SUNRISE COLONY TAX DEFERRED INVESTMENT & PROFIT SHARING PLAN

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2009

NOTE 1. DESCRIPTION OF PLAN

The following description of Sunrise Colony Tax Deferred Investment & Profit Sharing Plan (the Plan) provides only general information. Participants and other interest parties should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan was established effective January 1, 1985, and amended and restated as of March 6, 1995, for all employees of Sunrise Desert Partners and affiliates in the group of entities known collectively as Sunrise Company or its successor, Sunrise Colony Company (the Company, the Employer, or the Sponsor). On January 1, 1997, the Company adopted the Vanguard Prototype Plan. The plan was subsequently amended and restated effective January 1, 2006 to include Roth 401(k) provisions.

This Plan is administered by a committee (the Committee) consisting of three or more individuals selected by the Company.

Eligibility

An employee becomes eligible to be a participant in the Plan on the first "entry date" (January 1 or July 1) coinciding with or following the date the individual first completes three months of service.

Participation in the Plan will continue until separation from service, or as long as the participant is entitled to receive any benefits.

Contributions to the Plan and Participant Accounts

The Plan is a defined contribution profit sharing plan that enables eligible employees to contribute from 1% to 50% of their compensation. Contributions may be made either from employees' pretax salary or, beginning June 29, 2006, may be included in the employee's gross income under Roth 401(k) provisions, subject to Internal Revenue Service limitations and as defined in the Plan. Contributions of Roth elective deferrals will be maintained in a plan account separate from pre-tax contributions.

The Company may, at its discretion, decide to make matching contributions for any Plan year. If matching contributions are to be made for any Plan year, they shall be in addition to the contributions made by participants and shall be allocated to each participant based on the participants' contribution up to 100% of the participant's contribution up to and including 3% of compensation, and 50% of the participant's contribution from 4% to 5% of compensation, or such other percentage as specified by the Company and as defined in the Plan. In addition, matching contributions shall be paid to the trust fund each pay period and credited to the participants' Employer Contribution Account upon receipt of funds. The Employer Contribution Account is maintained for each active and inactive participant in the Plan. The Company did not elect to make matching contributions for the year ended December 31, 2009.

NOTE 1. DESCRIPTION OF PLAN (Continued)

Contributions to the Plan and Participant Accounts (Continued)

The Plan also allows for new employees to make rollover contributions. A rollover contribution to a Roth 401(k) account will be accepted only if it is a direct rollover from another Roth elective deferral account. The Plan additionally allows for employees who transfer between affiliates to transfer their balance to the affiliated plan.

Vesting

Participants' accounts are 100% vested (nonforfeitable) at all times.

Payment of Benefits

Upon attainment of normal retirement age (65 years), or as caused by death, termination of employment due to permanent disability, voluntary or involuntary termination due to causes other than those previously listed, or the termination of the Plan, the accounts of the participant, being 100% vested as mentioned, become payable to the participant by a lump-sum cash distribution. However, if the balance in the participant's account exceeds $5,000, then the distribution is not made until the participant becomes 70 ½ years of age, unless the participant consents in writing to an earlier distribution.

Participant Loans

Participants may borrow from their fund accounts a minimum of $1,000 up to a maximum equal to the lesser of $50,000 or 50% of their account balance, whichever is less. The loans are secured by the balance in the participant's account and bear interest at a rate equal to the prime rate of a bank that is selected by the Committee and has operations in the area of the Company, or equal to the prime rate as reported in *The Wall Street Journal* or other Committee-selected publication as in effect immediately prior to the month in which the loan is granted. The interest rates range from 3.25% to 7.75%. Principal and interest is paid ratably through payroll deductions. Administrative expenses for loans are paid directly from the respective participant's account.

NOTE 2. SUMMARY OF ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements of the Plan are prepared using the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America, primarily from data provided by the Trustee.

NOTE 2. SUMMARY OF ACCOUNTING POLICIES (Continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Trustee and management of the Plan to make estimates and assumptions that affect the amounts reported in the financial statements, accompanying notes and supplemental schedules. Actual results could differ from those estimates.

Concentration of Risk

The Plan has exposure to risk to the extent that its investments are subject to market fluctuations and interest rate fluctuations that may materially affect the value of the investment balances.

Valuation of Investments and Income Recognition

The Plan's investments are reported at fair value and participant loans are stated at the unpaid principal amount which approximates fair value. Accounting principles generally accepted in the United States of America require that for fully-benefit responsive contracts the amount representing the difference between the fair value and the contract value be presented on the face of the statement of net assets available for plan benefits. As of December 31, 2009 and 2008, the difference between the contract value and fair value of the Vanguard Retirement Savings Trust is immaterial to the financial statements and therefore no adjustments have been made to the accompanying statements of net assets available for plan benefits.

Investments are valued daily. Interest income is recorded on an accrual basis. Dividend income is recorded on the ex-dividend date.

Benefits Payable to Participants

Benefits are recorded when paid.

Administrative Expenses

Administrative expenses incident to the administration of the Plan, including fees of the administrative agent and independent public accountants not paid by the Company are paid by the Plan. The Company paid for the independent public accountants and all administrative and related fees. Most investment options have management fees that reduce the overall return on assets. The net appreciation of investments is reflected net of those fees.

NOTE 2. SUMMARY OF ACCOUNTING POLICIES (Continued)

Fair Value

The Company accounts for their financial instruments using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The fair value measurement hierarchy is based on three levels of inputs, of which the first two are considered observable and the last unobservable. The three levels of the fair value hierarchy are the following:

- Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are inactive; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 – Inputs to the valuation that are unobservable and significant to the fair value measurement.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Mutual Funds – This category consists of publicly traded funds of registered investment companies. The net asset value of the mutual fund's shares is quoted on the exchange where the fund is actively traded and therefore classified as Level 1 within the valuation hierarchy.

Common Collective Trust – The fair value of underlying assets other than wrap contracts, which included investments in a pool investment contracts that are issued by insurance companies and commercials banks and in contracts that are backed by bond trusts, is determined using a combination of discounted cash flows, pricing services, quotes from dealers, and amortized cost. The fair value of the wrap contracts is determined using a discounted cash flow model using current market level rates. The fair value of the common collective trust equals the total of the fair value of the underlying assets plus the total wrap contract value and is classified as Level 2 within the valuation hierarchy.

Participant Loans - Participant loans are valued at their unpaid principal amount which approximates fair value and are classified as Level 3 within the valuation hierarchy.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair Value (Continued)

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009:
