FRESNO OXYGEN EMPLOYEES 401(K) RETIREMENT PLAN
NOTES TO FINANCIAL STATEMENTS
Year Ended December 31, 2016

NOTE 1. DESCRIPTION OF PLAN

The following description of the Fresno Oxygen (the Company) Employees 401(k) Retirement Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined contribution plan covering substantially all eligible employees of the Company. It is subject to provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan provides retirement benefits that cover employees of the Company that have at least three months of service and are age 21 or older. The employees' vested benefit is dependent upon their years of service with the Company. The plan sponsor provides matching contributions to participants that have at least one year of service and are age 21 or older.

Contributions - Each year, participants may contribute a portion of their annual compensation on a pretax basis up to the maximum annual deferral limit. Participants may also contribute (or "rollover") amounts representing distributions from other qualified retirement plans. Fresno Oxygen matches a participant's contribution at a rate of 100% of the first 3% of compensation deferred. Participant's contribution must be a minimum of 2% to qualify for the match. The contribution match begins at the beginning of the next fiscal year following the participant's one year anniversary of employment. Participants direct the investment of all contributions into various investment options offered by the Plan.

Participant accounts - Each employee's segregated account is credited with the participant's contribution and allocations of (a) the Company's contribution and, (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting - Participants are vested immediately in their salary deferral and rollover contributions plus actual earnings thereon. Vesting in the Company's match and profit sharing contribution portion of their accounts is based on years of continuous service. A participant is 100 percent vested after six (6) years of credited service.

Participant loans - Participants may borrow from their fund accounts an amount equal to a minimum of $1,000 up to a maximum of $50,000 or 50% of their account balance, whichever is less. The loans are secured by the balance in the participant's account and bear interest at rates commensurate with local prevailing rates as determined monthly by the trustees. The interest rate on loan balances in 2016 was 5.5% per annum.

NOTE 1: DESCRIPTION OF PLAN (Continued)

Payment of benefits - Upon termination of service, a participant may elect to receive a lump-sum amount equal to the value of the participant's vested interest in his or her account. Distributions may also commence upon death, disability, or attainment of normal retirement age.

Forfeited accounts - At December 31, 2016, forfeited accounts had a balance of $4,678. There were $4,341 in new forfeitures during the fiscal year ended December 31, 2016 and $55 was used to pay plan expenses. This account will be used to reduce future employer contributions or plan expenses.

Date of management's review - Subsequent events were evaluated through July 31, 2017, which is the date the financial statements were available to be issued.

Profit sharing - The Company has elected not to make a profit sharing contribution for the 2016 plan year.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of accounting – The financial statements are prepared using the accrual basis of accounting.

Use of estimates – The preparation of financial statements, in conformity with generally accepted accounting principles, requires that the plan administrator make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment valuation and income recognition – The Plan's investments are stated at fair value, as reported by Transamerica Life Insurance Company at December 31, 2016, except for guaranteed investment contracts, which are reported at contract value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurement.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Administrative expenses – Reasonable expenses for administration, investments, and processing shall be charged against the Trust Fund earnings, paid by the employer, or allocated among terminated and active Participants according to an expense policy adopted by the employer and applied in a uniform manner consistent with DOL and Treasury regulations. In 2016, all administrative expenses, except for record keeping and investment expenses charged by TransAmerica, have been paid by the plan sponsor, Fresno Oxygen & Welding Suppliers, Inc. (See paragraph 3.1.6 in the Plan Document).

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Payment of benefits - Benefits are recorded when paid.

Date of management's review of subsequent events - Subsequent events were evaluated through July 31, 2017, which is the date the financial statements were available to be issued.

Participant loans - Participant loans are measured at their unpaid principal balance plus any accrued but unpaid interest. Interest income is recorded on the accrual basis. Related fees are charged directly to the borrowing participant's account and are included in administrative expenses when incurred. As of December 31, 2016 and 2015, no allowance for credit losses has been recorded. If a participant does not make loan repayments and the plan administrator considers the participant loan to be in default, the loan balance is reduced, and the delinquent participant loan is recorded as a benefit payment based on the terms of the Plan document.

NOTE 4: FAIR VALUE MEASUREMENTS

The fair value measurement accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consist of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority. Level 2 inputs consist of observable inputs other than quoted prices for identical assets (Level 1). Level 3 inputs are unobservable and have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 2 inputs are used for investments for which Level 1 inputs were not available. Level 3 inputs would only be used if Level 1 or Level 2 inputs were not available.

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 — Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The following is a description of the valuation methodologies used for assets measured at fair value.

Pooled separate accounts: Valued at the underlying net asset value (NAV) of assets comprising the accounts of shares held by the Plan at year end.

Life insurance policies: Valued at cash value, which approximates fair value.

Participant loans: Valued at amortized cost, which approximates fair value.

NOTE 4: FAIR VALUE MEASUREMENTS (Continued)

Guaranteed investment contract: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer. The contract value represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

The methods described above may produce a fair value calculation that may not be indicative of the net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2016:

	Fair Value Measurement at the End of the Reporting Period
