Note 1 - Description of Plan

The following description of the Harris Farms Savings and Investment Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

Establishment of Plan

The Plan is a defined contribution plan sponsored by Harris Farms, Inc. (the "Sponsor"). The Plan was established on June 21, 1973, and on July 1, 1993, it was amended and restated to be a profit-sharing plan within the guidelines of Section 401(a)(27) of the Internal Revenue Code of 1986, as amended. The Plan uses the accrual basis of accounting.

Charles Schwab Trust Company is the Plan's Trustee (the "Trustee"). The Trustee and its affiliates hold the Plan's investment assets, execute investment transactions and provide services relating to the processing of distributions and loans to participants, valuation and maintenance of account balance and allocation of the Plan's earnings, losses and contributions.

Contributions

Plan contributions consist of four components: (1) voluntary employee contributions, from 1 percent to 100 percent (the maximum percent was amended from 15 percent to 100 percent on November 1, 2006) of a participant's pretax compensation up to an annual dollar limitation, (2) voluntary employee contributions from a participant's post-tax compensation and at the same percentages as from pretax compensation up to an annual dollar limitation (amended on September 1, 2006), (3) discretionary employer matching contributions (amended from 40 percent to 50 percent on August 1, 1998) based on employee voluntary contributions, but not to exceed 6 percent of the participant's compensation, (4) additional discretionary employer contributions, as determined by the Sponsor's board of directors and allocated to individual participant accounts based on a formula in accordance with the provisions of the Plan, and (5) rollover contributions representing qualifying lump-sum distributions received by a participant's account that are subject to an annual limitation described in the Plan agreement.

Eligibility and Vesting

Prior to July 1, 2006 employees were eligible for participation in the Plan on January 1 or July 1 after one year of qualifying service as defined in the Plan agreement. Effective July 1, 2006, service eligibility requirements were changed from one year of service to none and entry dates were changed from January 1 and July 1 to the date on which the employee meets the eligibility requirements.

(Continued)

Note 1 - Description of Plan (Continued)

Participants are immediately vested in their voluntary contributions and rollover contributions. Vesting of employer contributions is based on years of service according to the following table:

Years of Service	Vesting % Discretionary Contributions Prior to January 1, 2007	Vesting % Discretionary Contributions January 1, 2007 and After	Vesting % Matching Contributions Prior to January 1, 2002	Vesting % Matching Contributions January 1, 2002 and After
Less than 1	0 %	0%	0 %	0 %
1 but less than 2	10 %	0%	10 %	0 %
2 but less than 3	20 %	20%	20 %	20 %
3 but less than 4	30 %	40%	30 %	40 %
4 but less than 5	40 %	60%	40 %	60 %
5 but less than 6	60 %	80%	60 %	80 %
6 but less than 7	80 %	100%	80 %	100 %
7 or more	100 %		100 %	

Participant Accounts

Participants may direct that their accounts be invested in one or more of the funds described in Note 3, in increments of 5 percent.

Each participant's account is credited with the participant's contributions, employer matching contributions and an allocation of employer discretionary contributions and plan earnings. Employer discretionary contributions and plan earnings are allocated to individual participant accounts based on a formula in accordance with the provisions of the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's account.

Distribution of Benefits

Participants separated from the Plan due to service retirement, disability or death are automatically fully vested in their employer contributions and will receive their benefits in a lump-sum payment. Participants separated from the Plan due to termination receive a lump-sum payment including the vested portion of their employer contributions and earnings.

(Continued)

Note 1 - Description of Plan (Continued)

Forfeitures

Forfeitures are first used to restore previously forfeited amounts to participants who terminate and rehire, provided the participant repays all amounts previously distributed to them. The remaining forfeitures are then used to reduce future employer matching contributions. During 2010, $84,324 of forfeitures were used to decrease the current year employer match contributions. Forfeited balances available to reduce future employer contributions were $1,069 and $58,045 as of December 31, 2010 and 2009, respectively.

Participant Loans

Participants are eligible to apply for a loan on or after their first anniversary date in the Plan. Participants may borrow from the Plan once a year subject to a minimum loan amount of $1,000 and a maximum loan amount of the lesser of: (1) 50 percent of the vested account balance, or (2) $50,000. Only one loan may be outstanding at a time. Interest rates and loan origination fees are established at the origination date and are determined by the plan administrator.

Account Withdrawals

The Plan allows participants to make withdrawals, under certain conditions (as defined in the Plan document), of their company discretionary contribution account.

Plan Termination

Although the Sponsor has not expressed any intent to terminate the Plan, it has the right to do so at any time subject to the provisions of ERISA. In the event of plan termination, participants would become 100 percent vested in their accounts.

Note 2 - Significant Accounting Policies

Method of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Accordingly, income is recognized when earned, and expenses are recorded when incurred.

(Continued)

Note 2 - Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Investments

The fair value of investment funds is determined by Charles Schwab Trust Company based on the fair value of the underlying assets. The net appreciation (depreciation) in the fair value of the investments reported in the statement of changes in net assets available for benefits consists of the realized gains and losses and the unrealized appreciation (depreciation) on those investments. Participant loans are valued at cost which approximates fair value. Common stocks are valued at fair value as determined by quoted market prices in an active market.

Plan Administration Costs

All plan administration costs are absorbed by the participant as the quarterly earnings are reduced by all applicable fees. Participants pay a fixed $100 fee for new loans which are deducted from the loan disbursement.

Note 3 - Investments

The Plan's investments include funds managed by Cohen & Steers, Charles Schwab, Sound Shores, Strong, Thornburg, Vanguard and Wells Fargo offered through Charles Schwab Trust Company. Participants can direct the investment of their salary deferral and rollover contributions into the following nine investment funds:

Charles Schwab Stable Value Fund

The Charles Schwab Stable Value Fund seeks stability of principal providing high current income. The fund invests in a diversified portfolio for the purposes of short-term cash management consisting primarily of insurance company guaranteed investment contracts, bank deposit investment contracts, and instruments, arrangements commonly known as "synthetic" investment contracts.

Note 3 - Investments (Continued)

Personal Choice Retirement Account

The Personal Choice Retirement Account (PCRA) allows the participant to buy and sell any investment available at Charles Schwab. This plan allows the participant to place trades and manage the account based on investment strategies.

Cohen & Steers Realty Shares Inc. Fund

The Cohen & Steers Realty Shares, Inc. Fund investment objective is total return through investment in real estate securities achieved by seeking, with approximately equal emphasis, capital appreciation and current income. The fund will invest substantially all of its assets in the equity securities of real estate companies. A real estate company is defined as one that derives at least 50 percent of its revenues from the ownership, construction, financing, management or sale of commercial, industrial, or residential real estate or that has at least 50 percent of its assets in such real estate. The fund may invest up to 10 percent of its total assets in securities of foreign real estate companies. The fund may also invest without limit in shares of real estate investment trusts ("REITs").

Schwab S&P 500 Index Fund

The Schwab S&P 500 Index Fund (formerly called Schwab S&P 500 Fund - Investor SHS) seeks to track the total return performance of stocks that compose the S&P 500 index. The fund normally invests at least 80 percent of assets in common stock that compose the index. It buys and sells stocks primarily to match the index, to invest cash from share purchases or to obtain cash for redemption of shares.

Sound Shore Fund

The Sound Shore Fund primary investment strategy is the growth of capital with income growth being secondary. The fund invests primarily in equity securities. It may invest up to 10 percent of assets in the securities of other investment companies.

(Continued)

Note 3 - Investments (Continued)

Thornburg International Value I Fund

The Thornburg International Value I Fund seeks long-term capital appreciation. The fund normally invests at least 75% of assets in foreign securities or depository receipts of foreign securities. It may invest in developing countries. The fund typically makes equity investments in the following three types of companies: basic value companies with well established businesses whose stock is under-valued; Consistent earner companies when they are selling at valuations below historic norms; and emerging franchises that are in the process of establishing a leading position in a product, service or market expecting growth at an above average rate.

Vanguard Primecap Fund

The Vanguard Primecap Fund seeks long-term growth of capital. Dividend income is incidental. The fund normally invests at least 80 percent of its assets in equity securities. Companies are selected on the basis of fundamental factors, including current earnings and consistency and quality of earnings growth. These fundamental factors are then evaluated in relation to the market price of each company's stock to determine which investments to make.

Vanguard Wellington Fund

The Vanguard Wellington Fund seeks conservation of capital and reasonable income without undue risk. The fund invests in bonds, preferred stocks, and common stocks. The amount held in each class varies depending upon management's assessment of business, economic, and market conditions. Usually, the fund invests from 60 percent to 70 percent of its total assets in common stocks and holds the balance in investment-grade bonds and cash. It may invest up to 10 percent of its assets in foreign securities.

Wells Fargo Advantage Government Securities Fund

The Wells Fargo Advantage Government Securities Fund seeks total return by investing for a high level of current income with a moderate degree of share-price fluctuation. The fund invests at least 80% of assets in higher quality bonds issued by the U.S. government or its agencies. It may also invest up to 20% of assets in U.S. dollar-denominated foreign securities. The fund's average effective maturity will normally be between 3 and 15 years.

Note 5 - Fair Value of Financial Instruments

Current accounting standards establish a fair value hierarchy based on the inputs used in valuation techniques. There are three levels to the fair value hierarchy of inputs to fair value, as follows:

Level 1:
Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

(Continued)

Note 5 - Fair Value of Financial Instruments (Continued)

Level 2:
Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3:
Unobservable inputs reflecting the Plan's own assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

The Plan follows current accounting standards for all financial assets and liabilities that are recognized or disclosed at fair value on a recurring basis.

Assets measured at fair value on a recurring basis comprise the following:

Description	Fair Value At December 31, 2010	Fair Value At December 31, 2009
Mutual funds	$22,272,354	$19,923,515
Common stocks	466,147	340,374
Publicly traded partnerships	7,074	5,340
Common/collective trust	2,864,267	2,392,014
Total	$25,609,842	$22,661,243

(Continued)

Note 5 - Fair Value of Financial Instruments (Continued)

Fair Value was determined as follows:

	December 31, 2010 Based on		
	Quoted Prices in Active Markets	Other Observable Inputs	Unobservable Inputs
Assets			
Mutual funds	$22,272,354	$ -	$ -
Common stocks	466,147	-	-
Publicly traded partnerships	7,074	-	-
Common/collective trust	2,864,267	-	-
Total Financial Assets	$25,609,842	$ -	$ -

	December 31, 2009 Based on		
	Quoted Prices in Active Markets	Other Observable Inputs	Unobservable Inputs
Assets			
Mutual funds	$19,923,515	$ -	$ -
Common stocks	340,374	-	-
Publicly traded partnerships	5,340	-	-
Common/collective trust	2,392,014	-	-
Total Financial Assets	$22,661,243	$ -	$ -

Generally, for all trading securities, fair value is determined by reference to quoted market prices and other relevant information generated by market transactions. For Certain available-for-sale securities and derivatives, fair value is estimated as the present value of expected future cash inflows.
