Independent Auditors' Report

The Board of Directors of
Chemtura Corporation:

We were engaged to audit the financial statements of the Chemtura Corporation Retirement Plan (the "Plan") as of December 31, 2009 and 2008, and for the years then ended, as listed in the accompanying table of contents. The financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 5, which was certified by Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certification from the trustee as of December 31, 2009 and 2008 and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, has been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, is presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

(1) Description of the Plan

On July 1, 2005, Crompton Corporation and Great Lakes Chemical Corporation combined their businesses by merging a wholly-owned subsidiary of Crompton with and into Great Lakes. The Company changed its name to Chemtura Corporation (the "Company").

The investments of the Witco Corporation Retirement Plan (the "Plan") were combined with and managed in conjunction with the assets of various other retirement plans of Chemtura Corporation and participating subsidiaries in the Witco Corporation Retirement Plan Trust (the "Witco Master Trust").

On November 1, 2005, the assets of the Witco Master Trust were combined with the assets of the Chemtura Corporation Defined Benefit Master Trust (the "Master Trust"). Investment income/(loss) and certain expenses are allocated to the Plan based upon the percentage of the Plan's assets to the total assets of the Master Trust. Benefit payments and other non-allocated expenses are specifically identified and charged to each plan participating in the Master Trust. On December 31, 2005, various plans of Chemtura Corporation were consolidated into the Witco Corporation Retirement Plan.

On January 1, 2007 the Plan changed its name from the Witco Corporation Retirement Plan to the Chemtura Corporation Retirement Plan.

The following description of the Plan provides only general information. Further information about the Plan is included in the Plan document, which is available from the Chemtura Corporation Human Resources Department.

General

The Plan is a non-contributory defined benefit pension plan. It is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan sponsor is Chemtura Corporation.

Participation and Service

The Plan covers certain domestic employees of the Company who have reached the age of 21 and who have at least one year of service. Employees are credited for all years of service. A minimum of five years of vesting service or attainment of age 55 is required to receive benefits. Effective January 1, 2000, all newly hired corporate employees of the Company were no longer eligible to participate in the Plan. Effective January 1, 2001, all newly hired non-bargaining employees of the Company are no longer eligible to participate in the Plan and at December 31, 2005, the Plan was frozen to all non-bargained participants, and no additional incremental benefits will accrue to the participants.

Retirement Benefits

The accrued benefit for most participants is calculated as a percentage of "Final Average Earnings," as defined, multiplied by credited years of service less a percentage of Social Security Retirement benefits multiplied by credited service.

Normal retirement is at age 65. Early retirement is available to employees who are at least age 55 with benefits reduced for each month prior to age 65.

If an employee terminates with five years of vesting service or attains age 55, a vested pension based upon the above formula is payable at age 65, or age 55, reduced as in early retirement.

Death and Disability Benefits

A participant may elect to receive a reduced amount of retirement income which would continue after the participant's lifetime in accordance with various options provided in the Plan.

In the case of death of an active participant with at least five years of vesting service prior to retirement or attainment of age 55, there is a benefit payable to the surviving spouse equal to 50% of the benefit the participant had accrued prior to the date of death, payable at early retirement under the Qualified Joint and Survivor Annuity Option.

Disability retirement income benefits equal to the participant's accrued benefit are payable at age 50 to participants disabled with at least fifteen years of vesting service.

Administration of the Plan

The Plan is administered by the Employee Benefits Committee of Chemtura Corporation.

Funding Policy

The contribution to provide benefits under the Plan is made by the Company based upon an amount determined by Towers Watson, the consulting actuary. It is the Company's policy to comply with the minimum funding requirements of ERISA, and such policy has been complied with for the years ended December 31, 2009 and 2008.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

(2) Significant Accounting Policies

Adoption of Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*. SFAS No. 168 is effective for financial statements for annual periods ending after September 15, 2009 and establishes the FASB Accounting Standards Codification ("ASC"). Under SFAS No. 168, now referred to as ASC 105-10, the ASC became the only source of authoritative U.S. generally accepted accounting principles ("U.S. GAAP") to be applied by non-governmental entities and superseded all existing non-SEC accounting and reporting standards. The Plan adopted the codification as of December 31, 2009. As the ASC does not create new accounting rules, but only provides a comprehensive system to reorganize previously existing U.S. GAAP in a single authoritative source, its adoption had no effect on the Plan's financial position.

In July 2006, FASB issued ASC 740-10 (formerly FIN 48). ASC 740-10 establishes principles and standards related to the accounting for and disclosure of accounting for uncertainty in income tax positions. The Plan adopted this standard as of January 1, 2009, resulting in no effect on its financial position.

In March 2008, FASB issued ASC 815-10 *Disclosures about Derivative Instruments and Hedging Activities* (formerly SFAS No. 161). ASC 815-10 expands the required disclosures about an entity's derivative instruments and hedging activities. The Plan adopted this standard on December 31, 2009, resulting in no effect on its financial position.

In April 2009, FASB issued an amendment to ASC 820-10 *Fair Value Measurements and Disclosure* (formerly FSP No. FAS 157-4). The amendment provides additional guidance on how to determine the fair value of an investment when the volume and level of activity for the asset or liability have significantly decreased and in identifying transactions that are not orderly. It also expands disclosure requirements for investments by requiring detail by major security type. The Plan adopted this amendment on December 31, 2009, resulting in no effect on its financial position.

In May 2009, FASB issued ASC 855-10 *Subsequent Events* (formerly SFAS No. 165). ASC 855-10 establishes principles and standards related to the accounting for and disclosure of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. The Plan adopted this standard on December 31, 2009, resulting in no effect on its financial position.

In September 2009, FASB issued Accounting Standards Update No. 2009-12, "Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)" ("ASU 2009-12"). ASU 2009-12 provides guidance on how organizations should estimate the fair value of certain alternative investments, effective for periods ending after December 15, 2009. The fair value of investments within the scope of the guidance can now be determined using net asset value ("NAV") as a practical expedient, unless it is probable the investment will be sold at something other than NAV. The Plan adopted this amendment on December 31, 2009, resulting in no effect on its financial position.

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management of the Plan to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Fair value is defined as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Accounting standards establish a fair value hierarchy, which require an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value as described below.

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 - Inputs to the valuation methodology that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or other inputs that are observable or can be corroborated by observable market data for substantially the full terms of the assets or liabilities.

Level 3 - Inputs to the valuation methodology that are unobservable and supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The fair value of investments held by the Master Trust and the Plan are determined based upon quoted market prices, if available. The Master Trust and the Plan account for the change in the difference between the fair value and the cost of investments as unrealized appreciation/ (depreciation) in the fair value of investments. Realized appreciation/ (depreciation) in the fair value of investments is the difference between the proceeds received and the average cost of investments sold. Investment advisors are used to manage the Master Trust's and the Plan's investments. Net investment income/(loss) of the Master Trust includes interest and dividend income and realized and unrealized appreciation or depreciation in the fair value of the Master Trust's investments, less allocated administrative expenses.

The following is a description of the valuation methodologies used for assets within the Master Trust:

Fair values of marketable securities (including corporate common and preferred stock) are based on quotations obtained from national securities exchanges. This valuation method results in a level one classification for marketable securities held by the Master Trust.

The debt instruments are valued by the custodian at the last reported sales price on the last business day of the plan year. This valuation method results in a level two classification for the debt instruments held by the Master Trust.

Mutual funds are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end. This valuation method results in a level one classification with the exception of cash equivalents and money market funds which are not listed on an exchange and quotations are obtained from service firms. Cash equivalents and money market funds are classified as level two investments.

Common collective trusts are valued based on information reported by the investment advisor using the audited financial statements of the collective trusts at year end or based on information reported by the custodian with reference to the market value of the trust's underlying assets at year end. These valuation techniques result in a level two classification for common collective trusts held by the Master Trust. The short-term investment common collective trust held by the Plan is designed to maintain a $1 per unit value and invests primarily in corporate and government bonds, certificates of deposit, commercial paper, and corporate notes. Redemptions of this common collective trust are allowed daily with no restrictions. The international common collective trust's strategy is to invest primarily in international equity securities. Redemptions are allowed only on the first day of each month for this common collective trust. The large growth common collective trust invests primarily in large growth domestic equities that have sustainable earnings growth potential. Seven days notice is required in order to make a redemption from this common collective trust. The equity common collective trusts mirror the S&P 500 Index and attempt to produce slightly higher returns than that index. Redemptions of these common collective trusts are allowed daily with no restrictions. There are no unfunded commitments for any common collective trusts. The fair value of the common collective trusts has been estimated using the net asset value per share of the investments.

The estimated fair market value of investments in limited partnerships is determined by the plan administrator based upon financial information provided by the investment manager for each fund with reference to the underlying investments. The limited partnerships invest in real estate and are audited annually. This valuation method results in a level three classification for the limited partnerships held by the Master Trust.

Future contracts (as further described in derivatives footnote) are valued at fair value as determined on the futures exchange at the date the contract is entered into, which is typically zero. The plan utilizes a margin account and collateral to account for the daily fluctuations in the value of the futures contract. The change in market value is recorded as appreciation/(depreciation).

The table below sets forth the investments of the Master Trust by level and major asset class, within the fair value hierarchy, as of December 31:

The table below sets forth a summary of changes in the fair value of the level three investment assets held by the Master Trust for the years ended December 31:

	2009 Limited Partnerships	2008 Limited Partnerships
Balance at beginning of year	$ 583,789	$ 211,754
Unrealized gains (losses) relating to instruments still held at reporting date	(359,882)	(131,644)
Purchases, issuances and settlements (net)	-	503,679
Balance at end of year	$ 223,907	$ 583,789

Purchases and sales are recorded on the trade-date (the date the order to buy or sell is executed). Gain or loss is computed using the average cost for securities sold. Realized gains or losses on security transactions are calculated as the difference between proceeds received and cost. Dividend income is recorded on the ex-dividend date, and interest income is recorded on the accrual basis.

Derivatives

The Master Trust makes use of several investment strategies involving limited use of derivative investments. The Master Trust's management, as a matter of policy and with risk management as their primary objective, monitors risk indicators such as duration and counter-party credit risk, both for the derivatives themselves and for the investment portfolios holding the derivatives. Investment managers are allowed to use derivatives for strategies such as portfolio structuring, return enhancement, and hedging against deterioration of investment holdings from market and interest rate changes. Derivatives are also used as a hedge against foreign currency fluctuations. The Investment Committee does not allow investment managers for the Master Trust to use leveraging for any investment purchase. Derivative investments are stated at estimated fair market values as determined by quoted market prices. Gains and

losses on such investments are included in net investment appreciation (depreciation) in the statements of changes in participating plans' net assets of the Master Trust.

The Plan uses forward contracts as a type of foreign exchange contract. A foreign exchange forward contract ("forward contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate. Forward contracts are traded on the over-the-counter market. Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of instruments denominated in foreign currencies. Forward contracts are utilized by the investment managers to hedge a portion of the currency exposure that results from the Plan's holdings of fixed income securities denominated in foreign currency. Forward contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between the contract value and market value is included in net appreciation of investments. As of December 31, 2009 the Master Trust had one open foreign exchange contracts.

The following tables summarizes the location and fair value of derivatives designated as hedging investments reported in the net assets of the Master Trust:

	Master Trust	December 31, 2009	
Description	Classification	Asset	Liability
Foreign exchange contract	Debt instruments	$ 4,961,125	$ (4,961,125)

	Master Trust	December 31, 2008	
Description	Classification	Asset	Liability
Foreign exchange contract	Debt instruments	$ 12,976,406	$ (12,976,406)

The following table shows the effect of derivatives, designated as hedging investments, on net investment income (loss) of the Master Trust:

		Income (loss) For the Year Ended December 31:	
	Master Trust		
Description	Classification	2009	2008
Foreign exchange contract	Debt instruments	$ (1,219,456)	$ 3,060,824

Certain duration, liquidity and counterparty risks may arise upon entering into foreign exchange contracts. The fund manager measures the portfolios duration, liquidity and credit exposure daily, to determine the appropriate portfolio weightings for securities and derivatives by utilizing a risk analysis model. Counterparty risk is mitigated by limiting derivative transactions to counterparties of the highest quality and by utilizing collateralization. As of December 31, 2009 the Plan does not believe that any material risks exist.

Benefits

Benefit payments are recorded when paid.

Expenses of the Plan

All expenses of the Plan are paid with Plan funds. Expenses incurred that are not plan-specific are allocated to the Plan based on the percentage of Plan assets to the total assets of the Master Trust.

Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

The Master Trust and the Plan invest in a combination of stocks, bonds, fixed income securities, and other investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for plan benefits. A decline in the fair value of the Plan's investments negatively impacts the funding status of the Plan.

(3) Actuarial Methods and Assumptions

Actuarial Cost Method

Actuarial valuations are determined using the projected unit credit actuarial cost method.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) present employees or their beneficiaries.

Accumulated plan benefits for active employees are based on their final average compensation, when applicable, preceding the valuation date. Benefits payable under all circumstances – retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from Towers Watson and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits consists of the following:

		January 1, 2009
Vested benefits:		
Participants currently receiving payments	$	548,104,190
Other participants		290,565,799
		838,669,989
Non-vested benefits		4,640,442
Total actuarial present value of accumulated plan benefits	$	843,310,431

The net increase in actuarial present value of accumulated plan benefits can be attributed to the following:

		Year ended January 1, 2009
Actuarial present value of accumulated plan benefits, beginning of year	$	823,935,971
Increase(decrease) during the year attributable to:		
Increase in benefits accumulated during the year		1,044,879
Increase for interest due to decrease in discount period		47,716,017
Benefits paid		(58,185,588)
Actuarial experience		28,799,152
Net increase		19,374,460
Actuaria Actuarial present value of accumulated plan benefits, end of year	$	843,310,431

The significant actuarial assumptions underlying the January 1, 2009 valuation are:

Discount rate	6.00%
Mortality	RP-2000 mortality
	RP-2000 used for current liabilities

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan terminates, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(4) Investments

The investments of the Chemtura Master Trust, at fair value, are summarized as follows at December 31:

Plan interest in net investment income (loss) of Master Trust	$ 53,274,706	$ (75,928,316)

(5) Compliance and ERISA

The Plan Administrator has elected the method of compliance permitted under 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Accordingly, no auditing procedures with respect to information certified as complete and accurate by Northern Trust Company, the trustee of the Plan, were performed by the independent auditors except for comparing the information to the financial statements. This information included investments held at December 31, 2009 and 2008, investment earnings and other investment-related transactions of the Plan for the years then ended.

(6) Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a. Benefits attributable to employee contributions, if any, taking into account those paid out before termination.

b. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

c. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).

d. All other vested benefits (that is, vested benefits not insured by the PBGC).

e. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

(7) Party-In-Interest Transactions

Certain investments of the Master Trust are shares of registered investment companies managed by entities related to the trustees of the Plan and therefore, transactions involving these investments qualify as party-in-interest. The Plan holds shares of Chemtura Corporation, the Plan sponsor, which also qualifies as a party-in-interest transaction.

(8) Income Tax Status

The Company obtained its latest determination letter for the Plan on April 16, 2003 in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, Chemtura Corporation and its tax counsel believe that the Plan is currently designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting standards require recording uncertain income tax positions that exist in the Plan's financial statements. Plan management has determined there are no uncertain tax positions and believes there is no adjustment or disclosure required in the Plan's financial statements.

(9) Subsequent Events

The Company has evaluated subsequent events through October 6, 2010, the date these financial statements were available for issuance.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

EIN / PN: 52-2183153 / 001

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not Valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Chemtura Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.
Data Sources	Towers Watson used asset data supplied by the trustee. Chemtura Corporation furnished participant data, as well as the dates and amounts of any contributions and/or credit balance elections made for 2009. Data were reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Watson actuaries when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Definitions

Vesting service	Prior to 1985:
	One year of vesting service for each calendar year of 1,000 or more hours of service
	After 1984 and prior to 1993:
	One year of vesting service for each year of employment on an elapsed time basis
	After 1992:
	One year of vesting service for each year of employment determined in complete and fractional years. Part-time employees will receive one year of vesting service for each plan year credited with 1,000 hours of service
	Effective with the December 31, 2005 merger all active participants were 100% vested
Pension service	Prior to 1976:
	In accordance with plan provisions then in effect
	After 1975 and prior to 1985:
	One year of pension service for each plan year of 1,000 or more hours, with prorated credit in the first and last year of employment

	After 1984 and prior to 1993:
	Vesting service while an active participant
	After 1992 and prior to 2001:
	Part-time employees receive pension service for each year of vesting service
	After 2000:
	"active participant" is replaced with "eligible employee"
	Former Anzon salaried employees, former FMC employees, and former Optical Monomers employees receive credit for prior plan service.
	Participants at the Adrian, Michigan location continue to accrue service. For all others, benefits are frozen as of December 31, 2005 and no pension service is granted for employment after that date.
Normal retirement date (NRD)	First of month coinciding with or next following the attainment of age 65 with 5 years of participation service

	and permanent disability and after completing 10 years of pension service
Preretirement death benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse

Benefits Paid Upon the Following Events

Normal retirement	Monthly pension benefit determined as of NRD
Early retirement	Monthly pension benefit determined as of early retirement date, reduced 3.0% for each year that payment precedes age 62
Postponed retirement	Monthly pension benefit determined as of actual retirement date
Vested termination	Monthly pension benefit determined as of termination date, reduced actuarially for payment before the participant's NRD
Disablement	Monthly pension benefit determined as of date of disablement, payable immediately
Preretirement death	The monthly preretirement death benefit that would have been payable if the participant had terminated, survived to normal retirement age, elected a joint and 100% survivor annuity, and then died

Other Plan Provisions

Forms of payment	Preretirement death benefits are payable only as described above. Monthly pension benefits are paid as a life annuity, if the participant has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid in the form of 100% joint and survivor annuity option or, if the participant elects and the spouse consents, a life annuity.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining minimum and maximum contributions. Towers Watson is not aware of any future plan changes which are required to be reflected.
