NOTES TO FINANCIAL STATEMENTS

1. PLAN DESCRIPTION

The following description of the EAS/JMEG ("Companies") 401(k) Retirement Plan ("Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined contribution plan covering all employees of the Companies who have a minimum of 1,000 hours of service and are twenty-one or older. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions - Each year, participants may contribute up to 100% of pretax annual compensation, as defined in the Plan. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers twenty-two pooled separate accounts as investment options for participants. The Companies may, at the option of their Boards of Directors, make matching contributions. Additional profit sharing amounts may also be contributed at the option of the Companies' Board of Directors. Contributions are subject to certain limitations.

Participant accounts - Each participant's account is credited with the participant's contribution and allocations of (a) the Companies' contribution and, (b) Plan earnings (losses), and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting - Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Companies' contribution portion of their accounts is based on years of continuous service. A participant is 100% vested after five years of credited service.

Loans to participants - Participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of their account balance. The loans are secured by the balance in the participant's account and bear interest at rates commensurate with local prevailing rates as determined quarterly by the plan administrator. Principal and interest is paid ratably through monthly payroll deductions.

Payment of benefits - On termination of service, a participant may receive the value of the vested interest in his or her account as a lump-sum distribution.

Forfeited accounts - At December 31, 2009 and 2008, forfeited nonvested accounts totaled \$20,947 and \$6,857, respectively. These accounts may be used to reduce future employer contributions. In 2009, employer contributions were reduced by \$5,779 from forfeited nonvested accounts.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Date of management's review - Subsequent events were evaluated through October 8, 2010, which is the date the financial statements were available to be issued.

Basis of presentation - The financial statements of the Plan are prepared on the accrual basis of accounting.

Investment valuation and income recognition - Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of benefits - Benefits are recorded when paid.

Operating expenses - Substantially all expenses of maintaining the Plan are paid by the Companies.

3. INVESTMENTS

The December 31, 2009 and 2008 Statements of Net Assets Available for Benefits, the investment activities included on the Statement of Changes in Net Assets Available for Benefits for the year ended December 31, 2009, and the accompanying notes to the financial statements were prepared in part or entirely from information certified by the trustee in accordance with 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. The information certified includes total investments of \$5,078,072 and \$3,053,855 at December 31, 2009 and 2008, respectively, and related gain of \$961,522 for the year ended December 31, 2009.

4. FAIR VALUE MEASUREMENTS

FASB ASC 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets, quoted prices for identical assets or liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Pooled Separate Accounts - Valued at the net asset value (NAV) of shares held by the Plan at year-end.

Participant loans - Valued at amortized cost, which approximates fair value.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

5. TAX STATUS

The Plan received a determination dated January 12, 2009, in which the Internal Revenue Service stated that the Plan, as designed, was in compliance with the applicable requirements of the Internal Revenue Code. Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed and currently being operated in compliance with the applicable requirements of the IRC.

6. PLAN TERMINATION

Although it has not expressed any intent to do so, the Companies have the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants would become 100% vested in their employer contributions.

7. RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

8. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
