NOTE B - SUMMARY OF ACCOUNTING POLICIES

A summary of the accounting policies consistently applied in the preparation of the accompanying financial statements follows:

1. Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis, accordingly, additions are recorded when earned and deductions are recorded when incurred.

2. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect certain reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Accordingly, actual results may differ from those estimates.

3. Investment Valuation and Income Recognition

The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note C for discussion of fair value measurements.

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

4. Benefits Payable

Benefits are recorded when paid.

5. Subsequent Events

Management has evaluated subsequent events for recognition and disclosure in the financial statements through November 8, 2010, which is the date the financial statements were available to be issued. Through November 8, 2010, no subsequent events required recognition or disclosure in the financial statements.

NOTE C - INVESTMENTS

NOTE C - INVESTMENTS - Continued

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Accounting standards also establish a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standards describe three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities that are traded in an active exchange market, as well as U.S. Treasury securities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments. This category generally includes certain U.S. Government and agency mortgage-backed debt securities and corporate debt securities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant measurement judgment or estimation. This category generally includes certain private debt and equity investments.

NOTE C - INVESTMENTS - Continued

Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial asset, including estimates of timing, amount of expected future cash flows and the credit standing of the issuer. In some cases, the fair value estimates cannot be substantiated by comparison to independent markets. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial asset. Potential taxes and other expenses that would be incurred in an actual sale or settlement are not reflected in amounts disclosed. In addition, the disclosed fair values do not reflect any premium or discount that could result from offering for sale at one time an entire holding of a particular financial asset.

Fair values of the United States treasury bill, mutual funds, exchange traded funds, common stocks, and money market funds have been determined by the Plan from observable market quotations, when available.

The following table presents the Plan's fair value hierarchy for those assets measured at fair value on a recurring basis as of January 31:

NOTE D - TAX STATUS

The Internal Revenue Service has determined and informed the Company by a letter dated November 18, 1994, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

The Plan adopted the accounting standards for uncertainty in income taxes effective February 1, 2009. This guidance prescribes a comprehensive model for financial statement recognition, measurement, classification, and disclosure of uncertain tax positions. The implementation of the standards had no net effect on net assets available for benefits.

As of January 31, 2010, the Plan has recognized in the financial statements the effects of all tax positions and continually evaluates expiring statutes of limitations, audits, changes in tax law, and new authoritative rulings. The Plan is not aware of any circumstances or events that make it reasonably possible that unrecognized tax benefits may increase or decrease within 12 months of the date of the statements of net assets available for benefits. Penalties and interest assessed by taxing authorities are included in other deductions, if applicable. There were no interest or penalties paid during 2009.

The Plan files Form 5500 annually in the U.S. federal jurisdiction. The federal returns prior to 2006 are closed.

NOTE E - PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of Plan termination, participants will become 100% vested in their accounts.

NOTE F - BENEFITS PAYABLE

Benefits payable to persons who have withdrawn from the Plan in the amounts of approximately $ 738,000 and $ 176,000 at January 31, 2010 and 2009, respectively, are included in net assets available for benefits.

NOTE G - RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

NOTE H - RELATED-PARTY TRANSACTIONS

Plan investments are managed by Northeast Investment Management, Inc. Northeast Investment Management Services, Inc. is the custodian as defined by the Plan. These transactions qualify as party in interest. Fees paid by the Plan for trustee and custodial services were approximately $ 22,100 and $ 25,700 for the years ended January 31, 2010 and 2009, respectively.
