1. Description of Plan

The following brief description of the First American Bank Corporation Profit Sharing Plan (the "Plan") is provided for general information purposes only. The Plan was adopted January 1, 1985, and restated effective January 1, 2002. Participants and other interested parties should refer to the Plan document for a more complete description of the Plan's provisions.

General - The Plan is a contributory defined contribution plan The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The sponsor of the Plan is the First American Bank Corporation (the "Company").

Participating Employer - The participating employer in the Plan is First American Bank (the "Bank"). The Bank pays all expenses related to the Plan's administration.

Eligibility - Full-time employees are eligible to begin making elective deferrals beginning on the first day of the quarter after they have completed one month of service. Employees who do not decline participation upon eligibility are automatically enrolled in the Plan at a deferral rate of 2.5% of eligible compensation. Full-time employees are eligible for employer match and profit sharing contributions after completing one year of employment, with 1,000 hours of service. Employees must be at least 21 years of age to participate in the Plan.

Contributions - Each year, participants may contribute a portion of eligible pre-tax and post-tax annual compensation, as defined by the Plan, not to exceed Internal Revenue Service limits. The Company will contribute a matching contribution for each participant equal to 100% of each participant's elective deferrals up to 3% of the participant's compensation, plus 50% of each participant's elective deferrals in excess of 3% but not in excess of 5% of the participant's compensation. The Company may also contribute a discretionary profit sharing amount annually, which is determined by the Board of Directors. For the years ended December 31, 2009 and 2008, the Company elected to fund the employer matching contribution through the First American Bank Corporation Employee Stock Ownership Plan. The Company contributed $899,776 and $1,020,479 for the employer safe harbor matching contributions for the years ended December 31, 2009 and 2008, respectively. The Company elected not to make profit sharing contributions for the years ended December 31, 2009 and 2008.

Participant Accounts - Each participant's account is credited with the participant's contributions, and allocation of: (a) any Company profit sharing and matching contributions, and (b) investment earnings. Investment earnings are allocated based upon participant account balances. Any Company profit sharing contributions are allocated in accordance with the permitted disparity regulations (Social Security integration).

Forfeitures - Nonvested amounts forfeited by employees are used to reduce the Plan's administrative expenses.

1. Description of Plan, continued

Vesting - Participants are immediately vested in rollovers, trustee-to-trustee transfers, their elective deferrals and Company matching contributions, plus actual earnings thereon. Vesting in their profit sharing account is based on years of credited service. A participant shall have no vested interest in his or her accrued benefit until they have completed two years of vesting service, at which point the account will vest ratably through six years of service, until 100% vested.

Retirement, Death and Disability - A participant (or his beneficiary) is entitled to 100% of his account balance upon retirement, death or disability.

2. Summary of Significant Accounting Policies

Basis of Presentation - The accompanying financial statements have been prepared on an accrual basis, and present the net assets available for Plan benefits and changes in those assets.

Use of Estimates - The preparation of financial statements in accordance with generally accepted accounting principles requires the Plan Administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes in net assets, and the related disclosures, at the date of the financial statements and during the reporting periods. Accordingly, results could differ from those estimates.

Investments - Investments are stated at fair value. Purchases and sales of securities are recorded on the date the transaction order is executed. Dividend income is recorded on the ex-dividend date. Income from other investments is recorded as earned on an accrual basis. In accordance with the policy of stating investments at fair value, net unrealized appreciation or depreciation for the year is reported in the statement of changes in net assets available for plan benefits as a change in net assets.

Information Certified by Trustee - Information concerning Plan assets and changes in net assets available for Plan benefits has been certified as being complete and accurate.

3. Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

3. Fair Value Measurements, continued

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Collective investment funds and mutual funds are valued at the net asset value of shares held by the Plan at year end. The fair value of collective investment funds for which quoted market prices are not available are valued based on the fair market values of the individual assets held by each fund.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009 and 2008:

		Fair Value Measurements at Reporting Date Using

The Plan Administrator believes the Plan is designed and being operated in compliance with the applicable requirements of the IRC.

The First American Bank is the trustee as defined by the Plan. Trust department fees paid by the plan for services amounted to $2,668 and $78,944 for the years ended December 31, 2009 and 2008, respectively. These fees were reimbursed to the Plan by the Bank.
