We have been informed by the plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the Trustee as of December 31, 2009 and 2008 and for the years then ended that the information provided to the plan administrator by the Trustee is complete and accurate.

As described in Note 2, these financial statements were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 1 - Plan Description

The following brief description of The Budd Company Pension Plan for Executive and Administrative Employees (the "Plan") is provided for general information purposes only. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan, as amended and restated through December 31, 1988, is a noncontributory defined benefit plan sponsored by ThyssenKrupp Budd Company (the "Company"). Generally all salaried employees not covered by another qualified plan of the Company, which includes ThyssenKrupp USA, Inc., or by a collective bargaining agreement are eligible to participate in the Plan immediately upon hire by the Company or any of its domestic subsidiaries or affiliates that have adopted the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

In December 2006, the Company sold the majority of its operating facilities which employed substantially all active employees covered under the Plan.

Eligibility and Vesting - Employees become fully vested upon completion of five years of service. Employees who terminate service before becoming fully vested forfeit all benefits under the Plan.

Pension Benefits - Normal retirement is permitted at the age of 65 with five years of continuous service. The Plan permits early retirement at ages ranging from 55 to 64. Monthly benefits are based on years of credited service and an annualized average of the participants' monthly base earnings, as described in the plan document. The Plan also contains provisions for disability, deferred vesting, and surviving spouse benefits.

Death Benefits - In certain circumstances, if an active or terminated employee who has a vested interest in the Plan dies prior to his or her normal retirement age, the surviving spouse or designated beneficiary shall receive a survivor benefit, as defined in the Plan.

Funding Policy - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA. The Company also, from time to time, will make additional contributions, with the total not to exceed the maximum contribution deductible under the Internal Revenue Code. No additional contributions were made during 2009 and 2008.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation - The accompanying statements have been prepared on the modified cash basis of accounting. Under the modified cash basis of accounting, contributions and investment income are recorded when received; benefit payments and expenses are recorded when paid; and investments are recorded at fair market value.

Investment Valuation - The Plan's investments are stated at fair value. The fair value of the Plan's interest in the ThyssenKrupp USA Master Trust (the "Master Trust") is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. Common stock, preferred stock, and mutual funds are valued at quoted prices. Money market funds and interest-bearing cash are valued at their outstanding balances, which approximates fair value. The government securities and corporate obligations are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures. Investments in common collective trust funds are valued at fair value, based on the fair value of the underlying assets. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Administrative expenses associated with the Plan are paid by the Plan unless voluntarily paid by the Company. During 2009 and 2008, all expenses were paid by the Plan.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Use of Estimates - The preparation of financial statements in conformity with the modified cash basis of accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Subsequent Events - Subsequent events have been evaluated through September 8, 2010, which is the date the financial statements were available to be issued.

Reclassification - Certain prior year amounts have been reclassified to conform to the current year presentation.

Note 3 - Unaudited Investment Information

The trustee of the Plan, The Bank of New York Mellon/BNY Mellon, N.A. (the "Trustee"), holds the Master Trust's investments and executes all related investment transactions. The investment balances and related investment results included in the accompanying financial statements, including information summarized in Note 5, are based solely on information provided by the Trustee.

Certain assets of the Master Trust are in investment funds managed by The Bank of New York Mellon/BNY Mellon, N.A. or its affiliates. Since The Bank of New York Mellon/BNY Mellon, N.A. is the trustee of the Plan, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines. The market value of these investments was approximately \$97,000,000 and \$39,000,000 at December 31, 2009 and 2008, respectively.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 4 - Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered to the valuation date. These include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

The normal individual retirement benefit is based on the participant's years of credited service and their compensation, as defined in the plan document.

The actuarial present value of accumulated plan benefits is determined by an independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The determination was made as of January 1, 2009 and 2008.

The more significant actuarial assumptions underlying the actuarial computations at January 1, 2009 and 2008 are as follows:

Actuarial cost method	- Traditional Unit Credit Cost Method
Interest rate	- 8.00 percent and 8.25 percent in 2009 and 2008, respectively
Mortality basis	- RP-2000 Combined Healthy Mortality White Collar Adjusted
Retirement	- Based upon a defined table of ages and percentages
Salary projection	- 3.25 percent and 4.00 percent in 2009 and 2008, respectively (per annum)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Notes to Financial Statements December 31, 2009 and 2008

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial present value of accumulated plan benefits as of January 1, 2009 and 2008 was as follows:

	2009	2008
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 256,499,079	\$ 248,785,334
Other vested participants	46,839,997	54,953,493
Total vested benefits	303,339,076	303,738,827
Nonvested benefits	1,030,471	1,579,667
Total actuarial present value of accumulated plan benefits	<u>\$ 304,369,547</u>	<u>\$ 305,318,494</u>

The following schedule summarizes the components of net increase in actuarial present value of accumulated plan benefits for the years ended January 1, 2009 and 2008:

	2009	2008
Actuarial present value of accumulated plan benefits -		
Beginning of year	\$ 305,318,494	\$ 300,941,858
Increase (decrease) during the year attributable to:		
Benefits accumulated including actuarial gains and losses	(3,634,469)	6,496,022
Increase due to the decrease in the discount period	24,107,895	23,876,841
Benefits paid	(27,782,507)	(25,996,227)
Change of assumptions	6,360,134	-
Net (decrease) increase	<u>(948,947)</u>	<u>4,376,636</u>
Actuarial present value of accumulated plan benefits -		
End of year	<u>\$ 304,369,547</u>	<u>\$ 305,318,494</u>

The following actuarial assumptions were changed to better reflect anticipated plan experiences:

The interest rate was changed from 8.25 percent in 2008 to 8.00 percent in 2009.

The salary projection rate was changed from 4.00 percent in 2008 to 3.25 percent in 2009.

Note 5 - Interest in Master Trust

The Plan's investments are in the Master Trust which was established for the investment of assets of the Plan and several other pension plans sponsored by affiliated participating employers of ThyssenKrupp USA, Inc. Each participating retirement plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Trustee. At December 31, 2009 and 2008, the Plan's interest in the net assets of the Master Trust was approximately 29 percent and 31 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon their pro rata share in the net assets of the Master Trust.

The following table is a summary, at fair value, of the net assets of the Master Trust at December 31, 2009 and 2008:

Securities Lending - The Master Trust participates in a securities lending program with the Trustee for its U.S. and non-U.S. securities held in custody with the Trustee. The program allows up to 100 percent of the qualified assets to be on loan at any given time. These securities are lent to certain unrelated third-party brokers in exchange for cash and noncash collaterals. U.S. assets and non-U.S. assets on loan are collateralized at 102 percent and 105 percent, respectively, of the assets' market value.

The net assets of the Master Trust reflect, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. The collateral received from borrowers totaled \$96,784,750 and \$39,199,601 as of December 31, 2009 and 2008, respectively. This consisted of cash collateral received of \$96,784,750, and \$39,199,601, which was invested in the ASL short-term fund, a money market fund, at December 31, 2009 and 2008, respectively. In the event that a loaned security is called, the Master Trust will receive the market value of the asset in cash. The market value of loaned securities amounted to \$94,346,870 and \$37,995,025 at December 31, 2009 and 2008, respectively.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2009 and 2008

Note 5 - Interest in Master Trust (Continued)

Derivative Instruments - The Master Trust is party to certain agreements, which are designed to manage exposures to foreign exchange risk. The foreign currency instruments are used for the purpose of hedging changes in the fair value of assets that result from currency fluctuations. The notional amount represents the contract amount, not the amount at risk. The notional amount of foreign currency instruments was approximately \$3,100,000 and \$9,100,000 at December 31, 2009 and 2008, respectively. The estimated fair value of derivative instruments at December 31, 2009 and 2008 is insignificant.

The investment managers, on behalf of the Master Trust, manage its foreign currency risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of a foreign currency, the Master Trust's risk is limited to the fair value of the instrument.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2009 and 2008, and the valuation techniques used by the Plan to determine those fair values.

Level 1 - In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Investments are valued at the fair value per share multiplied by the number of shares held as of the measurement date.
- (2) Short-term investments are valued at \$1.00/unit, which approximates fair value. Amounts are generally invested in actively managed interest-bearing accounts.

Note 7 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service, dated October 2, 2002, indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the benefits administration committee believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Note 8 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

 Valuation Date: January 1, 2009

Vested benefits upon termination of service

Eligibility: 5 years of Vesting Service.

Benefit: Accrued Benefit payable at age 65. The participant with 10 or more years of Vesting Service may elect a reduced pension starting immediately. The monthly retirement benefit is reduced for early commencement as follows:

<u>Age</u>	<u>Factor</u>	<u>Age</u>	<u>Factor</u>
65	100.0%	59	65.2%
64	92.3	58	61.4
63	85.6	57	57.9
62	79.6	56	54.7
61	74.3	55	51.9
60	69.5		

The participant's accrued benefit will be reduced for the cost of the pre-retirement joint and survivor annuity coverage.

Normal form of retirement income

The normal form of benefit for a single participant is a monthly annuity payable for life. The normal form for a participant who is married on his annuity starting date is a split benefit, where half of the benefit is payable in a Joint and 50% Survivor form, and the other half is payable as a Joint & 60% Survivor form, with a pop-up in the event of the spouse's death before the retiree's death, for the portion of the benefit accrued before 2008. For the portion of the benefit accrued after 2007, the normal form for married participants is the Joint and 50% Survivor form.

The option conversion factors to calculate the normal form of payment from a straight life benefit for a married participant are:

- Option factor for Joint and 50% Survivor part of benefit: 87% decreased 0.5% for each year the retiree's age exceeds the spouse's age (minimum 77%) and increased 0.5% for each year the spouse's age exceeds the retiree's age (maximum 96%).
- Option factor for Joint and 60% Survivor part of benefit: 95% decreased 0.5% for each year the retiree's age exceeds the spouse's age by more than five years and increased 0.5% for each year the retiree's age exceeds the spouse's age by more than five years (maximum 100%).

Plan Name: The ThyssenKrupp Budd Company Pension Plan for Executive and Administrative Employees
 EIN / PN: 230443060 / 009
 Plan Sponsor: ThyssenKrupp Budd Company
 Valuation Date: January 1, 2009

Optional forms of payment

In lieu of the normal form of payment, the following actuarial equivalent optional forms of payment are available:

- Life Annuity
- Joint and Survivor Annuity with a 25%, 33-1/3%, 50%, 66-2/3%, 75% or 100% survivor benefit payable to the Participant's Spouse or other designated beneficiary (continuation percentages may be restricted for a non-spouse beneficiary depending on age of participant and beneficiary).

For the portion of the benefit accrued before 2008, participants may elect to receive their entire benefit under the Life Annuity or Joint and Survivor Annuity or receive half of their benefit under a form of payment listed above and the other half under the Joint and 60% Survivor Annuity described as part of the Normal form of payment.

Regardless of the form of payment selected, a participant other than a terminated vested participant, may elect to receive a temporary supplemental benefit of \$250, \$300 or \$350 per month payable until age 62, with an actuarially reduced benefit payable from age 62 on, for the portion of the benefit accrued before 2008.

If the actuarial equivalent for a terminated vested participant is less than \$5,000, the benefit shall be paid as a single sum payment.

Pre-retirement death benefits

Eligibility: Completion of five or more years of Vesting Service and married at time of death.

Benefit: In the event of the death of an active participant after becoming eligible for early, normal or late retirement, the amount of the death benefit will be equal to the benefits payable as though the participant had terminated employment as of the date of death, elected the normal form of payment, and died the next day following the commencement of payments. If the employee and spouse have not been married for a full year prior to the date of death, the 50% Joint and Survivor form of payment will replace the Normal Form of payment. The participant will be treated as having given advance notice of retirement to determine the reduction factors for early commencement.

In the case where either (i) the employee was not yet eligible for early retirement at the date of death or, (ii) the participant was a former employee entitled to a deferred vested benefit, the benefit payable to the spouse is calculated as though the participant had terminated employment as of the date of death, elected the 50% Joint and Survivor form of payment commencing at the earliest age possible, and died the next day following the commencement of payments. The participant will be treated as not having given advanced notice of retirement to determine the reduction factors for early commencement.

Special Medicare benefit

Eligibility: Normal, Early or Late Retirement. Also payable to a surviving spouse of an active employee who dies after becoming eligible for an Early Retirement. Terminated vested participants are not eligible for this benefit. Not available to any new participants who enter the plan after 2007.

Benefit: A \$40 monthly benefit payable to a participant or surviving spouse at age 65. This benefit is payable while the retiree or spouse continues to pay premiums for Social Security Medicare coverage.

UAW transfers

The E&A plan assumed responsibility for the UAW benefit liability of two closed groups of former UAW participants (1989, 1994) who had previously transferred to a salaried position. All benefits for these participating (E&A and UAW) will be paid from the E&A plan.

Benefits for service prior to November 30, 1998 will be based on the terms of the Shelbyville plan and benefits for service after November 30, 1998 will be based on the terms of the E&A plan. All benefits for these participants (E&A and Shelbyville) will be paid from the E&A plan.

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 25 Change in Method

The asset valuation method was updated pursuant to changes in the permitted asset valuation method made by the Worker, Retiree, and Employer Recovery Act of 2008 (WRERA). As described in the IRS Notice 2009-22, expected earnings are taken into account when averaging. Changes in asset method for plan years beginning in 2009 to any permissible asset method are deemed to be automatically approved by the IRS. Also, the prior year calculated the valuation assets based on two monthly computation periods. This year's valuation assets are based on two annual computation periods.

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modification may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore, the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

 Valuation Date: January 1, 2009

Form of payment

Participants married at retirement are assumed to elect the split benefit form of payment where half of the benefit is payable as a Joint and 50% Survivor form, and the other half is payable as a Joint and 60% Survivor form, with a pop-up in the event of the spouse's date of death before the retiree's death. Plan Name: The ThyssenKrupp Budd Company Pension Plan for Executive and Administrative Employees
 EIN / PN: 230443060 / 009
 Plan Sponsor: ThyssenKrupp Budd Company
 Valuation Date: January 1, 2009

Asset method

The actuarial value of assets is the average of the fair value of assets on the valuation date and the adjusted fair market value of assets as of the two prior valuation dates. The adjusted fair market value of assets as of any date is the fair market value of assets as of that date, increased for subsequent contributions and expected earnings and decreased for benefits and administrative expenses paid from the plan. The expected earnings is based on the assumed rate of return limited by the average third segment interest rate from the prior actuarial valuations (special limits apply for pre-PPA plan years and years where the full yield curve was used). The resulting actuarial value of assets is further limited so that it is not less than 90% nor greater than 110% of the fair value of assets on the valuation date, including the present value of receivable contributions.

Participant data

Employee data was supplied by the plan sponsor and administrator as of the valuation date, January 1, 2009.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2009 is used to determine the maximum deductible contribution for the tax year ending September 30, 2009.

Benefits not included in valuation

We believe that we have reflected all significant plan provisions in this valuation.

PBGC premium funding target

For purposes of determining the PBGC Premium Funding Target in Section 2.2D, the Alternative Premium Funding Target was determined using the assumptions described above.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report such as Funding

Target Attainment Percentage, are rounded to the nearest 0.01% (e.g., 83.33%) to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Changes in assumptions and methods since last actuarial valuation

The following changes were made to the actuarial methods and assumptions from the January 1, 2008 actuarial valuation:

- The asset valuation method was updated pursuant to changes in the permitted asset valuation method made by the Worker, Retiree, and Employer Recovery Act of 2008 (WRERA). As described in IRS Notice 2009-22, expected earnings are taken into account when averaging. Changes in the asset method for plan years beginning in 2009 to any permissible asset method are deemed to be automatically approved by the IRS. Also, the prior year calculated the valuation assets based on two monthly computation periods. This year's valuation assets are based on two annual computation periods.
- The mortality was updated as prescribed.
- The discount rate was changed from the October 3-segment rates to the full yield curve as of the October before the valuation date. This change is being made as elected by the plan sponsor and is deemed to be automatically approved by the IRS pursuant to guidance in the IRS March 2009 Special Edition Employee Plans News.
- The future compensation increase assumption was changed from 4.00% to 3.25%.
- The national average wage index was changed from 3.75% to 3.00%.
- The CPI was changed from 2.75% to 2.00%.
- The FAS 35 interest rate was changed from 8.25% to 8.00%.
- The PBGC premium funding target was changed from the standard to alternative method.
- An assumption for administrative expenses assumed to be paid during the plan year was introduced. Following proposed regulation, administrative expenses were not included last year.

Changes in the future compensation increase, national average wage index, CPI and FAS 35 interest rate were made to better reflect anticipated future plan experience and did not change the January 1, 2009 funding target.

Schedule SB, Line 10 Explanation of Interest on Carryover Balance

Interest shown in item 10(a) is based on the plan's prior year actual return of -24.443%, prior to rounding return to two decimal places. This is based on the calculations used to develop the January 1, 2009 actuarial valuation and January 1, 2009 Adjusted Funding Target Attainment Percentage prior to release of 2009 Schedule SB instructions, requiring display of the plan's actual return using two decimal places and taking the product of that return and the amount shown in item 9(a).

Schedule SB, Line 24 Change in Assumptions

The following non-prescribed assumptions were changed for the January 1, 2009 actuarial valuation:

- The expected administrative expenses are determined as the average of administrative expenses other than PBGC premiums charged to the trust in the three prior years, plus the expected PBGC premiums (based on the premium target liability method used last year). The amount included for administrative expenses is \$1,322,223 for the plan year ending December 31, 2009.
- The future compensation increase assumption was changed from 4.00% to 3.25%.
- The national average wage index was changed from 3.75% to 3.00%.
- The CPI was changed from 2.75% to 2.00%.

Changes in the future compensation increase, national average wage index and CPI were made to better reflect anticipated future plan experience and did not change the January 1, 2009 funding target.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
