B. CONTRIBUTIONS - Each year, participants may make salary reduction contributions on a pre-tax basis up to 100 percent of their eligible compensation through regular payroll deductions to the Plan.

SFAS 157, Fair Value Measurements, establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 consists of unadjusted quoted prices in active markets for identical assets and have the highest priority, Level 2 inputs consist of prices that are not publically quoted and have the second highest priority, and Level 3 inputs have more than one unobservable input and have the lowest priority. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value.

(Continued)

NOTE 8: FAIR VALUE MEASUREMENTS OF INVESTMENTS – continued

Level 1 Fair Value Measurements

The fair value of mutual funds is based on quoted net asset values of the shares held by the Plan at year end.

Level 2 Fair Value Measurements

The fair value of the Collective Investment Trust is based on the market value of the underlying investments, which includes investment contracts comprised of both observable Level 1 or Level 2 pricing inputs, including quoted prices for similar assets in active or non-active markets.

The fair value of separate accounts is based on the net asset value of the separate pooled account, which is not publically traded.

Level 3 Fair Value Measurements

The guaranteed investment contract with an insurance company and participant loans are not actively traded and significant other observable inputs are not available. Thus, the fair value of the guaranteed contract is determined by discounting the related cash flows based on current yields of similar instruments with comparable durations, and the fair value of participant loans is equal to the amortized cost of the loans because the loans are secured by each respective participant's account balance.

The separate account invests in commercial real estate and includes mortgage loans which are backed by the associated properties. These underlying real estate investments have unobservable Level 3 pricing inputs, and are valued using various real estate valuation techniques.
