Independent Auditor's Report

To the Management Committee
Rotek Incorporated Pension Plan for
Florence Hourly Employees

We were engaged to audit the financial statements - modified cash basis of Rotek Incorporated Pension Plan for Florence Hourly Employees (the "Plan") as of December 31, 2009 and 2008 and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified by The Bank of New York Mellon/BNY Mellon, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the Trustee as of December 31, 2009 and 2008 and for the years then ended that the information provided to the plan administrator by the Trustee is complete and accurate.

As described in Note 2, these financial statements were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Rotek Incorporated Pension Plan for Florence Hourly Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 1 - Plan Description

The following description of Rotek Incorporated Pension Plan for Florence Hourly Employees (the "Plan") is provided for general information purposes only. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a noncontributory defined benefit pension plan covering all hourly employees of Rotek Incorporated and subsidiary's (collectively, the "Company") Florence, Kentucky location. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective October 15, 2008, new participants are no longer accepted into the Plan. Employees participating in the Plan prior to October 15, 2008 were given a one-time option to "opt out" of the Plan. By electing to "opt out," a participant's accumulation of benefits will be frozen. In lieu of benefit accumulation, participants were eligible to receive matching contributions as a participant in the Company's defined contribution 401(k) plan. Those participants who did not elect to "opt out" will continue to accrue benefits as outlined in the plan document.

Eligibility and Vesting - Employees become participants in the Plan following completion of the eligibility requirements as described in the Plan and are fully vested for normal retirement benefits after five years of service. Employees who terminate service before becoming fully vested forfeit all benefits under the Plan.

Pension Benefits - The Plan provides for normal retirement benefits at age 65, unreduced early retirement benefits as early as age 62 with (i) 25 years of vesting service or (ii) 10 years of vesting service and a seniority date prior to January 1, 1982, reduced early retirement benefits at age 60, surviving spouse death benefits, and disability benefits, as defined in the Plan. The normal individual retirement benefit is equal to credited service times a monthly pension benefit in effect when the years of credited service were earned.

Death Benefits - In certain circumstances, if an active or terminated employee who has a vested interest in the Plan dies prior to his or her normal retirement age, the surviving spouse or designated beneficiary shall receive a survivor benefit, as defined in the Plan.

Funding Policy - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. The Company will also make additional contributions from time to time with the total not to exceed the maximum contribution deductible under the Internal Revenue Code. Annual contributions meet the minimum funding requirements of ERISA.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation - The accompanying financial statements have been prepared on the modified cash basis of accounting. Under the modified cash basis of accounting, contributions and investment income are recorded when received, benefit payments and expenses are recorded when paid, and investments are recorded at fair market value.

Investment Valuation - The Plan's investments are stated at fair value. The fair value of the Plan's interest in the ThyssenKrupp USA Master Trust (the "Master Trust") is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. Common stock, preferred stock, and mutual funds are valued at quoted prices. Money market funds and interest-bearing cash are valued at their outstanding balances, which approximates fair value. The government securities and corporate obligations are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures. Investments in common collective trust funds are valued at fair value, based on the fair value of the underlying assets. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Use of Estimates - The preparation of financial statements in conformity with the modified cash basis of accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Notes to Financial Statements December 31, 2009 and 2008

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Administrative Expenses - Administrative expenses of approximately \$67,000 and \$149,000 for the years ended December 31, 2009 and 2008, respectively, were paid by the Company.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including August 20, 2010, which is the date the financial statements were available to be issued.

Reclassification - Certain prior year amounts have been reclassified to conform to the current year presentation.

Note 3 - Unaudited Investment Information

The trustee of the Plan, The Bank of New York Mellon/BNY Mellon, N.A. (the "Trustee") holds the Master Trust's investments and executes all related investment transactions. The investment balances and related investment results included in the accompanying financial statements, including information summarized in Note 5, are based solely on information provided by the Trustee.

Certain assets of the Master Trust are in investment funds managed by The Bank of New York Mellon/BNY Mellon, N.A. or its affiliates. Since The Bank of New York Mellon/BNY Mellon, N.A. is the trustee of the Plan, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines. The market value of these investments was approximately \$97,000,000 and \$39,000,000 at December 31, 2009 and 2008, respectively.

Note 4 - Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered to the valuation date. These include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

Rotek Incorporated Pension Plan for Florence Hourly Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The normal individual retirement benefit is equal to the participant's years of credited service multiplied by a monthly pension benefit in effect when the years of credited service were earned.

The actuarial present value of accumulated plan benefits is determined by the independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts and interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, and retirement) between the valuation date and the expected date of payment. The determination was made as of January 1, 2009 and 2008.

The more significant actuarial assumptions underlying the actuarial computations at January 1, 2009 and 2008 are as follows:

Actuarial cost method	-	Projected unit credit cost method
Interest rate	-	8.5 percent
Mortality basis	-	1994 Group Annuity Mortality Basic Table projected to January 1, 2006 for males and females
Retirement	-	Based upon defined table of ages and percentages

The foregoing actuarial assumptions are based on the presumption that the Plan will continue indefinitely. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of January 1, 2009 and 2008 was as follows:

	2009	2008
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 238,935	\$ 235,520
Other vested participants	1,638,732	1,509,058
Total vested benefits	1,877,667	1,744,578
Nonvested benefits	680,614	614,341
Total actuarial present value of accumulated plan benefits	<u>\$ 2,558,281</u>	<u>\$ 2,358,919</u>

Rotek Incorporated Pension Plan for Florence Hourly Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The following table summarizes the components of the net increase in actuarial present value of accumulated plan benefits for the years ended January 1, 2009 and 2008:

	<u>2009</u>	<u>2008</u>
Actuarial present value of accumulated plan benefits -		
Beginning of year	\$ 2,358,919	\$ 2,141,269
Increase (decrease) during the year attributable to:		
Benefits accumulated including actuarial gains and losses	59,520	151,272
Interest due to the decrease in the discount period	205,998	182,044
Benefits paid	(25,300)	(24,159)
Plan amendment	53,625	-
Change of assumptions	<u>(94,481)</u>	<u>(91,507)</u>
Net increase	<u>199,362</u>	<u>217,650</u>
Actuarial present value of accumulated plan benefits -		
End of year	<u>\$ 2,558,281</u>	<u>\$ 2,358,919</u>

The interest rate included in the assumptions above was changed from 8.25 percent to 8.5 percent in 2009, and from 8 percent to 8.25 percent in 2008, in order to better reflect anticipated plan experience.

Note 5 - Interest in Master Trust

The Plan's investments are in the Master Trust which was established for the investment of assets of the Plan and several other pension plans sponsored by affiliated participating employers of ThyssenKrupp, USA, Inc. Each participating retirement plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Trustee. At December 31, 2009 and 2008, the Plan's interest in the net assets of the Master Trust was approximately 0.44 percent and 0.35 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon their pro rata share in the net assets of the Master Trust.

Securities Lending - The Master Trust participates in a securities lending program with the Trustee for its U.S. and non-U.S. securities held in custody with the Trustee. The program allows up to 100 percent of the qualified assets to be on loan at any given time. These securities are lent to certain unrelated third-party brokers in exchange for cash and noncash collaterals. U.S. assets and non-U.S. assets on loan are collateralized at 102 percent and 105 percent, respectively, of the assets' market value.

The net assets of the Master Trust reflect, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. The collateral received from borrowers totaled \$96,784,750 and \$39,199,601 as of December 31, 2009 and 2008, respectively. This consisted of cash collateral received of \$96,784,750 and \$39,199,601, which was invested in the ASL short-term fund, a money market fund, at December 31, 2009 and 2008, respectively. In the event that a loaned security is called, the Master Trust will receive the market value of the asset in cash. The market value of loaned securities totaled \$94,346,870 and \$37,995,025 at December 31, 2009 and 2008, respectively.

Notes to Financial Statements December 31, 2009 and 2008

Note 5 - Interest in Master Trust (Continued)

Derivative Instruments - The Master Trust is party to certain agreements, which are designed to manage exposures to foreign exchange risk. The foreign currency instruments are used for the purpose of hedging changes in the fair value of assets that result from currency fluctuations. The notional amount represents the contract amount, not the amount at risk. The notional amount of foreign currency instruments was approximately \$3,100,000 and \$9,100,000 at December 31, 2009 and 2008, respectively. The estimated fair value of derivative instruments at December 31, 2009 and 2008 is insignificant.

The investment managers, on behalf of the Master Trust, manage its foreign currency risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of a foreign currency, the Master Trust's risk is limited to the fair value of the instrument.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2009 and 2008 and the valuation techniques used by the Plan to determine those fair values.

Level 1 - In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

- (1) This class represents investments in actively managed common collective trust funds that invest primarily in equity securities which may include common stocks, options, and futures. Investments are valued at the fair value per share multiplied by the number of shares held as of the measurement date.
- (2) This class invests primarily in fixed-income securities, including, but not limited to, bonds, notes, or other investments, such as government securities, commercial paper, certificates of deposit, master notes, or variable amount notes, with the objective of providing high-current income consistent with the preservation of capital and the maintenance of liquidity. Short-term investments are valued at \$1.00/unit, which approximates fair value.
- (3) Short-term investments are valued at \$1.00/unit, which approximates fair value. Amounts are generally invested in actively managed interest-bearing accounts.

Note 7 - Tax Status

The Plan obtained its latest determination letter on October 1, 2008, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Company has applied for a new determination letter and the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Note 8 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefits Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee while other benefits may not be provided for at all.

Early Retirement Benefit

Eligible at age 60 with at least 10 years of Vesting Service.

The monthly benefit available at early retirement is the amount of normal retirement benefit based on service up to actual retirement (accrued normal retirement benefit). The benefit commences at age 65 unless the employee elects a reduced benefit commencing prior to age 65. The reduction is 1/180 for each month that commencement precedes age 65.

If the participant has 25 years of service and is age 62 or older, the benefit is unreduced for early commencement. Additionally, a temporary monthly supplement of \$350 is payable as a life only annuity until attainment of age 65.

Disability Pension

Eligible if disabled after 10 or more years of Vesting Service.

The accrued normal retirement benefit is payable immediately (unreduced).

Termination

Eligible after 5 years of Vesting Service.

The deferred vested benefit is the accrued normal retirement benefit payable at age 65 or, alternatively, a reduced pension payable as early as age 60 if the employee has at least 10 years of Vesting Service. The reduction is 1/180 for each month that commencement precedes age 65.

Regular Pre-Retirement Spouse's Benefit

Upon death of an employee after age 60 and completion of 10 years of Vesting Service, the surviving spouse will receive 50% of the benefit which would have been paid if the employee had retired on the day prior to his death. The 50% is reduced by 1/2% for each year that the employee is more than 5 years older than the spouse.

Pre-Retirement Spouse's Benefit for Vested Participants

Upon death of a married participant after 5 years of Vesting Service, and not eligible for retirement from employment with the Company, the surviving spouse will receive 50% of the benefit which would have been paid if the participant had terminated employment on the earlier of his date of death or actual termination date and had survived to and retired on his earliest Retirement Date under the 50% Joint and Survivor option.

Prior Plan Account Value Distribution

Each participant's account due to participation in the Plan in effect on December 31, 1975 earns annual interest at a rate equal to 6% prior to 1983 and the Fund earnings rate on a market value basis for each Plan Year thereafter and vests at the rate of 10% a year beginning after 1 year (the 10% is changed to 20% effective January 1, 1989). Upon termination of employment, the reduced vested portion of a member's account will be paid in five annual installments, including interest on the undistributed portion. The reduction, if any, equals the actuarial value of benefits for which the employee is eligible upon termination of employment and which are due to service prior to January 1, 1976.

Form of Payment

For normal, early, or disability retirements, the normal form of payment is a 50% Joint and Survivor annuity providing the participant was married on his date of retirement; otherwise, a straight-life basis applies.

Asset Method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.40%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.25%, and the applicable limitation for the plan year, equal to 6.40%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.25%, and the applicable limitation for the plan year, equal to 6.09%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Nature of Actuarial Calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. SCHEDULE SB ATTACHMENTS

Schedule SB, Line 25 Change in Method

- The discount rate was changed from the October 3-segment rates to the full yield curve as of the October before the valuation date. This change is being made as elected by the plan sponsor and is deemed to be automatically approved by the IRS pursuant to guidance in IRS March 31, 2009 Newsletter.
- The asset valuation method was updated pursuant to changes in the permitted asset valuation method made by the Worker, Retiree, and Employer Recovery Act of 2008 (WRERA). As described in IRS Notice 2009-22, expected earnings are taken into account when averaging. Changes in the asset method for plan years beginning in 2009 to any permissible asset method are deemed to be automatically approved by the IRS. Also, the prior year calculated the valuation assets based on two monthly computation periods. This year's valuation assets are based on two annual computation periods.
- The amount included this year for plan-related expenses is \$1,241. WRERA includes a technical corrections provision requiring target normal cost to include the amount of plan related expenses expected to be paid from plan assets during the year.
- The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

Schedule SB, Line 11b
Explanation of Prefunding Balance Interest Rate Calculation

The excess contributions of \$471,247 shown in Line 11a are comprised of:

- \$315,452 which represents the discounted employer contributions made for the prior year in excess of the total funding requirement for the prior plan year before reflecting carryover/prefunding balances, plus
- \$155,795 which represents the carryover balance used to offset the prior plan year funding requirement and subsequently replenished.

\$(25,966) shown on Line 11b represents the interest on Line 11a as follows:

- Interest on \$315,452 using the prior year's effective rate of 6.19%, or \$19,526, plus
- interest on \$155,795 using the prior year's actual return of (29.20)%, or \$(45,492).
