INDEPENDENT AUDITOR'S REPORT

To the Plan Administrator
Oneida Molded Plastics, LLC 401(k) Plan:

We were engaged to audit the financial statements of the Oneida Molded Plastics, LLC 401(k) Plan as of December 31, 2010 and 2009, and for the years then ended, and the supplemental schedule as of December 31, 2010 as listed in the accompanying index. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in note 6, which was certified by State Street Bank and Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements and the supplemental schedule. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

As discussed in Note 2(c), the Plan adopted new guidance as of January 1, 2009 relating to the accounting for loans to participants.

ONEIDA MOLDED PLASTICS, LLC
401(k) PLAN

Notes to Financial Statements

December 31, 2010 and 2009

(1) Description of the Plan

The following description of the Oneida Molded Plastics, LLC (Company) 401(k) Plan (Plan) provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

(a) General

The Plan is a defined contribution profit sharing plan under Section 401(a) of the Internal Revenue Code and has a Section 401(k) salary deferral arrangement. The Plan covers substantially all employees of the Company who have one month of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

(b) Contributions

Participants may contribute between 1% and 50% of pretax annual compensation, as defined in the Plan. Participants who have attained age 50 before the end of the plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers various mutual funds and common/collective trusts as investment options for participants. The Company may elect to make discretionary contributions to the Plan on behalf of each participant equal to the percentage declared as determined by the Board of Directors of the Company. There were no Company contributions in 2010 or 2009. Contributions are subject to certain limitations.

(c) Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's discretionary contributions and (b) plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

(d) Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts is based on years of continuous service. A participant is 20% vested after one year of credited service and vests an additional 20% every year thereafter until fully vested.

(Continued)

(1) Description of the Plan, Continued

(e) Notes Receivable from Participants

Participants may borrow from their fund accounts a minimum of $500 up to a maximum equal to the lesser of $50,000 or 50% of their vested account balance. Loan terms range from one to five years, unless for the purchase of a primary residence, in which case, the maximum duration of the loan may be up to thirty years. The loans are secured by the balance in the participant's account and bear interest at a rate of 5.25%, which is commensurate with local prevailing rates as determined by the Plan administrator. Principal and interest are paid ratably through payroll deductions.

(f) Payment of Benefits

On termination of service, a participant or beneficiary may elect to receive either a lump-sum amount equal to the value of the participant's vested interest in his or her account, or may elect to defer distribution until a later date, as defined by the Plan.

(g) Forfeited Accounts

Forfeited non-vested amounts will be used to reduce future employer contributions. There were no forfeitures of terminated non-vested account balances at December 31, 2010 and 2009.

(2) Summary of Accounting Policies

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The statements of net assets available for benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The statements of changes in net assets available for benefits is prepared on a contract value basis.

(b) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results may differ from those estimates.

(Continued)

(2) Summary of Accounting Policies, Continued

(c) Notes Receivable from Participants

In 2010, the Plan adopted Accounting Standards Update (ASU) 2010-25, *Plan Accounting – Defined Contribution Pension Plans (Topic 962): Reporting Loans to Participants by Defined Contribution Pension Plans.* The ASU requires the Plan to retrospectively classify loans to participants as notes receivable from participants and measure them at their unpaid principal balance plus any accrued but unpaid interest. In addition, the ASU requires the Plan to account for interest income on the outstanding loans to participants as interest income on notes receivable from participants in the accompanying statements of changes in net assets available for benefits. The ASU did not affect the amount of participant loans receivable as of December 31, 2010 and 2009. Delinquent participant loans are reclassified as distributions based upon the terms of the Plan document.

(d) Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

(e) Payment of Benefits

Benefits are recorded when paid.

(f) Administrative Expenses

Certain administrative expenses, including legal and accounting costs and costs of maintaining participant accounts are the obligation of the Plan; however, the Company may pay for such expenses or reimburse the Plan for any payment of these expenses. Costs of managing the investments are paid directly out of the Plan's assets and netted with investment income.

(g) Reclassifications

Certain amounts in the 2009 financial statements have been reclassified to conform to the 2010 presentation.

(Continued)

(2) Summary of Accounting Policies, Continued

(h) Subsequent Events

Effective July 1, 2011, the Company changed its Plan administrator from Automated Data Processing (ADP) to Paychex.

Subsequent events have been evaluated through October 4, 2011, which is the date the financial statements were available to be issued.

(3) Investments

The following presents investments that represent five percent or more of the Plan's net assets at December 31:

	2010		2009	
	Number of shares/units	Fair value	Number of shares/units	Fair value
Alliance Berstein Intl Gr. Fund - A	7,090	$ 108,974	6,422	$ 90,426
Blackrock-Mid Cap Val OPP Fund - A	6,421	106,847	6,092	80,664
Janus Forty Fund - S	3,823	127,261	3,507	110,532
Oppenheimer Sm & Md Cap Value Fund -A	2,506	80,298	2,436	64,740
State Street Bank and Trust Company ADP Program SSgA Stable Value	8,562	134,413	8,700	133,394
T. Rowe Price Retirement 2020 Fund - R	16,828	273,461	15,370	221,946
T. Rowe Price Retirement 2030 Fund - R	7,399	126,521	7,448	111,573

During 2010 and 2009, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated in value as follows:

	2010	2009
Mutual funds	$ 119,207	213,670
Common/collective trusts	4,173	5,317
	$ 123,380	218,987

(Continued)

(4) Common/Collective Trusts

The Plan participates in a common collective trust that includes a stable value fund that is a benefit responsive investment contract. The fund has invested all of its assets in State Street Bank and Trust Company ADP Program SSgA Stable Value Common/Collective Trust Fund. The objective of the fund is to provide a diversified group of investments offering competitive levels of yield consistent with stable fixed-income methodology allowing for preservation of capital and returns. The fund invests in investment contracts and security-backed contracts. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The issuer is contractually obligated to repay the principal at the stated contract value.

Because the stable value fund is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the investment contracts. Contract value is based on information reported by the investment advisor using the audited financial statements of the collective trust at year end. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. For 2009, contract value approximated fair value.

There are no reserves against contract value for credit risk of the contract issuers or otherwise. The fair value of the stable value fund at December 31, 2010 and 2009 was $134,414 and $132,948, respectively. The crediting interest rate for the account was 1.85% and 1.99% during the years ended December 31, 2010 and 2009, respectively.

Certain events limit the ability of the Plan to transact at contract value with the issuers. Such events include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under the Employee Retirement Income Security Act of 1974. The Plan administrator does not believe that any events which would limit the Plan's ability to transact at contract value with participants are probable of occurring.

The Plan also participates in a stock index fund that is a common/collective trust. The objective of the fund is to provide returns that correspond to the total return of U.S. common stocks as represented by the Standard & Poor's 500 Index. The fund invests in individual U.S. common stocks in identical proportions to the Standard & Poor's 500 Index. The investment is indexed to major securities indices and pricing is performed daily based on changes in the related index. The fund is not fully benefit-responsive and therefore the above accounting treatment is not applicable to this investment.

(Continued)

(5) Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (Topic 820), *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 — Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

(5) Fair Value Measurements, Continued

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

Mutual funds: Valued at the net asset value (NAV) of shares held by the plan at year end.

Common/collective trust-stock index fund: Indexed to major securities indices. Pricing is performed daily based on changes in the related index. The trust is not exchange-traded and therefore it has been classified as a level 2 asset.

Common/collective trust-stable value fund: Valued at the net asset value (NAV) per unit at the valuation date. The fair value of traditional guaranteed investment contracts is determined using a discounted cash flow methodology where the individual contract cash flows are discounted at the prevailing swap rate as of year end. Synthetic investment contracts are valued based on the fair value of the individual assets. Fixed income investments are valued based on market transactions for comparable securities. The trust is not exchange-traded and therefore it has been classified as a level 3 asset.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31:

	Assets at fair value as of December 31, 2010

(5) Fair Value Measurements, Continued

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require that transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

We evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2010, there were no transfers in or out of levels 1, 2 or 3.

(6) Information Certified by the Plan's Trustee

The Plan administrator has elected the method of annual reporting permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, State Street Bank and Trust Company, the Trustee, has certified that the following data included in the accompanying financial statements and supplemental schedule is complete and accurate:

	December 31,	
	2010	2009
Investments:		
Mutual funds	$ 1,082,808	879,743

	Year ended December 31, 2010	2009
Investment income:		
Net investment gains on mutual funds and common/collective trusts	$ 123,380	218,987
Dividends	14,514	11,894
	$ 137,894	230,881
Interest income on notes receivable from participants	$ 760	255

All information in the supplemental schedule is presented solely upon the certification except for the fair value of the State Street Bank and Trust Company ADP Program SSgA Stable Value Common/Collective Trust Fund.

The Plan's independent auditors did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedule.

(7) Party-in-Interest Transactions

Certain Plan investments are shares of common/collective trust funds managed by State Street Bank and Trust Company. State Street Bank and Trust Company is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan to State Street Bank and Trust Company amounted to $5,791 and $6,649 for the years ended December 31, 2010 and 2009, respectively.

(8) Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants would become 100% vested in their employer contributions.

(Continued)

(9) Tax Status

The Company adopted a prototype plan from the third-party administrator, Automated Data Processing (ADP), of which, the Internal Revenue Service has determined and informed ADP that the prototype plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC) as of December 6, 2001. Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2007.

(10) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

INDEPENDENT AUDITOR'S REPORT

To the Plan Administrator
Oneida Molded Plastics, LLC 401(k) Plan:

We were engaged to audit the financial statements of the Oneida Molded Plastics, LLC 401(k) Plan as of December 31, 2010 and 2009, and for the years then ended, and the supplemental schedule as of December 31, 2010 as listed in the accompanying index. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in note 6, which was certified by State Street Bank and Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements and the supplemental schedule. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2010 and 2009, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

As discussed in Note 2(c), the Plan adopted new guidance as of January 1, 2009 relating to the accounting for loans to participants.

ONEIDA MOLDED PLASTICS, LLC
401(k) PLAN

Notes to Financial Statements

December 31, 2010 and 2009

(1) Description of the Plan

The following description of the Oneida Molded Plastics, LLC (Company) 401(k) Plan (Plan) provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

(a) General

The Plan is a defined contribution profit sharing plan under Section 401(a) of the Internal Revenue Code and has a Section 401(k) salary deferral arrangement. The Plan covers substantially all employees of the Company who have one month of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

(b) Contributions

Participants may contribute between 1% and 50% of pretax annual compensation, as defined in the Plan. Participants who have attained age 50 before the end of the plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers various mutual funds and common/collective trusts as investment options for participants. The Company may elect to make discretionary contributions to the Plan on behalf of each participant equal to the percentage declared as determined by the Board of Directors of the Company. There were no Company contributions in 2010 or 2009. Contributions are subject to certain limitations.

(c) Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's discretionary contributions and (b) plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

(d) Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts is based on years of continuous service. A participant is 20% vested after one year of credited service and vests an additional 20% every year thereafter until fully vested.

(Continued)

(1) Description of the Plan, Continued

(e) Notes Receivable from Participants

Participants may borrow from their fund accounts a minimum of $500 up to a maximum equal to the lesser of $50,000 or 50% of their vested account balance. Loan terms range from one to five years, unless for the purchase of a primary residence, in which case, the maximum duration of the loan may be up to thirty years. The loans are secured by the balance in the participant's account and bear interest at a rate of 5.25%, which is commensurate with local prevailing rates as determined by the Plan administrator. Principal and interest are paid ratably through payroll deductions.

(f) Payment of Benefits

On termination of service, a participant or beneficiary may elect to receive either a lump-sum amount equal to the value of the participant's vested interest in his or her account, or may elect to defer distribution until a later date, as defined by the Plan.

(g) Forfeited Accounts

Forfeited non-vested amounts will be used to reduce future employer contributions. There were no forfeitures of terminated non-vested account balances at December 31, 2010 and 2009.

(2) Summary of Accounting Policies

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The statements of net assets available for benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The statements of changes in net assets available for benefits is prepared on a contract value basis.

(b) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results may differ from those estimates.

(Continued)

(2) Summary of Accounting Policies, Continued

(c) Notes Receivable from Participants

In 2010, the Plan adopted Accounting Standards Update (ASU) 2010-25, *Plan Accounting – Defined Contribution Pension Plans (Topic 962): Reporting Loans to Participants by Defined Contribution Pension Plans.* The ASU requires the Plan to retrospectively classify loans to participants as notes receivable from participants and measure them at their unpaid principal balance plus any accrued but unpaid interest. In addition, the ASU requires the Plan to account for interest income on the outstanding loans to participants as interest income on notes receivable from participants in the accompanying statements of changes in net assets available for benefits. The ASU did not affect the amount of participant loans receivable as of December 31, 2010 and 2009. Delinquent participant loans are reclassified as distributions based upon the terms of the Plan document.

(d) Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

(e) Payment of Benefits

Benefits are recorded when paid.

(f) Administrative Expenses

Certain administrative expenses, including legal and accounting costs and costs of maintaining participant accounts are the obligation of the Plan; however, the Company may pay for such expenses or reimburse the Plan for any payment of these expenses. Costs of managing the investments are paid directly out of the Plan's assets and netted with investment income.

(g) Reclassifications

Certain amounts in the 2009 financial statements have been reclassified to conform to the 2010 presentation.

(2) Summary of Accounting Policies, Continued

(h) Subsequent Events

Effective July 1, 2011, the Company changed its Plan administrator from Automated Data Processing (ADP) to Paychex.

Subsequent events have been evaluated through October 4, 2011, which is the date the financial statements were available to be issued.

(3) Investments

The following presents investments that represent five percent or more of the Plan's net assets at December 31:

	2010		2009	
	Number of shares/units	Fair value	Number of shares/units	Fair value
Alliance Berstein Intl Gr. Fund - A	7,090	$ 108,974	6,422	$ 90,426
Blackrock-Mid Cap Val OPP Fund - A	6,421	106,847	6,092	80,664
Janus Forty Fund - S	3,823	127,261	3,507	110,532
Oppenheimer Sm & Md Cap Value Fund -A	2,506	80,298	2,436	64,740
State Street Bank and Trust Company ADP Program SSgA Stable Value	8,562	134,413	8,700	133,394
T. Rowe Price Retirement 2020 Fund - R	16,828	273,461	15,370	221,946
T. Rowe Price Retirement 2030 Fund - R	7,399	126,521	7,448	111,573

During 2010 and 2009, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated in value as follows:

	2010	2009
Mutual funds	$ 119,207	213,670
Common/collective trusts	4,173	5,317
	$ 123,380	218,987

(Continued)

(4) Common/Collective Trusts

The Plan participates in a common collective trust that includes a stable value fund that is a benefit responsive investment contract. The fund has invested all of its assets in State Street Bank and Trust Company ADP Program SSgA Stable Value Common/Collective Trust Fund. The objective of the fund is to provide a diversified group of investments offering competitive levels of yield consistent with stable fixed-income methodology allowing for preservation of capital and returns. The fund invests in investment contracts and security-backed contracts. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The issuer is contractually obligated to repay the principal at the stated contract value.

Because the stable value fund is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the investment contracts. Contract value is based on information reported by the investment advisor using the audited financial statements of the collective trust at year end. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. For 2009, contract value approximated fair value.

There are no reserves against contract value for credit risk of the contract issuers or otherwise. The fair value of the stable value fund at December 31, 2010 and 2009 was $134,414 and $132,948, respectively. The crediting interest rate for the account was 1.85% and 1.99% during the years ended December 31, 2010 and 2009, respectively.

Certain events limit the ability of the Plan to transact at contract value with the issuers. Such events include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under the Employee Retirement Income Security Act of 1974. The Plan administrator does not believe that any events which would limit the Plan's ability to transact at contract value with participants are probable of occurring.

The Plan also participates in a stock index fund that is a common/collective trust. The objective of the fund is to provide returns that correspond to the total return of U.S. common stocks as represented by the Standard & Poor's 500 Index. The fund invests in individual U.S. common stocks in identical proportions to the Standard & Poor's 500 Index. The investment is indexed to major securities indices and pricing is performed daily based on changes in the related index. The fund is not fully benefit-responsive and therefore the above accounting treatment is not applicable to this investment.

(Continued)

(5) Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (Topic 820), *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 — Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

(5) Fair Value Measurements, Continued

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2010 and 2009.

Mutual funds: Valued at the net asset value (NAV) of shares held by the plan at year end.

Common/collective trust-stock index fund: Indexed to major securities indices. Pricing is performed daily based on changes in the related index. The trust is not exchange-traded and therefore it has been classified as a level 2 asset.

Common/collective trust-stable value fund: Valued at the net asset value (NAV) per unit at the valuation date. The fair value of traditional guaranteed investment contracts is determined using a discounted cash flow methodology where the individual contract cash flows are discounted at the prevailing swap rate as of year end. Synthetic investment contracts are valued based on the fair value of the individual assets. Fixed income investments are valued based on market transactions for comparable securities. The trust is not exchange-traded and therefore it has been classified as a level 3 asset.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31:

	Assets at fair value as of December 31, 2010

(5) Fair Value Measurements, Continued

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require that transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

We evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2010, there were no transfers in or out of levels 1, 2 or 3.

(6) Information Certified by the Plan's Trustee

The Plan administrator has elected the method of annual reporting permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, State Street Bank and Trust Company, the Trustee, has certified that the following data included in the accompanying financial statements and supplemental schedule is complete and accurate:

	December 31,	
	2010	2009
Investments:		
Mutual funds	$ 1,082,808	879,743

	Year ended December 31, 2010	2009
Investment income:		
Net investment gains on mutual funds and common/collective trusts	$ 123,380	218,987
Dividends	14,514	11,894
	$ 137,894	230,881
Interest income on notes receivable from participants	$ 760	255

All information in the supplemental schedule is presented solely upon the certification except for the fair value of the State Street Bank and Trust Company ADP Program SSgA Stable Value Common/Collective Trust Fund.

The Plan's independent auditors did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedule.

(7) Party-in-Interest Transactions

Certain Plan investments are shares of common/collective trust funds managed by State Street Bank and Trust Company. State Street Bank and Trust Company is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan to State Street Bank and Trust Company amounted to $5,791 and $6,649 for the years ended December 31, 2010 and 2009, respectively.

(8) Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants would become 100% vested in their employer contributions.

(Continued)

(9) Tax Status

The Company adopted a prototype plan from the third-party administrator, Automated Data Processing (ADP), of which, the Internal Revenue Service has determined and informed ADP that the prototype plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC) as of December 6, 2001. Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2010, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2007.

(10) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Re: Case No. 12-0072L

To Whom It May Concern:

The 5500 filing for year ending December 31, 2010, was delayed due to the following circumstances:

Rodney Mayette our CFO at the time was responsible for this. Rodney is no longer with us and I did not know that this was not taken care of. I am currently working with ADP to resolve this issue.

I have every intention of complying with reporting and disclosure rules. I believe that the late filing of this Form 5500 is the result of reasonable cause, not willful neglect. I do not anticipate the same issues in the future and the filings in the future will be timely. I would ask for abatement of the purposed late filing penalty.

Sincerely,

Joseph Kiah
CFO
