SERVICE HOLDINGS LLC RETIREMENT PLAN
NOTES TO FINANCIAL STATEMENTS

1. Description of the Plan

The following brief description of the Service Holdings LLC Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

General – The Plan is a defined contribution plan covering all employees of Service Holdings LLC (the Company) who have completed sixty days of service and are age twenty-one or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended by subsequent legislation.

Contributions and Investment Earnings – Participants may contribute up to 100% of their annual gross compensation, subject to the limits imposed by the Internal Revenue Code ($16,500 for 2010 and 2009). Age 50 and over participants can contribute an additional $5,500 in 2010 and 2009. The Plan also permits participants to make rollover contributions in accordance with the Internal Revenue Code. Contributions are invested by the trustees into the fund(s) elected by each participant. The Plan currently offers various registered investment companies, a money market fund and a common/collective trust fund as investment options for the participants.

The Company may make discretionary matching contributions to the Plan prior to the end of each quarter. No matching contributions were made during 2010 and 2009. In addition, at the discretion of management, the Company may also contribute a profit-sharing contribution for active participants at the end of each year. For the years ended December 31, 2010 and 2009, no profit-sharing contributions were made by the Company.

Participant Accounts – Each participant's account is credited with the participant's contribution and allocations of (a) the Company's contribution and (b) Plan earnings, including increases or decreases in fair value of investments, and administrative expenses. Allocations are based on participant earnings or account balances, as defined in the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting – Participants are vested immediately in their contributions plus actual earnings thereon. Participants become immediately vested upon permanent disability, death or upon retirement at age 65 or after. Vesting in the Company's contributions is based on the following schedule:

Completed Years of Service	Percent Vested
Less than 1 year of service	0%
1 year of service	20%
2 years of service	40%
3 years of service	60%
4 years of service	80%
5 years of service	100%

1. Description of the Plan (Cont.)

Notes Receivable From Participants – Participants may borrow from their accounts a minimum of $1,000 up to a maximum of $50,000 or 50% of their vested account balance, whichever is less, less the participant's highest outstanding loan balance, if any. Loans are secured by the balance in the participant's account and bear interest at the prevailing rate at the date of inception. Principal and interest installment payments are made through payroll deductions and are payable within 5 years (except for loans used to acquire a principal residence, which are payable within 20 years). Loans outstanding at December 31, 2010 bear interest at rates from 4.25% to 9.50%.

Payment of Benefits – Upon termination of service due to death, disability or retirement, the entire vested balance in a participant's account may be distributed in a lump-sum payment, rolled over into another qualified plan or, if the amount is in excess of $5,000, in substantially equal annual installments as selected by the participant or beneficiary.

Participants are permitted to obtain hardship withdrawals from their plan accounts while employed by the Company. The amounts of the withdrawals may not exceed a participant's vested account balance. Participants receiving hardship withdrawals may not re-contribute to the Plan for a period of six months.

Forfeited Accounts – At December 31, 2010, forfeited non-vested accounts totaled $5,082. Such forfeitures are used to reduce administrative expenses and employer contributions. At December 31, 2009, forfeited non-vested accounts totaled $1,880.

2. Summary of Significant Accounting Policies

Basis of Accounting – The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets during the reporting period. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition – Investments are stated at fair value.

Purchases and sales of securities are recorded on a trade-date basis. Dividend income is recorded on the ex-dividend date and interest income is recorded as earned on the accrual basis. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Fair Value Measurements – In January 2010, the Financial Accounting Standards Board (FASB) issued guidance amending the disclosure requirements related to recurring and nonrecurring fair value measurements. The guidance requires new disclosures on the transfers of assets and liabilities between fair value measurement hierarchy levels, including the reasons for and the timing of the transfers. The new accounting guidance also clarifies existing disclosure requirements regarding the level of disaggregation of fair value measurements and disclosure of significant inputs and valuation techniques utilized. The Plan adopted these disclosure requirements in 2010. Additionally, beginning in 2011, the guidance requires separate presentation of purchases, sales, issuances, and settlements in the Level 3 reconciliation table. The Plan intends on adopting these disclosures requirements in 2011.

2. Summary of Significant Accounting Policies (Cont.)

Reporting Participant Loans – In September 2010, the FASB issued guidance in Accounting Standards Codification No. 962, *Plan Accounting – Defined Contribution Pension Plans*, amending the reporting and disclosure requirements related to participant loans for defined contribution pension plans. The guidance requires that loans issued to participants be reported as notes receivable, segregated from plan investments, and be measured at their unpaid principal balances plus any accrued but unpaid interest. This guidance was effective for reporting periods ending after December 15, 2010, and is to be applied retrospectively to all periods presented. The adoption of this guidance by the Plan resulted in a reclassification from investments to notes receivable from participants of $219,524 and $242,127 as of December 31, 2010 and 2009, respectively. Adoption had no effect on the Plan's net assets available for benefits.

Notes Receivable from Participants – Notes receivable from participants are reported at their unpaid principal balance plus any accrued but unpaid interest, with no allowance for credit losses, as repayments of principal and interest are received through payroll deductions.

Payment of Benefits – Benefits are recorded when paid.

3. Information Certified by the Trustee

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Great West Life Annuity, the trustee of the Plan, has certified the following information included in the financial statements and supplemental schedule as complete and accurate:

- Investments, at fair value, and notes receivable from participants, as shown in the statements of net assets available for benefits as of December 31, 2010 and 2009.
- Interest and dividend income, interest from participant notes receivable, net appreciation in fair value of investments, and the related investment activity as shown in the statements of changes in net assets available for benefits for the years ended December 31, 2010 and 2009.
- Investments, at fair value, and participant loans included in the schedule of assets (held at end of year) as of December 31, 2010.

5. Fair Value Measurements

Generally accepted accounting principles provide a uniform framework for the definition, measurement and disclosure of fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The financial accounting standards establish a fair value hierarchy which requires the plan to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The financial accounting standards describe three levels of inputs that may be used to measure fair value:

Level 1: Quoted market prices (unadjusted) for identical assets or liabilities in active markets that the plan has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted market prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect the plan's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

5. Fair Value Measurements (Cont.)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

The fair value of registered investment companies is determined by quoted market prices on nationally recognized securities exchanges (Level 1 inputs).

Money market funds are stated at cost which approximates fair value (Level 1 inputs).

The determination of the fair value of the common/collective trust fund is determined by the fair value of underlying investments (Level 2 inputs).

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2010 and 2009:
