Notes to Financial Statements
as of and for the Year Ended December 31, 2011
and as of December 31, 2010

A. Description of Plan

The following description of the Columbia Food Service Company 401(k) Profit Sharing Plan & Trust (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering substantially all employees of the Columbia Food Service Company and various affiliated entities (collectively, the "Employer"), who have attained age twenty-one. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended. The Plan was established on January 1, 2003.

Contributions

Each year, participants may, through participant salary deferrals, make contributions up to the maximum amount allowed by the Internal Revenue Service ("IRS"). Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions, as defined in the Plan. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. In addition, the Employer may make discretionary matching contributions. During the year ended December 31, 2011, the Employer made matching contributions of approximately $66,500. Contributions are subject to certain limitations.

Participant Accounts

Each participant's account is credited with the participant's contribution and an allocation of (1) any Employer contribution and (2) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Forfeitures

The Plan allows the Employer to use forfeitures of terminated participant's non-vested contributions to reduce the Employer's contributions. Plan forfeitures for the year ended December 31, 2011 and 2010 were approximately $3,100 and $-0-, respectively. At December 31, 2011 and 2010, the balance of the unapplied forfeitures approximated $19,600 and $16,500, respectively. No forfeitures were used in 2011 or 2010 to reduce

the Employer's contributions and the unapplied balances are included in the Cash account.

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Employer's discretionary contribution portion of their accounts plus actual earnings thereon is tiered based on years of continuous service. A participant is 100% vested after six years of credited service.

Investment Options

The Plan is a "participant-directed account plan". As such, it provides individual accounts for participants to select how the assets in their accounts are invested. Participants may invest in various funds, each with different risk exposure and return potential. The Plan currently offers various mutual funds and one guaranteed interest account as investment options. Participants may change their investment options daily.

Payment of Benefits

On termination of service due to death, disability, retirement or other reasons, a participant or their beneficiary, as applicable, may elect to remain in the Plan (subject to required minimum distributions promulgated by the IRS) or to receive a lump sum distribution equal to the value of the participant's vested interest in his or her account. However, if the vested account balance is less than $1,000, the plan administrator will distribute the participant's entire vested account balance as a lump-sum distribution as soon as administratively feasible.

B. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared using the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for plan benefits, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets available for plan benefits during the reporting period. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note D for a discussion of fair value

measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Excess Contributions Payable and Other Liabilities

Contributions received from participants for 2011 are net of $14,802 of excess contributions made in 2011 that were returned (less $549 of losses thereon) to certain participants in 2012 to satisfy the relevant nondiscrimination provisions of the Plan. At December 31, 2011 and 2010, liabilities include approximately $14,300 and $32,400, respectively, of such excess contributions and related losses and earnings thereon.

At December 31, 2011 and 2010, this account also includes approximately $87,600 and $64,000, respectively that is due to the Employer for matching contributions and related earnings thereon, made on contributions that were returned to employees to satisfy the relevant nondiscrimination provisions of the Plan.

Payment of Benefits

Benefits are recorded when paid.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with these securities, it is at least reasonably possible that changes in their values will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for plan benefits.

Operating Expenses and Other Party-In-Interest Transactions

During the year ended December 31, 2011, substantially all of the Plan's investments were held in pooled separate accounts which were invested in funds managed by John Hancock Life Insurance Company USA ("John Hancock"), the custodian of the Plan. Therefore, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan to these entities and other parties in interest approximated $1,300 during the year ended December 31, 2011.

The Plan's operating expenses are paid in part by the Plan and in part by the Employer, as provided by the plan document. During the year ended December 31 2011, the Employer paid Plan expenses of approximately $13,500. In addition, certain administrative functions are performed by officers or employees of the Employer. No such officer or employee receives compensation from the Plan.

Subsequent Events

Plan management has evaluated subsequent events through October 12, 2012, the date the financial statements were available to be issued.

C. Investments and Information Prepared and Certified by Custodian (Unaudited)

The following summarizes investment information regarding the Plan as of December 31, 2011 and 2010, and for the year ended December 31, 2011, included in the Plan's financial statements and supplemental schedule, that was prepared by or derived from information provided by John Hancock, as custodian of the Plan. D. Fair Value Measurements

The *Fair Value Measurements and Disclosure* section of the *Financial Accounting Standards Board* (FASB) *Accounting Standards Codification* (ASC) establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under *Fair Value Measurement and Disclosure* section of the FASB ASC are described below:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 — Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Following is a description of the valuation methodologies used for investments measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010.

Pooled separate accounts and guaranteed interest account: The underlying investments are valued using quoted prices in active markets for identical assets ("Level 1") or based on the pricing data provided by at the net asset value ("NAV") of shares held by the Plan at year end.

Guaranteed Interest Account – The guaranteed interest account is invested in the general asset account of John Hancock and reported at fair value based upon information reported by John Hancock. The contract value is the amount plan

participants would receive currently if they were to withdraw or transfer funds within the Plan prior to their maturity. The contracts are classified within Level 2 of the valuation hierarchy.

The methods described above may produce fair value calculations that may not be indicative of net realizable value or reflective of future fair values. Also, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of other methodologies or assumptions to determine fair values of certain financial instruments could result in different fair value measurements at the reporting dates.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2011 and 2010:

	Fair Value Measurements as of December 31, 2011			
	Level 1	Level 2	Level 3	Total

E. Plan Termination

Although it has not expressed any intent to do so, the Employer has the right under the Plan to discontinue contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in the employer portion of their account balances.

F. Tax Status

The Plan obtained its latest determination letter in September 2001 in which the IRS stated that the Plan and related trust documents that were adopted effective January 1, 2003 were designed and in compliance with the applicable requirements of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the determination letter; however the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Accordingly, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more than likely would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2008.
