Report on the Financial Statements

We were engaged to audit the financial statements and the supplementary schedules of the Florida Heart Associates Retirement Plan (the "Plan") which comprise the Statements of Net Assets Available for Plan Benefits (modified cash basis) as of December 31, 2015 and 2014, and the related Statements of Changes in Net Assets Available for Plan Benefits (modified cash basis) for the years then ended and related notes to the financial statements.

Management's Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with the modified cash basis of accounting described in Note B; this includes determining that the modified cash basis of accounting is an acceptable basis for the preparation of the financial statements in these circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in NOTE E, which was certified by Principal Life Insurance Company, the trustee/custodian of the Plan, except for comparing the information with the related information included in these financial statements and the supplementary schedules. We have been informed by the Plan administrator that the trustee/custodian holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee/custodian as of and for the years ended December 31, 2015 and 2014, that the financial information provided to the Plan administrator by the trustee/custodian is complete and accurate (29 CFR 2520.103-5(c)).

Basis of Accounting

As described in NOTE B, these financial statements and the supplementary schedules were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient, appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Other Matter

The supplementary schedules are the responsibility of plan management, are presented for the purpose of additional analysis and are not a required part of the financial statements but are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, it is inappropriate to and we do not express an opinion on the supplementary schedules referred to above.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements and supplementary schedules, other than that derived from the information certified by the trustee/custodian, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

NOTE A - DESCRIPTION OF PLAN

The following description of Florida Heart Associates (the "Company") (Sponsor) Retirement Plan (the "Plan") Plan 001 provides only general information. Participants should refer to the Summary Plan Description or Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a self-directed 401(k) defined contribution retirement plan covering substantially all eligible employees of the Florida Heart Associates, P.L. and affiliated entities collectively (the Company). The Plan was originally adopted on December 1, 1997 and is intended to provide participants with future retirement benefit opportunities. The Plan was restated on July 1, 2009 and again on December 1, 2010. The Plan is subject to the provisions of IRS Code Section 401(k), which allows for employee contributions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Plan administration

For the years ended December 31, 2015 and 2014, the trustee/custodian of the Plan was Principal Life Insurance Company (Third Party Administrator and servicing agent). Employer and participant contributions as well as all Plan assets are held and managed by the trustee/custodian, which invests cash received, interest, and dividend income in accordance with participant direction, and makes distributions to participants. The Plan Third Party Administrator (trustee/custodian) - Principal Life Insurance Company and the Company are considered parties-in-interest. The Plan also contracts with Leading Edge Retirement Plan Advisors as the designated investment manager.

Contributions

Participants can elect to enroll in the Plan and contribute a portion of their compensation, up to the maximum specified by the IRS by completing a salary elective deferral agreement. An eligible participant's annual salary reduction (deductible) contributions may not exceed the lesser of 100 percent of the participant's compensation or $18,000 and $17,500, respectively, for calendar years 2015 and 2014. Deferral contributions may include after-tax Roth contributions and pre-tax deferrals. Certain participants age 50 or older may contribute more by taking advantage of "catch up" provisions authorized by federal law. The Plan provides for

NOTE A - DESCRIPTION OF PLAN, CONTINUED

Contributions, continued

two types of employer contributions. The Company will contribute a "matching" contribution amount equal to 25% of the employee's elective deferral up to the first 4% of the employee's compensation. The Company may also contribute a "discretionary" contribution. The discretionary contributions made will be determined by the Company based on the top-heavy minimum contribution calculation. The participant does not have to make 401(k) contributions to be eligible for employer discretionary contributions. The Plan accepts rollover contributions.

During the year ended December 31, 2010, the Plan was amended to allow for eligible participants to designate all or any portion of their future elective deferral contributions as Roth elective deferral contributions.

Vesting

Upon attainment of normal retirement age (age 65), or early retirement age (age 60), if employment terminates prior to attainment of retirement age due to death or disability, the participant is 100% vested. However, upon termination of employment for any other reason, a participant is entitled to a portion of their account (excluding salary deferred amounts and any related income earned thereon which is immediately 100% vested) in accordance with the following five year vesting schedule:

Years of Service*	Employer Match	Discretionary Contribution
Less than one (1)	0%	0%
One (1)	20%	20%
Two (2)	40%	40%
Three (3)	60%	60%
Four (4)	80%	80%
Five (5) or more	100%	100%

*Vesting in the employer match and discretionary contributions in the participant accounts is based on participant's years of continuous service. The employee is immediately vested in the employee's respective contributions.

NOTE A - DESCRIPTION OF PLAN, CONTINUED

Payment of benefits

Payments are made upon termination of service due to retirement, early retirement, death, disability, or financial hardship. Financial hardship distributions are permitted as described by Federal Rules. If a participant experiences a situation of extreme financial hardship where a request for withdrawal, as defined by the Internal Revenue Code, is requested and approval is granted by the Plan's trustees, the participant may withdraw all or any part of the vested account resulting from elective deferral contributions, not including investment earnings. At termination, retirement or death, vested account balances less than $5,000 will be paid in a single lump sum payment. Vested account balances greater than $5,000 are distributed in the manner elected by the participant, payable monthly as a life annuity providing income that continues for the life of the participant or spouse, monthly payments over a fixed period of time or single sum payment. Upon death of participant, remaining balance is paid to beneficiary. Benefits due terminated employees, either through retirement or otherwise, are recorded when paid.

Forfeitures

Forfeitures resulting from termination of Plan participation of non-vested employees may be first used to pay Plan expenses. Any forfeitures remaining shall be used to offset the first contribution made after the forfeiture is determined.

For the years ended December 31, 2015 and 2014, approximately $3,722 and $7,309 had been forfeited and used to reduce administrative costs of the Plan and/or employer contributions.

Participant accounts

Each participant's account is credited with the participant's contribution and the allocation of the Company's contribution and the participant's pro rata share of the Plan earnings as determined and allocated under the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account. Upon termination employees can elect to leave their account balance in the Plan if the balance is greater than $5,000. As of December 31, 2015 and 2014, the amount held in the Plan for terminated vested participants is $513,514 and $292,599 respectively.

NOTE A - DESCRIPTION OF PLAN, CONTINUED

Participant accounts, continued

Participants may select from a broad array of investment account options to invest their respective participant account. See Note E for a listing of investment options available as of December 31, 2015 and 2014.

Loans

Loans are not available to participants under the Plan.

Expenses

All administrative expenses incurred by the Trustee/Custodian, the Servicing Agent and/or Third Party Administrator are paid for by the Plan with Plan assets.

Hardship

Participants may withdraw amounts limited to deferral amounts, within the respective participant's account, for immediate and severe financial need. Elective deferral contributions will be suspended for six months following the date of the withdrawal.

Plan eligibility

Employees qualify for participation in the elective deferral portion of the Plan upon completion of one year of service (of at least 1,000 hours) and attainment of age 21. The Plan offers monthly entry dates.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies used in the preparation of these financial statements:

Basis of accounting

Florida Heart Associates Retirement Plan prepares its financial statements using the modified cash basis of accounting. Under this comprehensive basis of accounting, no provision has been made to record items which have been incurred but not paid or earned but not received. This includes items such as interest receivable. Accordingly, the accompanying financial statements are not intended to present

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Basis of accounting, continued

financial position or results of operations in conformity with accounting principles generally accepted in the United States of America.

Investments

Investments held by a common collective investment trust (the "Fund") are required to be reported at fair value. The fair value of the collective trust is determined at the close of business each day based in quoted or appraised market value. However, contract value is the relevant measurement attribute for that portion of the net assets of a collective investment trust attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the underlying defined-contribution plan. The accompanying portfolio of investments reflects both the fair value as well as the adjustment to contract value for each investment that is deemed benefit responsive. The statements of net assets available for plan benefits present the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statements of Changes in Net Assets Available for Plan Benefits were prepared on a contract value basis.

The change between the fair value and contract value of the Plan's fully benefit-responsive investment (common collective investment trusts) contracts (Principal Financial Stable Value Signature) at December 31, is reflected below:

	2015	2014	Change
Investments at fair value	$ 2,799,547	$ 2,568,705	$ 230,842
Investments at contract value	2,792,189	2,541,694	250,495
Adjustments to contract value	$ (7,358)	$ (27,011)	$ (19,653)

The Plan's pooled separate and mutual fund investments are stated at market (fair) value. The values of each account are determined at the close of each business day based on quoted or appraised market value. The value of the accounts are expressed in units. The unit value is the dollar value of one unit and is determined at the close of each business day by dividing the value of the entire account by the total number of units in the account. The values of the forfeiture accounts are equal to actual cash value and or outstanding balance at the respective year-end.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Events limiting contract value treatment

Market value events may limit the ability of the common collective investment trust (Fund) to transact at contract value with the issuer. Market value events are events or conditions that occur which are outside of the normal operation of the Fund and lead to any Fund disbursements which have or will have a material adverse effect on the operations of the Fund and a financial effect on the investment contract or wrap issuer's interest hereunder.

Such events may include but are not limited to: Fund administration is amended or changed, merger or consolidation of investors, group terminations or layoffs, implementation of an early retirement program, termination or partial termination of the Fund, failure to meet certain tax qualifications, participant communication that is designed to influence participants not to invest in the Fund, transfers to competing options without meeting the equity wash provisions of the Fund, and plan sponsor withdrawals without the appropriate notice to the Fund and/or issuer.

In the normal course of business, such events or conditions would not limit the ability of the Fund to transact at contract value with the participants in the Fund. The Fund is managed to maintain a certain amount of liquidity to provide for the day-to-day liquidity needs of participants as well as the occasional market value event.

Termination events by the issuers within the Fund

An issuer can terminate an investment contract upon the event of default by the contract holder, Adviser or Trustee if the issuer determines in its reasonable discretion, such event has had, or is likely to have a material adverse effect on the issuer's interest with respect to the contract.

Such events may include but are not limited to: management of the portfolio is not in accordance with investment guidelines, a breach of any material obligation under the wrap agreement, any representation or warranty made by the contract holder becomes untrue in any material way, a replacement of the Adviser without prior consent of the issuer, the Fund is terminated or ceases to qualify as a group trust or plans cease to meet the appropriate tax qualification, or the wrap becomes a prohibited transaction within the meaning of Section 406 of ERISA.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Fully benefit responsive investment valuation within the Fund

Investments in contracts within the Fund are presented in the portfolio of investments at contract value, which represents invested principal plus accrued interest thereon. The contracts are nontransferable but provide for benefit responsive withdrawals and participant transfers to noncompeting options by plan participants at contract value. In the event facts and circumstances provide evidence that contract value is impaired, the contracts would be presented at fair value. In determining contract value, the Trustee considers such factors as the benefit responsiveness of the contracts, the ability of the parties to the contracts to perform in accordance with the terms of the contracts and the likelihood of default by the issuer of an investment security.

Investments in regulated investment companies or collective investment trusts are valued at the net asset value per share/unit on valuation date.

Investment contracts within the Fund

Investment contracts can be structured as nonparticipating, participating or a combination thereof. Conventional Guaranteed Investment Contracts (GICs) issued by insurance companies are primarily nonparticipating, wherein the contract holder does not participate in any gains and losses incurred due to performance of the underlying portfolio relative to the book value at times of withdrawals. Conversely, synthetic investment contracts, or wrap contracts, issued by insurance companies or banks, are primarily participating, wherein the contract holder participates in gains and losses incurred due to the performance of the underlying portfolio relative to book value at times of withdrawals. Gains and losses are amortized through future crediting rate re-sets. Participating structures are the most common structure utilized in this Fund.

GIC contracts are typically issued with a fixed crediting rate and a fixed maturity date that does not change over the life of the contract. Wrap contracts typically re-set on a monthly or quarterly basis as negotiated with the wrap issuer and do not have a final stated maturity date. The wrap contracts in this Fund are predominately re-set on a monthly basis with a one-month look back for the portfolio statistics. The wrap contract issuer guarantees a minimum 0% crediting rate although a wrap does not absorb any loss for credit default in an underlying portfolio.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Investment contracts within the Fund, continued

The gross crediting rate formula is negotiated in the wrap contract and is typically represented as:

CR = (MV/BV)^(1/D)*(1+YTM)-1 where:

MV = market value of portfolio
BV = book value of portfolio
D = weighted average duration of portfolio
YTM = annualized dollar or duration weighted yield to maturity of the portfolio

The net crediting rate is equal to the gross crediting rate minus the wrap fee due the contract issuer and if applicable, minus the sub-advisor fees for specific investment strategies. Crediting rates reflect the amortization of realized and unrealized gains and losses in the underlying portfolio over the duration of the portfolio and, in consequence, may not reflect the actual returns achieved in the portfolio. From time to time the crediting rate may be significantly greater or less than current market interest rates.

A number of factors can influence future crediting rates, which may include but are not limited to: portfolio cash flows, underlying portfolio performance, current market interest rates for reinvestment, duration posture, change in credit ratings, default or bankruptcy by an asset or wrap issuer, the unexpected receipt of principal and interest payments, extraordinary withdrawals and certain wrap contract terms, including wrap fees.

The gross crediting rate formula is also subject to re-negotiation by the contract issuer and/or the contract holder. Events which may warrant the use of a different crediting rate formula or variables utilized in the formula illustrated above include, but are not limited to, depressed market value to book value ratios, credit events or pricing pressures within the wrapped portfolio that impacts market valuation.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Investment contracts within the Fund, continued

Synthetic investment contracts are comprised of both investment and contractual components. The investment component consists of securities or shares of units of a pooled portfolio of fixed-income securities, referred to as the underlying investments. Underlying investments may include, but are not limited to:

- Asset-backed securities
- Corporate bonds
- Mortgage-backed securities
- Securities issued or backed by the U.S. government agencies, government sponsored enterprises or similar U.S. government entities or instrumentalities
- Shares of mutual finds primarily invested in the above
- Units of commingled pools primarily invested in the above
- Money market instruments

This investment component is "wrapped" by contracts issued by third-party financial institutions. This wrap becomes the contractual component and provides for benefit withdrawals and investment exchanges at the full contract value of the synthetic investment contracts (i.e., principal plus accrued interest) notwithstanding the actual market value of the underlying investments (i.e., fair value of security plus accrued interest). In this manner, wrap contracts are designed to smooth out the impact of normal market fluctuations associated with the performance of the underlying investments.

Wrap contract issuers place restrictions on minimum/maximum portfolio durations and on the minimum credit quality of the underlying investments.

Most of the investments underlying the synthetic contracts have expected average lives. That is, they have a target maturity date that is subject to change depending on market conditions. Should the expected average life of the investments shorten or extend, the crediting rate on the contract is normally reset to reflect the investments' net yield to maturity. If the underlying investments prepay prior to their expected maturity, the cash flows from the investments are typically reinvested in new investments.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Investment contracts within the Fund, continued

At December 31, 2015 and 2014, the Fund held a synthetic investment contract in which the underlying investment consisted of units of the Principal Financial Stable Value Fund, another of the Trustee's Collective Trust Funds. The primary objective of the actively managed fund is to provide participating entities with a medium for collective investment primarily in actively managed fixed income portfolios sub-advised by multiple managers with specific investment strategies. The sub-advisors are Pacific Investment Management Company (PIMCO), Wellington Capital Management and Blackrock, Inc.

The following tables are intended to show the hypothetical impacts to the Fund's crediting rate over the next four quarterly periods as a result of changes in yields on the underlying investments, and changes in yields on underlying investments combined with a significant redemption from the Fund.

December 31 Assumptions	2015	2014
Portfolio gross crediting rate	2.024%	1.862%
Current market interest rate	1.917%	1.436%
Percent market rate change per interval	25%	25%

The above is illustrative only and based on the assumptions given below. The crediting rate on the portfolio and total returns actually achieved by investors in the future may vary significantly from the above illustration due to market, plan and cash flow events.

- The basis for current market interest rate is the actual yield to maturity of underlying assets.
- The above represents an estimate based on current crediting rate calculation conventions.
- The illustrative crediting rate calculations are gross of wrap fees which typically average 24 basis points.
- Assumptions used in crediting rate calculation:
  - Market value to book value ratio = 100.264%, initial gross crediting rate = 2.024% and duration = 2.74 years.
  - The participant cash flow example above reflects the manager's methodology in paying benefits and managing overall portfolio allocations.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Investment contracts within the Fund, continued

- Immediate one time hypothetical 10% decrease in net assets due to participant transfers occur after the interest rate change.
- One quarter increase of current yield equals the current yield multiplied by 1.25.
- Effect on crediting rate as of the date of the latest statement and at the end of the next four quarters assumes the portfolio rate resets quarterly.
- Reset rate based on interest rate impact on the portfolio market value and underlying investments yield to maturity. Assumes market value grows by interest earnings over next reset periods.

At December 31, 2015 and 2014, all investment contracts held by the Fund were deemed fully benefit-responsive. The change in the difference between the fair value and contract value of the Fund's fully benefit-responsive investment contracts during 2015 and 2014 is reflected below:

	December 31		
	2015	**2014**	**Change**
Investments at fair value	$ 3,893,569,903	$ 3,812,488,141	$ 81,081,762
Wrap contracts at fair value	766,340	1,716,359	(950,019)
Investments at contract value	3,882,625,575	3,768,941,757	113,683,818
Adjustments to contract value	(11,710,668)	(45,262,743)	33,552,075

Investment income within the Fund

For fully benefit-responsive synthetic investment contracts, earnings on the underlying assets are factored into the next computation of the crediting rate re-set.

Income recognition

Transactions are accounted for using the transaction date. Realized gains or losses are determined on the basis of actual cost. In accordance with the policy of stating investments at fair market value, any change in unrealized appreciation or depreciation for the year is separately stated as are the realized gains and losses in the statements of changes in net assets available for Plan benefits.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Income tax status

The Plan adopted a Prototype Non-Standardized Profit Sharing Plan with a cash or deferral arrangement which received a favorable opinion letter from the Internal Revenue Service (IRS) on March 31, 2008, which stated that the Plan and the related trust are designed in accordance with applicable sections of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan's management and counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code and that the Plan is qualified and related trust is tax exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require the plan administrator to evaluate tax positions taken by the Plan and recognize a tax liability for any uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by tax authorities; however, there are currently no audits for any tax periods in progress.

The Plan's annual return Form 5500 for the prior three (3) fiscal years remain open for examination.

Parties-in-interest transactions

Certain Plan investments are managed by Principal Life Insurance Co., which is the trustee/custodian as defined by the Plan and is considered a party-in-interest. Principal also performs certain Plan administrative functions. Certain administrative functions are performed by officers and employees of the Partnership. No such officer or employee receives compensation from the Plan.

Plan termination

Although the Company has not expressed any intent to do so, the Plan may be terminated at any time subject to the provisions of ERISA. In the event of termination, all participants would become 100% vested and their individual accounts nonforfeitable. Participant accounts will be held in the Plan and continue to earn interest until benefits are provided in accordance with the terms of the Plan.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Use of estimates

The preparation of financial statements in accordance with the modified cash basis of accounting requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosure of contingent assets and liabilities at the date of the statement of net assets available for Plan benefits and the changes during the reporting period. Accordingly, actual results could differ from these estimates.

Fair value of financial instruments

FASB ASC 825-10-50-21 (formerly Financial Accounting Standards Board Statement No. 107), "Disclosures About Fair Value of Financial Instruments," requires disclosure of fair value information about financial instruments for which it is practicable to estimate that value. The carrying amounts of cash and money market accounts approximate fair value due to the short maturity of those instruments.

Subsequent events

Subsequent events have been evaluated through June 3, 2016, which is the date the financial statements were available to be issued.

NOTE C - MARKET RISK

The Plan invests in various investment securities and in various companies within various markets. All of the Plan's investments are recorded at fair market value in accordance with the reporting requirements governing the Plan. Net changes in asset value is reflected as net appreciation (depreciation) in fair value of investments. All such investments are subject to various market and economic risk factors as well as the national and global economies and it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the participant's account balances and amounts reported in the Plan's financial statements and supplementary schedules. Investments may lose principal and/or value.

NOTE D - FAIR VALUE MEASUREMENTS

The Plan's investments are reported at fair value in the accompanying Statements of Net Assets Available for Plan Benefits and consist of the following:

		Fair Value Measurements Using:	
	Fair Value	Quoted Prices in Active Markets for Identical Assets Level (1)	Observable Inputs Other Than Quoted Prices Level (2)
2015			
Common collective trusts	$ 2,799,547	$ -	$ 2,799,547

Fair value measurements

FASB ASC 820-10-50-1 (formerly Financial Accounting Standards Board Statement No. 157), "Fair Value Measurements," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level (1) inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, Level (2) inputs primarily include fixed income securities or investment contracts and inputs other than quoted prices, Level (3) inputs have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair

NOTE D - FAIR VALUE MEASUREMENTS, CONTINUED

Fair value measurements, continued

value of its investments. When available, the Plan measures fair value using Level (1) inputs because they generally provide the most reliable evidence of fair value. No Level (3) inputs were used by the Plan.

Level (1) fair value measurements

The fair value of mutual funds is based on quoted net asset values of the shares held by the Plan at year end.

Level (2) fair value measurements

Fair value is based on inputs other than quoted prices within Level (1) that are observable for the asset, either directly or indirectly. The Plan's Level (2) assets include investment contracts (common collective trusts) and pooled separate accounts.

The pooled separate accounts invest mainly in domestic stocks. The majority of the underlying securities have observable Level (1) inputs however fair value is estimated based on the Net Asset Value (NAV) of each separate account. The NAV of each pooled separate account is not publicly quoted.

The Principal Financial Stable Value Signature Fund also has a contract value component vs. fair value of $(7,358) and $(27,011) and is therefore reflected as such at December 31, 2015 and 2014, respectively. Average yield rate was less 1% for both 2015 and 2014. This fund is a collective investment trust.

Level (3) fair value measurements

Fair value is based on significant unobservable inputs for the asset or liability. The Plan does not currently have any Level (3) assets or liabilities.
