Robert Bosch Tool Corporation 401(k) Plan for Union Associates

Notes to Financial Statements

December 31, 2009 and 2008

1. Description of the Plan

The following description of the Robert Bosch Tool Corporation 401(k) Plan for Union Associates (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions. The Plan is subject to the requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended.

General

The Plan is a profit sharing plan with a 401(k) feature covering union employees of Robert Bosch Tool Corporation (the "Company").

Eligibility

A full-time employee becomes a participant in the Plan after completing one hour of service. Part-time employees are eligible to participate after one year of service with 1,000 hours of service, as defined in the Plan document.

Contributions

The Plan provides for participant contributions to be made on both a pre-tax and an after-tax basis. Each pay period in which participants receive wages, they may contribute between 1% and 85% of their eligible compensation, as defined in the Plan document, subject to maximum amounts established by the Internal Revenue Code (the "Code"), pursuant to Section 401(k) of the Code. Participants may also contribute amounts representing catch-up contributions (if age 50 or older), and distributions from other qualified defined-benefit or defined-contribution plans.

Company matching contributions are made in accordance with the respective Collective Bargaining Agreement. Generally, participants must be employed on the last day of the year to be eligible for Company contributions.

Participant Accounts

Each participant's account is credited with the participant's contributions and allocations of the Company's contributions and Plan earnings. Allocations of Plan earnings are based on participant account balances in the respective investment options. The benefit to which a participant is entitled is equal to the vested balance that can be provided from the participant's account.

Investment Options

Participants may direct all contributions to any of the investment options offered, which include mutual funds and collective trusts, as well as the Bosch Stable Value Fund, which holds a liquidity fund and several synthetic guaranteed investment contracts. Participants may also utilize a brokerage account, which permits the participant to invest in other securities. Changes in allocations of future contributions and transfers among funds of presently invested contributions are permitted pursuant to Plan provisions. The Plan's investments are held by Mercer Trust Company (the "Trustee").

Effective July 1, 2008, the plan administrator made additional changes to the Plan's investment fund options. The American Century Value Fund was replaced by the Dodge & Cox Stock Fund, the JPMorgan Bond Fund was replaced by the NTGI-QM Collective Daily Aggregate Bond Index Fund, the SSgA International Stock Selection Fund was replaced by the SSgA Global Advisors International Alpha Select Fund, and the Lazard Emerging Markets Fund which was a mutual fund, is now offered as a collective trust option.

Robert Bosch Tool Corporation 401(k) Plan for Union Associates

Notes to Financial Statements

December 31, 2009 and 2008

Vesting

Effective January 1, 2004, all accounts of active participants are fully vested at all times.

Benefit Payments

In the event of retirement, termination of service, death, or disability, the participant may receive a lump sum or installment payments equal to the vested value of his or her account. Participants may also make withdrawals of any portion of their participant contributions after attaining the age of 59-1/2 or for certain financial hardship situations. Such withdrawals will be authorized by the Plan administrator only upon satisfaction of criteria as enumerated in the Plan document.

If the payment is for termination of service, the amount may be transferred directly to an Individual Retirement Account or another qualified plan. If the participant does not elect a direct plan-to-plan transfer, the Internal Revenue Service ("IRS") requires the Company to withhold 20% of the final distribution for payment of federal income taxes.

Administrative Expenses

The majority of administrative expenses, consisting principally of investment management, recordkeeping and audit fees, are paid by the Company.

Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event the Plan is terminated, the accounts of all participants would be distributed to the participants.

Participant Loans

Participants may borrow from their Plan accounts a minimum of \$1,000 up to a maximum of the lesser of \$50,000 (subject to certain limitations as defined in the Plan document) or 50% of their vested account balance. All loans are amortized over a reasonable period of time, generally not to exceed five years, and are payable immediately upon termination. The loans are secured by the vested balance in the participant's account and bear interest at a rate commensurate with local prevailing rates. Principal and interest are to be paid through payroll deductions.

2. Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Robert Bosch Tool Corporation 401(k) Plan for Union Associates

Notes to Financial Statements

December 31, 2009 and 2008

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Shares of mutual funds are valued at the net asset value of shares held by the Plan at year end. Participant loans are valued at their outstanding balances, which approximate fair value. Units of collective trusts are valued at the net asset value of units held by the Plan at year end, based on information reported by the investment advisor using the audited financial statements of the collective trusts.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined, contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts within the Bosch Stable Value Fund option. The Statements of Net Assets Available for Benefits present the fair value as well as the adjustment from fair value to contract value relating to the investment contracts. The Statements of Changes in Net Assets Available for Benefits are prepared on a contract value basis.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. The Plan presents in the Statements of Changes in Net Assets Available for Benefits the net appreciation (depreciation) in the fair value of its investments which consists of the gains and losses on investments bought and sold as well as held during the year.

Synthetic Guaranteed Investment Contracts

The Plan holds synthetic guaranteed investment contracts ("GICs") as part of the Bosch Stable Value Fund. The synthetic GICs provide for a fixed return on principal over a specified time through fully benefit-responsive wrapper contracts issued by AIG Financial Products, Royal Bank of Canada, and State Street Bank. The assets underlying the synthetic GICs primarily include a liquidity fund and an intermediate bond collective trust fund.

The fair value of the synthetic GICs equals the total of the fair value of the underlying assets plus the fair value of the wrapper contracts. The fair value of the wrapper contracts is computed using a replacement cost approach that incorporates a comparison of the current fee rate on similar wrapper contracts to the fee being paid by the Plan. Using this approach, the fair value of the wrapper contracts was \$0 and \$9,050 at December 31, 2009 and 2008, respectively.

Fully benefit-responsive synthetic GICs are valued at contract value, rather than fair value, for determining the net assets available for benefits. Contract value represents contributions, plus earnings, less participant withdrawals and administrative expenses. The wrapper contracts used by the Plan are fully benefit-responsive because the wrapper contract issuers are contractually obligated to make up any shortfall in the event that the underlying asset portfolio has been liquidated and is inadequate to cover participant withdrawals and transfers at contract value. There are currently no reserves against contract values for credit risk of the contract issuers or any other risk. The contract value for the synthetic GICs was \$2,247,467 and \$2,382,978 at December 31, 2009 and 2008, respectively.

Robert Bosch Tool Corporation 401(k) Plan for Union Associates

Notes to Financial Statements

December 31, 2009 and 2008

The crediting interest rate, which is reset quarterly, based on a formula agreed upon with each wrapper contract issuer, can never fall below zero. The crediting rate formula smoothes the impact of interest rate changes on participant returns by amortizing any difference between market value and book value over a period of years equal to the duration of the portfolio benchmark. The average yield on the synthetic GICs based on annualized earnings was approximately 4.29% and 6.56% at December 31, 2009 and 2008, respectively. The average interest rate credited to participants on the synthetic GICs was approximately 2.50% and 3.38%, respectively, for the years ended December 31, 2009 and 2008. The credit ratings for AIG Financial Products were A- at both December 31, 2009 and 2008, the credit ratings for Royal Bank of Canada were AA- at both December 31, 2009 and 2008, and the credit ratings for State Street Bank were AA- and AA at December 31, 2009 and 2008, respectively.

Certain events limit the ability of the Plan to transact at contract value with the issuer. These events include restructurings, early retirement plans, divestitures, bankruptcies or as the result of legal, tax, or regulatory changes. The Plan administrator believes that the occurrence of any such event is remote.

The providers of the wrapper contracts can only terminate at a value different than contract value under an event of default (that was not remedied) such as failure to follow the terms of the contract.

Benefit Payments

Benefits are recorded when paid.

Adoption of New Accounting Pronouncements

The accounting standards described below that were adopted in 2009 affected certain note disclosures but did not impact the statements of net assets available for benefits or the statement of changes in net assets available for benefits.

Fair Value Measurements

In April 2009, the Financial Accounting Standards Boards ("FASB") issued authoritative guidance clarifying that fair value is defined the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants under current market conditions. This new guidance requires an evaluation of whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. This guidance was adopted for the year ended December 31, 2009. The adoption of this guidance did not result in a significant change in the techniques used by the Plan to measure the fair value of its investments.

In August 2009, the FASB issued authoritative guidance clarifying the measurement of the fair value of a liability in circumstances when a quoted price in an active market for an identical liability is not available. The guidance emphasizes that entities should maximize the use of observable inputs in the absence of quoted prices when measuring the fair value of liabilities. This guidance became effective for the Plan as of October 31, 2009 and did not have a significant impact on the Plan.

Robert Bosch Tool Corporation 401(k) Plan for Union Associates

Notes to Financial Statements

December 31, 2009 and 2008

In September 2009, the FASB issued authoritative guidance that provides further clarification for measuring the fair value of instruments in entities that meet the FASB's definition of an investment company. This guidance permits a company to estimate the fair value of an investment using the net asset value ("NAV") per share of the investment if the NAV is determined in accordance with the FASB's guidance for investment companies as of the company's measurement date. This creates a practical expedient to determining the fair value estimate and allows certain attributes of the investment (such as redemption restrictions) to not be considered in measuring fair value. This guidance became effective for the Plan as of December 31, 2009 and is required to be applied prospectively. The Plan contains certain investments, including commingled funds, which are within the scope of this guidance. However, as the fair value of investments was already determined based on NAV per fund share, this guidance did not result in a significant change in the techniques used by the Plan to measure the fair value of these investments.

In January 2010, the FASB issue authoritative guidance intended to improve disclosures about fair value measurements. The guidance requires entities to disclose significant transfers in and out of fair value hierarchy levels and reasons for the transfers and to present information about purchases, sales, issuances, and settlements separately in the reconciliation of fair value measurements using significant unobservable inputs (Level 3). Additionally, the guidance clarifies that a reporting entity should provide fair value measurements for each class of assets and liabilities and disclose the inputs and valuation techniques used for fair value measurements using significant other observable inputs (Level 2) and significant unobservable inputs (Level 3). This guidance is effective for annual periods beginning after December 15, 2009 except for disclosures about purchases, sales, issuances and settlements in the Level 3 reconciliation, which will be effective for annual periods beginning after December 15, 2010. As this guidance provides only disclosure requirements, the adoption of the standard will not impact the Plan's financial statements.

The Company has expanded disclosures in Note 4 to comply with the aforementioned fair value guidance.

Accounting Standard Codification

In June 2009, the FASB issued authoritative guidance which replaced the previous hierarchy of GAAP and establishes the FASB Codification as the single source of authoritative GAAP recognized by the FASB to be applied by nongovernmental entities. This guidance modifies the GAAP hierarchy to include only two levels of GAAP: authoritative and nonauthoritative. This guidance was effective for the Plan as of September 30, 2009. The adoption of this guidance did not impact the Plan's financial statements since the FASB Codification is not intended to change or alter existing GAAP.

Subsequent Events

In May 2009, the FASB issued authoritative guidance which established general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. The new standard is based on the same principles as those that currently exist in auditing standards and does not change the way subsequent events are assessed. This guidance became effective for the Plan for annual periods ending after June 15, 2009. The Plan has evaluated the events and transactions that have occurred through October 4, 2010, the date the financial statements were available to be issued, and noted no items requiring adjustment to the financial statements or additional disclosures.

3. Investments

The Trustee of the Plan holds the Plan's investments and executes all investment transactions. Investment information disclosed in the accompanying financial statements and schedule, including investments held at December 31, 2009 and 2008, net appreciation (depreciation) in fair value of investments and dividend and interest income for the years ended December 31, 2009 and 2008, and the investment information presented below was obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by Mercer Trust Company, the Trustee.

The investments within the Bosch Stable Value Fund were certified at their contract value of \$2,247,467 and \$2,382,978 at December 31, 2009 and 2008, respectively. The fair value and the adjustment from fair value to contract value at December 31, 2009 and 2008 of \$125,580 and \$259,866, respectively, were not certified.

The fair value of individual investments that represent 5% or more of the Plan's net assets is as follows at December 31:

	2009	2008
JPMorgan Small Cap Equity Select Fund	\$ 356,299	\$ 283,605
JPMorgan Intermediate Bond Fund	2,099,191	1,950,798
JPMorgan SmartRetirement 2015 Fund	*	187,342

* Below 5% threshold

The Plan's investments including investments bought and sold as well as held during the year appreciated (depreciated) in fair value as follows:

	2009	2008
Mutual funds	\$ 174,781	\$ (380,538)
Collective trusts	92,176	(197,497)
	<u>\$ 266,957</u>	<u>\$ (578,035)</u>

4. Fair Value Measurements

The FASB established a framework to increase consistency and comparability in fair value measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;

Notes to Financial Statements

December 31, 2009 and 2008

- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.⁷

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

For a description of the valuation methodologies used for assets measured at fair value, see Investment Valuation and Income Recognition under Note 2.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's investment assets at fair value as of December 31, 2009 and December 31, 2008:

Notes to Financial Statements

December 31, 2009 and 2008

Common collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror indices such as the Standard & Poor's Index, Barclay's Capital Aggregate Index, MSCI EAFE Index and MSCI Emerging Markets Index. They are valued on the basis of the relative interest of each participating investor in the fair value of the underlying assets of each of the respective common collective trusts. The underlying assets are valued based on the NAV as provided by the investment account manager and are classified in level 2 of the fair value hierarchy. Certain of these investments can only be traded within a certain window within each monthly period. Common collective trusts included in the Plan and their relative benchmarks include:

Common Collective Trust	Description	Benchmark
JPMorgan Liquidity Fund	Short term cash investments	90 day U.S. treasury bill
JPMorgan Intermediate Bond Fund	Diversified bond fund	Barclays Capital Intermediate Aggregate Index
JPMorgan SmartRetirement 2010 Fund	Diversified target date fund	S&P Target Date 2010 Index
JPMorgan SmartRetirement 2015 Fund	Diversified target date fund	S&P Target Date 2015 Index
JPMorgan SmartRetirement 2020 Fund	Diversified target date fund	S&P Target Date 2020 Index
JPMorgan SmartRetirement 2030 Fund	Diversified target date fund	S&P Target Date 2030 Index
JPMorgan SmartRetirement 2040 Fund	Diversified target date fund	S&P Target Date 2040 Index
Lazard Emerging Markets	Emerging markets investments	MSCI Emerging Markets GD
NTGI-QM Collective Daily Aggregate Bond Index Fund	U.S. bond and debt investments	Barclays Capital Aggregate Index
State Street Global Advisors International Alpha Select Fund	International stock investments	MSCI EAFE Index

There are no unfunded commitments related to these funds as of December 31, 2009.

Level 3 Gains and Losses

The following tables set forth a summary of changes in the fair value of the Plan's Level 3 investment assets for the years ended December 31, 2009 and December 31, 2008:

	Synthetic Guaranteed Investment Contracts	Participant Loans

Unrealized gains (losses)	9,050	-
Purchases, sales, issuances and settlements, net	-	(50,586)
Balance, end of year (2008)	<u>\$ 9,050</u>	<u>\$ 49,430</u>

Robert Bosch Tool Corporation 401(k) Plan for Union Associates

Notes to Financial Statements

December 31, 2009 and 2008

Gains and losses, realized and unrealized, included in changes in net assets for the periods above are reported in net appreciation (depreciation) in fair value of investments in the statements of changes in net assets available for benefits.

5. Tax Status

The Internal Revenue Service has determined and informed the Company by letter dated August 24, 2005, that the Plan and related trust are designed in accordance with applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable provisions of the Code.

6. Party-in-Interest Transactions

Participant loans qualify as exempt party-in-interest transactions.

7. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the Statement of Net Assets Available for Benefits.

8. Subsequent Event

Effective January 1, 2010, associates employed by the Gilmore Hose division will no longer be required to be employed on the last day of the plan year in order to receive Company matching contributions, and such contributions will be calculated and deposited on a pay period basis rather than annually.
