Note A - Description of Plan

The following description of the All Tile, Inc. Employees' Profit Sharing Plan and Trust (Plan) provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

1. General

   The Plan is a discretionary contribution plan with compensation deferral features covering all employees of All Tile, Inc. (Company) who have completed three months of service and are age eighteen or older. These employees may contribute pre-tax contributions to the Plan and are eligible for the discretionary matching contributions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). For purposes of being eligible to receive profit sharing contributions, the minimum age requirement is age eighteen and the minimum service requirement is one year of service.

2. Contributions

   Participants may contribute up to 100 percent of pre-tax annual compensation (maximum limit of $16,500 in 2009), as defined in the Plan. Participants who have attained age 50 before the end of the plan year are eligible to make catch-up contributions (maximum limit of $5,000 in 2009). Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans.

   The Company may, at its sole discretion, make matching contributions each pay period in an amount equal to 25% of the first three percent of compensation deferrals the employee makes to the Plan, if the employee is employed on the last day of such pay period and is eligible to participate in the Plan.

   The Company may also make a discretionary profit sharing contribution to the Plan at year-end on behalf of all eligible employees. To be eligible an employee must be an active participant on the last day of the plan year.

3. Participant Accounts and Administration

   Under the terms of the plan agreement, the trustee invests participant contributions and employer matching contributions in several investment funds as specified by the participants. Employer discretionary profit sharing contributions are invested in several investments as specified by the Plan sponsor. Each participant's account is credited with the participant's contribution and allocation of the Company's matching and discretionary contributions and plan earnings. Allocations are based on participant earnings or account balances, as defined. Forfeitures may be used to pay administrative expenses of the Plan and to reduce future employer contributions. The plan administrator authorizes all withdrawals of Plan assets and is responsible for the general administration of the Plan and compliance with its provisions. The costs of administering the Plan are borne by the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested accounts.

Note A - Description of Plan (Cont'd)

4. Vesting
   Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's matching and discretionary contribution portion of their accounts plus actual earnings thereon is based on years of continuous service, as defined. A participant is 100% vested in the matching and discretionary contributions after five years of credited service.

5. Forfeited Accounts
   At December 31, 2009, forfeited nonvested accounts totaled $1,788. This amount will be used to reduce future employer contributions. Also, in 2009, employer contributions were reduced by $1,788 from forfeited nonvested accounts.

6. Payment of Benefits
   On termination of service, if the amount exceeds $1,000, a participant may elect to receive one of the following: a lump-sum amount equal to his or her vested account or annual installments over a period which does not exceed the life of the participant or the designated beneficiary. If the amount is $1,000 or less the Plan will make a lump sum distribution.

7. Participants Loans
   Participants may borrow from their fund accounts a minimum of $1,000 up to a maximum equal to the lesser of $50,000 or 50 percent of their vested account balance. Loan terms range from 1 - 5 years or longer for the purchase of a primary residence. The loans bear interest at a rate of 1% above prime rate.

8. Termination
   The Company intends to continue the Plan indefinitely but reserves the right to amend or terminate it. Upon termination, all account balances are nonforfeitable and would be distributed to participants within a reasonable time following termination.

Note B - Summary of Accounting Policies

Basis of Accounting
The Plan's financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition
Investments are reported at fair value except for the life insurance policies which are valued at cash surrender value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note C for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest and dividend income are recorded on the accrual basis. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Note B - Summary of Accounting Policies (Cont'd)

Payment of Benefits
Benefits are recorded when paid.

Operating Expenses
All expenses of maintaining the plan are paid by the Plan.

Federal Income Taxes
The plan obtained its latest determination letter in July 2010, in which the Internal Revenue Service (IRS) stated that the plan is in compliance with the applicable requirements of the Internal Revenue Code.

Estimates and Assumptions
The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Subsequent Events
The Plan has evaluated subsequent events through September 28, 2010, the date which the financial statements were available to be issued.

Note C - Fair Value Measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Note C - Fair Value Measurements (Cont'd)

Level 2 inputs to the valuation methodology include the following:

Quoted prices for similar assets or liabities in active markets.

Quoted prices for identical or similar assets or liabilities in inactive markets.

Inputs other than quoted prices that are observable for the asset or liability.

Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used at December 31, 2009 and 2008.

Mutual funds: Valued at the net asset value of the shares held by the Plan at year end.

Common stock: Valued at the closing price reported in the active market in which the individual security is traded.

Corporate bonds: Valued at the closing price reported in the active market in which the bond is traded.

U.S. government securities: Valued at the closing price reported in the active market in which the individual security is traded.

Participant loans: Valued at amortized cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market partipicants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
