Note H - Summary of Accounting Policies

Basis of accounting

The financial statements of the Plan are prepared under the modified cash basis of accounting. Investment income and contributions are recognized when received and disbursements are recognized when made. Accordingly, the financial statements are not intended to present net assets and changes in net assets of the Plan in conformity with generally accepted accounting principles.

Investment valuation and income recognition

The Plan's investments are stated at fair value, except for the guaranteed account that is valued at contract value. Shares of mutual funds are valued at quoted market prices, which represent the net asset value of the shares held by the Plan at year-end.

Notes receivable from participants

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are reclassified as distributions based upon the terms of the Plan agreement.

Note H - Summary of Accounting Policies (Continued)

Administrative fees

Officers or employees of the plan sponsor perform administrative functions for the Plan. No officer or employee receives compensation from the Plan. The independent auditors' fees are paid directly by the plan sponsor. The personal retirement account fees paid by the participants are shown as administrative fees.

Management estimates

The preparation of financial statements in conformity with the modified cash basis of accounting requires Plan management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of Plan income and expenses during the reporting period. Actual results could differ from those estimates.

Note I - Information Certified by the Plan's Trustee

Contributions to the guaranteed account are guaranteed against loss of principal and earn a minimum rate of return determined by SLIC at the beginning of the year. The actual rates of interest at December 31, 2012 and 2011 were 3.45% and 3.60%, respectively.

Note K - Participant Directed Funds

Note L - Fair Value Measurements

FASB ASC 820-10, *Fair Value Measurement*, established a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

Note L - Fair Value Measurements (Continued)

The three levels of fair value hierarchy under FASB ASC 820-10 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 Inputs to the valuation methodology are observable other than level 1 prices, such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Inputs to the valuation measurement are unobservable, supported by little or no market data, and are significant to the fair value of the assets and liabilities.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2012 and 2011.

Pooled separate accounts: Valued at the number of shares of the underlying fund multiplied by the closing net asset value (NAV) per share quoted by that fund.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Fair value of assets measured on a recurring basis at December 31, 2012:

	Level 1	Level 2	Level 3	Total
Shares of pooled separate accounts	$ -	$ 1,272,182	$ -	$ 1,272,182
	$ -	$ 1,272,182	$ -	$ 1,272,182

Note L - Fair Value Measurements (Continued)

Fair value of assets measured on a recurring basis at December 31, 2011:

	Level 1	Level 2	Level 3	Total
Shares of pooled separate accounts	$ -	$ 1,010,475	$ -	$ 1,010,475
	$ -	$ 1,010,475	$ -	$ 1,010,475

As of December 31, 2012 and 2011, the Plan had no assets measured at fair value on a non-recurring basis and no liabilities measured at fair value on a recurring or non-recurring basis.

Note M - Related-Party Transactions

Certain Plan investments are shares of separate accounts and deposits in guaranteed funds managed by Sentry Life Insurance Company (SLIC) . SLIC is the trustee of the Plan's assets as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for investment management services, which are netted against investment income, amounted to approximately $0 and $2,000 for the years ended December 31, 2012 and 2011, respectively.

Note N - Plan Termination

Although they have not expressed any intent to do so, the plan sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

Note O - Taxes

The plan sponsor adopted a Defined Contribution Plan and Trust Basic Plan Document #01 (a prototype plan) which received a favorable opinion letter from the Internal Revenue Service (IRS) on March 31, 2008, which stated that the Plan and related trust are designed in accordance with the applicable requirements of the Internal Revenue Code. The plan administrator believes that the Plan currently is designed and being operated in compliance with the applicable requirements of the Internal Revenue Code and that, therefore, the Plan continues to qualify under Section 401(a) and the related trust continues to be tax-exempt as of December 31, 2012. Therefore, no provision for income taxes is included in the Plan's financial statements.

The modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles, require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) contingency if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Department of Labor or by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for the years prior to 2009.

Note P - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Note Q - Subsequent Events

Distributions totaling approximately $600 were made after December 31, 2012 to participants who terminated service in prior years.
