Note 1 - Description of Plan

Effective January 1, 2006, Quantitative Risk Management Inc. (the company) adopted the QRM 401(k) Retirement Savings Plan (the plan). The following description of the plan provides only general information. Participants should refer to the plan agreement for a complete description of the plan's provisions.

General

The plan is a defined contribution plan maintained on a calendar year basis. Any employee of the company who has earned income within the United States of America is eligible to participate in the plan upon date of hire. The plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Participant Contributions

Participants may elect to make 401(k) deferral contributions up to 100% of their total earnings. These contributions are made out of pretax earnings and are subject to certain IRS limitations. Participants may also make voluntary after-tax Roth 401(k) contributions, which are also subject to certain IRS limitations.

Employer Contributions

The employer makes a safe harbor matching contribution equal to 100% of the first 3% (in relation to compensation) of each participant's contribution and 50% of the next 2% (in relation to compensation) of each participant's contribution.

Participant Accounts

Each participant's account is credited with the participant's contributions, the employer's matching contribution and allocations of plan earnings, and charged with allocations of plan losses and administrative expenses. Allocations are based on participant compensation or participant-directed account balances, as defined. The benefit to which the participant is entitled is the benefit that can be provided from the participant's vested account. Participants are immediately vested in all of their accounts.

Benefits

Benefit payments are generally paid in a lump sum as soon as practicable after employment with the company has ended. Participants may elect to defer commencement of distributions until April of the calendar year after they attain the age of 70½. Until such time as the funds are distributed, the participant is entitled to receive a pro rata share of fund earnings. Benefits may also be paid directly to an eligible retirement plan as a rollover distribution.

Note 1 - Description of Plan (Continued)

Administrative Expenses

All administrative costs, charges and expenses are paid by the plan to the extent not paid by the company.

Note 2 - Summary of Significant Accounting Policies

Significant accounting policies are described below and have been consistently applied.

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting.

Investments

Investments are reported at fair value in accordance with accounting principles generally accepted in the United States of America (GAAPUSA). See Note 3 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with GAAPUSA requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of additions to and deductions from net assets available for benefits during the reporting period. Actual results could differ from those estimates.

Subsequent Events

The company has evaluated subsequent events through August 27, 2010, the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

GAAPUSA defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market or, in the absence of a principal market, the most advantageous market accessible to the reporting entity as of the measurement date. Under GAAPUSA, the principal market is the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity. The most advantageous market, which may be a hypothetical market, is the market in which the reporting entity would sell the asset or transfer the liability with the price that maximizes the amount that would be received for the asset or minimizes the amount that would be paid to transfer the liability, considering transaction costs in the respective market.

GAAPUSA describes three approaches to measuring fair value: the market approach, the income approach and the cost approach. Each approach includes multiple valuation techniques. GAAPUSA does not prescribe which valuation technique should be used when measuring fair value, but does establish a fair value hierarchy that prioritizes the inputs used in applying the various techniques based on the degree to which such inputs are observable to market participants. Inputs broadly refer to the assumptions that market participants use to make pricing decisions, including assumptions about risk.

The plan's investments are classified in one of the following three categories based upon the inputs used to determine their respective fair values.

- Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

- Level 2 - Observable market-based inputs or unobservable inputs that are corroborated by market data. These inputs may include quoted prices for similar assets or liabilities in active markets as well as quoted prices for identical or similar assets or liabilities in inactive markets.

- Level 3 - Unobservable inputs that cannot be corroborated by market data. These inputs reflect management's best estimate of fair value using its own assumptions about the assumptions a market participant would use in pricing the asset or liability.

When the inputs used to value an investment fall into more than one level, the investment is classified in its entirety based on the lowest level input that is significant to that investment's fair value measurement. Management's assessment of the significance of a particular input to the fair value measurement requires judgment and is dependent on factors specific to the investment. Valuation techniques used need to maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Note 3 - Fair Value Measurements (Continued)

As of December 31, 2009 and 2008, the following valuation methodologies have been used to value the plan's investments:

- Registered investment companies (mutual funds) - Valued at the reported net asset value (NAV) of the shares held by the plan at year-end.

The following tables summarize the plan's financial assets and liabilities that are measured at fair value on a recurring basis as of December 31, 2009 and 2008:

	2009			
	Level 1	Level 2	Level 3	Total
Registered Investment Companies				
Money Market	$ 537,399	$ -	$ -	$ 537,399
Fixed Income	1,014,746	-	-	1,014,746
Balanced	3,235,147	-	-	3,235,147
Domestic Equity	3,185,156	-	-	3,185,156
International Equity	2,060,087	-	-	2,060,087
Other	87,352	-	-	87,352
	$ 10,119,887	**$ -**	**$ -**	**$ 10,119,887**

	2008			
	Level 1	Level 2	Level 3	Total
Registered Investment Companies				
Money Market	$ 289,714	$ -	$ -	$ 289,714
Fixed Income	577,909	-	-	577,909
Balanced	1,729,706	-	-	1,729,706
Domestic Equity	1,900,408	-	-	1,900,408
International Equity	1,002,789	-	-	1,002,789
Other	59,484	-	-	59,484
	$ 5,560,010	**$ -**	**$ -**	**$ 5,560,010**

The plan's investments are exposed to various risks such as interest rate, credit and overall market volatility. Due to these risk factors, it is reasonably possible that changes in the value of investments will occur in the near term and materially affect the amounts reported in the statement of net assets available for benefits.

Note 4 - Investments

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Vanguard Fiduciary Trust Company (Vanguard), the plan's trustee, has certified as to the completeness and accuracy of net assets available for benefits as of December 31, 2009 and 2008, the related investment activity reflected in the statement of changes in net assets available for benefits for the year ended December 31, 2009, and the schedule of assets held at end of year as of December 31, 2009, as indicated below and in total.

The following investments represent 5% or more of the plan's net assets as of December 31, 2009 or 2008:

	2009		2008	
	Number of Units	Fair Value	Number of Units	Fair Value
Registered Investment Companies				
Vanguard Funds				
Target Retirement 2035 Fund	121,540	$ 1,412,293	82,644	$ 764,455
Target Retirement 2045 Fund	92,417	1,110,857	65,719	628,928
500 Index Fund	9,406	965,710	6,726	558,846
Emerging Markets Stock Index Fund	29,753	770,906	20,987	312,705

For the year ended December 31, 2009, the plan's investments in registered investment companies (including gains and losses on investments bought and sold as well as held during the year) appreciated in value by $1,968,783.

Note 5 - Termination

Although it has not expressed any intent to do so, the company has the right to discontinue contributions and to terminate the plan at any time, subject to the provisions of ERISA.

Note 6 - Related Party Transactions

The plan invests in shares of registered investment companies managed by an affiliate of Vanguard. Vanguard acts as trustee for the plan. Transactions in such investments qualify as party-in-interest transactions, which are exempt under the prohibited transaction rules.

Note 7 - Tax Status

On January 1, 2006, the plan adopted a Vanguard prototype plan document. Vanguard has received a determination letter from the Internal Revenue Service and has represented to the plan that, as designed, the plan is in compliance with the applicable requirements of the Internal Revenue Code.
