NOTES TO FINANCIAL STATEMENTS
December 31, 2009 and 2008

NOTE 1 - DESCRIPTION OF PLAN

The following description of the Unisia of Georgia Corporation (the Company) 401K Plan (the Plan) is provided for general information purposes only. More complete information regarding the Plan's provisions may be found in the Plan document.

General

The Plan is a defined contribution plan covering substantially all eligible employees of the Company who are age twenty-one or older and have three months of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions

Participants may elect to defer a percentage of their annual compensation subject to Internal Revenue Service limitations of \$16,500 for 2009. Participants who reach age 50 during the calendar year may be eligible make catch-up contributions up to \$5,500 in addition to the IRS limit of \$16,500 for the year ended December 31, 2009. Participants may direct participant contributions to any of the plan's investment alternatives and may transfer among investment options on a daily basis.

The Plan also allows the Company to make discretionary matching contributions and discretionary profit sharing contributions. During the years ended December 31, 2009 and 2008 the Company matched 50% of the first 6% of compensation that a participant contributed to the plan. There were no discretionary profit sharing contributions for the years ended December 31, 2009 or 2008.

Participant Accounts

Each participant's account is credited with the participant's deferral contributions, the Company's matching contributions, discretionary profit sharing contribution, and a proportionate interest in the investment earnings or losses of the funds which the contributions are invested. Each participant's account is also charged with an allocation of administrative expenses. Expenses are generally allocated evenly across all eligible accounts. Earnings are currently allocated on a daily basis. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

401K PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2009 and 2008

Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the company's contribution portion of their accounts is based on years of continuous service. A participant is 100% vested after five years of credited service.

Participant loans

Participants may borrow from their fund accounts a minimum of \$500 up to a maximum equal to the lesser of \$50,000 or 50% of their account balance. The loans are secured by the balance in the participant's account and bear interest at rates that range from 5.25% to 10.25%, which are commensurate with local prevailing rates as determined quarterly by the plan administrator. Principal and interest is paid ratably through payroll deductions.

Payment of Benefits

On termination of service, death, disability, or retirement, the participant or their beneficiary may elect to receive a lump-sum amount equal to the value of the participant's vested interest in his or her account. Participants may request a withdrawal of a portion of their participant contribution account balance if they can demonstrate financial hardship as defined by the Plan.

Forfeited Accounts

At December 31, 2009 and 2008, forfeited nonvested accounts totaled \$2,252 and \$2,251, respectively. These accounts will be used to reduce future employer contributions or to pay administrative expenses of the Plan. In 2009 and 2008, employer contributions and profit sharing contributions were reduced by \$0 and \$3,469, respectively, from forfeited nonvested accounts.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

UNISIA OF GEORGIA CORPORATION
401K PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2009 and 2008

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 4 for discussion of fair value measurements.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to the investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statement of Net Assets Available for Benefits presents the fair value of the investment contracts. There is no adjustment to contract value as it closely approximates fair value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Purchase and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Benefit Payments

Benefit payments are recorded when paid

Administrative Expenses

The Plan's administrative expenses are paid by either the Plan or the Company as provided by the Plan document.

NOTE 4 - FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 Inputs to the valuation methodology include

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

UNISIA OF GEORGIA CORPORATION
401K PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2009 and 2008

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Mutual funds: Valued at fair value reported by the fund manager based on the underlying investments within each fund and are expressed in units representing the net asset value of each fund by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit worthiness of the issuer.

Participant loans: Valued at amortized cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value, on a recurring basis, as of December 31, 2009 and 2008:

Fair Value Measurements At December 31, 2009				
	Level 1	Level 2	Level 3	Total
Investments				
Mutual funds	\$ 1,938,389	\$ -	\$ -	\$ 1,938,389
