Contributions

Profit Sharing Contributions:

The Employer may decide to make additional contributions which will be subject to the "Vesting Schedule" shown below. The Profit Sharing Contribution will be allocated to your account in the ratio that your compensation bears to the compensation of all participants. Forfeitures of this contribution shall be allocated with the Profit Sharing Contribution.

Additional Contributions:

The employer may make special contributions to enable the Elective Deferral Contributions and Matching Contributions to pass discrimination tests required under the Internal Revenue Code. These contributions are called Qualified Non-Elective Contributions and will be made in the manner required for the purpose of passing the tests.

Matching Contributions:

The Employer may make Matching Contributions to the Plan to all Participants who have Elective Deferral Contributions. These contributions are subject to the vesting schedule shown below.

This contribution will be equal to a percentage of your Elective Deferral Contributions and will be determined by the Employer.

These contributions must meet special tests which assure that highly compensated employees do not make significantly more Matching Contributions to the Plan than non-highly compensated employees. If, under the test, contributions of the highly compensated employees exceed the amount permitted, the employer must reallocate some of the Matching Contribution, make additional contributions, distribute some of the vested contributions, or hold the excess and use it as part of the employer's matching contribution for the next year.

First Baird Bancshares, Inc. 401(K) Profit Sharing Plan
Notes to Financial Statements

Compensation

All your contributions are based on the amount participants are paid.

Your pay or earnings are the sum of your W-2 earnings and amounts deferred through a salary deferral agreement under an IRC 401(k) Plan, through a Cafeteria Plan under IRC 125, a SEP under 402(h), or through an annuity under IRC 403(b).

The amount of your compensation which will be used for plan purposes will be that paid to you during the Plan Year beginning each January 1 and ending each December 31.

Participants Accounts

Each participant's account is credited with the participant's contributions and allocations of (a) the Company's contributions and (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. Allocations of discretionary contributions are based on the participant's compensation in proportion to the total compensation all eligible employees. The benefit to which a participant is entitled is the benefit that can be provided from the participant's account.

Vesting

The plan has a Vesting Schedule that establishes what percentage of Profit Sharing Contribution and Matching Contribution is nonforfeitable if participants leave the employer.

If the participant leaves the employer, then the participant gets the percentage of the Matching and other contributions in which is vested based on the following schedule. The remainder of the Matching Contribution is then forfeited to the Plan to reduce future employer contributions.

Forfeitures of Profit Sharing Contributions will be reallocated in the same manner as current Profit Sharing Contributions.

The vesting schedule is based on Covered Years of Service. A Covered Year of Service is the 12 month period ending on the plan year end during which you worked for the employer at least 1000 hours.

Vesting Schedule

Covered Years of Service:	Percentage of Account Vested:
less than 1	0%
1 but less than 2	0%
2 but less than 3	20%
3 but less than 4	40%
4 but less than 5	60%
5 but less than 6	80%
6 or more	100%

If the participant has reached Normal Retirement Age, or dies, or is permanently disabled, or if the Plan is terminated then the participants account balance becomes 100% vested. The participant is always 100% vested in their Elective Deferral contributions to the Plan. Employee 401(k) and employer matching contributions are 100% vested. Employer contributions and earnings are subject to a 6-year vesting schedule.

Payment of Benefits

Upon termination of service, death, disability, or retirement, a participant may receive either a lump-sum amount equal to the vested value of his or her account or installments over a period of years.

Distribution of Elective Deferrals (and earnings thereon accrued as of December 31, 2010) may be made in the event of hardship.

Operating Expenses

All expenses of maintaining the Plan are paid by the plan sponsor.

NOTE B-Summary of Accounting Policies

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect the certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investment at Mainstay and New York Investment Contract is stated at fair value. Shares of mutual funds are valued at quoted market prices which represent the net asset value of shares held by Mainstay at year-end.

NOTE C—Fair Value Measurements

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value measurement accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, and Level 3 inputs are unobservable and have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. No Level 2 inputs were available to the Plan, and Level 3 inputs were only used when Level 1 or Level 2 inputs were not available.

Level 1 Fair Value Measurements

The fair value of mutual funds is based on quoted net asset values of the shares held by the Plan at year-end. The fair values of the investments are based on the closing price reported on the active market where the individual securities are traded.

Level 3 Fair Value Measurements

The guaranteed investment contract with an insurance company is not actively traded and significant other observable inputs are not available. Thus, the fair value of the guaranteed investment contract is determined using an income approach by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer.
The following tables set forth, by level within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2010 and 2009:

NOTE C—Fair Value Measurements (Continued)

NOTE H—RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
