Assumptions Made In Valuing Spouse's Benefit

Eighty-five percent of the male and fifty percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Forms

All married participants are assumed to elect the QSJA form and all single participants are assumed to elect the 10CC form.

Provision for Expenses

The expected administrative expenses expected to be paid from plan assets were included in the Target Normal Cost for minimum contribution purposes. Expenses were subtracted from the Expected Return on Assets for FAS 87 expense purposes.

FAS 87 Measurement Date

January 1

Fiscal Year

The 12-month period ending each December 31.

Asset Method

Funding: Market Value of Assets plus an adjustment to defer full recognition of investment losses and gains over a two year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the prior year effective rate minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Contributions made after the end of the prior plan year will be discounted for interest at the prior year's effective rate.

Market Value of Assets plus, for FAS 35 purposes only, any contributions for prior plan years that will be made in this plan year.

The segmented interest rates used for determining the funding target were 5.26%, 5.82% and 6.38%. The funding target is calculated using the segmented rates as required under PPA '06 and is in the allowable range for the current plan year.

The asset method used in the prior valuation was the Market Value of Assets plus any unpaid contributions discounted for interest.

The mortality table for the funding target was changed as required under PPA '06.

Expected expenses were not added to the Target Normal Cost in the prior valuation.

***Justification for
Changes in Actuarial
Assumptions***

The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."

Assumptions Made In Valuing Spouse's Benefit

Eighty-five percent of the male and fifty percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Forms

All married participants are assumed to elect the QSJA form and all single participants are assumed to elect the 10CC form.

Provision for Expenses

The expected administrative expenses expected to be paid from plan assets were included in the Target Normal Cost for minimum contribution purposes. Expenses were subtracted from the Expected Return on Assets for FAS 87 expense purposes.

FAS 87 Measurement Date

January 1

Fiscal Year

The 12-month period ending each December 31.

Asset Method

Funding: Market Value of Assets plus an adjustment to defer full recognition of investment losses and gains over a two year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the prior year effective rate minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Contributions made after the end of the prior plan year will be discounted for interest at the prior year's effective rate.

Market Value of Assets plus, for FAS 35 purposes only, any contributions for prior plan years that will be made in this plan year.

Employees Valued

Only participants as of the valuation date were valued.

***Changes in
Assumptions and
Methods since the
Last Actuarial
Valuation***

The segmented interest rates used for determining the funding target were 5.26%, 5.82% and 6.38%. The funding target is calculated using the segmented rates as required under PPA '06 and is in the allowable range for the current plan year.

The asset method used in the prior valuation was the Market Value of Assets plus any unpaid contributions discounted for interest.

The mortality table for the funding target was changed as required under PPA '06.

Expected expenses were not added to the Target Normal Cost in the prior valuation.

***Justification for
Changes in Actuarial
Assumptions***

The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
