REPORT OF INDEPENDENT AUDITORS

Plan Administrator
Lockheed Martin Tactical Defense Systems Retirement Plan for
Bargaining Unit Employees

We have audited the accompanying statements of net assets available for benefits of the Lockheed Martin Tactical Defense Systems Retirement Plan for Bargaining Unit Employees (the "Plan") as of December 31, 2009 and 2008, and the related statement of changes in net assets available for benefits for the year ended December 31, 2009. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Plan's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan at December 31, 2009 and 2008, and the changes in its financial status for the year ended December 31, 2009, in conformity with accounting principles generally accepted in the United States.

Notes to Financial Statements

1. Description of Plan

The following description of the Lockheed Martin Tactical Defense Systems Retirement Plan for Bargaining Unit Employees (the Plan) provides only general information. Participants should refer to the Summary Plan Description or the Plan Document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering certain collective bargaining employees of Lockheed Martin Tactical Defense Systems, and has been revised and amended from time to time. Lockheed Martin Corporation (Lockheed Martin or the Corporation) is the Plan Sponsor and the Plan Administrator.

Effective, January 1, 2009, new hires and rehired employees are not eligible to participate in the Plan.

The assets of the Plan, excluding the "Employer contribution receivable," are held and invested on a commingled basis in the Lockheed Martin Corporation Master Retirement Trust (the Master Trust). The assets of the Master Trust are held by The Northern Trust Company (the Trustee), with the exception of commingled investment funds, limited partnerships and certain futures contracts.

Contributions

The Corporation has agreed to contribute such amounts as are necessary to provide assets sufficient to meet the benefit obligations to be paid to Plan participants. The Corporation has the right under the Plan to discontinue such contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of retirement benefits, next for the payment of vested benefits, and finally for the payment of accrued benefits for the remaining participants. If the net assets allocated for one of the above categories are not sufficient to pay all the benefits in such category, the available net assets shall be allocated pro rata to all the benefits in that category. However, in the event of termination of the Plan, the PBGC guarantees the payment of nonforfeitable retirement benefits subject to certain limitations prescribed by ERISA.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared based on the accrual basis of accounting.

Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date.

Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries; and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's credited service preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Funding Policy

Contributions by Lockheed Martin met the Employee Retirement Income Security Act of 1974 (ERISA) minimum funding requirements utilizing the entry-age-normal actuarial cost method.

Risks and Uncertainties

The Plan, through the Master Trust, invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Lockheed Martin Tactical Defense Systems
Retirement Plan for Bargaining Unit Employees (037)

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Risks and Uncertainties (continued)

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Certain amounts in the prior year financial statements have been reclassified to conform to the current year presentation. Those changes relate to modifications in investment classifications as a result of the issuance of additional accounting standards.

Investment Valuation and Income Recognition

Investments in the Master Trust are reported at fair value. Fair value is the price that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for additional disclosure of fair value measurements.

Investment transactions in the Master Trust are recorded on a trade-date basis. Interest income is recorded on an accrual basis. Dividends are recorded as of the ex-dividend date. Net realized and unrealized gain/loss includes the Master Trust's gains and losses on investments bought and sold as well as held during the year.

Administrative Expense

Direct administrative expenses are paid by the Master Trust and generally allocated to the Plan either on a pro rata basis or directly if specifically related to the Plan. Other indirect administrative expenses are paid by the Corporation.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Recent Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board (FASB) issued a standard to provide additional guidance on estimating fair value when the volume and level of activity for an asset or liability have significantly decreased in relation to its normal

market activity. The standard also provided additional guidance on circumstances that may indicate that a transaction is not orderly and on defining major categories of debt and equity securities. The Plan adopted the guidance in the standard for the reporting period ended December 31, 2009. Adoption of the standard did not have a material effect on the Plan's Statements of Net Assets or its Statement of Changes in Net Assets.

In May 2009, the FASB issued a standard related to accounting for and disclosure of events that occur after the balance sheet date, but before financial statements are issued or are available to be issued. The standard was amended in February 2010. The Plan has adopted the standard, as amended.

In January 2010, the FASB issued an accounting standard update to clarify certain existing fair value disclosures and require additional disclosures related to fair value measurements. The guidance in the update clarified that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. The update also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, the update introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in the update becomes effective for reporting periods beginning after December 15, 2009. Management is currently evaluating the effect that the provisions of the update will have on the Plan's financial statements.

Subsequent Events

The Plan has evaluated subsequent events through October 6, 2010, the date the financial statements were available to be issued.

Retirement Plan for Bargaining Unit Employees (037)

Notes to Financial Statements (continued)

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The actuarial present value of the accumulated plan benefits is as follows:

	December 31,	
	2009	2008
	<i>(In thousands)</i>	
Vested benefits:		
Participants currently receiving payments	\$ 35,320	\$ 36,847
Other participants	11,048	10,381
Total vested benefits	46,368	47,228
Nonvested benefits	1,363	1,484
Total actuarial present value of accumulated plan benefits	<u>\$ 47,731</u>	<u>\$ 48,712</u>

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (RP-2000 Mortality Table), (b) turnover based upon the termination experience of the Plan, (c) assumed retirement age probabilities based on the experience of the Plan, and (d) an annual discount rate of 5.875% and 6.125% for 2009 and 2008, respectively. The interest rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations.

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

Factors affecting the change in the actuarial present value of accumulated plan benefits are as follows:

	Year ended December 31, 2009 <i>(In thousands)</i>
Actuarial present value of accumulated plan benefits at end of the prior year	\$ 48,712
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	2,833
Benefits paid	(4,908)
Benefits accumulated	(86)
Changes in actuarial assumptions	1,180
Net decrease	(981)
Actuarial present value of accumulated plan benefits at end of year	<u>\$ 47,731</u>

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Income Tax Status

The Internal Revenue Service has determined and informed the Corporation by letter dated December 15, 2009, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

5. Reconciliation of Financial Statements to Form 5500

Net investment gain from the participation in the Master Trust reported in the financial statements is \$144,000 greater than the amount reported on Form 5500 for the year ended December 31, 2009. Administrative expenses reported in the financial statements are \$144,000 less than the amounts reported on Form 5500 for the year ended December 31, 2009. These differences arose from the classification of certain administrative expenses

which are included in the net investment gain in the Master Trust for Form 5500 reporting purposes.

6. Master Trust

General

The Plan's investments are held by the Master Trust, which was established for the investment of the Plan's assets and the assets of several other defined benefit plans sponsored by the Corporation. The Master Trust's net assets, investment income, appreciation/depreciation of investments, and administrative expenses are allocated to the Plan on a pro rata basis based on its share of the total contributions made to the Master Trust. The Plan's interest in the Master Trust's net assets as of December 31, 2009 and 2008 was approximately 0.20%.

The Master Trust owes direct reimbursements to the Corporation for certain expenses incurred by the Corporation and its subsidiaries in providing services to the Plan.

Fair Value of Assets

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and expands disclosures about fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 – Observable inputs – quoted prices in active markets for identical assets and liabilities;
- Level 2 – Observable inputs other than the quoted prices in active markets for identical assets and liabilities – includes quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and
- Level 3 – Unobservable inputs – includes amounts derived from valuation models where one or more significant inputs are unobservable and require us to develop relevant assumptions.

In the tables above, U.S. equity securities included common stock of the Corporation in the amount of \$6,962,000 and \$6,020,000 as of December 31, 2009 and 2008, respectively.

The Master Trust has invested in certain private equity funds (e.g., limited partnerships) that have required capital commitments, which may be called over a specific number of years. Unfunded capital commitments as of December 31, 2009 and 2008 totaled \$1,421,770,000 and \$1,627,936,000, respectively.

Derivative instruments are used in the Master Trust to achieve certain portfolio objectives and to adjust asset allocation in order to manage market risk. Derivative instruments allow internal and external investment managers to achieve these goals efficiently while maintaining appropriate liquidity.

At December 31, 2009, the Master Trust utilized three types of derivative instruments:

6. Master Trust (continued)

Fair Value of Assets (continued)

Futures Contracts – The purchase of futures contracts allows the Master Trust to achieve desired portfolio positions in various commodities without the need to physically own and store them. From an asset allocation standpoint, futures are used to manage the overall risk to equity and fixed income markets. Foreign exchange futures are used to separate the management of currency exposure from foreign equity exposure. Futures contracts are exchange-traded with initial margin required from both parties and daily settlement of gains and losses; therefore credit and counterparty risks are minimal, and futures contracts have no net market value.

Foreign Exchange Forwards – Foreign exchange forward contracts are traded over-the-counter and are used by investment managers as another means of separating currency risk from investment risk. These contracts allow a manager to lock into a rate at which to exchange an upcoming settlement in a foreign currency into US dollars. The contracts are traded over-the-counter, but are generally very short-term which minimizes counterparty risk.

Options on Futures – These contracts allow the holder to buy or sell a futures contract at a specified price prior to an expiration date. Options are primarily used to protect against downside risk in an equity, commodity or currency position held by the Master Trust.

Valuation Techniques

Cash equivalents are mostly comprised of short-term money-market instruments and are valued at cost, which approximates fair value.

U.S. equity securities and international equity securities categorized as Level 1 are traded on national and international exchanges and are valued at their closing prices on the last trading day of the year. For U.S. equity securities and international equity securities not traded on an active exchange, or if the closing price is not available, the trustee obtains indicative quotes from a pricing vendor, broker, or investment manager. These securities are categorized as Level 2 if the custodian obtains corroborated quotes from a pricing vendor or categorized as Level 3 if the custodian obtains uncorroborated quotes from a broker or investment manager.

Retirement Plan for Bargaining Unit Employees (037)

Notes to Financial Statements (continued)

6. Master Trust (continued)

Valuation Techniques (continued)

Commingled equity funds are public investment vehicles valued using the Net Asset Value ("NAV") provided by the fund manager. The NAV is the total value of the fund divided by the number of shares outstanding. Commingled equity funds are categorized as Level 1 if traded at their NAV on a nationally recognized securities exchange or categorized as Level 2 if the NAV is corroborated by observable market data (e.g., purchases or sales activity).

Fixed income securities categorized as Level 2 are valued by the trustee using pricing models that use verifiable observable market data (e.g. interest rates and yield curves observable at commonly quoted intervals), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics.

Private equity funds, real estate funds, hedge funds, and certain fixed income securities categorized as Level 3 are valued based on valuation models that include significant unobservable inputs and cannot be corroborated using verifiable observable market data. Valuations for private equity funds and real estate funds are determined by the general partners, while hedge funds are valued by independent administrators. Depending on the nature of the assets, the general partners or independent administrators use both the income and market approaches in their models. The market approach consists of analyzing market transactions for comparable assets while the income approach uses earnings or the net present value of estimated future cash flows adjusted for liquidity and other risk factors. Guaranteed annuity contracts are included in other fixed income and are categorized as Level 3. These contracts are valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering credit-worthiness of the issuer.

Commodities categorized as Level 1 are traded on a commodity exchange and are valued at their closing prices on the last trading day of the year. Commodities categorized as Level 2 represent shares in a commingled commodity fund valued using the NAV, which is corroborated by observable market data.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes the valuation methods of the Master Trust are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

7. Parties-in-Interest Transactions

The Master Trust invests in the common stock of the Corporation, the plan sponsor, and in funds managed by The Northern Trust Company, the Trustee. These are party-in-interest transactions for which a statutory exemption exists.

Section 104 of ERISA and Section 6059(a) of the Internal Revenue Code require that an Enrolled Actuary's report be submitted for each defined benefit plan, as part of the annual return/report Form 5500, for each plan year beginning on or after January 1, 1976.

This letter, together with the accompanying Schedule B (Form 5500) and supporting attachments, constitutes the Enrolled Actuary's report for the Plan Year ending December 31, 2009. We have prepared the Schedule B based on plan, contribution and participant information furnished by the Plan Sponsor and based on our understanding of the current minimum funding requirements under ERISA, the Internal Revenue Code and regulations thereunder.

The current liability information, as reported in Items 1(d) and 2(b) of the Schedule B, and the Additional Required Funding Charge (if any), as determined in Item (12), were prepared based on the IRS guidance that has been published to date concerning Section 412(1) of the Internal Revenue Code. If any guidance that is published in the future conflicts with the methods used to prepare this Schedule B, we reserve the right to modify and/or adjust this information and the minimum funding requirements to follow such guidance.

Sincerely,

Statement by Enrolled Actuary (see instructions before signing):

To the best of my knowledge, the information supplied in this schedule and on the accompanying schedules, statements, and attachments, if any, is complete and accurate, and in my opinion each assumption, used in combination, represents my best estimate of anticipated experience under the plan. Furthermore, in the case of a plan other than a multiemployer plan, each assumption used (a) is reasonable (taking into account the experience of the plan and reasonable expectations) or (b) would, in the aggregate, result in a total contribution equivalent to that which would be determined if each such assumption were reasonable; in the case of a multiemployer plan, the assumptions used, in the aggregate, are reasonable (taking into account the experience of the plan and reasonable expectations).

**LOCKHEED MARTIN TACTICAL DEFENSE SYSTEMS RETIREMENT PLAN
FOR BARGAINING UNIT EMPLOYEES
EIN: 52-1893632/037**

Schedule B, line 6 – Statement of Actuarial Assumptions/Methods

DESCRIPTION OF THE ENTRY AGE NORMAL COST METHOD

In the initial calculation under the Entry Age Normal Cost Method, the Actuarial Present Value of Projected Benefits and the Actuarial Present Value of Future Normal Costs are obtained assuming the Plan has always been in existence and using the Participants' entry ages. The Actuarial Present Value of Future Normal Costs is divided by a temporary annuity to determine the Normal Cost. The Actuarial Present Value of Projected Benefits less the Actuarial Present Value of Future Normal Costs and assets yields the Initial Unfunded Actuarial Accrued Liability, which is amortized over a period of 30 years.

In the second and subsequent years, the Normal Cost and Unfunded Actuarial Accrued Liability are calculated as above. An **"Expected"** Unfunded Actuarial Accrued Liability is also calculated as the prior year's Unfunded Actuarial Accrued Liability, less any contribution in excess of the Normal Cost, plus interest at the valuation rate. The **"Expected"** and Actual Unfunded Actuarial Accrued Liabilities are compared to determine the gain or loss for a particular year. The gain or loss is then amortized over 5 years from its occurrence.

The total annual cost for the Plan, then, is equal to the Normal Cost plus an amount necessary to amortize the Unfunded Actuarial Accrued Liability over the remaining periods of amortization.
