Independent Auditors' Report

To the Board of Trustees and Participants
Pepsi MidAmerica 401(k) Plan
Marion, Illinois

We were engaged to audit the statement of net assets available for benefits of Pepsi MidAmerica 401(k) Plan (the Plan) as of December 31, 2009, and the related statement of changes in net assets available for benefits for the year then ended and the supplemental schedule of assets (held at end of year). These financial statements and supplemental schedule are the responsibility of the Plan's management. Other auditors were engaged to audit the statement of net assets available for benefits of the Plan as of December 31, 2008, whose report dated October 12, 2009, disclaimed an opinion on the aforementioned statement for the same reasons described in the following paragraph.

As permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 3, which was certified or provided by Principal Life Insurance Company, the trustee of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedule. We have been informed by the Plan Administrator that the trustee holds the Plan's investment assets and executes investment transactions. As disclosed in Note 3, the Plan Administrator has obtained certifications from the trustee regarding the completeness and accuracy of the investment information provided to the Plan Administrator by the trustee as of and for the year ended December 31, 2009, and as of December 31, 2008.

Because of the significance of the information that we did not audit, we are unable to express, and we do not express, an opinion on the accompanying financial statements and supplemental schedule taken as a whole as of and for the year ended December 31, 2009. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Note 1. Description of the Plan

The following description of the Pepsi MidAmerica 401(k) Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General: The Plan is a defined contribution plan covering all full-time, nonunion employees of Pepsi MidAmerica (the Company) who elect to participate in the Plan. Under the Plan, an employee becomes eligible to participate in the Plan after completing one year of service, as defined, and attainment of age 21. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions: Each year, the Company contributes to the Plan amounts at the discretion of the Company's Board of Directors. Participants may contribute up to 15% of their annual compensation. Matching discretionary contributions are made for all participants who were active at any time during the year up to the participant's annual contribution. During 2009, the Company matched 0.25% of the participant's compensation, up to 1% of the participant's annual compensation. Contributions are subject to certain limitations as required by the Internal Revenue Code (IRC) ($16,500 for 2009). Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. The Plan allows participant rollovers from other plans. Participants direct the investment of their contributions as well as the Company's contribution into various investment options offered by the Plan. The Plan currently offers various pooled separate accounts and guaranteed interest accounts as investment options for participants.

Participant accounts: Each participant's account is credited with the participant's elective and, if applicable, rollover contributions, transfers to the Plan, and allocations of (a) the Company's contributions, (b) Plan earnings, and (c) administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting: Participants are immediately vested in their elective and, if applicable, rollover contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts plus earnings thereon is based on years of continuous service. A participant is fully nonvested until after three years of continuous service upon which the participant will be fully vested. The nonvested balance is forfeited upon termination of service. Forfeitures are used to reduce the employer matching contribution.

Payment of benefits: On termination of service, for reasons other than death, the employer may elect to permit Plan distributions to be made in a lump-sum amount if the participant's vested account balance is less than $5,000. For account balances greater than $5,000, the employee may elect to receive the value of his or her account in an annuity or have the balance rolled over into an Individual Retirement Account or other qualified Plan. If a participant dies, a death benefit equal to the value of the participants' account is paid to the participant's beneficiary. Withdrawals other than for termination are permitted under circumstances provided by the Plan.

Forfeited accounts: Forfeited non-vested accounts are used to reduce future employer contributions and to pay Plan expenses. For the 2009 Plan year, $384 was used to reduce employer contributions. At December 31, 2009 and 2008, the amount of forfeited non-vested accounts was not significant.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment valuation and income recognition: The Plan provides for various investment options in investment securities. The Plan reports these securities at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The methods used to estimate the fair value of investments are described in Note 3.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of benefits: Benefits are recorded when paid.

Administrative expenses: Certain administrative functions applicable to the Plan are performed by employees of the Company. No such employees receive compensation from the Plan. The Plan incurs expenses related to general administration and record keeping. The Plan and the Plan sponsor each pay a portion of these expenses.

Recent accounting pronouncements: In 2009, the Financial Accounting Standards Board (FASB) issued guidance which expanded disclosures and required that a major category for debt and equity securities in the fair value hierarchy table be determined on the basis of the nature and the risks of the investments. This guidance was adopted by the Plan during 2009 and such disclosures are included in Note 3 to the financial statements. The adoption did not have a material impact on the Plan's financial statements.

In September 2009, FASB issued an amendment, which provides guidance on how entities should estimate fair value of certain alternate investments. The fair value of investments within the scope of this guidance can now be determined using net asset value (NAV) per share as a practical expedient when the fair value is not readily determinable, unless it is probable the investment will be sold at something other than NAV. It also requires disclosure of certain attributes by major category of alternative investments, regardless of whether the practical expedient was used. This amendment was effective for periods ending after December 15, 2009, with early adoption permitted. The adoption of this guidance did not have a material impact on the Plan's financial condition or results of operations.

In January 2010, FASB issued an amendment, *Fair Value Measurements and Disclosures –Improving Disclosures about Fair Value Measurements* (ASU 2010-06) which requires new disclosures and reasons for transfers of financial assets and liabilities between levels 1 and 2. This amendment also clarifies that fair value measurement disclosures are required for each class of financial assets and liabilities, and disclosures about inputs and valuation techniques are required for both Level 2 and Level 3 measurements. It further clarifies that the reconciliation of Level 3 measurements should separately present purchases, sales, issuances, and settlements instead of netting these changes. With respect to matters other than Level 3 measurements, the amendment was effective and adopted for period beginning on or after December 15, 2009. The guidance related to Level 3 measurements is effective for periods beginning on or after December 15, 2010 and has not yet been adopted. We are currently evaluating the impact of the guidance related to Level 3 measurements on our disclosures.

Note 2. Summary of Significant Accounting Policies (Continued)

During 2009, the Plan adopted FASB guidance related to the FASB Accounting Standards Codification (ASC) and the Hierarchy of GAAP (Generally Accepted Accounting Principles in the United States.) This statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with GAAP in the United States. This statement replaces prior guidance related to the hierarchy of GAAP and establishes the FASB ASC as the source of authoritative accounting principles recognized by the FASB.

Note 3. Information Certified and Provided by the Trustee

The Plan Administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following December 31, 2009 and 2008 information certified or provided by the trustee, except for comparing such information certified or provided by the trustee to information included in the Plan's financial statements, Note 3, and the supplemental schedule of assets (held at end of year).

The trustee also certified the completeness and accuracy of certain information which management used in preparing the financial statements, the supplemental schedule, and accompanying notes. Accordingly, this information was not audited. The following is a summary of information, which the trustee furnished to the Plan administrator.

- Net appreciation in fair value of pooled separate accounts as reported in the statement of changes in net assets available for benefits for the year ended December 31, 2009 of $244,467.

- Interest earned on guaranteed interest accounts as reported in the statement of changes in net assets available for benefits for the year ended December 31, 2009 of $5,975.

- Other loss as reported in the statement of changes in net assets available for benefits for the year ended December 31, 2009 of $2,553.

Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures,* provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quotes prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;

Note 3. Information Certified and Provided by the Trustee (Continued)

- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Insurance company pooled separate accounts: Valued at the total of the net asset value of shares held by the Plan at year end except for the following three: (1) Money Market is valued at amortized cost; (2) Bond and Mortgage and (3) Government and High Quality Bond are both valued based on pricing applications as determined by Interactive Data Corporation. The Plan's interest in these accounts is based on information provided by the Plan's trustee.

U.S. Property separate account: Valued using discounted cash flow valuation models that utilize public real estate market data inputs.

Guaranteed interest accounts with insurance company: Valued at the fair value based on a formula specified in the Plan's group annuity contract with Principal Life Insurance Company, which takes into account currently credited interest rates. See Note 5 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within fair value hierarchy, the Plan's assets at fair value as of December 31, 2009 and 2008. Single investments representing more than 5% of the Plan's net assets as of December 31, 2009 and 2008, are separately identified:

(a) There are five pooled separate accounts that make up this category. Four invest mainly in domestic stocks and the other separate account invests in a single mutual fund. While the underlying assets values are quoted prices, the net asset values of the separate accounts are not publicly quoted.

(b) There are three pooled separate accounts that make up this category. These accounts invest mainly in domestic stocks. While the underlying assets values are quoted prices, the net asset values of the separate accounts are not publicly quoted.

(c) There are three pooled separate accounts that make up this category. These accounts invest mainly in domestic stocks. While the underlying assets values are quoted prices, the net asset values of the separate accounts are not publicly quoted.

(d) There are three pooled separate accounts that invest mainly in international stocks. The majority of the underlying securities are quoted prices for similar assets in active or non-active markets. When markets move outside of set thresholds in a day, instead of accepting the exchange quote from its pricing service, Principal uses prices determined by the Fair Market Value mode which is a multi-factor regression model. This model is used to adjust closing prices on foreign markets for activity between the closing of the foreign and U.S markets.

(e) The pooled separate accounts in this category invest in its own single mutual fund and are managed based on the number of years to retirement therefore the accounts' investments gradually become more conservative as the target retirement date approaches. While the underlying assets values are quoted prices, the net asset values of the separate accounts are not publicly quoted.

Note 4. Fair Value of Investments in Certain Entities that Calculate Net Asset Value per Share (or its equivalent) (Continued)

(f) This pooled separate account invests mainly in fixed securities such as asset backed securities, residential mortgage backed securities, commercial mortgage backed securities, and government bonds. The majority of the underlying securities have quoted prices for similar assets in active or non-active markets.

(g) The pooled separate account in this category invests in its own single mutual fund. While the underlying assets value is a quoted price, the net asset value of the separate account is not publicly quoted.

(h) This pooled separate account invests mainly in fixed securities such as domestic and foreign corporate bonds, asset backed securities, commercial mortgage backed securities, and government bonds. The majority of the underlying securities have quoted prices for similar assets in active or non-active markets.

(i) This pooled separate account invests mainly in short term securities such as commercial paper. The majority of the underlying securities have quoted prices for similar assets in active or non-active markets.

(j) This category invests the majority of its assets in U.S. commercial real estate holdings including multifamily, office, warehouse, manufacturing, and retail properties. It focuses on properties that return both lease income and appreciation of the buildings' marketable value. The fair value of the underlying real estate is estimated using discounted cash flow valuation models that utilize public real estate market data inputs such as transaction prices, market rents, vacancy levels, leasing absorption, market cap rates, and discount rates. In addition, each property is appraised annually by an independent appraiser. As of December 31, 2009, a limitation was in effect which delays the payment of withdrawal requests and provides for payments of such requests on a pro rata basis as cash becomes available.

Note 5. Investment in Guaranteed Interest Accounts with Insurance Company

The Plan has entered into a Guaranteed Interest Account (GIA) contract with Principal Life Insurance Company (Principal). Principal maintains the Plan's deposit in the GIA, to which it adds interest at the contract rates which ranged from 1.44% - 4.55% and 1.18% - 2.79% as of December 31, 2009 and 2008, respectively. The account is credited with earnings on the underlying investments and could be charged for participant withdrawals and expenses. Principal is contractually obligated to repay principal and a specified interest rate that is guaranteed to the Plan. As such, an adjustment to the contract value of the GIA for market value is only recorded if the resulting market value is less than the contract value. This contract has been determined to not be fully benefit-responsive as market value adjustments are made for certain types of withdrawals.

Note 6. Tax Status

The Plan is a prototype Plan developed by Principal Life Insurance Company. The prototype plan has received a favorable opinion letter from the Internal Revenue Service (IRS), dated March 31, 2008, which states that the Plan and related trust are designed in accordance with the applicable sections of the Internal Revenue Code (IRC). The Plan has been amended in 2008 since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Note 6. Tax Status (Continued)

The FASB issued new guidance on accounting for uncertainty in income taxes. The Plan adopted this new guidance for the year ended December 31, 2009. Management evaluated the Plan's tax positions and concluded that the Plan had maintained its tax exempt status and had taken no uncertain tax positions that require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements.

Note 7. Plan Termination

Although it has not expressed an intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in their accounts.

Note 8. Party-in-Interest Transactions

The Plan invests in certain insurance company pooled separate accounts and guaranteed interest accounts managed by the trustee; therefore, these transactions qualify as party-in-interest transactions. All reasonable costs, charges, and expenses incurred by the trustee and the Plan Administrator, in connection with the administration of the Plan, may be paid by the Company, but if not paid by the Company when due, may be paid from the Plan assets. During 2009, there was $22,525 in administrative expenses incurred by the trustee and not paid by the Company when due were paid from the Plan assets.

Note 9. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Note 10. Reconciliation to the Form 5500

The following is a reconciliation of distributions per the financial statements for the year ended December 31, 2009, to the Form 5500:

Benefits paid per the financial statements	$	250,931
Less: Corrective distributions		(278)
Benefits paid to participants per the Form 5500	$	250,653

Note 11. Subsequent Events

The Plan Administrator has evaluated events occurring subsequent to December 31, 2009 as to their potential impact to the financial statements events through October 13, 2010, which is the date the financial statements were available to be issued.
