FALCON TRADING COMPANY, INC. 401(K) PLAN AND TRUST

NOTES TO FINANCIAL STATEMENTS
Year Ended December 31, 2009

Note 1. DESCRIPTION OF PLAN

The following description of the Falcon Trading Company, Inc. 401(k) Plan and Trust ("Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all employees age twenty-one and older, work over 1,000 hours and have completed six months of service. The Plan is subject to the provisions of the Employee Retirement Income Securities Act of 1974 (ERISA).

Contributions

Eligible employees may elect to defer from 1% to 100% of their pre-tax annual compensation as defined in the Plan, up to a maximum of $16,500 in 2009. If a participant has reached the age of fifty, or older in 2009, a one time only "catch-up" provision is allowed for a maximum of $5,000, for a total of $21,500 in 2009. The Company can match and make discretionary payments to the Plan at the option of the Board of Directors.

Participant Accounts

Each participant's account is credited with participant's contributions and allocation of (a) the Company's contributions and (b) Plan earnings. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's account.

Vesting

Participants are immediately vested in their contributions, plus actual earnings thereon. Vesting in the Company's contribution portion of their account plus actual earnings thereon is based on years of continuous service. A participant is 100 percent vested after six years of credited service.

Participant Loans

Participants may borrow from their vested account balances a minimum of $1,000, up to a maximum of $50,000, or 50 percent of their vested account balance, whichever is less. The loans are secured by the balance in the participant's account and bear interest at prime, as determined in by Bank of America, plus 1 percent.

Note 1. DESCRIPTION OF PLAN (Continued)

Investments

Separate investment accounts are established for each employee. Employees direct the investments of funds through fifteen investment options. Investments are participant directed through by AXA Equitable Life Assurance Society of the United States.

Payment of Benefits

On termination of service, a participant may elect to receive payment in either a lump-sum amount equal to the value of his or her account, or in regular installments.

Note 2. SUMMARY OF ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Shares of pooled separate accounts are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end.

Realized and Unrealized Appreciation

Realized and unrealized appreciation is based on the market value of the assets at the end of the Plan year compared to the market value of the assets at the beginning of the Plan year, or at the time of purchase for assets purchased/exchanged during the Plan year.

Payment of Benefits

Benefits are recorded when paid.

Note 2. SUMMARY OF ACCOUNTING POLICIES (Continued)

Forfeited Accounts and Undistributed Earnings

At December 31, 2009, there was $1,456 in forfeited non-vested accounts. Forfeitures are allocated to participant accounts.

Note 3. FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board Statement No. 157, *Fair Value Measurements* (FASB Statement No. 158), establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used in measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarch under FASB Statement No. 157 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in active markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specific (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Note 3. FAIR VALUE MEASUREMENTS (Continued)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at December 31, 2009 and 2008.

Common stocks, corporate bonds and U.S. government securities: Value at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the net asset value ("NAV") of shares held by the Plan at year end.

Participant loans: Valued at amortized cost, which approximates fair value

The methods described above may produce a fair value calculation that may not be indicative of the net realizable value or reflective of future values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009.

	Level 1	Level 2	Level 3	Total
Pooled separate accounts	$ 2,039,784	-	-	2,039,784
Insurance company (unallocated contracts)	479,046	-	-	479,046
