PROFIT SHARING AND 401(k) PLAN

Notes to Financial Statements
December 31, 2009 and 2008

Note 1 - Summary of significant accounting policies

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for plan benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statement of Net Assets Available for Plan Benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Plan Benefits is prepared on a contract value basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

Investments and participant loans are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 13 for discussion of fair value measurement.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded when paid.

Operating Expenses

The Plan's administrative expenses are paid by either the Plan or Lawry's Restaurants Inc. ("the Company"), as provided by the Plan document.

Note 1 - Summary of significant accounting policies (continued)

Subsequent Events

The Plan has evaluated subsequent events through October 6, 2010, the date the financial statements were available to be issued and has determined that, except for disclosures in Note 14, there are no subsequent events that would require recognition or disclosure in the financial statements.

Note 2 - Description of the Plan

The following description of the Plan provides only general information. The Plan is a defined contribution plan.

Effective January 1, 2007, eligibility for participation in the Plan requires six months of service. Employees are eligible to participate on the first day of the month that is or next follows the date employees satisfy the applicable eligibility requirements. All coworkers except those covered by a collective bargaining agreement, are eligible to participate in the Plan.

The Plan allows participants to elect to defer a portion of their compensation, as defined by the Plan, on their behalf in lieu of receiving such amount as compensation. For the year ended December 31, 2009, the maximum amount of salary deferral is $16,500. For participants age fifty or older, an additional catch-up provision of $5,500 was allowed under the Plan during 2009.

Each participant's account is allocated a proportionate share of the sum of Lawry's Restaurants, Inc.'s discretionary matching contribution and the matching contribution is based on the amounts deferred by the participants. For 2009 and 2008, the Company made a discretionary matching contribution of 15 cents on each dollar deferred by the participants or 2.5%, of gross wages, up to a maximum of $1,000, and $550, respectively. The actual matching percentage of any contribution is traditionally determined at the Company's January Board meeting subsequent to each Plan year.

Effective January 1, 2005, the Plan was amended to eliminate the profit sharing provision. Profit sharing contributions will no longer be made to the Plan. Participants' profit sharing accounts however, will continue to receive allocation of their investments' earnings or losses.

All investment elections are self directed by the participants.

Each participant's account is credited with the participant's contributions, employer contributions, an allocation of earnings or losses from the participant's self-directed investments, and charged with an allocation of administrative expenses. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Note 2 - Description of the Plan (continued)

Participants are immediately vested in their contributions plus actual earnings thereon. The Company's contribution portion of their accounts is based on years of continuous service. Vesting in Company related contributions and earnings are as follows:

Years of Continuous Service	Vested Percentage
1	20 %
2	40 %
3	60 %
4	80 %
5	100 %

Employees who terminate their employment with the Company for reasons other than death, disability or retirement shall receive the vested portion of the Company's contribution portion of their accounts. In addition, participants shall receive their total elective salary deferral account balance, which is fully vested and nonforfeitable at all times.

Upon incurring a disability, upon retirement or upon death the participant's shares in the Plan would become fully vested and distributed to them. Disability is defined as a participant's total and permanent disability resulting from personal injury or sickness and satisfies the definition of "disability" under the employer's long-term disability plan. Retirement is defined as the date when participants retire after attaining their 65th birthday or retire after attaining their 60th birthday and having completed at least five years of continuous service.

Benefit payments may be made in a lump sum or, in equal or nearly equal installments over a period of not more than the joint life expectancy of the participant and his spouse, in partial withdrawals, or a joint and 100% survivor annuity.

Forfeitures during the year are applied first to reduce expenses related to the administration of the plan and then to reduce any employer contributions.

Participants may borrow from their salary deferral fund accounts. Loan transactions are treated as a transfer to (from) the investment fund from (to) the participant note fund. The loans are secured by the balance in the participant's account and bear interest at the prevailing rate of 5.25 -10.25%. Principal and interest is paid ratably through biweekly payroll deductions.

Note 3 - Plan termination

Although the Company has not expressed an interest in terminating the Plan agreement, it may do so at any time. Upon termination of the Plan, the participants' shares in the Plan would become fully vested and distributed to them.

Note 4 - Obligation for employer contribution

The Company may make matching contributions based on the amounts deferred by the participants.

Note 5 - Administration of plan assets

The Plan's assets are held by the trustee and custodian of the Plan. Certain administrative functions are performed by officers or employees of the Company or its subsidiaries. No such officer or employee receives compensation from the Plan.

Note 6 - Investments

In the Statement of Net Assets available for Plan Benefits, the Plan has aggregated certain participant investment options funds with similar investment objectives. The schedule of investments, including aggregated funds and assets exceeding 5% of plan investments are as follows:

Note 7 - Investment contract with insurance company

In 1998, the Plan entered into a fully benefit-responsive investment contract with Massachusetts Mutual Life Insurance Company (Mass Mutual). Mass Mutual maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for Plan withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the plan.

As described in Note 1, because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for plan benefits attributable to the guaranteed investment contract. The guaranteed investment contract is presented on the face of the statements of net assets available for plan benefits at fair value with an adjustment to contract value in arriving at net assets available for plan benefits. Contract value, as reported to the plan by Mass Mutual, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The fair value of the investment contract at December 31, 2009 and 2008 was $5,088,285 and $4,204,681, respectively. The crediting interest rate is based on a formula agreed upon with the issuer, but it may not be less than three percent. Such interest rates are reviewed on a semi annually basis for resetting.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include but may not be limited to the following: (1) temporary absence; (2) change in position or other occurrence qualifying as a temporary break in service under the Plan; (3) transfer or other change of position resulting in employment by an entity controlling, controlled by, or under the other common control with the employer; or, (4) cessation of an employment relationship resulting from a reorganization, merger, layoff or the sale or discontinuance of all or any part of the Plan sponsor's business; (5) removal from the plan of one or more groups or classifications of participants; (6) partial or complete plan termination; or (7) plan disqualification. The Plan administrator does not believe that any events that would limit the Plan's ability to transact at contract value with Plan participants are probable of occurring.

The guaranteed investment contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

	2009	2008
Average yields:		
Based on actual earnings	2.93%	3.40%
Based on interest rate credited to participants	2.93%	3.40%

Note 8 - Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for plan benefits according to the financial statements to the Form 5500:

Note 9 - Federal income taxes

The Company adopted a prototype plan on January 1, 2002, which received a favorable opinion letter from the Internal Revenue Service ("IRS") which stated that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has subsequently been amended since the adoption. However, the plan administrator and the plan's tax counsel believe that the plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

Note 10 – Trustee and custodian certifications

All investments and related investment income and appreciation (depreciation) of investment assets for 2009 and 2008 have been included in the accompanying financial statements based upon reliance on the certifications of the trustee and custodian as to their accuracy and completeness.

Note 11 - Party-in-interest transactions

Certain Plan investments are units of participation in pooled separate accounts managed by a division of Mass Mutual. Mass Mutual is the record keeper. State Street Bank and Trust Company is the trustee of the Plan. Both Mass Mutual and State Street Bank and Trust Company are the custodians of the plans assets. 401(k) Advisors is the Plan consultant. PKF performs the annual audit of the Plan's financial statements. These transactions qualify as party-in-interest transactions.

Note 12 - Risk and uncertainties

The Plan invests in various types of investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statement of net assets available for plan benefits.

The Plan held substantially all of its assets with one institution. In the event of the institution's failure, the Plan could be subject to losses in its funds to the extent of dollars invested in the funds.

Note 13 - Fair value measurements

In accordance with the authoritative guidance on fair value measurements and disclosures, in conformity with accounting principles generally accepted in the United States of America, the Plan discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and lowest priority to unobservable inputs (level 3 measurements).

The fair value hierarchy is categorized into three levels based on the inputs as follows:

- Level 1: Valuations based on unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

- Level 2: Valuations based on quoted prices in markets that are not active or quoted prices for similar assets or liabilities in active market or for which all significant inputs are observable, either directly or indirectly, or inputs that are derived principally from or corroborated by observable market data by correlation or other means. The fair value of pooled separate accounts is determined using Level 2 inputs.

- Level 3: Valuations based on inputs that are unobservable in the market and significant to the overall fair value measurement. The fair value of guaranteed investment contract and participant loans is determined using Level 3 inputs.

Note 13 - Fair value measurements (continued)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets for by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009 and 2008:

Assets at Fair Value as of December 31, 2009

	Level 1	Level 2	Level 3	Total
