INDEPENDENT AUDITOR'S REPORT

To the Board of Trustees
Sabin Metal Corp. Retirement Plan

Report on the Financial Statements

We have audited the accompanying financial statements of Sabin Metal Corp. Retirement Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2012 and 2011, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2012, and changes therein for the year then ended and its financial status as of December 31, 2011, and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Report on Supplemental Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules on pages 17 through 22 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Note 1 - Plan Description

The following brief description of the Sabin Metal Corp. Retirement Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

General

The Plan is a defined benefit pension plan covering substantially all employees of Sabin Metal Corp. and its wholly owned subsidiary Sabin Metal West Corp., who are not subject to a collective bargaining agreement. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended.

Contributions

The amounts to be contributed by the employer shall be determined by the administrator. Such determination shall be based on such actuarial assumptions as may be established from time to time.

All contributions to the Plan are expressly conditioned on their deductibility. Any contribution that is determined to be nondeductible shall be returned to the employer and reduced by any losses attributable thereto within one year of the contribution.

For plan years commencing on or after January 1, 2008, the Plan will satisfy the requirement of Code § 412 by making the minimum required contributions under Code § 430. In determining the amount necessary to be contributed to the Trust Fund for each plan year, the administrator shall assume such rates of interest, mortality and turnover and make such other actuarial assumptions as shall be specified by the Code, the employer or by a qualified actuary designated by the employer. All calculations shall be based upon accepted actuarial methods and principles.

Benefits

The regulations of the Plan provide for various types of retirement and death benefits to eligible employees who meet specific eligibility requirements as to age and years of service.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

Purchases and sales are recorded on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Subsequent Events

The Plan has evaluated subsequent events and transactions through April 12, 2013, the date that the financial statements were available to be issued.

Note 3 - Concentrations of Credit Risk

Financial instruments that subject the Plan to concentrations of credit risk include cash. The Plan maintains accounts at several high quality financial institutions. While the Plan attempts to limit any financial exposure by maintaining accounts at several banks, its deposit balances may, at times, exceed federally insured limits. The Plan has not experienced any losses on such accounts.

Note 4 - Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was determined by the Plan's actuary. That amount results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the present value of money, through discounts for interest and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of January 1, 2012 are as follows:

Funding method:	Unit Credit Cost Method without projection
Effective interest rate:	5.00% per annum, compounded annually
Retirement age:	65, or attained age, if later
Mortality:	1971 Group Annuity Mortality Table
Salary scales:	3.50% per annum, compounded annually
Withdrawal prior to retirement:	Actuary's Pension Handbook Table T-7
Valuation of assets:	PPA Average Value, but not less than 90%, or more than 110% of Market Value

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The Plan's actuaries have advised that the Plan is being funded at a level which is adequate to meet the minimum funding standard requirements of ERISA and there is no accumulated funding deficiency as of January 1, 2012.

Actuarial present value of accumulated plan benefits at January 1, 2012 is as follows:

Vested benefits:	
Participants currently receiving benefits	$ 6,618,445
Other participants	15,855,624
	22,474,069
Non-vested benefits	90,901
Total actuarial present value of accumulated plan benefits	$22,564,970

Changes in the actuarial present value of accumulated plan benefits during the year ended December 31, 2011 are as follows:

Actuarial present value of accumulated plan benefits at beginning of the year	$17,999,209
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	1,079,953
Change in interest rate assumption	2,220,228
Benefits accumulated	1,985,477
Benefits paid	(719,897)
Net increase	4,565,761
Actuarial present value of accumulated plan benefits at end of the year	$22,564,970

Note 5 - Investments

The following table presents investments that represent 5 percent or more of the Plan's net assets available for benefits.

	2012	2011
BBH Limited Duration Fund CL I	$ 5,157,348	$ -
BBH Broad Market Fund	*	5,538,970
Janus Research Fund	2,303,272	2,155,874
MFS Value Fund	*	1,205,920

*Represented less than 5% of net assets available for benefits

During 2012 and 2011, the Plan's investments (including gains and losses on investments bought, sold as well as held during the year) appreciated (depreciated) in value by $2,259,952 and $(525,375), respectively, as follows:

	2012	2011
Investments, at fair value, as determined by quoted market prices:		
Common and preferred stocks	$ 1,140,787	$ (233,325)
Mutual funds	1,077,229	(344,888)
Corporate bonds, notes and debentures	47,213	20,927
U.S. government and government agency securities	(5,277)	31,911
Net appreciation (depreciation) in fair value of investments	$ 2,259,952	$ (525,375)

Note 6 - Fair Value Measurements

Financial Accounting Standards Board ("FASB") *Accounting Standards Codification* ("ASC") 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. It defines fair value as an exit price, which is the price that would be received for an asset or paid to transfer a liability in the Plan's principal or most advantageous market for the asset or liability, in an orderly transaction between market participants on the measurement date.

The fair value hierarchy generally requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability and are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the entity's own assumptions based on market data and the entity's judgments about the assumptions that market participants would use in pricing the asset or liability, and are to be developed based on the best information available in the circumstances.

Note 6 - Fair Value Measurements (Continued)

The Plan determines the fair market value of its investment in securities based on the established fair value definition and hierarchy levels. The three levels within the hierarchy that may be used to measure fair value are:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities.

The lowest level of input that is a significant component of the fair value measurements determines the placement of the entire fair value measurement in the hierarchy. The Plan's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2012 and 2011.

U.S. Treasuries and common and preferred stock are carried at fair value as determined by quoted market prices in active markets.

Mutual funds are valued at the net asset value of the shares held by the Plan at year end.

Short-term investment funds are stated at cost which approximates fair value.

U.S. government agencies and corporate bonds and notes are valued utilizing inputs obtained from approved industry pricing services. To determine the value of these investments, a variety of inputs are utilized, including benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. If a pricing service determines they do not have sufficient independently verifiable information to determine a security's valuation, further attempts to value the issue are discontinued until ample information is received. Secondary pricing or generic pricing may be solicited from the same or other industry pricing service providers.

The preceding valuation methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 6 - Fair Value Measurements (Continued)

The following table sets forth, by level, the Plan's assets that were accounted for at fair value on a recurring basis as of December 31, 2012:

Note 6 - Fair Value Measurements (Continued)

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

We evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2012 and 2011, there were no significant transfers in or out of Levels 1, 2 or 3.

Note 7 - Priorities Upon Termination of the Plan

In the event the Plan terminates, the net assets of the Plan (available to provide benefits) shall be used for the benefit of participants and beneficiaries and shall be allocated in amounts determined by the Trustees on the basis of values determined by the actuary in accordance with ERISA and the Plan provisions.

Benefits under this Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most pensions. However, the PBGC does not guarantee all types of benefits under covered plans, and the amount of benefit protection is subject to certain limitations.

Note 8 - Tax Status

The Plan is qualified under Section 401(a) of the Internal Revenue Code ("IRC") and is exempt from Federal income taxation under Section 501(a). The Plan has obtained a favorable tax determination letter from the Internal Revenue Service ("IRS") dated March 1995.

Prior to 2012, the restated Plan was submitted to the IRS, with an additional amendment added in 2012. On November 8, 2012, the Plan obtained a favorable tax determination letter from the IRS.

Note 8 - Tax Status (Continued)

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. Employee benefit plans are subject to routine audits by taxing jurisdictions; however there are currently no audits for any tax periods in progress for the Plan. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

Note 9 - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 10 - Reconciliation of Financial Statements to Form 5500 Annual Return/Report of Employee Benefit Plan

SABIN METAL CORP. RETIREMENT PLAN

Actuarial Assumptions and Funding Method

I. ACTUARIAL ASSUMPTIONS

The actuarial assumptions used in determining the liabilities and calculating the contributions to the pension plan are as follows:

PPA Prescribed Mortality:	2012 Combined Mortality Table.
PPA Prescribed Segment Rates for Minimum Required Contribution and AFTAP:	Unblended MAP-21 Segment Rates as of January 2012: 1st Segment Rate – 5.54% 2nd Segment Rate – 6.85% 3rd Segment Rate – 7.52%
Effective Interest Rate:	6.99% per annum, compounded annually, calculated in accordance with PPA.
PPA Prescribed Segment Rates for Maximum Deductible Contribution:	Unblended PPA 24-Month Segment Rates as of January 2012: 1st Segment Rate – 1.98% 2nd Segment Rate – 5.07% 3rd Segment Rate – 6.19%
FAS 35 Interest Rate:	5.0% per annum, compounded annually.
FAS 35 Mortality:	1971 Group Annuity Mortality Table.
Turnover Rates Before Retirement – All Causes:	Terminations are based on an employee's age in accordance with Table T-7 of the Actuary's Pension Handbook.
Salary Increases:	3.5% per annum, compounded annually.
Retirement Age:	Calculations reflect an assumed retirement age of 65 or attained age, if later.
Loading for Expenses:	$83,000.
Profit Sharing Plan Offset	Interest – 9.0% compounded annually. Mortality – 1971 Group Annuity Mortality Table.
Asset Valuation Method:	PPA Average Value, but not less than 90%, or more than 110% of Market Value. Expected Return on Assets – Funding Target Effective Interest Rate for applicable plan year.

II. FUNDING METHOD

The funding method (actuarial cost method), as prescribed by PPA, is the Unit Credit Cost Method without projection.

In general, for the plan years in which the value of plan assets is less than the plan's Funding Target, the Minimum Required Contribution with respect to any plan year is equal to the Target Normal Cost plus the Shortfall Amortization Charge for the plan year, if any.

PPA DEFINITIONS:

Target Normal Cost is the present value of all benefits which are expected to accrue during the plan year. The Target Normal Cost also includes estimated administrative expenses to be paid by the plan.

Funding Target is the present value of all benefits accrued as of the beginning of the plan year.

Funding Shortfall is the excess if any, of the Funding Target over the value of plan assets reduced by any credit balance.

Shortfall Amortization Charge is the total of the Shortfall Amortization Installments for the current plan year and each of the 6 preceding plan years. Each installment represents the 7 year amortization of the Shortfall Amortization Base for that year using the segment rates applicable for that year. Once established, these bases and installments are not redetermined in subsequent plan years.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

SABIN METAL CORP. RETIREMENT PLAN

Summary of Plan Provisions

EFFECTIVE DATE

December 31, 1965. Amended to conform to ERISA, effective January 1, 1976. Amended to conform to TEFRA, DEFRA and REA, effective January 1, 1984 and January 1, 1985. Further amended and restated on May 14, 1993 to comply with Tax Reform Act of 1986 and to make certain plan benefit improvements. Amended and restated in 2002 to comply with GUST and EGTRRA legislation. Amended and restated in 2010 to comply with PPA legislation.

ELIGIBILITY

All non-union employees of Sabin Metal Corporation and Sabin Metal West are eligible to participate on the December 31st following attainment of age 20½ and completion of 6 months of service.

CREDITED SERVICE

Counted from date of employment for purposes of eligibility and vesting; counted from date of participation for benefit accrual purposes (except all service counted for $25 minimum benefit).

RETIREMENT DATES

Normal:	Age 65 or completion of 5 years of plan participation, if later.
Deferred:	Allowed.
Early:	No specific provision.
Disability:	Any age.

VESTING

With 5 or more years of Credited Service.

RETIREMENT BENEFITS

At or after Normal Retirement Date, a Participant will receive a monthly benefit of 30% of his Final Average Compensation, plus 30% of such Compensation in excess of 1984 Social Security Covered Compensation; reduced by 1/25 for each Year of Credited Service under 25 years. This benefit is prorated, based on years of participation, if retirement or termination of employment occurs before Normal Retirement Date.

Harbridge
Consulting Group
a BPAS Company

Benefits are further reduced by the monthly equivalent of the vested account balance from the Sabin Metal Corp. Profit Sharing Plan. Such monthly equivalent is calculated by projecting such balance at termination to the Normal Retirement Date using a 9% annual interest rate. Vested account balances are frozen as of December 31, 1990, for purposes of the offset application, but are adjusted to reflect actual investment earnings after that date.

For employees who terminate employment or retire after June 30, 1992, a past service benefit is added to the above benefit, equal to 1% of Average Compensation (determined as of December 31, 1990) in excess of 1984 Social Security Covered Compensation times Years of Service (maximum = 5). A $25 per month per year of service minimum benefit (before application of the profit sharing offset) is also provided.

Final Average Compensation is the average monthly compensation during the five highest consecutive calendar years during the last ten years of employment, subject to a maximum of $245,000 (adjusted for changes in the cost-of-living after 2010).

OPTIONAL METHODS OF PAYMENT

(a) Ten Years Certain and Continuous (Basic Option for Single Participants):
A monthly benefit payable for life with 120 monthly payments guaranteed.

(b) 50% Joint and Survivor Annuity with 120 monthly payments guaranteed (Basic Option for Married Participants):
A reduced monthly benefit payable for life with 120 monthly payments guaranteed; and upon death after the tenth anniversary of the effective date of the pension, 50% of the benefit is continued to the Participant's spouse.

(c) 75% and 100% Joint and Survivor Annuity with 120 monthly payments guaranteed:
A reduced monthly benefit payable for life with 120 monthly payments guaranteed; and upon death after the tenth anniversary of the effective date of the pension, 75% or 100% of the benefit is continued to the Participant's spouse.

PRE-RETIREMENT DEATH BENEFIT

The present value of a Participant's accrued benefit, subject to the requirements of the Retirement Equity Act of 1984 and including an optional form of payment with 120 monthly payments guaranteed.
