INDEPENDENT AUDITORS' REPORT

910 Ridgebrook Road
Sparks, MD 21152

To the Investment and Benefits Committee and Participants
of the Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group
(Chicago Dewey & Almy Plant):

We were engaged to audit the accompanying statement of net assets available for benefits of the Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group (Chicago Dewey & Almy Plant) (the Plan) as of December 31, 2009 and the related statement of changes in net assets available for benefits for the year then ended and the statement of accumulated plan benefits as of December 31, 2009 and the statement of changes in accumulated plan benefits for the year then ended and supplemental schedule of assets (held at end of year) as of December 31, 2009. These financial statements and supplemental schedule are the responsibility of the Plan's management. The statement of net assets available for benefits of the Plan as of December 31, 2008 and the related statement of changes in net assets available for benefits for the year then ended and the statement of accumulated plan benefits as of December 31, 2008 and the statement of changes in accumulated plan benefits for the year then ended were audited by other auditors. As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed the other auditors not to perform, and they did not perform, any auditing procedures with respect to the information certified by The Northern Trust Company, the Trustee of the Plan. Their report, dated October 13, 2009, indicated that (a) because of the significance of the information that they did not audit, they were unable to, and did not, express an opinion on the financial statements taken as a whole and (b) the form and content of the information included in the financial statements other than that derived from the information certified by the Trustee, were presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Notes 5 and 9 as of and for the year ended December 31, 2009, which was certified by The Northern Trust Company, the Trustee of the Plan. We have been informed by the Plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the Trustee as of and for the year ended December 31, 2009, that the information provided to the Plan administrator by the Trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying 2009 financial statements and supplemental schedule taken as a whole. The form and content of the information included in the 2009 financial statements and supplemental schedule, other than that derived from the information certified by the Trustee, has been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, is presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

DESCRIPTION OF METHOD CHANGES

Target Liability interest rates were changed as shown below.

	01/01/2009	01/01/2008
for Minimum Required Contribution	October 2008 Yield Curve	5.66%, 5.85%, 6.03%
for Maximum Deductible Contribution	October 2008 Yield Curve	5.66%, 5.85%, 6.03%

Asset Method

The Actuarial Value of Assets has been determined using the Average Value Method, where asset appreciation or depreciation is only partially recognized in the year of occurrence. The result is a gradual recognition of 1/3 per year over a 24 month period of each year's appreciation or depreciation in excess of or less than that which was assumed. The Actuarial Value of Asset must be within 90% to 110% of the Market Value of Assets.

This was changed from the Market Value of Assets used as of January 1, 2008.

Source of Data

Participant data as of January 1, 2009 was provided on computer files from the Pension Service Center based on participant data provided by the Company for administration of the Retirement Plans. Data for participants in pay status has been compared and reconciled to the Northern Trust payroll file. The participant data has been reviewed and reconciled to participant data used in the prior Valuation and appears reasonable for Valuation purposes.

Asset amounts as of December 31, 2008 were derived from the Trustee reports from Northern Trust provided by the Company. The assets have been reviewed for reasonableness and are assumed to be appropriate for Valuation purposes.

Although we believe these to be accurate and complete, the data and financial information have not been audited by us.

1. Description of the Plan

The following description of the Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group (Chicago Dewey & Almy Plant) ("Plan") provides only general information. Participants should refer to the Plan document for a complete description of its provisions.

General

The Plan is a noncontributory defined benefit retirement plan which was established January 1, 1963. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). Certain administrative decisions regarding the Plan are made by a committee appointed by the Board of Directors and/or the Investment and Benefits Committee of W. R. Grace & Co. ("Grace"). For investment purposes, the assets of the Plan are commingled with the assets of certain other retirement plans of Grace in the Trust Fund of the W. R. Grace & Co. Retirement Plans ("Fund"), a master trust, which is maintained by The Northern Trust Company ("Trustee").

On April 2, 2001, Grace and 61 of its U.S. subsidiaries and affiliates (collectively, the "Company") filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code with the United States Bankruptcy Court for the District of Delaware (the "Court"). With the Court's permission, Grace has continued to meet its obligations under the Plan. During the remaining term of the Company's Chapter 11 cases, the Court must approve any amendments or changes to the Plan, which are not in the ordinary course of business, as well as any contributions to the Plan.

Eligibility

Any hourly employee of the Chicago Dewey & Almy Plant is eligible to participate in the Plan. Participants enter the Plan on the first day of the month following the date on which the eligibility requirements are met.

Pension Benefits

Participants are eligible to receive retirement benefits upon actual retirement at any age from 65 (based on the retirement benefit level at actual termination or the commencement of retirement benefits, if earlier) and are eligible for early retirement benefits at age 55. Participants' monthly retirement benefits range from \$17 to \$45 for each year of credited service, depending on the date of termination of service, as defined by the Plan. Additionally, retirees' monthly benefits are reduced if the employee has less than ten years of service.

Benefits are paid in the form of an annuity unless the participant's accrued benefit is valued at \$1,000 or less, in which case the participant will receive a direct distribution from the Plan. If the participant's accrued benefit exceeds \$1,000 but not \$5,000, the benefit will remain in the Plan until the participant affirmatively elects to have the Plan distribute the funds or have the funds paid in a direct rollover to an individual retirement plan. Former Grace employees with an account balance within the W. R. Grace & Co. Savings and Investment Plan (the "S&I Plan") may directly roll over into the S&I Plan a lump sum distribution received from the Plan.

**Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group
(Chicago Dewey & Almy Plant)
Notes to Financial Statements
December 31, 2009 and 2008**

Death and Disability Benefits

Upon the death of an active vested participant, or a vested former participant who terminated on or after January 1, 1976, a death benefit may be payable to the participant's spouse or designated beneficiary.

Disability benefits are also available for eligible participants prior to retirement age.

Vesting

Employees are fully vested in benefits accrued after 5 years of vesting service, as defined by the Plan, or at age 55 regardless of years of service.

2. Summary of Accounting Policies

The following are the significant accounting policies followed by the Plan:

Basis of Accounting

The financial records of the Plan are maintained on the accrual basis of accounting.

Investment Valuation and Income Recognition

All investments in the Fund are stated at fair value, with the exception of annuity and immediate participation contracts, which are stated at contract value. Contract value represents contributions made under the contract plus interest at the contract rate ranging from 5.54% to 5.57% during 2009 and from 6.02% to 6.27% during 2008, and dividends less funds used for benefit payments. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Refer to Note 6 for a description of significant accounting policies employed in determining the fair value of investments held by the Fund. Purchases and sales of securities are recorded on a trade-date basis. Securities denominated in foreign currencies are translated at the exchange rate prevailing at the statement of net assets available for benefits date. Investment income (loss) from securities denominated in foreign currencies is translated at the average exchange rate prevailing during the year. The average cost method is used to determine the cost of securities sold. Dividends are recorded on the ex-dividend date. Funds under the investment contract that have been allocated and applied to purchase annuities (through insurance companies with those companies obligated to pay the related pension benefit) are excluded from the Plan's assets.

Risks and Uncertainties

Contributions to the Plan, if any, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation and demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment securities are exposed to various risks, such as interest rate, credit and market risks. Investment securities change in value, and it is possible that such changes could be material.

**Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group
(Chicago Dewey & Almy Plant)
Notes to Financial Statements
December 31, 2009 and 2008**

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Such estimates include those regarding fair value of investments and accumulated benefit obligations. Actual results could differ from those estimates.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits represent those future periodic payments, including lump sum distributions, based on the Plan provisions earned by all active, retired and vested terminated participants up to the date of the valuation. Accumulated plan benefits include benefits expected to be paid to (a) retired or vested terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits reflecting the time value of money and the probability of payment between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2009 and 2008 were a) life expectancy of active participants (the RP-2000 Mortality Table), b) a graduated retirement age scale from age 55 to 70 and c) interest rate of 8.00%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue.

In the event of Plan termination, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Administrative Expenses

Expenses incurred in the administration of the Plan are required to be paid through the Fund, unless paid directly by the Company at its discretion. Administrative expenses incurred by the Fund are allocated to the Plan as described in Note 5. The Trust paid administrative expenses totaling \$4,562,647 and \$4,060,698 for the years ended December 31, 2009 and 2008, respectively.

Effect of New Accounting Standards

In June 2009, the Financial Accounting Standards Board ("FASB") issued FASB Accounting Standards Codification ("ASC") 105, Generally Accepted Accounting Principles, which is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Codification does not change current U.S. generally accepted

**Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group
(Chicago Dewey & Almy Plant)
Notes to Financial Statements
December 31, 2009 and 2008**

accounting principles, but is intended to simplify user access by providing all of the authoritative literature related to a particular topic in one place, and as of the effective date, all existing United States accounting standard documents were superseded. The Plan has included references to the Codification, as appropriate, in these financial statements.

In May 2009, the FASB issued Statement of Financial Accounting Standard ("SFAS") No. 165, "Subsequent Events", which was subsequently codified as ASC 855. The objective of ASC 855 is to establish general standards of accounting for and disclosure of events that occur after the statement of net assets available for benefits date but before financial statements are issued or are available to be issued. ASC 855 is effective for interim or annual financial periods ending after June 15, 2009. The Plan has adopted ASC 855. ASC 855 requires that non-public entities evaluate subsequent events through the date that the financial statements are available to be issued. Subsequent events have been evaluated through September 30, 2010, the date the financial statements were available to be issued.

In March 2008, the FASB issued SFAS No. 161, "Disclosures About Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133", which was subsequently codified as ASC 815. ASC 815 requires enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivatives are accounted for under ASC 815, and its related interpretations, and (c) how derivative instruments affect an entity's financial position, financial performance and cash flows. ASC 815 also requires that objectives for using derivatives be disclosed in terms of underlying risk and accounting designation and requires cross-referencing within the footnotes. ASC 815 suggests disclosing the fair values of derivatives and their gains or losses in tabular format. ASC 815 is effective for Plan years beginning after November 15, 2008. The Plan has adopted ASC 815.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements", which was subsequently codified as ASC 820. ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. ASC 820 is effective for fiscal years beginning after November 15, 2007. In April 2009, the FASB issued FASB Staff Position ("FSP") No. FAS 157-4 "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly", which was subsequently codified as ASC 820. ASC 820 provides additional guidance and expands on the factors that should be considered in estimating fair value when there has been a significant decrease in market activity for a financial asset. This portion of ASC 820 is effective for periods ending after June 15, 2009. The Plan has adopted ASC 820. See Note 6 for further discussion of ASC 820.

In June 2006, the FASB issued Interpretation No. 48, which was subsequently codified as ASC 740, Income Taxes. ASC 740 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return as well as guidance on de-recognition, classification, interest and penalties and financial statement reporting disclosures. For these benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The Plan implemented the provisions of ASC 740 during

**Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group
(Chicago Dewey & Almy Plant)
Notes to Financial Statements

the year ended December 31, 2009. As the Plan is tax exempt and has no unrelated business income, the implementation did not have a material impact on the Plan's financial statements. The Plan does not have any amounts accrued relating to interest and penalties as of December 31, 2009.

3. Funding Policies

Employee contributions are not required by the Plan. Contributions are made by the Company based upon annual actuarial determinations of cost using the "Projected Unit Credit Method." The contributions of the Company are to be made at such intervals as may be determined by management and the Company's actuaries in such amounts as are necessary to maintain the Plan on a sound actuarial basis and to meet minimum funding standards of ERISA. No Company contributions were required for 2009 or 2008.

Under the provisions of the Pension Protection Act, the minimum funding requirements have been increased. Therefore, Plan sponsors may be required to make larger contributions in the future if plan obligations are less than 100% funded.

4. Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event of Plan termination, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, to provide the following benefits in the order indicated:

- (a) Benefits attributable to employee contributions, if any, with interest, taking into account those paid out before termination.
- (b) Other vested benefits up to insurance limitations guaranteed by the Pension Benefit Guaranty Corporation ("PBGC").
- (c) All other (i.e., uninsured) vested benefits.
- (d) All nonvested benefits.

Benefits to be provided via investment contracts under which a third party is obligated to pay would be excluded for allocation purposes.

Any remaining Plan assets would be returned to the Company. The PBGC insures pension benefits to Plan participants, up to certain limits, should unfunded vested benefits exist upon Plan termination. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. Whether a particular participant's accumulated plan benefit will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at the time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2009 and 2008, that ceiling was \$4,500 and \$4,513, respectively. That ceiling applies to pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward. For all benefits greater than the PBGC ceiling, the benefits will not be guaranteed for the excess.

5. Investment in the Fund

The Plan has an undivided interest in the Fund, which comprises all of the Plan's investments. As the Plan's sole investment is its interest in the Fund, the investment is greater than 5% of the Plan's net assets. The assets of the Fund are comprised entirely of the Plan's assets and the assets of certain other retirement plans of the Company, each of which has an undivided interest in the Fund and is a related party to the Plan. At December 31, 2009 and 2008, the Plan's percentage interests in the Fund were approximately .56% and .56%, respectively.

Fund Investments

Investments in publicly traded securities are valued at the closing sales price on the last day of the year, which is fair value. Investments, such as government and agency securities, as well as corporate bonds traded on the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices, which approximates fair value. Common/collective trust funds are valued at fair value, as they are principally made up of marketable securities which are valued based on quoted market prices, with the remaining investments in the funds fair value as determined by the investment advisor. Asset backed securities are valued at fair value based upon industry standard pricing as provided by third party sources. Short-term investments are reported at cost, which approximates fair value.

As part of the Fund's investment strategy, certain investment managers may use derivative financial instruments including fixed income futures, options and swaps as substitutes for certain types of fixed income securities for the following primary reasons: 1) to hedge a part of the Fund's portfolio to contain or lessen exposure in certain areas of risk (e.g. currency risk), 2) to gain market exposure in the portfolio in a more efficient and less expensive manner, 3) to enhance investment returns by decreasing the cost of structuring the portfolio or by capturing pricing disparities between financial instruments, and 4) to adjust the

maturity mix of the portfolio more efficiently. These investments are marked-to-market and generally have maturities of six months or less. During 2009 and 2008, derivative transactions were executed in accordance with policies referenced in each investment manager's relevant management agreement and with the Fund's Statement of Investment Policy. The investment managers use exchange-traded investments such as equity and interest rate futures and on occasion, over-the-counter ("OTC") options and forward exchange contracts.

There may be risk exposures associated with some of the derivative transactions. Credit loss could occur due to nonperformance of counterparties associated with these transactions. The investment managers mitigate these exposures through credit approvals, credit limits and other counterparty monitoring procedures.

The following is a summary of the significant accounting policies associated with the Fund's use of derivatives:

Futures - Upon entering into a futures contract, the Fund is required to pledge to the broker an amount of cash and/or collateral equal to the minimum "initial margin" requirements of the exchange. Pursuant to the futures contract, the Fund agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin", which is settled daily and is included in net appreciation (depreciation) in Other Investments. Fixed income futures of \$(1,289,820) and \$13,332,242 were held by the Fund at December 31, 2009 and 2008, respectively, with corresponding fixed income futures offsets of \$1,289,820 and \$(13,332,242), respectively. Fixed income futures and related offset are included in Other Investments in the net Fund assets available for benefits.

The following tables present the Plan's open futures contracts as of December 31, 2009 and 2008:

Options - Investment managers may buy or write put and call options through listed exchanges and in the OTC market. When an investment manager buys or writes an option, an amount equal to the premium paid or received by the Fund is recorded as an asset or liability and is periodically adjusted to the current fair value of the option purchased or written. The premiums paid or received from buying or writing options are recorded as realized gains or losses upon the expiration of the options. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss, if sold, or an adjustment to cost, if acquired. The Fund, as a writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result, bears the market risk of an unfavorable change in the price of the security underlying the written option. Fixed income options of \$(1,147,924) and \$(51,078) were held by the Fund at December 31, 2009 and 2008, respectively. Fixed income options are included in Other Investments in the net Fund assets available for benefits.

Swaps - Conventional interest rate swaps and/or forward interest rate swap spreads are employed for duration and yield curve management. Credit default swaps are used for credit risk management and may be purchased to protect long positions or to capitalize on deteriorating credits or sold to capitalize on pricing inefficiencies relative to cash pay bonds. Total return swaps are used to gain inexpensive exposure to the market and for efficient sector allocation. Swaps of \$(281,164) and \$(80,544) were held by the Fund at December 31, 2009 and 2008, respectively. Swaps are included in Other Investments in the net Fund assets available for benefits.

Fixed income - The investment managers take positions in long and short futures contracts, options, swaps and forward contracts to carry out the Fund's fixed income investment strategy. Investment managers do not use derivative transactions to leverage the Fund's portfolio. Short-term and long-term futures contracts are exchange-traded instruments used to provide the portfolio with liquidity, to obtain a desired portfolio structure and to capture relative value differences.

The investment managers trade listed options on both short-term and long-term futures. The investment managers also trade OTC options on securities, swaps and futures. OTC options are used primarily with securities rather than with futures because there is no listed market for options on most securities. Whether exchange traded or OTC, options are used to obtain a desired portfolio structure.

The assets of the Plan held by the Fund are commingled. The Company, its independent actuary and the Trustee have maintained a record of the assets of each separate plan in the Fund by crediting contributions and charging disbursements to the balance of the Plan's assets at the start of each year. Returns on investments and administrative expenses are allocated to the participating plans on a monthly basis based on the proportion of each plan's beginning net asset balance to the total beginning net asset balance of the Fund for such period.

6. Fair Value Measurements

Certain of the Fund's assets and liabilities are reported at fair value. See Note 5 for methods of valuation for the various investments held by the Fund. ASC 820 defines fair value as the value that would be received at the measurement date in the principal or "most advantageous" market. The Fund uses principal market data, whenever available, to value assets and liabilities at fair value that are required to be reported at fair value. ASC 820 prescribes three valuation techniques that shall be used to measure fair value as follows:

1. **Market Approach**—uses prices or other relevant information generated by market transactions involving identical or comparable assets or liabilities.
2. **Income Approach**—uses valuation techniques to convert future amounts to a single present amount (discounted).
3. **Cost Approach**—the amount that currently would be required to replace the service capacity of an asset (i.e., current replacement cost).

One or a combination of the approaches above can be used to calculate fair value, whichever results in the most representative fair value.

In addition to the three valuation techniques, ASC 820 prescribes a fair value hierarchy in order to increase consistency and comparability in fair value measurements and related disclosures. The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 Inputs — Quoted prices in active markets for identical assets or liabilities. A quoted price in an active market provides the most reliable evidence of fair value.

Level 2 Inputs — Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs — Unobservable inputs for the asset or liability, which should reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

**Retirement Plan of W. R. Grace & Co.-Conn. Chemical Group
(Chicago Dewey & Almy Plant)
Notes to Financial Statements
December 31, 2009 and 2008**

Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The methods of investment valuation discussed in Note 5 may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables present the fair value hierarchy for the Fund's assets measured at fair value as of December 31, 2009 and 2008:

7. Tax Status of Plan

The Plan received a favorable determination letter from the Internal Revenue Service dated August 13, 2002. The Plan has been amended since that letter was received. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

8. Related Party Transactions

Certain Fund investments are common/collective trust funds held by The Northern Trust Company as Trustee. The Company provides certain accounting and administrative services to the Plan for which no fees are charged. Fees are paid at the Fund level and are allocated to the Plan. These transactions qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules.
