NOTE 1 - DESCRIPTION OF THE PLAN

The following description of the Nylic Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan document and summary plan description for a more complete description of the Plan's provisions.

A. General

The Plan is a non-contributory defined benefit pension plan covering substantially all eligible agents under contract with New York Life Insurance Company (the "Company") or its domestic life insurance subsidiaries on or after the effective date of the Plan, January 1, 1982. The Plan is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and the Internal Revenue Code of 1986, as amended ("Code").

B. Pension Benefits

Plan participants are entitled to annual pension benefits beginning at normal retirement date, which is the later of the last day of the month in which age 65 is attained or the completion of 5 years of vesting service. The benefit generally is the sum of the agent's Frozen Accrued Benefit, if applicable, and his/her Earnings-Related Benefit Accruals ("ERBAs"). The Frozen Accrued Benefit is the amount accrued as of December 31, 1990 for service, if any, on or prior to that date under the production-related benefit formula. For periods of service after December 31, 1990, the agent's ERBAs are calculated by multiplying the sum of his/her Pensionable Earnings credited after 1990 by 2.75%. The Plan also provides benefits to certain eligible participants whose retirement benefit under the Plan is less than their Senior NYLIC Income (i.e., compensation under certain agents' contracts for agents who have completed 20 Nylic years) so that their total retirement benefit under the Plan, subject to applicable Code limits, is equal to their Senior NYLIC Income.

The Plan permits early retirement if the agent has completed at least 20 years of vesting service. Annuity benefits paid prior to normal retirement age are reduced for early payment. In addition, the Plan provides for a deferred vested benefit for participants who do not qualify for a normal or early retirement benefit, but have completed at least 5 years of vesting service at termination. Agents may elect to receive their pension benefits on a single life basis, a 50% joint and survivor basis, or a 75% joint and survivor basis (the automatic form of payment for married participants).

C. Death and Disability Benefits

The Plan provides for a 75% pre-retirement survivor annuity payable to a participant's surviving spouse in the event of the death of an active agent who has completed at least 5 years of vesting service. A survivor annuity is payable to the surviving spouse of a participant who dies while receiving benefits in the form of a joint and survivor annuity.

Participants with 10 years of vesting service who become totally and permanently disabled may retire at any time and are eligible to receive a disability retirement benefit after the disability has existed continuously for 30 days.

D. 401(h) Account

On January 1, 1990, the Plan established an account under Section 401(h) of the Code to prefund postretirement health care benefits for agents. In accordance with Section 401(h), the Plan's investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retired agents and their beneficiaries.

The related obligations for health benefits under the Section 401(h) account are not included in this Plan's obligations in the Statements of Accumulated Benefits, but are reported as obligations in the financial statements of the Group Plan for New York Life Agents. These assets are held in an immediate participation guarantee contract issued by the Company. Employer contributions or qualified transfers to the 401(h) account are determined annually at the discretion of the Plan sponsor.

The following is a reconciliation of net assets available for benefits per the financial statements to the Form 5500:

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Method of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Certain amounts in prior years have been reclassified to conform to the current year presentation. These reclassifications had no effect on net assets available for benefits or changes in net assets available for benefits as previously reported.

B. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions, including estimates that affect the actuarial present value of accumulated benefits, which adjust for the time value of money and the probability of payment, at the date of the financial statements. Actual results could differ from those estimates. The method for developing the actuarial present value of accumulated benefits for agents is described in Note 2F – Actuarial Present Value of Accumulated Benefits.

C. Valuation of Investments

Under Department of Labor instructions for the filing of Form 5500 and GAAP, immediate participation guarantee ("IPG") contracts entered into before March 20, 1992 may be valued at fair value or at amounts reported by the insurance company, that is contract value. The Company has elected to use contract value as the basis for valuing the Plan's IPG contract, which was executed on April 30, 1982. Contract value represents contributions made under the contract, plus interest earned, less funds used to pay benefits to participants and their beneficiaries and expenses.

The authoritative guidance allows companies to determine the fair value of certain investments using net asset value ("NAV") as a practical expedient, without further adjustments, if the fair value of the investment is not readily determinable and the investee entity issues financial statements in accordance with measurement principles for investment companies. If it is probable that the investment will be sold at a price other than NAV, the use of this practical expedient is prohibited. The investments in the separate accounts and the real estate investment funds are reported at fair value based on the NAV of the units held at the valuation date consistent with the practical expedient.

Purchases and sales of investments are recorded on a trade-date basis.

D. Income recognition

Net increases or decreases in the market value of invested assets include realized gains or losses on investments sold and unrealized gains or losses on investments held during the year. Interest income is recorded on the accrual basis.

E. Benefits

Benefit payments to participants are recorded upon distribution.

F. Actuarial Present Value of Accumulated Benefits

Accumulated benefits represent the future periodic payments that are attributable to the service rendered by agents. Under the Plan's provisions, accumulated benefits include benefits expected to be paid to (a) retired or terminated agents or their beneficiaries, (b) beneficiaries of agents who have died, and (c) active

agents or their beneficiaries. With respect to service credited, the accumulated benefits under the Plan are based on the agent's sales production and persistency of that production during their period of credited service through December 31, 1990. For credited service after December 31, 1990, benefits are based on pensionable earnings. The accumulated benefits for active agents do not anticipate future increases in pensionable earnings.

For certain eligible participants, if their benefit under the Plan is less than their Senior NYLIC Income, their total retirement benefit under the Plan, subject to applicable Code limits, is equal to their Senior NYLIC Income.

The actuarial present value of accumulated benefits is determined by Aon Hewitt Associates, LLC, the Plan's actuary. The actuarial present value of accumulated benefits is the amount that results from applying actuarial assumptions to adjust the accumulated benefits to reflect the time value of money and the probability of payment. The significant actuarial assumptions used in the valuation as of January 1, 2013 were (a) life expectancy (Fully Generational RP-2000 Combined Healthy Participant Table using Scale AA for healthy participants and the Revenue Ruling 96-7 mortality table for disability after December 31, 1994 for disabled participants), (b) retirement rates (rates vary by Nylic service for pre-1991 agents and age for post-1990 agents), (c) disability rates (10% of the 1987 Commissioners Group Disability Table), (d) turnover rates (rates vary by service until age 65), and (e) the valuation interest rate. The significant actuarial assumptions used in the valuation as of January 1, 2013 changed from those used as of January 1, 2012 as described below.

Retirement rates were modified to better reflect anticipated experience. The valuation interest rate used to determine the actuarial present value of accumulated benefits was changed from 5.00% for 2012 to 4.25% for 2013. These assumption changes resulted in an increase of approximately $170,019 thousand in the present value of accumulated benefits.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated benefits.

G. Administration

The Plan Administrator (the Company) is responsible for administration of the Plan. The Plan pays certain expenses of service providers unrelated to the Company and certain direct expenses incurred by the Company with respect to the Plan. The group annuity contract issued with respect to the general account provides for the payment of an annual administration charge, based on a percentage of assets maintained in the fixed account under the contract. The group annuity contract issued with respect to the separate accounts provides for the payment of annual fees for the management of each separate account. The Real Estate Funds (as defined in Note 3 below) provide for the payment of quarterly management and incentive fees for the management of the funds.

Separate account unit values are reduced by the management fees attributable to such separate account, except that the management fees for the Private Equity and Hedge Fund Separate Accounts are direct payments to the manager. The NAVs of the Plan's investment in the Real Estate Funds are reduced by the funds' management and incentive fees. The Company pays all remaining administrative expenses of the Plan.

H. Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board ("FASB") issued updated guidance on fair value measurements and related disclosure requirements. The updated guidance clarified existing guidance related to the application of fair value measurement methods and requires expanded disclosures. The expanded disclosures required by this guidance are included in Note 10 – Fair Value Measurements. The Company adopted this guidance effective January 1, 2012. The adoption of this guidance did not impact the Plan's financial statements.

NOTE 3 - PLAN INVESTMENTS

The Plan currently invests in two group annuity contracts issued to the Trustees of the Nylic Retirement Plan Trust ("Contractholder") by the Company: one contract is an IPG contract relating to the Company's general account ("GA Contract"), and the other relates to pooled separate accounts ("SA Contract").

Certain Plan assets were also directly invested in the Morgan Stanley Prime Property Fund, LLC ("Prime Fund") and Invesco Core Real Estate – U.S.A, L.P. ("Invesco Fund"), third party real estate investment funds ("Real Estate Funds").

All of the Plan's investments are held in the Nylic Retirement Plan Trust. The Company is the issuer of the GA and SA Contracts, and New York Life Investment Management LLC ("NYLIM"), an indirect wholly owned subsidiary of the Company, is the investment manager with Cornerstone Capital Management Holdings LLC, MacKay Shields LLC, GoldPoint Partners LLC (indirect wholly owned subsidiaries of the Company), and Private Advisors, LLC (an indirect majority-owned subsidiary of the Company) as sub-advisors of some of the pooled separate accounts under the SA Contract.

Immediate Participation Guarantee Contract:

The GA Contract is a general account contract, under which a fixed dollar account ("FDA") is maintained that reflects the investment experience of the segment of the Company's general account to which the GA Contract and contracts in its class are assigned, in accordance with the Company's Investment Year Method ("IYM"). The basic principle of the IYM is that the assets purchased by the segment in a calendar year with available net cash flow are accounted for as a separate investment fund. The GA Contract is not to be assigned to a third party.

The FDA is credited with contributions, interest, amounts transferred in from other Group Annuity Contract(s) and dividends, if any, and charged with expenses, amounts transferred to other Group Annuity Contract(s), pension benefits, non-pension benefits, amounts withdrawn on discontinuance, and investment selection charges ("ISCs").

As of the last day of each calendar year, the Company, as insurer, credits interest to the FDA by applying a net annual rate of interest (equal to the rate of net investment income earned during the calendar year for the GA Contract, determined in accordance with the Company's IYM) to the average balance in the FDA. The interest rate earned by the FDA in 2013 and 2012 was 5.31% and 5.55%, respectively.

Whenever a payment is to be made from the FDA pursuant to the GA Contract's transfer, non-pension benefit or the discontinuance provisions, the Company, as insurer, determines the ISC, if any, which is to be withdrawn from the FDA. An ISC will apply when the new investment earnings rate exceeds the contract earnings. In 2013 and 2012, there were no ISCs.

In the event the Contractholder elects to discontinue the GA Contract, the Company, as insurer, will determine the amount required to purchase annuities for pensioners and terminated plan participants as of

the date of discontinuance on the actuarial basis provided for in the GA Contract, and will withdraw that amount from the FDA. If the amount required exceeds the FDA, then an additional contribution from the Company, as Plan sponsor, in the form of a transfer from the SA Contract, will be due. If the amount required is less than the FDA, the remaining balance may be paid out in a single sum, subject to an ISC or an investment selection credit, or in installment payments over 5 years without an ISC.

Group Annuity Contract for Pooled Separate Accounts:

The SA Contract is a multiple separate account contract that provides for the investment of funds in a series of non-guaranteed pooled separate accounts ("Separate Accounts"). The only other contract participating in these separate accounts is a contract issued to the Trustees of the New York Life Insurance Company Pension Plan Trust. Under the SA Contract, the Contractholder bears all investment risk and has no guarantees as to principal and interest. There are also limited guarantees with respect to mortality and expense.

Contractual accounts are maintained under the SA Contract, each of which reflects the investment experience of the Company's corresponding Separate Account. The dollar value of any contractual account as of any day will be equal to the number of units in such account at the end of the day multiplied by the unit value for that day. The dollar amount of a credit or withdrawal from any contractual account as of any day will be converted into a number of units by dividing the dollar amount by the unit value for the day.

Credits to or charges against each separate account are made in connection with each contract participating in that separate account. The investment experience of each separate account is recorded by the Company by means of an accounting system involving units and unit values. Units are the measure used to determine the amount in each of the contractual accounts that participate in the corresponding separate account.

The Contractholder may, for any reason, terminate the SA Contract as of any business day, in which case that day will be the Termination Date. The dollar value of the balance in each of the contractual accounts as of the Termination Date (or the valuation date next following the Termination Date where the assets are not valued on a daily basis) will be transferred to the Contractholder or to another funding medium designated by the Contractholder in a single sum.

NOTE 4 - FEDERAL INCOME TAXES

The Plan applied to the Internal Revenue Service ("IRS") for a favorable determination letter that the Plan, as amended and restated through December 16, 2009, continues to meet the qualification requirements of Section 401(a) of the Code and that its trust is exempt from federal income tax under Section 501(a) of the Code. As part of this submission, the Plan was restated to incorporate changes since the Plan's previous determination letter dated August 31, 2005, including legal changes to comply with regulatory and legislative requirements and Plan amendments.

The IRS has determined and informed the Company by a letter dated August 3, 2012 that the Plan and related trust are designed in accordance with applicable sections of the Code. The Plan has been amended since the December 16, 2009 restatement. However, the Company believes that the Plan is designed, and is currently being operated in compliance with the applicable requirements of the Code. Since the trust is exempt from taxation, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE 5 - FUNDING POLICY

The Plan is funded solely by Company contributions. The Company's funding policy is to make annual contributions that are no less than the minimum amount needed to comply with the requirements of ERISA and the Code, as amended by the Pension Protection Act of 2006 ("minimum funding requirements"), and no greater than the maximum amount deductible for federal income tax purposes. The Company did not make any contributions attributable to the 2013 Plan Year. On September 9, 2013, the Company made a voluntary contribution to the Plan of $44 million which is reflected as a receivable on the Statement of Net Assets Available for Benefits for the 2012 Plan year. No contributions were required for either Plan year to comply with the minimum funding requirements.

Although it has not expressed any intention to do so, the Company has the right to terminate the Plan and discontinue its contributions at any time, subject to the provisions set forth in ERISA.

NOTE 6 - PLAN TERMINATION

In the event of the termination of the Plan, the Plan provides that the rights of affected participants to the benefits accrued to the date of termination would be non-forfeitable, but there would be no recourse for these non-forfeitable benefits other than from the Plan's assets or the Pension Benefit Guaranty Corporation ("PBGC").

In the event of Plan termination, the Plan funds would be allocated on the basis of actuarial valuation in the following order of priority prescribed by ERISA:

1. To retired participants who were receiving benefits 3 years before the Plan termination date; participants who would have received a benefit 3 years before the Plan termination date if they had retired before that 3-year period; and spouses or beneficiaries of deceased participants who were receiving benefits 3 years prior to the Plan termination date or who would have been receiving benefits if the deceased participants had retired before such date

2. To all other benefits guaranteed by the PBGC that are not included in paragraph 1 above (for retired participants, spouses or beneficiaries of deceased participants receiving a benefit, participants eligible to retire on the Plan termination date, and participants or former participants not eligible to retire who are entitled to receive a deferred vested retirement benefit)

3. To all other non-forfeitable benefits promised by the Plan but not guaranteed by the PBGC (generally, other vested benefits). Plan funds are first allocated based on Plan provisions in effect 60 months before the Plan termination date, and then according to subsequent plan amendments in order from oldest to newest

4. To all other remaining benefits

If sufficient Plan funds are not available under any paragraph, participants receive a pro-rata share of the funds allocated.

If there are more funds than necessary to satisfy all Plan liabilities, the excess will be paid to the Company.

The Plan Administrator may require that any benefits be withdrawn in cash, as an immediate or deferred annuity or other periodic payments as determined by the Plan Administrator.

Vested benefits under this Plan are insured by the PBGC, a U.S. government agency, if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under covered plans, and the amount of benefit protection is subject to certain limitations.

The PBGC guarantees vested benefits at the level in effect on the date of Plan termination. However, if benefits have been increased within the five years before Plan termination, the whole amount of the Plan's vested benefits or the benefit increase may not be guaranteed to the full extent as would have been paid under the Plan. In addition, there is a ceiling on the amount of monthly benefit that the PBGC guarantees, which is adjusted periodically.

NOTE 7 – RISKS AND UNCERTAINTIES

The pooled separate accounts under the Plan’s SA Contract and the real estate investment funds invest in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Actuarial present values of accumulated benefits are reported based on certain actuarial assumptions, which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions could occur in the near term and could be material to the financial statements.

NOTE 8 – CERTIFIED INFORMATION

The Company, as the issuer of the GA Contract and the SA Contract, and Bank of New York Mellon, as the trustee of the assets invested in the Real Estate Funds, have certified that the following information stated below and included in the Statements of Net Assets Available for Benefits and the Statements of Changes in Net Assets Available for Benefits is complete and accurate in accordance with Section 2520.103-5 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA.

NOTE 9 - PARTY-IN-INTEREST TRANSACTIONS

The Plan currently invests in two group annuity contracts issued by the Company: the GA Contract (an IPG contract relating to the Company's general account) and the SA Contract (relating to pooled separate accounts). The GA Contract provides for the payment of an annual administration charge to the Company, based on a percentage of assets maintained in the fixed account under the contract. Under the SA Contract, the separate accounts are, in whole or in part, managed by the Company and/or NYLIM (or a NYLIM affiliate), an indirect wholly owned subsidiary of the Company that receives fees for such services. The SA Contract provides for the payment of annual fees for the management of each separate account. Separate account unit values are reduced by the management fees attributable to such separate account, except that the management fees for the Private Equity and Hedge Fund Separate Accounts are direct payments to the manager. Both the Company and NYLIM are parties-in-interest as defined by ERISA.

NOTE 10 – FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative guidance around fair value establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which

the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

The levels of the fair value hierarchy are based on the inputs to the valuation as follows:

Level 1	Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
Level 2	Observable inputs other than Level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.
Level 3	Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability.

Inputs used to measure the fair value of an asset may fall into different levels of the fair value hierarchy. The Plan determines the level in which the fair value falls based upon the lowest level input that is significant to the determination of fair value.

The following tables present the Plan assets measured at fair value on a recurring basis as of December 31, 2013 and 2012 (in thousands):

Determination of Fair Value

Private Equity and Hedge Fund Separate Accounts

The Private Equity and Hedge Fund Separate Accounts invest in limited partnerships and hedge funds, respectively. Investments are restricted with respect to transfer or withdrawal. Since the plans cannot transact at the current NAV, the investments fall within Level 3.

Other Pooled Separate Accounts

The SA contract is a multiple separate account contract that provides for the investment of funds in a series of non-guaranteed pooled separate accounts. Under the SA contract, the Plan bears all investment risk. The investments in the group annuity contract for pooled separate accounts, excluding the Private Equity and Hedge Fund separate accounts, are fair valued using the number of units in each separate account at the end of the reporting period multiplied by the unit value at the end of the reporting period. The NAV for these investments are not considered a readily determinable fair value since the prices are not publicly published. In addition, there are no restrictions on transfers or withdrawals, therefore the investments in these separate accounts are reported as Level 2.

Real Estate Investment Funds

The Prime Fund and Invesco Fund, third party real estate investment funds, invest primarily in real estate and real estate related assets. The Plan owns shares in the Prime Fund and Invesco Fund, and the NAV represents the fair value of each unit held by the Plan. There are restrictions with respect to transfers or withdrawals greater than 90 days. Due to the potential inability to transact at the current NAV, these assets are reported as Level 3.

Transfers between levels

Transfers between levels may occur due to changes in valuation sources or changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity,

trading volume or bid−ask spreads. The Company's policy is to report the transfer as if it occurred at the beginning of the period.

Transfers between Levels 1 and 2

Periodically the Company has transfers between Level 1 and Level 2.

During the years ended December 31, 2013 and 2012, there were no transfers between Levels 1 and 2.

Transfers into and out of Level 3

The Company's basis for transferring assets into and or out of Level 3 is based on the changes in the observability of data.

Transfers into Level 3 would be the result of unobservable inputs utilized within valuation methodologies and the use of broker quotes (that could not be validated), when previously information from third party pricing services (that could be validated) was utilized. Transfers out of Level 3 are due to significant increases in market activity and significant inputs becoming observable.

During the years ended December 31, 2013 and 2012, there were no transfers into or out of Level 3.

The table below presents a reconciliation of all Level 3 assets for the years ended December 31, 2013 and 2012 (in thousands):

NOTE 11 – SUBSEQUENT EVENTS

In April 2014, $26 million in Plan assets were invested in JPMCB Strategic Property Fund, a third party real estate investment fund.

2nd Segment Rate	6.15%.
3rd Segment Rate	6.76%.

Retirement age for Active participants	
Pre-1991 Agents	See Table 1.
Post-1990 Agents	See Table 2.
Qualified Plan Commencement Age for Vested Terminees	40% are assumed to commence at age 65, 60% are assumed to commence at age 55.
Mortality rates	
Healthy	RP-2000 Combined Healthy Generational mortality table for annuitants and non-annuitants per section 1.430(h)(3)-1(a)(4).
Disabled	Revenue Ruling 96-7 mortality table for disability after December 31, 1994.
Withdrawal rates	Rates vary by service until age 65. Agents age 65 and later with less than five years of service are assumed to terminate at the same rate as a retirement eligible agent of the same age. See Table 3.
Disability rates	See Table 4.

Decrement timing	Middle-of-year decrements, with 100% retirement occurring at beginning of year.
Annuity Option	85% of married male agents and 80% of married female agents are assumed to choose a 75% Joint and Survivor Annuity. 100% of single agents choose a Single Life Annuity.
Surviving spouse benefit	It is assumed that 70% of males and 30% of females have an eligible spouse, and that males are three years older than their spouses.
Valuation Compensation	Determined by applying the Pensionable Earnings Increase Rates to a three-year average of Pensionable Earnings.
Benefit and compensation limits	Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of $205,000 and the 401(a)(17) compensation limit of $255,000.
Valuation of plan assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Expected return on assets	
2011 plan year	8.00%, limited to 6.57%.
2012 plan year	8.00%, limited to 7.52%.
Trust Expenses Included in Target Normal Cost	$2,600,000; expenses are assumed to be equal to the average of the prior two years' actual administrative expenses paid from the trust (without PBGC premiums), plus the expected PBGC premiums for the current year, rounded to the nearest $10,000.
Actuarial method	Standard unit credit cost method.
Valuation date	January 1, 2013

Assumptions Specific to the Valuation of the BOBW Formula Benefits

Current Year Nylic Count Insurance	Nylic Count Insurance for the current Nylic Year is estimated by taking the average of an Agent's production in each of the second, third, and fourth prior Nylic Years to the current Nylic Year and then projecting forward to the current year using the production increase rates.
Production Increase Rates	
Lines of Business Other Than Target Life	Rates vary by Nylic Year. See Table 5.
Target Lifes	Rates vary by Nylic Year. See Table 6.
Persistency of Nylic Count Insurance	Based on the average persistency of each Agent's production in the last 10 Nylic Years relative to the Linton A Policy Lapse rates. The Linton A Policy Lapse Rate for Policy Year 1 is ignored as Nylic Count Insurance by definition does not lapse during the first policy year.

The Linton A Policy Lapse rates are as follows:

Policy Year	Policy Lapse Year Rate	Policy Year	Policy Lapse Year Rate
1	N/A	6	4.4%
2	6.5%	7	4.1%
3	5.6%	8	3.8%
4	5.0%	9	3.7%
5	4.7%	10	3.6%

Persistency of Universal Life Nylic Count Insurance

Based on the average persistency of each Agent's production in the last 10 Nylic Years relative to the Baseline Universal Life Persistency Rates. The Baseline Universal Life Persistency Rate for the Nylic Year of Sale is ignored as Universal Life Nylic Count Insurance by definition does not lapse during the first year.

The Baseline Universal Life Persistency Rates are as follows:

Nylic Year Since Sale	Baseline Universal Life Persistency Rates
0	N/A
1	45.0%
2	40.0%
3	35.5%
4	31.5%
5	28.0%
6	25.0%
7	22.5%
8	20.5%
9	19.0%

Benefits Valued

Liabilities for benefits under the Disability Income, Periodic Premium Annuity and Group Plus product lines were deemed immaterial by New York Life Insurance Company and were ignored for purposes of this valuation. All benefits were valued as if calculated under a QN6 contract.

Senior Nylic Formula Amount—Product Lines Other Than Universal Life	For Agents with a QN6 type of contract (generally Agents who began operating under a Nylic Contract on or after March 1, 1964), the Senior Nylic Formula Amount is determined as follows: Monthly income based on NCI obtained in first 20 Nylic Years = [$1.10 × 1/3 (A+B+C)] ÷ $1,000 A = 1/15 of NCI obtained in Nylic Years 1-15 persisting to end of the 4th Nylic Year following the year obtained. B = 1/15 of NCI obtained in Nylic Years 1-15 persisting to end of the 9th Nylic Year following the year obtained (or at the end of the 20th Nylic Year, if sooner). C = 1/5 of NCI obtained in Nylic Years 16-20 multiplied by a persisting ratio equal to the proportion of NCI obtained in Nylic Years 11 to 19 persisting to the end of the 20th Nylic Year.

Definitions

Senior Nylic Formula Amount—Product Lines Other Than Universal Life	Monthly income based on each subsequent completed quinquennial period = Monthly Income Rate × [Income Base] ÷ $1,000 Where the Monthly Income Rate is $.50, $.60, $.70, $.75, $.80, $.85, and $.90, for the quinquennial periods ending in the 25th, 30th, 35th, 40th, 45th, 50th, and 55th Nylic Years, respectively; and the Income Base is one-tenth of the NCI obtained in the last 10 Nylic Years multiplied by a persistency ratio equal to the proportion of NCI obtained during the first nine of those Nylic Years persisting to the end of the 10-year period. For Agents with other types of contracts, the Formula Amount is generally based on different Nylic Years for NCI, different persistency factors, and different monthly income rates.
Senior Nylic Formula Amount—Universal Life	For Agents with a QN6 type of contract (generally Agents who began operating under a Nylic Contract on or after March 1, 1964), the Senior Nylic Formula Amount is obtained as follows: Monthly income based on NCI obtained in first 20 Nylic Years = [$1.10 × 1/3 (A'+B'+C')] ÷ $1,000 A'= 1/15 of ULNCI obtained in Nylic Years 1-15 that was Universal Life Persisting Insurance at the end of the 4th Nylic Year following the year obtained. B'= 1/15 of ULNCI obtained in Nylic Years 1-15 that was Universal Life Persisting Insurance at the end of the 9th Nylic Year following the year obtained (or at the end of the 20th Nylic Year, if sooner). C'= 1/5 of ULNCI obtained in Nylic Years 16-19 that was Universal Life Persisting Insurance at the end of the 20th Nylic Year.

Definitions

Senior Nylic Formula Amount—Universal Life	Monthly income based on each subsequent completed quinquennial period = Monthly Income Rate × [Universal Life Income Base] ÷ $1,000 The Monthly Income Rate is $.50, $.60, $.70, $.75, $.80, and $.85, for the quinquennial periods ending in the 25th, 30th, 35th, 40th, 45th, and 50th Nylic Years respectively; and the Universal Life Income Base is one-tenth of the ULNCI obtained in the last ten Nylic Years multiplied by a persistency ratio equal to the proportion of ULNCI obtained during the first nine of those Nylic Years persisting to the end of the 10-year period. Additional monthly income attributable to ULNCI may be obtained in each of the three Nylic Years following the completion of the 21st Nylic year and in each of the three Nylic Years following each quinquennial period thereafter[1].

Senior Nylic Formula Amount—Product Lines Other Than Universal Life	Monthly income based on each subsequent completed quinquennial period = Monthly Income Rate × [Income Base] ÷ $1,000 Where the Monthly Income Rate is $.50, $.60, $.70, $.75, $.80, $.85, and $.90, for the quinquennial periods ending in the 25th, 30th, 35th, 40th, 45th, 50th, and 55th Nylic Years, respectively; and the Income Base is one-tenth of the NCI obtained in the last 10 Nylic Years multiplied by a persistency ratio equal to the proportion of NCI obtained during the first nine of those Nylic Years persisting to the end of the 10-year period. For Agents with other types of contracts, the Formula Amount is generally based on different Nylic Years for NCI, different persistency factors, and different monthly income rates.
Senior Nylic Formula Amount—Universal Life	For Agents with a QN6 type of contract (generally Agents who began operating under a Nylic Contract on or after March 1, 1964), the Senior Nylic Formula Amount is obtained as follows: Monthly income based on NCI obtained in first 20 Nylic Years = [$1.10 × 1/3 (A'+B'+C')] ÷ $1,000 A'= 1/15 of ULNCI obtained in Nylic Years 1-15 that was Universal Life Persisting Insurance at the end of the 4th Nylic Year following the year obtained. B'= 1/15 of ULNCI obtained in Nylic Years 1-15 that was Universal Life Persisting Insurance at the end of the 9th Nylic Year following the year obtained (or at the end of the 20th Nylic Year, if sooner). C'= 1/5 of ULNCI obtained in Nylic Years 16-19 that was Universal Life Persisting Insurance at the end of the 20th Nylic Year.

Definitions

Senior Nylic Formula Amount—Universal Life	Monthly income based on each subsequent completed quinquennial period = Monthly Income Rate × [Universal Life Income Base] ÷ $1,000 The Monthly Income Rate is $.50, $.60, $.70, $.75, $.80, and $.85, for the quinquennial periods ending in the 25th, 30th, 35th, 40th, 45th, and 50th Nylic Years respectively; and the Universal Life Income Base is one-tenth of the ULNCI obtained in the last ten Nylic Years multiplied by a persistency ratio equal to the proportion of ULNCI obtained during the first nine of those Nylic Years persisting to the end of the 10-year period. Additional monthly income attributable to ULNCI may be obtained in each of the three Nylic Years following the completion of the 21st Nylic year and in each of the three Nylic Years following each quinquennial period thereafter[1].

Based on segment rates with a four-month lookback (as of September 2012), each adjusted as needed to fall within the 25-year average interest rate corridor under MAP-21:

1st Segment Rate	4.94%.
2nd Segment Rate	6.15%.
3rd Segment Rate	6.76%.

Salary Increases

Rates consistent of inflation component and a productivity and merit component. The inflation component is 2.5% for all ages. The rates including the productivity and merit component vary by age as follows:

Age	Rate	Age	Rate
Under 25	10.50%	40-44	4.50%
25-29	8.50%	45-49	4.00%
30-34	6.50%	50-54	3.50%
35-39	5.50%	55 & over	3.25%

Bonus percentage

Future bonuses are assumed to be paid at 119% of target bonus in 2013 grading to 110% of target bonus by 2016.

Cash Balance Interest Crediting Rate

4.00%

Optional payment form election percentage	
Traditional 2012 Group A Participants	80% of married male employees choose a Joint and 75% Survivor Annuity; 50% of married female employees choose a Joint and 75% Survivor Annuity.

Disabled	Revenue Ruling 96-7 mortality table for disability after December 31, 1994.
Withdrawal Rates	See Tables 2A and 2B.
Disability Rates	See Table 3.
Decrement Timing	Middle-of-year decrements, with 100% retirement occurring at beginning of year.
Surviving Spouse Benefit	It is assumed that 80% of males and 50% of females have an eligible spouse, and that males are two years older than their spouses.

The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Expected Return on Assets	
2011 Plan Year	8.00%, limited to 6.57%.

Actuarial Method	Standard unit credit cost method.
Valuation Date	January 1, 2013.
