Independent Auditors' Report

To the Board of Trustees of
Community Computer Service, Inc. 401(k) Plan

We were engaged to audit the accompanying statements of net assets available for benefits for Community Computer Service, Inc. 401(k) Plan as of and for the years ended December 31, 2009 and 2008, and the related statement of changes in net assets available for benefits for the year ended December 31, 2009 and the supplemental schedule of Schedule H, line 4i-Schedule of Assets Held (At End of Year) as of December 31, 2009. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 10, which was certified by ING Life Insurance and Annuity Company, the custodian of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedule. We have been informed by the Plan administrator that the custodian holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the custodian as of and for the years ended December 31, 2009 and 2008, that the information provided to the Plan administrator by the custodian is complete and accurate.

Because of the significance of the information we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the custodian, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Note 1 - Description of Plan

The following brief description of the Community Computer Service, Inc. 401(k) Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all full-time employees of Community Computer Service, Inc. (the Company). It is subject to the provisions of the Employees Retirement Income Security Act of 1974 (ERISA).

Contributions

Each year, participants may contribute up to the annual dollar limit set by law of pretax annual compensation, as defined in the Plan. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers twenty investment options for participants, including mutual funds and insurance investment contracts. The Company contributed 25% of the first 7% of base compensation that a participant contributes to the Plan with an elective to match up to 100% of contributions through the end of 2008. As of January 1, 2009, the Company contributed 100% of the first 7% of base compensation that a participant contributes to the Plan. The matching Company contribution is invested based on the participants' investment allocations.

Participants' Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's contribution and, (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon as well as Company's contributions.

Participant Loans

Participants may borrow from their fund accounts a minimum of $500 up to a maximum equal to the lesser of $50,000 or 50% of their account balance. The loans are secured by the balance in the participant's account and bear interest at prime plus 1%. Principal and interest is paid ratably through weekly payroll deductions.

Note 1 - Description of Plan (Continued)

Payment of Benefits

On termination of service due to death, disability or retirement, a participant will receive a lump-sum amount equal to the value of the participant's vested interest in his or her account. For termination of service due to other reasons, a participant will receive the value of the vested interest in his or her account as a lump-sum distribution.

Forfeited Accounts

At December 31, 2009 and 2008, forfeited nonvested accounts totaled $102,989 and $92,547, respectively. Based on the plan document forfeited accounts can be used to reduce future employer contributions and/or Plan expenses. Management has reviewed the forfeiture balance as of December 31, 2009 and will partially use it to pay for plan expenses and reduce employer contributions during the plan year ending December 31, 2010 and future years.

Investment Options

Participants may direct that contributions be invested in any one, or combination, of the following investment options:

A. Pooled Separate Accounts

1. EuroPacific Growth Fund - This fund invests primarily in common stocks of issuers in Europe and the Pacific Basin that have a potential for growth.

2. ING Oppenheimer Global Portfolio - This fund seeks a high level of current income principally derived from interest on debt securities. The portfolio invests mainly in debt securities in foreign government and companies, U.S. Government securities, and lower-grade high-yield securities of U.S. and foreign companies.

3. ING VP International Value Portfolio - This fund seeks long-term capital appreciation. The fund normally invests at least 65% of net assets in equity securities of issuers located in a number of different countries outside of the U.S. The fund may invest up to 35% of assets in securities of U.S. issuers, including investment grade government and corporate debt securities. It may invest in derivative instruments including futures, options and swaps. The fund also may lend portfolio securities on a short-term or long-term basis, up to 33 1/3% of assets.

Note 2 - Summary of Significant Accounting Policies

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

As described in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 962, investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. As required, the statements of net assets available for benefits present the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The statements of changes in net assets available for benefits are prepared on a contract value basis.

New Accounting Pronouncements

In June 2009, FASB established the FASB Accounting Standards Codification (Codification) as the sole source of authoritative accounting principles generally accepted in the United States of America. As a result, all references to accounting literature will conform to the appropriate reference within the Codification. The adoption of the Codification, which became effective during September 2009, did not have any impact on the Plan's financial statements.

During 2009, the Plan adopted FASB guidance related to using net asset value as a practical expedient in estimation of certain alternative investments. This guidance had no effect on the financial statement, but enhanced disclosure with respect to these investments.

The FASB issued an interpretation regarding accounting for uncertainty in income taxes. This interpretation clarifies the accounting for uncertainty in income taxes recognized in the Plan's financial statements and is effective for fiscal years beginning after December 15, 2008. The Plan adopted the provisions of the pronouncement and the adoption did not impact the amounts reported in the Plan's financial statements.

In June 2009, the FASB issued a new accounting standard related to subsequent events. Effective December 31, 2009, the plan adopted the standard which provides guidance on accounting for and disclosure of events that occur after the statement of net assets available for benefits date, but before financial statements are issued or are available to be issued. The adoption of this standard did not have a material effect on the Plan's financial statements.

Note 2 - Summary of Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosures of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Investment Fees

Net investment returns reflect certain fees paid by the various investment funds to their affiliated investment advisors, transfer agents, and others as further described in each fund prospectus or other published documents. These fees are deducted prior to allocation of the Plan's investment earnings activity and thus not separately identifiable as an expense.

Payment of Benefits

Benefits are recorded when paid.

Plan Expenses

The Plan document states that at the discretion of the Plan's sponsor, any administrative expenses can be paid by either the Plan or the Plan's sponsor. For the years ended December 31, 2009 and 2008, administrative expenses of $16,314 and $19,867, respectively, were paid by the Plan sponsor.

Subsequent Events

The Plan has evaluated subsequent events through August 11, 2010 which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and market-corroborated inputs which are derived principally from or corroborated by observable market data.

Level 3: Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for investments measured at fair value. There have been no significant changes in the methodologies used during the years ended December 31, 2009 and 2008:

Level 2 Fair Value Measurements

Investments in pooled separate accounts are comprised of participation units in such pooled separate accounts that are not publicly traded. The underlying assets in these funds (asset allocation funds, equity funds, index funds, fixed income funds, money market funds) are valued where applicable on exchanges and price quotes for the assets held by these funds are readily available. Pooled separate accounts are valued at their net asset value (NAV) on the last day of the calendar year of the period.

Level 3 Fair Value Measurements

The investment contract and participant loans are not actively traded and significant other observable inputs are not available. The fair value of the investment contract is valued by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer. Participant loans are valued at amortized cost, which approximates fair value.

Note 3 - Fair Value Measurements (Continued)

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain investments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value:

			Fair Value Measurement Using:		
		Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2009:					
Pooled separate accounts	**	$11,544,196	$ -	$11,544,196	$ -
Investment contract	*	1,348,621	-	-	1,348,621
Participant loans		170,998	-	-	170,998
		$13,063,815	$ -	$11,544,196	$1,519,619
December 31, 2008:					
Pooled separate accounts		$7,650,650	$ -	$7,650,650	$ -
Investment contract	*	1,232,190	-	-	1,232,190
Participant loans		133,117	-	-	133,117
		$9,015,957	$ -	$7,650,650	$1,365,307

* Amount represents the fair value. As of December 31, 2009 and 2008, the contract value amounted to $1,348,346 and $1,150,440, respectively.

** This category includes investments whose fair values have been estimated using the fair value of the investments. There are no unfunded commitments or significant redemption notice periods.

Note 3 - Fair Value Measurements (Continued)

The following table sets forth a summary of the changes in the fair value of the Plan's Level 3 investments:

	Participant Loans	Investment Contract
Balance - January 1, 2008	$124,170	$ 889,262
Purchases, sales, issuances, and settlements (net)	8,947	124,796
Unrealized gain relating to investments held at reporting date	-	145,286
Transfers in or out of Level 3, net	-	72,846
Balance - December 31, 2008	133,117	1,232,190
Purchases, sales, issuances, and settlements (net)	37,881	178,820
Unrealized loss relating to investments held at reporting date	-	(42,057)
Transfers in or out of Level 3, net	-	(20,332)
Balance - December 31, 2009	$170,998	$1,348,621

The unrealized gains (losses) on the investment contract includes an amount representing the change in the fair value of fully benefit-responsive investment contracts. As discussed in Note 2, the activity for fully-benefit responsive investment contracts is recorded on a contract value basis and thus, the amounts above are not reflected the statement of changes in net assets available for benefits. All other realized and unrealized gains and losses for the years ended December 31, 2009 and 2008 are included in net appreciation (depreciation) in fair value of investments on the statements of changes in net assets available for benefits

Note 4 - Investments

The following table presents investments at December 31, 2009 and 2008 that represent 5% or more of the Plan's net assets. All investments are participant directed.

	2009	2008
ING Fidelity VIP Equity Income	$1,795,250	$1,297,789
ING Fidelity VIP Contrafund	2,621,952	1,835,830
T. Rowe Price Value Fund	722,261	445,260 *
ING Aeltus Money Mkt Fd	718,727	2,103 *

ING Fixed Account, at fair value	1,348,621	1,232,190

* Does not represent five percent or more of the Plan's net assets available for benefits for respective year, but is shown for comparative purposes.

Note 4 - Investments (Continued)

The net appreciation (depreciation) in fair value of investments (including gains and losses on investments bought and sold, as well as held during the year) for each significant class of investment consists of the following for the years ended December 31:

	2009	2008
Pooled separate accounts	$2,505,938	($4,504,564)

Note 5 - Investment Contract with Insurance Company

The Plan has a benefit-responsive investment contract with ING Life Insurance and Annuity Company (ING). ING maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for Plan withdrawals and administrative expenses charged by ING. The guaranteed investment contract issuer is contractually obligated to repay the principal and specified interest rate that is guaranteed to the Plan. As described in Note 2, because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by ING, represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on an agreed-upon formula with the issuer, but cannot be less than 3 percent.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (1) amendments to the Plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity was provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that causes a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption form federal income taxes or any required prohibited transaction exemption under ERISA. The Plan administrator does not believe that the occurrence of any such value event, which would limit the Plan's ability to transact at contract value with Plan participants, is probable.

The guaranteed investment contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

	2009		2008	
Average yields:				
Based on actual earnings	3.15	%	3.65	%
Based on interest rate credited to participants	3.15	%	3.65	%

Note 6 - Related Party Transactions

Certain Plan investments are managed by ING Life Insurance and Annuity Company. ING Life Insurance and Annuity Company is the custodian as defined by the Plan and, therefore, these transactions qualify as party-in-interest. Fees paid by the Plan for the investment management services are based on a percentage of the account value and were netted against earnings for the years ended December 31, 2009 and 2008. All other fees were paid for by the Plan sponsor.

In addition, the Plan issues loans to participants, which are secured by the balances in the participants' accounts. Therefore, related transactions qualify as party-in-interest transactions. All other transactions which may be considered parties-in-interest transactions relate to normal plan management and administrative services, and the related payment of fees.

Note 7 - Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in their accounts.

Note 8 - Tax Status

The Plan obtained its latest determination letter on January 26, 1993, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. Although the Plan has been amended since receiving the determination letter, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Internal Revenue Code.

The Plan is exempt from federal income taxes under the Internal Revenue Code. The Plan is not subject to examination by U. S. federal or state taxing authorities for the years prior to 2005.

Note 9 - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Note 10 - Information Prepared and Certification by Custodian

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the custodian has certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate.

	2009	2008
Pooled separate accounts	$11,544,196	$7,650,650

Independent Auditors' Report

To the Board of Trustees of
Community Computer Service, Inc. 401(k) Plan

We were engaged to audit the accompanying statements of net assets available for benefits for Community Computer Service, Inc. 401(k) Plan as of and for the years ended December 31, 2009 and 2008, and the related statement of changes in net assets available for benefits for the year ended December 31, 2009 and the supplemental schedule of Schedule H, line 4i-Schedule of Assets Held (At End of Year) as of December 31, 2009. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 10, which was certified by ING Life Insurance and Annuity Company, the custodian of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedule. We have been informed by the Plan administrator that the custodian holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the custodian as of and for the years ended December 31, 2009 and 2008, that the information provided to the Plan administrator by the custodian is complete and accurate.

Because of the significance of the information we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the custodian, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Note 1 - Description of Plan

The following brief description of the Community Computer Service, Inc. 401(k) Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all full-time employees of Community Computer Service, Inc. (the Company). It is subject to the provisions of the Employees Retirement Income Security Act of 1974 (ERISA).

Contributions

Each year, participants may contribute up to the annual dollar limit set by law of pretax annual compensation, as defined in the Plan. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers twenty investment options for participants, including mutual funds and insurance investment contracts. The Company contributed 25% of the first 7% of base compensation that a participant contributes to the Plan with an elective to match up to 100% of contributions through the end of 2008. As of January 1, 2009, the Company contributed 100% of the first 7% of base compensation that a participant contributes to the Plan. The matching Company contribution is invested based on the participants' investment allocations.

Participants' Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's contribution and, (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon as well as Company's contributions.

Participant Loans

Participants may borrow from their fund accounts a minimum of $500 up to a maximum equal to the lesser of $50,000 or 50% of their account balance. The loans are secured by the balance in the participant's account and bear interest at prime plus 1%. Principal and interest is paid ratably through weekly payroll deductions.

Note 1 - Description of Plan (Continued)

Payment of Benefits

On termination of service due to death, disability or retirement, a participant will receive a lump-sum amount equal to the value of the participant's vested interest in his or her account. For termination of service due to other reasons, a participant will receive the value of the vested interest in his or her account as a lump-sum distribution.

Forfeited Accounts

At December 31, 2009 and 2008, forfeited nonvested accounts totaled $102,989 and $92,547, respectively. Based on the plan document forfeited accounts can be used to reduce future employer contributions and/or Plan expenses. Management has reviewed the forfeiture balance as of December 31, 2009 and will partially use it to pay for plan expenses and reduce employer contributions during the plan year ending December 31, 2010 and future years.

Investment Options

Participants may direct that contributions be invested in any one, or combination, of the following investment options:

A. Pooled Separate Accounts

1. EuroPacific Growth Fund - This fund invests primarily in common stocks of issuers in Europe and the Pacific Basin that have a potential for growth.

2. ING Oppenheimer Global Portfolio - This fund seeks a high level of current income principally derived from interest on debt securities. The portfolio invests mainly in debt securities in foreign government and companies, U.S. Government securities, and lower-grade high-yield securities of U.S. and foreign companies.

3. ING VP International Value Portfolio - This fund seeks long-term capital appreciation. The fund normally invests at least 65% of net assets in equity securities of issuers located in a number of different countries outside of the U.S. The fund may invest up to 35% of assets in securities of U.S. issuers, including investment grade government and corporate debt securities. It may invest in derivative instruments including futures, options and swaps. The fund also may lend portfolio securities on a short-term or long-term basis, up to 33 1/3% of assets.

These securities include U.S. Government securities, corporate debt securities, repurchase agreements, commercial paper, asset-backed securities, mortgage-related securities and certain obligations of U.S. and foreign banks. The fund may lend portfolio securities on a short-term or long-term basis, up to 33 1/3% of its total assets.

B. Insurance Company General Account. ING Fixed Account - This fund seeks to preserve the principal amount of your contribution while maintaining a rate of return comparable to other fixed income instruments. The fund invests in investment contracts issued an insurance company. The insurance company may impose limitations on the ability to transfer funds out of this investment option.

Note 2 - Summary of Significant Accounting Policies

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

As described in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 962, investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. As required, the statements of net assets available for benefits present the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The statements of changes in net assets available for benefits are prepared on a contract value basis.

New Accounting Pronouncements

In June 2009, FASB established the FASB Accounting Standards Codification (Codification) as the sole source of authoritative accounting principles generally accepted in the United States of America. As a result, all references to accounting literature will conform to the appropriate reference within the Codification. The adoption of the Codification, which became effective during September 2009, did not have any impact on the Plan's financial statements.

During 2009, the Plan adopted FASB guidance related to using net asset value as a practical expedient in estimation of certain alternative investments. This guidance had no effect on the financial statement, but enhanced disclosure with respect to these investments.

The FASB issued an interpretation regarding accounting for uncertainty in income taxes. This interpretation clarifies the accounting for uncertainty in income taxes recognized in the Plan's financial statements and is effective for fiscal years beginning after December 15, 2008. The Plan adopted the provisions of the pronouncement and the adoption did not impact the amounts reported in the Plan's financial statements.

In June 2009, the FASB issued a new accounting standard related to subsequent events. Effective December 31, 2009, the plan adopted the standard which provides guidance on accounting for and disclosure of events that occur after the statement of net assets available for benefits date, but before financial statements are issued or are available to be issued. The adoption of this standard did not have a material effect on the Plan's financial statements.

Note 2 - Summary of Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosures of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Investment Fees

Net investment returns reflect certain fees paid by the various investment funds to their affiliated investment advisors, transfer agents, and others as further described in each fund prospectus or other published documents. These fees are deducted prior to allocation of the Plan's investment earnings activity and thus not separately identifiable as an expense.

Payment of Benefits

Benefits are recorded when paid.

Plan Expenses

The Plan document states that at the discretion of the Plan's sponsor, any administrative expenses can be paid by either the Plan or the Plan's sponsor. For the years ended December 31, 2009 and 2008, administrative expenses of $16,314 and $19,867, respectively, were paid by the Plan sponsor.

Subsequent Events

The Plan has evaluated subsequent events through August 11, 2010 which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and market-corroborated inputs which are derived principally from or corroborated by observable market data.

Level 3: Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for investments measured at fair value. There have been no significant changes in the methodologies used during the years ended December 31, 2009 and 2008:

Level 2 Fair Value Measurements

Investments in pooled separate accounts are comprised of participation units in such pooled separate accounts that are not publicly traded. The underlying assets in these funds (asset allocation funds, equity funds, index funds, fixed income funds, money market funds) are valued where applicable on exchanges and price quotes for the assets held by these funds are readily available. Pooled separate accounts are valued at their net asset value (NAV) on the last day of the calendar year of the period.

Level 3 Fair Value Measurements

The investment contract and participant loans are not actively traded and significant other observable inputs are not available. The fair value of the investment contract is valued by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer. Participant loans are valued at amortized cost, which approximates fair value.

Note 3 - Fair Value Measurements (Continued)

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain investments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value:

			Fair Value Measurement Using:		
		Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2009:					
Pooled separate accounts	**	$11,544,196	$ -	$11,544,196	$ -
Investment contract	*	1,348,621	-	-	1,348,621
Participant loans		170,998	-	-	170,998
		$13,063,815	$ -	$11,544,196	$1,519,619
December 31, 2008:					
Pooled separate accounts		$7,650,650	$ -	$7,650,650	$ -
Investment contract	*	1,232,190	-	-	1,232,190
Participant loans		133,117	-	-	133,117
		$9,015,957	$ -	$7,650,650	$1,365,307

* Amount represents the fair value. As of December 31, 2009 and 2008, the contract value amounted to $1,348,346 and $1,150,440, respectively.

** This category includes investments whose fair values have been estimated using the fair value of the investments. There are no unfunded commitments or significant redemption notice periods.

Note 3 - Fair Value Measurements (Continued)

The following table sets forth a summary of the changes in the fair value of the Plan's Level 3 investments:

	Participant Loans	Investment Contract
Balance - January 1, 2008	$124,170	$ 889,262
Purchases, sales, issuances, and settlements (net)	8,947	124,796
Unrealized gain relating to investments held at reporting date	-	145,286
Transfers in or out of Level 3, net	-	72,846
Balance - December 31, 2008	133,117	1,232,190
Purchases, sales, issuances, and settlements (net)	37,881	178,820
Unrealized loss relating to investments held at reporting date	-	(42,057)
Transfers in or out of Level 3, net	-	(20,332)
Balance - December 31, 2009	$170,998	$1,348,621

The unrealized gains (losses) on the investment contract includes an amount representing the change in the fair value of fully benefit-responsive investment contracts. As discussed in Note 2, the activity for fully-benefit responsive investment contracts is recorded on a contract value basis and thus, the amounts above are not reflected the statement of changes in net assets available for benefits. All other realized and unrealized gains and losses for the years ended December 31, 2009 and 2008 are included in net appreciation (depreciation) in fair value of investments on the statements of changes in net assets available for benefits

Note 4 - Investments

The following table presents investments at December 31, 2009 and 2008 that represent 5% or more of the Plan's net assets. All investments are participant directed.

	2009	2008
ING Fidelity VIP Equity Income	$1,795,250	$1,297,789
ING Fidelity VIP Contrafund	2,621,952	1,835,830

ING VP Money Market Portfolio	12,639 *	584,912
ING Fixed Account, at fair value	1,348,621	1,232,190

* Does not represent five percent or more of the Plan's net assets available for benefits for respective year, but is shown for comparative purposes.

Note 4 - Investments (Continued)

The net appreciation (depreciation) in fair value of investments (including gains and losses on investments bought and sold, as well as held during the year) for each significant class of investment consists of the following for the years ended December 31:

	2009	2008
Pooled separate accounts	$2,505,938	($4,504,564)

Note 5 - Investment Contract with Insurance Company

The Plan has a benefit-responsive investment contract with ING Life Insurance and Annuity Company (ING). ING maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for Plan withdrawals and administrative expenses charged by ING. The guaranteed investment contract issuer is contractually obligated to repay the principal and specified interest rate that is guaranteed to the Plan. As described in Note 2, because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by ING, represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on an agreed-upon formula with the issuer, but cannot be less than 3 percent.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (1) amendments to the Plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity was provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that causes a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption form federal income taxes or any required prohibited transaction exemption under ERISA. The Plan administrator does not believe that the occurrence of any such value event, which would limit the Plan's ability to transact at contract value with Plan participants, is probable.

The guaranteed investment contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

	2009		2008	
Average yields:				
Based on actual earnings	3.15	%	3.65	%
Based on interest rate credited to participants	3.15	%	3.65	%

Note 6 - Related Party Transactions

Certain Plan investments are managed by ING Life Insurance and Annuity Company. ING Life Insurance and Annuity Company is the custodian as defined by the Plan and, therefore, these transactions qualify as party-in-interest. Fees paid by the Plan for the investment management services are based on a percentage of the account value and were netted against earnings for the years ended December 31, 2009 and 2008. All other fees were paid for by the Plan sponsor.

In addition, the Plan issues loans to participants, which are secured by the balances in the participants' accounts. Therefore, related transactions qualify as party-in-interest transactions. All other transactions which may be considered parties-in-interest transactions relate to normal plan management and administrative services, and the related payment of fees.

Note 7 - Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in their accounts.

Note 8 - Tax Status

The Plan obtained its latest determination letter on January 26, 1993, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. Although the Plan has been amended since receiving the determination letter, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Internal Revenue Code.

The Plan is exempt from federal income taxes under the Internal Revenue Code. The Plan is not subject to examination by U. S. federal or state taxing authorities for the years prior to 2005.

Note 9 - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Note 10 - Information Prepared and Certification by Custodian

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the custodian has certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate.

	2009	2008
Pooled separate accounts	$11,544,196	$7,650,650
Investment contract with insurance company:
