# Appendix B (Continued)

| | |
|---|---|
| Assumptions Made In Valuing Spouse's Benefit | All employees included in the valuation are assumed to be married. This percentage is used as the probability that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband. |
| Optional Form Selection | All employees are assumed to elect the lump sum form of benefit. |
| Provision for Expenses | The expected non-investment related expenses expected to be paid from plan assets for the upcoming year were included in the Target Normal Cost for Minimum Required Contribution purposes. |
| Standing Elections | The client has not signed an election that provides for the automatic use of the Carryover Balance and/or Prefunding Balance if necessary to meet the minimum funding requirement. |
| Asset Method | Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date. |
| Funding Method | Pure Unit Credit<br><br>The actuarial liabilities shown in this report are determined using software purchased from an outside vendor which was developed for this purpose. Certain information is entered into this model in order to generate the liabilities. These inputs include economic and non-economic assumptions, plan provisions, and census information. We rely on the coding within the software to value the liabilities using the actuarial methods and assumptions selected. Both the input to and the output from the model are checked for accuracy and reviewed for reasonableness. |
| Valuation Date | December 31 |
| Employees Valued | Only participants as of the valuation date were valued. |
| Changes in Assumptions and Methods since the Last Actuarial Valuation | The interest rates used for determining the funding target were 5.01%, 5.26% and 5.74%. These rates were updated to the rates required for the current plan year.<br><br>The mortality table for the funding target was changed as required under PPA '06. |
| Justification for Changes in Actuarial Assumptions | Assumption changes other than to the prescribed actuarial assumptions were made to better anticipate future experience and to comply with ASOP 35. We believe that no approval is required for those changes because the aggregate underfunding for PBGC premium purposes within the Controlled Group excluding overfunding, for this plan year does not exceed $50,000,000. |
