The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions

Each year, participants may contribute up to 100 percent of pretax annual compensation, as defined in the Plan. Participants who have attained age 50 before the end of the plan year are eligible to make catch up contributions. Participants may also contribute amounts representing distributions from other qualified plans (rollovers). Participants direct the investment of their contributions into various investment options offered by the Plan. The Plan currently offers various pooled separate accounts and an insurance investment contract as investment options for participants. The Company's contributions are discretionary and determined by the board of directors. During 2009, the Company elected to contribute 10 percent of a participant's salary deferral limited to one percent of a participant's gross weekly wages. Additional profit sharing amounts may be contributed at the option of the Company's board of directors. Contributions are subject to certain limitations.

Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Company's contribution and, (b) plan earnings, and (c) charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts is based on years of continuous service. A participant is 100 percent vested after two years of credited service.

Participant Loans

Participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50 percent of their account balance. The loans are secured by the balance in the participant's account and bear interest at rates that range from 5.25 percent to 10.25 percent, which are commensurate with local prevailing rates as determined by the plan sponsor. Principal and interest are paid ratably through weekly payroll deductions.

Payment of Benefits

On termination of service due to death, disability, retirement or any other reasons, a participant may receive the value of the vested interest in his or her account as a lump-sum distribution.

At December 31, 2009 and 2008, the value of the accounts held by participants who have separated from employment with the Company and have decided to continue to invest in the Plan total \$306,945 and \$170,130, respectively. For the year ended December 31, 2009, there were no distributions requested but not paid to participants who have elected to withdraw from the Plan.

Forfeited Accounts

The balance of forfeited non-vested funds at December 31, 2009 and 2008 totals \$96 and \$25, respectively. These accounts may first be used to reduce administrative expenses and then to reduce future employer contributions.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount that participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Statement of Net Assets Available for Benefits presents fair value of the investment contracts as well as the adjustment of fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosures of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 10 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income on the investment contracts account is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains or losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded in the period in which they are paid.

Expenses

The Company absorbs a significant portion of the recordkeeping costs of the Plan.

Subsequent Events

In accordance with FASB ASC 855, *Subsequent Events*, management has reviewed subsequent events through October 8, 2010 the date the financial statements were available to be issued.

3. INFORMATION CERTIFIED BY THE PLAN'S CUSTODIAN

The plan sponsor has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA. The custodian has certified that the following data included in the accompanying financial statements and supplemental information is complete and accurate at December 31, 2009 and 2008 and for the year ended December 31, 2009.

	<u>2009</u>	<u>2008</u>
Pooled separate accounts	\$ 1,197,617	\$ 797,933

Interest, insurance contract	<u>\$ 6,615</u>	
Net appreciation in fair value of pooled separate accounts	<u>\$ 187,426</u>	

4. INVESTMENTS

The following investments were held by the Plan at December 31, 2009 and 2008. Investments representing 5 percent or more of the Plan's net assets available for benefits have been separately stated.

	2009		2008

Other Investments	673,817		416,996	
Total	<u>\$ 1,599,485</u>		<u>\$ 1,103,728</u>	

* These investments represent 5 percent or more of the net assets available for benefits as of the respective date.

5. RELATED PARTY TRANSACTIONS

Certain plan investments are managed by ING Investments, L.L.C., a wholly-owned subsidiary of ING Group. ING Life Insurance and Annuity Company, another subsidiary of ING Group, Inc., is the custodian as defined by the Plan, and therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for services provided by ING total \$600 for the year ended December 31, 2009.

Plan transactions and records are administered by Daily Access Corporation who is the recordkeeper of the Plan; therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for services provided by Daily Access Corporation total \$1,740 for the year ended December 31, 2009.

As stated previously, the Company absorbs the recordkeeping costs of the Plan. For the year ended December 31, 2009, these costs total \$5,976.

6. TAX STATUS

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated March 31, 2008, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code ("IRC").

7. PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants would become 100 percent vested in their employer contributions.

8. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investments securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefit.

9. INVESTMENT CONTRACT WITH INSURANCE COMPANY

The Plan participates in a benefit responsive investment contract, ING Fixed Account, with ING Life Insurance and Annuity Company ("ING"). ING maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

Because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for the portion of the net assets available for benefits attributable to the guaranteed investment contract. The guaranteed investment contract is presented on the face of the statement of net assets available for benefits at fair value with an adjustment to contract value in arriving at the net assets available for benefits. Contract value, as reported to the Plan by ING, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The fair value of the investment contract at December 31, 2009 and 2008 was \$312,929 and \$192,419, respectively. The crediting interest rate is based on the earnings of the underlying assets in the entire medium-long term new portfolio compared to the minimum credit interest rate, 3 percent, and prevailing market conditions. Such interest rates are reviewed on a quarterly basis for resetting.

The plan sponsor has not identified any events that limit the ability of the Plan to transact at contract value with the guaranteed investment contract issuer. The contract does not define any circumstances which would permit the guaranteed investment contract issuer to terminate the contract at a value different from contract value.

	<u>2009</u>	<u>2008</u>
Average yields:		
Based on actual earnings	3.00%	3.50%
Based on interest rate credited to participants	3.00%	3.15%

10. FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

Pooled separate accounts: Valued at their accumulation unit value (“AUV”). The separate account is valued daily as the number of accumulation units held multiplied by the AUV. AUV is determined based on the combination of the accounts’ net asset value (“NAV”) and the separate account charges. NAV is calculated each business day as of the close of regular trading on the New York Stock Exchange, generally 4 p.m. Eastern time. The separate account charge is communicated to plan management in the contract and applicable notice of change.

Insurance contract: Valued daily based on the credited rate. Market value adjustments or surrender charges are based on formulas and schedules disclosed in the contract.

Participant loans: Valued at amortized cost, which approximates fair value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan’s management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009 and 2008:

Assets at Fair Value as of December 31, 2009
