1. DESCRIPTION OF PLAN

The following description of the First State Bank of the Florida Keys ("Bank") Profit Sharing Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement or Summary Plan Description for a complete description of the Plan's provisions.

General

The Plan is established by the Plan sponsor and employer, First State Bank of the Florida Keys. The Plan is a defined contribution plan, which covers all employees who have completed one year and 1,000 hours of service and attained the age of 21. The contributory portion of the Plan is based on elective contributions from participants in the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions

Elective deferrals by participants are based on a percentage of their compensation as defined in the Plan agreement, which are subject to certain limitations. Employees also may rollover account balances from other plans into their account. The Bank may, at the sole discretion of the Board of Directors, contribute to each participant's account an annual profit sharing contribution. In addition, the Bank may contribute to each participant's account a matching contribution, which is a percentage of the participant's elective contribution for the year. From July 1, 2010 through March 31, 2013, the Bank elected not to make matching contributions. Beginning April 1, 2013, the Bank elected and began making matching contributions equal to 100% of the first 4% of the compensation deferred by each participant subject to certain limitations as specified in the Plan agreement. There was no profit sharing contribution during 2014 and 2013. Forfeitures resulting from the termination of nonvested employees are used to reduce subsequent employer contributions or administrative expenses. Forfeitures were utilized to reduce administrative expenses in 2014 and 2013.

Participant Accounts

Each participant's account is credited with the participant's contributions, rollovers, if any, and an allocation of: (a) the Bank's contributions and (b) Plan's earnings or losses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the aggregate of the participant's deferrals, rollovers and vested employer contributions.

Investment Options

Participants may direct the custodians to invest their elective 401(k) contributions, rollovers, if any, as well as employer matching and profit sharing contributions to the Plan in any of the available investment options. Participants can individually determine their investment options based on desired level of risk and return for all contributions (employer and participant) to the Plan.

Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the employer contributions plus earnings is based on years of service as follows:

Years of Service	Vested Percentage
Less than 2	0%
2 but less than 3	20%
3 but less than 4	40%
4 but less than 5	60%
5 but less than 6	80%
6 or more	100%

1. DESCRIPTION OF PLAN (CONTINUED)

Payment of Benefits

On termination of service due to death, disability, or retirement, a participant or his or her beneficiary may elect to receive the vested portion in the participant's account in a lump sum distribution or in installment payments.

Notes Receivable from Participants

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent notes receivable from participants are reclassified as distributions based upon the terms of the plan document. Participants may borrow from their fund accounts a minimum of $1,000 and up to a maximum equal to the lesser of (a) $50,000 or (b) 50% of their vested account balance. However, the $50,000 amount in the preceding sentence is reduced by the highest outstanding loan balance under the Plan provisions during the previous twelve-month period. The loans are secured by the balance in the participant's account and bear an interest rate commensurate with local prevailing rates as determined quarterly by the Plan administrator.

Administrative Expenses

During the years ended December 31, 2014 and 2013, administrative expenses amounting to $14,074 and $6,753, respectively, were paid by the Plan and shown as a deduction from net assets. Additionally, all fees and expenses of the Plan for legal, accounting, and other miscellaneous administrative services are paid by the Bank.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared under the accrual basis of accounting.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. The Plan's group annuity contract with Principal Life Insurance Company ("Principal Life") is not "fully benefit-responsive". Therefore, for financial statement purposes, this contract must be carried at fair value. Fair value also means market value. Principal Life pooled separate accounts are reported at fair value. Principal Life Guaranteed Interest Investment Contract Accounts are reported at fair value, which approximates contract value. As of December 31, 2014 and 2013, Principal Life Guaranteed Interest Investment Contract Accounts fair value totaled $726,923 and $751,984, respectively.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("US GAAP") requires the Plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results may differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See NOTE 9 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Fair Value Measurements

Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in NOTE 9. Fair value estimates involve uncertainties and matters of significant judgment. Changes in assumptions or in market conditions could significantly affect the estimates.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Payment of Benefits

Benefits are recorded when paid.

Adoption of Accounting Pronouncements

Deferral of the Effective Date of Certain Disclosures for Nonpublic Employee Benefit Plans in ASU No. 2011-04

In July 2013, the Financial Accounting Standards Board ("FASB") issued an accounting standard update which defers indefinitely the effective date of certain required disclosures in Accounting Standards Update No. 2011-04 of quantitative information regarding the significant unobservable inputs used in Level 3 fair value measurements of investments held by a plan not subject to the Securities and Exchange Commission's filing requirements ("nonpublic employee benefit plan") in its plan sponsor's own nonpublic entity equity securities as well as equity securities of its plan sponsor's nonpublic affiliated entities. The update does not defer the effective date for certain quantitative disclosures for other nonpublic entity equity securities held in the nonpublic employee benefit plan or any qualitative disclosures. The update is effective upon issuance for any financial statements that have not been issued. The implementation of this update did not have a material effect on the financial statements.

Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)

In May 2015, the FASB issued an accounting standard update which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The update also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. The update is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. A reporting entity should apply the update retrospectively to all periods presented. Early adoption is permitted. The Plan is currently evaluating the effect the update will have on its financial statements.

Subsequent Events

The Plan has evaluated events through July 18, 2016, which is the date the financial statements were available to be issued.

3. PLAN TERMINATION

Although it has not expressed any intent to do so, the Bank has the right under Plan provisions to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in their accounts.

4. INVESTMENT CONTRACT WITH INSURANCE COMPANY

The Plan entered into a group annuity investment contract with Principal Life, which receives the contributions and deposits them into either guaranteed interest investment contract accounts or into pooled separate accounts according to the participant's election. Principal Life pooled separate accounts are reported at fair value. Principal Life Guaranteed Interest Investment Contract Accounts are reported at fair value, which approximates contract value. Contract value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Contributions allocated to the Guaranteed Interest Investment Contract Accounts are held in the Principal Life general account. Guaranteed Interest Investment Contract Accounts guarantee the return of principal plus interest earned over a defined 3, 5, or 10 year term – provided all contributions remain in the account until the end of the guaranteed period. The Plan's group annuity contract with Principal Life is not "fully benefit-responsive". Therefore, for financial statement purposes, this contract must be carried at fair value.

5. INVESTMENTS

The following represents investments that represent 5% or more of the Plan's net assets.

During the years ended December 31, 2014 and 2013, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value as follows:

	Year Ended December 31, 2014	Year Ended December 31, 2013

Guaranteed interest investment contract accounts	3,192	(8,852)
Registered investment companies	(484)	19,350
	$ 517,017	**$ 981,402**

5. INVESTMENTS (CONTINUED)

The Plan uses the Net Asset Value ("NAV") to determine the fair value of all the underlying investments which (a) do not have a readily determinable fair value and (b) prepare their financial statements consistent with the measurement principles of an investment company or have the attributes of an investment company. The following table lists all investments:

6. INFORMATION CERTIFIED BY THE PLAN'S CUSTODIANS

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Principal Life Insurance Company and Principal Trust Company, the custodians, have certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate.

The Plan's independent accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

7. PARTY-IN-INTEREST TRANSACTIONS

Parties-in-interest are defined under Department of Labor Regulations as any fiduciary of the Plan, any party rendering service to the Plan, the employer and certain others. All of the Plan's investments, including notes receivable from participants of $337,067 and $332,605 as of December 31, 2014 and 2013, respectively, are party-in-interest investments, as the issuers of the pooled separate accounts, guaranteed interest investment contract accounts and the registered investment companies, Principal Life Insurance Company and Principal Trust Company, are the Plan's custodians.

8. TAX STATUS

The Plan adopted its latest Prototype Non-standardized Profit Sharing Plan with a cash or deferral arrangement developed by Principal Life Insurance Company, effective July 1, 2007, which obtained a favorable Internal Revenue Service ("IRS") opinion determination letter on March 31, 2008 in which the IRS stated that the form of the underlying prototype plan was acceptable under provisions of the Internal Revenue Code ("Code") and that any employer adopting this form of the plan will be considered to have a plan qualified under the Code. Although the Plan has been amended since receiving the determination letter, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014 and 2013, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the accompanying financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2011.

9. FAIR VALUE MEASUREMENTS

The FASB Accounting Standards Codification ("ASC"), *Fair Value Measurements and Disclosures,* provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy under FASB ASC are described as follows:

- Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

- Level 2 — Inputs to the valuation methodology include:
  - Quoted prices for similar assets or liabilities in active markets;
  - Quoted prices for identical or similar assets or liabilities in inactive markets;
  - Inputs other than quoted prices that are observable for the asset or liability; and
  - Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

  If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

- Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Guaranteed Interest Investment Contract Accounts: Valued at fair value. Fair value represents the amount Plan sponsors would receive if they terminated the contract at the reporting date, which is book value less an early withdrawal charge. (SEE NOTE 4). The net asset value of guaranteed interest investment contract accounts is based on the market value of its underlying investments.

Pooled Separate Accounts: Valued at fair value. Pooled separate accounts are made up of a wide variety of underlying investments such as equities, preferred stock, bonds, real estate and mutual funds. The net asset value of pooled separate accounts is based on the market value of its underlying investments.

Registered Investment Companies: Valued at the quoted net asset value ("NAV") of shares held by the Plan at year end.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
