**MPI RESEARCH, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2009**

DESCRIPTION OF PLAN

The following description of the MPI Research, Inc. 401(K) Plan provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

GENERAL

The MPI Research, Inc. 401(K) Plan is a defined profit sharing plan with 401(K) features and covers substantially all employees of MPI Research, Inc. who are age twenty-one or older. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The 401(K) feature provides employees with the option to make elective contributions up to the maximum allowed under ERISA guidelines. Such contributions are 100% vested. Employer 401(K) match contributions are vested at a rate of 33% per year beginning after one year in the Plan. After three years the match contributions are 100% vested. Employees can choose how to invest their account among the investment funds offered.

DISTRIBUTION OF BENEFITS

A participant's vested account balance will be distributed to them or their beneficiary in the event of death, disability, and retirement. Benefits shall be paid in a lump sum or at the election of the participant in installments over a period not to exceed their assumed life expectancy. Employees whose employment is terminated for a reason other than those discussed above are entitled to receive only their vested percentage of their account balance and the remainder will be forfeited.

EMPLOYER CONTRIBUTIONS

Each year the employer can make discretionary matching contributions equal to a percent of the salary reduction elected by the employee subject to a maximum percentage. The percent is determined by the employer. The employer matching contribution for 2009 was \$1,138,768.

PARTICIPANT LOANS

Participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum of \$50,000 or 50% of their vested account balance, whichever is less. The loans are secured by the balance in the participant's account and bear interest at rates ranging from 5% to 10%. Principal and interest is paid ratably through monthly payroll deductions.

FORFEITED ACCOUNTS

For the year ended December 31, 2009, forfeitures were \$14,876. Total forfeitures held at December 31, 2009, were \$13,962. These forfeitures can be used to reduce employer match contributions.

MPI RESEARCH, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2009

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the Plan are prepared under the accrual basis of accounting. Benefit payments are recorded when paid.

Investment Valuation and Income Recognition – The Plan's investments are stated at fair value. Quoted market prices are used to value investments. Shares of mutual funds are valued at the net asset value of shares held by the Plan at year-end. Participant loans are valued at their outstanding balances, which approximate fair value.

The Internal Revenue Service has determined that the Plan is acceptable under Section 401 of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Company believes the Plan is currently designed and being operated in compliance with applicable requirements of the Internal Revenue Code.

The Company absorbs significant costs associated with the Plan.

Subsequent events were evaluated through August 26, 2010, which is the date the financial statements were available to be issued.

The preparation of financial statements in conformity with generally accepted accounting principles requires the Plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

PLAN TERMINATION

Although it has not expressed any interest to do so, the Company has the right under the Plan to terminate the Plan at any time subject to the provisions of ERISA. In the event of Plan termination, participants will become 100% vested in their accounts.

REPORTABLE TRANSACTIONS

There were no investment assets reportable as acquired and disposed of during the year. Additionally, there were no reportable transactions under categories i), ii), iii), or iv) as set forth in the Department of Labor Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board Statement No. 157, *Fair Value Measurements* (FASB Statement No. 157), establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB Statement No. 157 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

MPI RESEARCH, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2009

FAIR VALUE MEASUREMENTS (Continued)

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used for 2009.

Common stocks, corporate bonds and U.S. government securities: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the net asset value (NAV) of shares held by the plan at year end.

Loans to participants: Valued at outstanding balances which approximates fair value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value at:

December 31, 2009:

RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
