2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting and Use of Estimates

The financial statements of the Plan are prepared on the accrual basis of accounting. The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to use estimates and assumptions that affect the accompanying financial statements and disclosures. Actual results could differ from these estimates. Information provided and certified by the Trustee has been rounded to the whole dollar for presentation purposes and cents have been omitted; actual amounts are displayed in the totals.

Investments

The ERISA imposes certain duties on the parties who are responsible for the operation of the Plan. These parties, called fiduciaries, have a duty to invest plan assets in a prudent manner. However, an exception exists for plans which comply with ERISA Section 404(c) and permit a participant to exercise control over the assets in his/her account and choose from a broad range of investment alternatives. This Plan is intended to be a Section 404(c) plan. This means the Employee, and not the Plan fiduciary, is responsible for the investment decisions relating to the assets in their individual accounts under the Plan.

The investments of the Plan are stated at fair value based on quoted market prices and net appreciation (depreciation) for the year as reflected in the Plan's statement of changes in net assets available for benefits. The net appreciation (depreciation) in the fair value of the investments consists of realized gains or losses and unrealized appreciation or depreciation on the investments. Shares of registered investment companies are valued at quoted market prices which represent the net asset value of shares held by the plan at year-end. Investment income is recognized when earned.

Participant loans

Participants may borrow from their fund accounts a minimum of $500 and a maximum equal to the lesser of $50,000 or 50% of their vested account balance. Up to two loans are permitted at a time. Loan transactions are treated as a transfer to/(from) the investment fund from/(to) the Participant Loan fund. The loans are secured by the balance in the participant's account and bear interest at a rate commensurate with local prevailing rates as determined quarterly by the Plan administrator. Interest rates in 2009 were between 4.25% to 9.25%. Principal and interest are paid through periodic payroll deductions.

Plan expenses

Audit fees and other miscellaneous fees are paid by the employer. Costs of administering the Plan are paid by the Plan.

3. Income Tax Status

On December 10, 2001 the Internal Revenue Service issued a determination letter as to the qualified status of the Plan. The Plan is qualified under Section 401(a)(4)-1(b) of the Internal Revenue Code (the "Code") on the basis of a design based safe harbor described in the regulations. The financial statements are prepared with the assumption that the Plan has maintained its exemption under the Code.

4. Fair Value Measurements

Financial Accounting Standards Board Statement No. 157, Fair Value Measurements (FASB Statement No. 157), establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in the active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the assets or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of

The following table sets by level, within the fair value hierarchy, the Plan's assets at fair values as of December 31, 2009:

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting and Use of Estimates

The financial statements of the Plan are prepared on the accrual basis of accounting. The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to use estimates and assumptions that affect the accompanying financial statements and disclosures. Actual results could differ from these estimates. Information provided and certified by the Trustee has been rounded to the whole dollar for presentation purposes and cents have been omitted; actual amounts are displayed in the totals.

Investments

The ERISA imposes certain duties on the parties who are responsible for the operation of the Plan. These parties, called fiduciaries, have a duty to invest plan assets in a prudent manner. However, an exception exists for plans which comply with ERISA Section 404(c) and permit a participant to exercise control over the assets in his/her account and choose from a broad range of investment alternatives. This Plan is intended to be a Section 404(c) plan. This means the Employee, and not the Plan fiduciary, is responsible for the investment decisions relating to the assets in their individual accounts under the Plan.

The investments of the Plan are stated at fair value based on quoted market prices and net appreciation (depreciation) for the year as reflected in the Plan's statement of changes in net assets available for benefits. The net appreciation (depreciation) in the fair value of the investments consists of realized gains or losses and unrealized appreciation or depreciation on the investments. Shares of registered investment companies are valued at quoted market prices which represent the net asset value of shares held by the plan at year-end. Investment income is recognized when earned.

Participant loans

Participants may borrow from their fund accounts a minimum of $500 and a maximum equal to the lesser of $50,000 or 50% of their vested account balance. Up to two loans are permitted at a time. Loan transactions are treated as a transfer to/(from) the investment fund from/(to) the Participant Loan fund. The loans are secured by the balance in the participant's account and bear interest at a rate commensurate with local prevailing rates as determined quarterly by the Plan administrator. Interest rates in 2009 were between 4.25% to 9.25%. Principal and interest are paid through periodic payroll deductions.

Plan expenses

Audit fees and other miscellaneous fees are paid by the employer. Costs of administering the Plan are paid by the Plan.

3. Income Tax Status

On December 10, 2001 the Internal Revenue Service issued a determination letter as to the qualified status of the Plan. The Plan is qualified under Section 401(a)(4)-1(b) of the Internal Revenue Code (the "Code") on the basis of a design based safe harbor described in the regulations. The financial statements are prepared with the assumption that the Plan has maintained its exemption under the Code.

4. Fair Value Measurements

Financial Accounting Standards Board Statement No. 157, Fair Value Measurements (FASB Statement No. 157), establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in the active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the assets or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of

The following table sets by level, within the fair value hierarchy, the Plan's assets at fair values as of December 31, 2009:
