NOTE 1 – DESCRIPTION OF PLAN

The following description of Koeller, Nebeker, Carlson & Haluck, LLP ("Company") 401(k) Plan ("Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all employees of the Company. Employees are eligible to participate in the salary reduction portion of the plan immediately upon their hire. For discretionary profit sharing contributions, employees are eligible after they have completed one year of service and have worked 1,000 hours during that year. In addition, they must be employed at year end. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). In 2008, The Plan incorporated an automatic enrollment feature that took effect July 1, 2008. After this date going forward, all newly hired employees (as well as previously hired employees not enrolled in The Plan as of that date) were automatically enrolled in The Plan unless they notified the Plan Administrator on an enrollment form of their wish to decline participation. In addition to the automatic enrollment feature, the Plan was amended effective January 1, 2008 to incorporate the final regulations under IRC section 415 that update the definition of the term 'compensation' as it relates to various provisions affecting employer benefit plans.

Contributions

Each year, participants may elect to have a portion of their compensation contributed to the Plan on a pre-tax basis pursuant to Code Section 401(k). Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Participants are allowed to self-direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers eighteen mutual funds and five predetermined models combining such mutual funds as investment options for participants. The Company may make discretionary profit sharing contributions into the Plan. The discretionary profit sharing contributions are also participant self-directed. A participant's share of discretionary profit sharing contributions vest 20% per year after the participant has completed their second calendar year of service, defined as 1,000 hours of service per calendar year. A participant vests 100% in discretionary profit sharing contributions after six calendar years of service.

Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of the Company's contribution and plan earnings. Plan earnings are credited based on the makeup of the investments of the individual participant accounts. The Company pays for the majority of the administrative expenses of the plan. A portion of the administrative costs may be funded from participant forfeitures of unvested profit sharing contributions. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their salary reduction contributions plus actual earnings thereon. Vesting in the Company's discretionary profit sharing contribution portion of the participants' accounts is based on the participants' years of continuous service. A participant is 100% vested after six years of credited service.

Participant Loans

Participants may borrow a minimum of $1,000 up to a maximum equal to 50% of their vested account balance or $50,000 whichever is less. The balance in the participant's account secures the loans and the loans bear interest ranging between 6% and 10%, which are commensurate with prevailing rates as determined by the Plan administrator at the time of the loan. Principal and interest is paid ratably through semi-monthly payroll deductions. At December 31, 2009 and 2008, total participant loans included in investments were $203,134 and $174,067, respectively.

Payment of Benefits
On termination of service due to death, disability or retirement, a participant receives a lump-sum amount equal to the 100% value of the participant's vested interest in his or her account. For termination of service due to other reasons, a participant may receive the value of the vested interest in his or her account as a lump sum distribution.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Forfeited Accounts
During the year ended December 31, 2009, forfeitures of non-vested amounts totaled $7,212. These amounts were used to pay the fees of the Plan.

Estimates
The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition
The Plan's investments are stated at fair value. Quoted market prices are used to value investments. Shares of mutual funds are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end. Participant loans are valued at their outstanding balances, which approximate fair value.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits
Benefits are recorded when paid.

NOTE 9 – FAIR VALUE MEASUREMENTS

In determining fair value, the Company uses various valuation approaches. ASC Topic 820 establishes fair value measurement framework, provides a single definition of fair value, and requires expanded disclosure summarizing fair value measurements. ASC Topic 820 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, fair value measurements should be determined based on the assumptions that market participants would use in pricing an asset or liability.

The statement establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable input be used when available. Observable inputs are inputs that the market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy is measured in three levels based on the reliability of inputs:

Level 1 – Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Valuation adjustments and block discounts are not applied to Level 1 instruments.

Level 2 – Valuations based on quoted prices in less active, dealer or broker markets. Fair values are primarily obtained from third party pricing services for identical or comparable assets or liabilities.

Level 3 – Valuations derived from other valuation methodologies, including pricing models, discounted cash flow models and similar techniques, and not based on market, exchange, or broker-traded transactions. Level 3 valuations are "unobservable" and incorporate certain assumptions that are not observable in the market and require significant professional judgment in determining the fair value assigned to such assets or liabilities.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

NOTE 9 – FAIR VALUE MEASUREMENTS (Continued)

The following are the major categories of assets and liabilities measured at fair value during the year then ended December 31, 2009, using unadjusted quoted prices in active markets for identical assets (Level 1); significant other observable inputs (Level 2); and significant unobservable inputs (Level 3):

NOTE 10 – RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
