1. DESCRIPTION OF PLAN:

The following description of the Equipment Depot Ohio, Inc. Employee Benefit Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all full-time employees of the Equipment Depot Ohio, Inc. (the "Company") who have three months of service. Effective July 19, 2007, the Plan was amended to implement a qualified automatic contribution arrangement. Participants meeting eligibility criteria are automatically enrolled in the Plan and automatically contribute 5% in the first year increasing incrementally 1% in each subsequent year, not to exceed 10%. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions

The Company's contribution to the Plan shall be at the sole discretion of the Chief Executive Officer, provided that such amount does not exceed the deductible limits for federal income tax purposes.

Under the Plan, employees may defer the lesser of 60% of their compensation or the maximum salary deferral limit permissible under Section 402(g) of the Internal Revenue Code (IRC) not to exceed the limits of Code Sections 401(k), 404 and 415. The Company may make a matching contribution consisting of a certain percentage of the employee's deferral up to a percentage determined annually by the Company. In 2009 and 2008, the Company's contribution was 50% of the first 3% of each participant's eligible compensation and 25% of the participant's compensation from 3% to 5%, limited to a total of 2% of the participant's eligible compensation. Certain Company contributions may be required due to the top-heavy plan rules published by the Internal Revenue Service (IRS).

The Company's contributions in 2009 and 2008 consisted of matching contributions of \$258,216 and \$321,869, respectively, and discretionary profit sharing contributions of \$-0- and \$269,557, respectively.

There may be a limit placed on the percent of compensation deferred by certain participants. The Company determines that the salary deferral percentage, the employer matching percentage, and the total defined contribution percentage comply with several tests as prescribed by law. If the tests are not met, the Company reduces the contribution percentage of those individuals that exceed the limits and refunds the excess contributions to the individual.

Participant accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's contribution and (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. Profit sharing allocations are based on participant earnings. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their account is based on years of continuous service. A participant is 100% vested after six years of credited service.

Forfeitures

At December 31, 2009 and 2008, forfeited nonvested accounts totaled \$19,427 and \$2,442, respectively. Forfeited accounts are used to offset future employer contributions. For the years ended December 31, 2009 and 2008, \$3,837 and \$9,000 of forfeitures were utilized to offset employer contributions.

Investment options

Upon enrollment in the Plan, a participant may direct employee contributions in any of the investment options allowable under the Plan. Investment options include registered investment companies covering a broad range of investment objectives and a common/collective trust fund designed to earn interest while maintaining stability of principal. Participants may change their investment options at any time.

Participant loans

Participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of their vested account balance. The loans are secured by the balance in the participants account and accrue interest on the principal balance of the loan at local prevailing rates as determined by the plan administrator. Principal and interest is paid ratably through payroll deductions.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statement of Net Assets Available for Benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Investment valuation and income recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Withdrawals and payment of benefits

Withdrawals and benefits are recorded upon distribution. Certain deemed distributions of participant loans are included in benefits paid.

Administrative expenses

Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities. Accordingly, actual results may differ from those estimates.

Subsequent events

The Plan evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements. The accompanying financial statements consider events through September 27, 2010 which is the date on which the financial statements were available to be issued.

4. FAIR VALUE MEASUREMENTS:

Accounting principles generally accepted in the United States of America for *Fair Value Measurements and Disclosures* establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under accounting principles generally accepted in the United States of America are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Following is a description of the valuation methodologies used for assets measured at fair value.

Registered investment companies: Valued at the net asset value ("NAV") of shares held by the plan at year end as reported by the investment manager.

Interest-bearing cash: The carrying value approximates fair value.

Common/collective trust: The fair value of the investments in common/collective trusts is determined by the fund trustee based on the fair value of the underlying securities within the fund, which represents the net asset value of the shares held by the Plan at year end.

Notes to Financial Statements
December 31, 2009 and 2008

Loans to participants: Valued at their outstanding balances, which approximates fair value.

There have been no changes in the methodologies used at December 31, 2009 and 2008.

The methods described above may produce a fair value calculation that may not be indicative of net realizable or reflective of future fair values. Furthermore, while the Plan's trustees believe that the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The carrying amounts of financial instruments including contributions receivable approximated fair value at December 31, 2009 and 2008, because of the relatively short maturity of these instruments.

Investment securities are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that a change in the value of investment securities will occur in the near term and that such change could materially affect the amounts reported in the financial statements and supplemental schedule.

The following tables sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009 and 2008:
