CB&I Pension Plan for Provo Shop Employees Notes to Financial Statements

1. Description of the Plan

The following describes the major provisions of the Chicago Bridge & Iron Company (the “Company”) Pension Plan for Provo Shop Employees (the “Plan”) and provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions.

General—Effective February 7, 2001, CB&I Inc. (“CB&I”) purchased certain assets and liabilities of Pitt-Des Moines, Inc. (“PDM”) and assumed the pension liabilities for the employees of PDM’s Provo, Utah plant (“Provo”), who were participants in a plan formerly sponsored by PDM (the “Predecessor Plan”). The Plan, sponsored by CB&I, was established for the affected employees, and the resulting obligations and corresponding assets were transferred into the Plan from the Predecessor Plan.

Prior to December 31, 2004, hourly employees at Provo who had completed one year of service and had attained the age of 21 were eligible to participate in the Plan under a collective bargaining agreement covering the Shopmen’s Local Union #182 of the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers. However, effective December 31, 2004, benefit accruals and plan participation were frozen. As of the freeze date, no new or re-employed employees could become eligible, current participants became 100% vested, and no further service has since been credited to the participants.

Plan investments are held with the Prudential Retirement Insurance and Annuity Company (“Prudential”, or the “Custodian”). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

Pension Benefits—The Plan provides for the following retirement benefits to members who have fulfilled the applicable eligibility requirements:

- (1) Normal Retirement Pension – Prior to the freeze date, employees became eligible to receive monthly pension benefits after attaining age 65, upon completion of five years of service and termination of employment. As noted above, participants as of the freeze date became 100% vested, regardless of years of service, but were credited with no further service. Monthly benefits are determined by the number of years and months of service at the time of retirement, as shown below. Service time includes that carried over from the Predecessor Plan. The Plan does not include service beyond 45 years in the participant’s monthly benefit determination.
 - For employees that retired prior to July 1, 2001:
 - \$16 for each of the first ten full years of credited service; plus
 - \$18 for each of the next ten full years of credited service; plus
 - \$20 for each of the final 25 years of credited service.

- For employees that retired on or after July 1, 2001 through June 30, 2003:
 \$17 for each of the first ten full years of credited service; plus
 \$19 for each of the next ten full years of credited service; plus
 \$21 for each of the final 25 years of credited service.
 - For employees retiring after June 30, 2003:
 \$18 for each of the first ten full years of credited service; plus
 \$20 for each of the next ten full years of credited service; plus
 \$22 for each of the final 25 years of credited service.
- (2) Early Retirement Pension – Early retirement benefits, in the form of a reduced monthly pension benefit over the remaining life of the participant, are provided to participants who had attained age 55 and had at least 15 years of service as of the freeze date.
- (3) Disability Retirement Pension – Employees who become totally and permanently disabled are 100% vested in their accrued benefits at the date of disability, provided that the employee had at least 15 years of service as of the freeze date. The disability benefit utilizes the same formula to calculate monthly benefit for a normal retirement, based on the number of years and months of credited service at the time of disability.

Upon retirement, participants can elect to receive their benefit payments in a single life annuity, qualified joint and survivor annuity, or a direct rollover, as defined by the Plan.

2. Summary of Accounting Policies

Basis of Accounting—The accompanying financial statements of the Plan have been prepared using the accrual basis of accounting in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”). Benefit payments to participants are recorded upon distribution.

Use of Estimates—The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates that affect the amounts reported in the financial statements and accompanying notes and schedules. Actual results could differ from those estimates.

Administrative Expenses—Certain administrative expenses are paid by the Company.

Investment Valuation and Income Recognition—The categorization of the Plan’s financial instruments within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Investments that are valued using quoted prices are classified within level 1 of the valuation hierarchy, those valued using internally-developed models that use, as their basis, readily observable market parameters, are classified within level 2 of the valuation hierarchy, while those valued based upon models with significant unobservable market parameters are classified within level 3 of the valuation hierarchy.

The following is a description of the valuation methodologies used for the Plan's instruments measured at fair value, including the general classification of such instruments pursuant to the aforementioned valuation hierarchy:

- Pooled Separate Accounts – The Net Asset Value (“NAV”), provided by the applicable fund administrator, is classified within level 2 of the valuation hierarchy as the NAV's unit price is quoted on a private market that is not active; however, the unit price is based on underlying investments which are traded on an active market.
- Guaranteed Deposit Account – The Guaranteed Deposit Account is recorded at contract value (which approximates fair value), and is classified within level 2 of the valuation hierarchy. Contract value represents allocations and transfers plus accumulated interest less amounts withdrawn.

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded on the accrual basis and dividends are recorded on the ex-dividend date.

For additional disclosures associated with fair value, see Note 6 to the financial statements.

Risks and Uncertainties—The Plan provides for investments in various securities which in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported and disclosed in the financial statements.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumptions process, it is at least reasonably possible that changes in estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Actuarial Present Value of Accumulated Plan Benefits—Accumulated plan benefits are those future benefit payments attributable, under the Plan’s provisions, to service that employees have rendered as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (i) retired or terminated employees or their beneficiaries, (ii) beneficiaries of employees who have died or become disabled, and (iii) present employees or their beneficiaries. Benefits for retired, terminated, or transferred employees or their beneficiaries are based on their specific bargaining unit’s negotiated accrual rate in effect at the time of their retirement, termination or date of transfer out of the bargaining unit. Benefits for active employees are based on the specific bargaining unit’s negotiated accrual rate in effect at the valuation date. Monthly retirement pensions are generally equal to the number of years of benefit service multiplied by the dollar amount per year of benefit service, as previously described in Note 1 to the financial statements. Vested benefits are payable upon retirement, termination of employment, disability, or death. Benefits payable under all such circumstances are included to the extent that they are deemed attributable to employee service rendered through the valuation date.

The actuarial present value of accumulated plan benefits has been determined by an independent actuary and represents the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits for (i) the time value of money (through discounts for interest), and (ii) the probability of payment (by means of decrements such as death, disability, withdrawal, or retirement) between the benefit information date and the expected payment dates. The effect of plan amendments on accumulated plan benefits is recognized during the year in which such amendments become effective.

Actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Subsequent Events—The Plan evaluated all events and transactions that occurred through August 20, 2010, the date these financial statements were issued.

3. Funding Policy

CB&I makes cash contributions to the Plan at such times, and in such amounts, as actuarially calculated under the terms of the Plan and considered necessary so that contributions are sufficient to provide benefits. Contributions made by the Company are designed to meet ERISA minimum annual funding requirements, calculated using the unit credit funding method which, by definition, results in no unfunded past service liability. For the 2009 Plan year, the Plan has met the minimum funding requirements under ERISA.

4. Accumulated Plan Benefits

The calculations of the actuarial present value of accumulated plan benefits are made by the Plan’s independent actuary.

The most recent actuarial valuation was prepared as of December 31, 2009. The actuarial present value of accumulated plan benefits consists of the following:

	December 31,	
	2009	2008
Vested benefits:		
Participants receiving benefits	\$ 1,473,538	\$ 1,217,996
Participants with deferred vested benefits	660,867	372,287
Active participants	–	535,122
Total vested benefits	2,134,405	2,125,405
Nonvested benefits	–	–
Actuarial present value of accumulated plan benefits	<u>\$ 2,134,405</u>	<u>\$ 2,125,405</u>

The change in the actuarial present value of accumulated plan benefits from December 31, 2008 to December 31, 2009, is attributable to the following:

Actuarial present value of accumulated plan benefits – December 31, 2008	\$ 2,125,405
Interest	163,823
Change in actuarial assumptions	4,350
Benefits accumulated and actuarial gains	(885)
Benefits paid	(158,288)
Net increase	9,000
Actuarial present value of accumulated plan benefits – December 31, 2009	<u>\$ 2,134,405</u>

A summary of the more significant assumptions underlying the actuarial computations is as follows:

- (1) Mortality – IRS 2010 Static Mortality Table and IRS 2009 Static Mortality Table for males and females at December 31, 2009 and 2008, respectively.
- (2) Investment Return – 8.0% per annum, compounded annually, net of investment and contract fees.
- (3) Retirement Age – All employees are assumed to retire at age 65 or immediately for employees over age 65.
- (4) Disability – The 1952 Disability Study of the Society of Actuaries, Period 2, Benefit 5 rates were used.

5. Investments

All investment information disclosed in the accompanying financial statements and supplemental schedules was obtained or derived from information supplied to the plan administrator and is certified as complete and accurate by the Custodian of the Plan, including investment balances at December 31, 2009 and 2008, net appreciation in the fair value of pooled separate accounts and investment income for the year ended December 31, 2009.

The following presents investments that represent 5% or more of the Plan's net assets at December 31, 2009 and 2008:

	December 31,	
	2009	2008
Core Bond Fund	\$ 447,344	\$ 495,777
Large Cap Growth Fund	337,013	241,520
Large Cap Value Fund	320,986	262,289
International Equity Fund	238,023	203,201
Guaranteed Deposit Account	150,778	137,692

6. Fair Value Measurements

The following table presents the Plan's financial instruments carried at fair value as of December 31, 2009 and 2008 by type of investment and by valuation hierarchy:

7. Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan, subject to the provisions of ERISA. In the event of Plan termination, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority

determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (“PBGC”) upon termination of the Plan. Generally, the PBGC guarantees most vested, normal-age retirement benefits, early retirement benefits, and certain disability and survivor’s benefits. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan’s termination, subject to a statutory ceiling on the amount of an individual’s monthly benefit.

Should the Plan be terminated at some future time, not all participants are guaranteed to receive benefits as payments are dependent upon the sufficiency, at that time, of the Plan’s net assets to provide these benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

8. Tax Status

The Plan has received a determination letter from the Internal Revenue Service (“IRS”) dated March 5, 2004, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the “Code”) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification status. Subsequent to the aforementioned determination by the IRS, the Plan was amended. The plan sponsor believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax exempt.

9. Party-In-Interest Transactions

All investments of the Plan are managed by Prudential, the Custodian of the Plan, and therefore, all transactions qualify as party-in-interest transactions and are exempt from the prohibited transaction rules.

CB&I Pension Plan for Provo Shop Employees
EIN / PN: 36-3046868 / 003
Attachment to 2009 Schedule SB (Form 5500)
Line 22 - Description of Weighted Average Retirement Age

The Plan assumes that 100% of participants will retire at age 65.

ACTUARIAL COST METHOD

Actuarial Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in "Plan Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants, plus expenses expected to be paid from plan assets in the coming year..

Target Liability and Funding Shortfall

As of January 1, 2008, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

The plan sponsor elected not to phase in the new interest rate basis. Refer to the plan assumptions section (Appendix E) for additional detail.

Asset Valuation Method

Assets have been valued in accordance with generally accepted procedures as described below.

Funds invested in the General Accounts of an insurance company.	Stated contract value of funds
Funds invested in insurance company Separate Accounts.	Market value

PLAN ASSUMPTIONS

Assumptions have been chosen to anticipate the long range experience of the Plan. Consistency among assumptions is important as each interacts with the others; equally important is the recognition of inflationary trends in the economy.

As the Enrolled Actuary for the Plan, I will certify to the reasonableness of these assumptions, in aggregate, as required by ERISA.

The actuarial assumptions used to compute Plan costs are:
