Note 1. DESCRIPTION OF THE PLAN

The following description of Applied Membranes, Inc. (the "Company") 401(k) Profit Sharing Plan and Trust (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all full-time employees of the Company who have completed three months of service and are age twenty-one or older. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions

Participants may contribute to the Plan up to 100% of their gross annual wages and other compensation, not to exceed the limits established by the Internal Revenue Code. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans (rollover). The Company may make discretionary matching or other contributions to the Plan.

Participant Accounts

Each participant's account is credited with the participant's contribution, the Company's matching contribution, an allocation of the Company's other contributions, and the earnings thereon. Allocations of the Company's contributions are based on participant contributions and compensation. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Participant Loans

Participants may borrow from their fund accounts an amount up to $50,000 or 50% of their vested account balance, whichever is less. Participant loans must be repaid within 5 years. However, if the loan is for the purchase of the participant's principal residence, the Administrator may permit a longer repayment term. The loans are secured by the balance in the participant's account and bear interest at a rate commensurate with the interest rate charged for commercial loans that would be made under similar circumstances. Interest rates range from 5.00% to 6.00% on loans outstanding as of December 31, 2009, and 5.00% to 9.25% on loans outstanding as of December 31, 2008. Principal and interest are paid through regular payroll deductions.

Note 1. DESCRIPTION OF THE PLAN (continued)

Vesting

Participants are immediately vested in their voluntary contributions plus actual earnings thereon. Vesting in the Company contributions portion of their accounts plus earnings thereon is based on years of continuous service. A participant is 100% vested after six years of credited service, attainment of normal retirement age, death or total and permanent disability.

Payment of Benefits

On termination of service due to any reason, a participant may elect to receive an amount equal to the value of the participant's vested interest in his or her account in a lump-sum amount. Participants may also request to receive a withdrawal for reasons of financial hardship. These hardship withdrawals cannot exceed the participant's elective deferral contributions plus allocated earnings. After making a hardship withdrawal, a participant is suspended from making contributions to the Plan for a period of six months.

Forfeited Accounts

Forfeited, non-vested account balances are used to reduce the Company's matching contributions.

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting in conformity with the accounting principles generally accepted in the United States of America.

Note 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Note 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. The guaranteed income fund is reported at fair value in the statement of net assets available for benefits with a separate adjustment to contract value to reflect the amount participants would receive under permitted transactions. Contract value approximated fair value at December 31, 2009. Shares of registered investment companies are valued at the net asset value of shares held by the Plan at year end. Participant notes receivable are valued at their outstanding balances, which approximate fair value. Income is recognized during the period in which it is earned.

As described in Financial Accounting Standards Board Staff Position, FSP AAG INV-1 and FASB ASC 962-325-50-3 (formerly SOP 94-4), *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*, investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for the portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan.

Payment of Benefits

Benefits are recorded when paid.

Corrective Distributions

Excess contributions returned to participants in order to satisfy the relevant nondiscrimination provisions of the Plan are recorded as deductions from net assets. The amount is also included in the plan's statement of net assets available for benefits as excess contributions payable.

Administrative Expenses

Substantially all expenses of maintaining the Plan are paid by the Company.

Note 3. FAIR VALUE MEASUREMENTS

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits.

FASB ASC 820, *Fair Value Measurements*, establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of publicly quoted prices in active markets for identical assets and have the highest priority, Level 2 inputs consist of observable inputs other than publicly quoted prices for identical assets, and Level 3 inputs have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 3 inputs are used only when Level 1 or Level 2 inputs are not available.

Level 1 Fair Value Measurements

Fair values are based on publicly quoted prices in active markets for identical assets. The fair value of investments in registered investment companies is based on the publicly quoted net asset value of the shares held by the Plan at year-end.

Level 2 Fair Value Measurements

Fair values are based on observable inputs other than publicly quoted prices in active markets for identical assets that reflect assumptions market participants would use to price the asset based on market data obtained from sources independent of the Plan.

Level 3 Fair Value Measurement

Fair values are based on unobservable inputs that reflect the Plan's own assumptions about the assumptions market participants would use to price an asset based on the best information available in the circumstances. The fair value of investments in the guaranteed income fund is determined by the issuer based on the general interest rate environment. The fair value of participant notes receivable is based on the amortized cost of the loans because each loan is secured by the participant's account balance and each loan has an interest rate that does not deviate significantly from market rates for similar loans.

Note 3. FAIR VALUE MEASUREMENTS (continued)

	Fair Value Measurements as of December 31, 2009 Using:			
	Fair Value	Level 1	Level 2	Level 3
Investments in shares of registered investment companies	$ 699,377	$ 699,377	$ -	$ -

Note 4. INVESTMENTS

The Plan's investments are held in a trustee-administered trust fund. Participants may direct their account balance to any combination of a variety of investment funds. The number of such funds and the type of investments therein may be changed at any time by the Plan. The following tables present the fair value of investments at December 31, 2009 and 2008. Investments that represent 5% or more of the Plan's net assets are separately identified.

Note 5. INVESTMENT CONTRACT WITH INSURANCE COMPANY

The Plan entered into a benefit-responsive investment contract with Prudential Retirement Insurance and Annuity Company (Prudential). Prudential maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. Prudential is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

As described in Note 2, because the guaranteed income fund is fully benefit-responsive, contract value is the relevant measurement attribute for the portion of the net assets available for benefits attributable to the guaranteed income fund. Contract value, as reported to the Plan by Prudential, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily withdraw or transfer all or a portion of their investment at contract value.

Interest is credited on the Plan's contract balance using a single portfolio rate approach. Under this methodology, a single interest crediting rate is applied to all contributions made to the guaranteed income fund regardless of the timing of those contributions. Interest crediting rates are reviewed by Prudential on a semi-annual basis for resetting. When establishing interest crediting rates for the guaranteed income fund, Prudential considers many factors, including current economic and market conditions, the general interest rate environment and both the expected and actual experience of a reference portfolio within the contract issuer's general account. These rates are established without the use of a specific formula. The minimum crediting rate under the contract is 1.50%.

There are no reserves against contract value for risk of the contract issuer or otherwise. Generally there are not any events that could limit the ability of the Plan to transact at contract value with the issuer. The funds are paid within 90 days from the date the Plan provides notice to discontinue, or in rare circumstances, over time.

The guaranteed income fund contract does not permit the insurance company to terminate the contract nor require the Plan to settle at an amount different than contract value paid either within 90 days or over time.
