Report of Independent Accountants

To the Participants and Administrator
of the Simplex Time Recorder Pension Plan

We were engaged to audit the financial statements of the Simplex Time Recorder Pension Plan as of December 31, 2009 and 2008, and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2009 and 2008, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Simplex Time Recorder Pension Plan

Notes to Financial Statements

December 31, 2009

1. DESCRIPTION OF PLAN

The following brief description of the Simplex Time Recorder Pension Plan (the "Plan"), formerly the Simplex Time Recorder Company Employees' Pension Plan, is provided for general information purposes only. Selected Plan provisions are described below. Participants should refer to the Plan document and summary of Plan description for more complete information regarding the terms of the Plan.

General

The Plan is a trustee, noncontributory, defined benefit pension plan which covers virtually all United States employees of Simplex Time Recorder Co. (the "Company") who completed one year of service and attained age 21 prior to December 31, 2001. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") and the Internal Revenue Code of 1986, as amended (the "Code").

Effective December 31, 2001, all future participation under the Plan ceased. Annual cash balance credits on account of compensation or service and continuation of interest credits for cash balance accounts were no longer provided, except for those participants who are eligible for special transition credits as provided for in the restated Plan document effective January 1, 2001.

Effective September 30, 2006, in anticipation of the plan to separate Tyco International Ltd. ("TIL") into three separate, unrelated publicly traded companies consisting of Covidien Ltd ("Covidien"), Tyco Electronics Ltd. ("Tyco Electronics"), and TIL (the "Separation"), the Plan was amended to change the Plan Sponsor from Tyco International (US) Inc. to Citrine Management Corp. ("CMC"). On February 8, 2007, CMC changed its name to Tyco International Management Company ("TIMCO"). On June 29, 2007 TIL was separated into three unrelated publically traded companies. TIMCO converted on August 13, 2010, from a Nevada corporation to a Nevada limited liability company. TIMCO's new legal name is Tyco International Management Company, LLC ("TIMCO LLC" or "Plan Sponsor" or "Tyco") and TIMCO LLC is currently the Plan Sponsor of the Plan.

The Company is part of a controlled group of entities with TIMCO LLC.

Funding Policy

The Company's funding policy is to make all required contributions to the pension plan in accordance with applicable pension laws and regulations. Additional voluntary contributions (in excess of required minimum amounts) are periodically considered based on their individual merits. No Company contributions were necessary during 2009 in order meet the minimum funding requirements under Internal Revenue Service regulations. The Company's contributions for 2008 met the minimum funding requirements under Internal Revenue Service regulations.

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA.

Pension Benefits

Participants are entitled to annual pension benefits beginning at normal retirement age of 65 based on the participant's calculated balance which consists of the following:

- 1) Opening balance credit for benefits earned through December 31, 1988.
- 2) Annual transition credits for active participants on January 1, 1989 credited through 1998; Annual transition credits for active participants on January 1, 2002 credited through 2006. Transition credits are equal to a percentage of compensation based on age and years of benefit service as of December 31, 1988 and December 31, 2001, respectively.
- 3) Annual credits equal to a percentage of compensation based on age and years of benefit service.
- 4) Annual interest credits based on one-year United States Treasury Bill yields (not less than 6% or more than 11%).

The Plan permits early retirement at age 55 and 10 years of vesting service. Retirement benefits are normally paid in equal monthly installments for life to unmarried employees and on a reduced basis 50% for married participants with the reduced benefit paid to the designated beneficiary for life.

Participants may elect the following:

- a) An unreduced benefit payable for his/her lifetime only.
- b) A percentage (100%, 75%, 66-2/3% or 50%) of the reduced benefit continued to a designated beneficiary for life.
- c) A reduced benefit for life with a guarantee that no less than 120 payments will be made.
- d) A temporarily increased benefit, followed by a decrease, which, when added to Social Security payments, provides a reasonably constant total lifetime benefit.

Vesting

Accrued benefits vest at the earlier of: normal retirement age, completion of five years of vesting service; three years after January 1, 2008, or complete or partial plan termination. Effective January 1, 2008, a participant will need to complete three years of service to be 100 % vested.

Disability and Death Benefits

Participants who terminate employment due to total and permanent disability or spouses of vested participants who die may be entitled to receive benefits under this Plan.

Administrative Expenses

Insurance premiums, trustee service charges, audit fees, investment related fees and certain administrative and actuarial fees are paid by the Plan. All other expenses associated with the administration of the Plan are paid by the Company.

Plan Administration

The Plan has an Administrative Committee and an Investment Committee. The Administrative Committee acts in the capacities of Plan administrator and Plan fiduciary. The Investment Committee acts in the capacity of Plan fiduciary. At least three persons of each committee are appointed by the Board of Directors of TIMCO LLC. The Investment Committee appoints the investment managers to manage the assets of the Tyco Master Trust (the "Master Trust").

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable, or would have been payable, during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC"), a U.S. government agency, up to the applicable limitations.
3. All other vested benefits; that is, vested benefits not insured by the PBGC.
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan's sponsor and the level of benefits guaranteed by the PBGC.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Actuarial Valuation Method and Assumptions

Independent actuaries are employed by the Company to determine the Plan's required contributions, present value of accumulated benefits, and prior service costs using the traditional unit credit cost method. The significant actuarial assumptions including mortality, salary increases, and investment returns, used by the independent actuaries are summarized as follows:

Investment Return Rate:	8.04% Effective interest rate based on the IRS November 2008 full yield curve.
Retirement:	Weighted Average Age 64
Mortality:	2009 PPA separate static annuitant and non-annuitant mortality table

Certain actuary assumptions discussed above have changed since the January 1, 2008 valuation. The actuarial assumptions used in the January 1, 2008 valuation were: a) the investment return rate was 5.31% for the first 5 years, 5.90% for the next 15 years, and 6.41% for the years thereafter, b) the mortality table was the 2008 PPA separate static annuitant and non-annuitant mortality tables.

The affects of these changes are included in footnote 3 under the caption Change in actuarial assumptions.

Basis of Accounting

The financial statements of the Plan are presented on the accrual basis of accounting.

Recently Issued Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board ("FASB") issued guidance that emphasizes that even if there has been a significant decrease in the volume and level of activity, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not forced liquidation or distressed sale) between participants at the measurement date under current market conditions. The guidance provides a number of factors to consider when evaluating whether there has been a significant decreases in volume and level of activity for an asset or liability in relation to normal market activity. In addition, when transactions or quoted prices are not considered orderly, adjustments to those prices based on the weight of available information may be needed to determine the appropriate fair value. The guidance also requires increased disclosures. This guidance is effective for annual reporting periods ending after June 15, 2009, and shall be applied prospectively. The impact of adoption of this guidance was not material to the Plan's net assets available for benefits or statement of changes in net assets available for benefits.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The investment in the Master Trust is shown at estimated fair value since no quoted market price for this investment is available. The fair value of the Plan's interest in the Master Trust is based on the beginning of the year value of the Plan's interest in the Master Trust plus actual contributions and allocated net investment income or loss less actual distributions and allocated administrative expenses. Net investment income or loss and certain administrative expenses are allocated to the individual plans based upon the ratio of the plans holdings in the Master Trust of the prior month end.

Other significant accounting policies include: investment transactions are recorded on the trade date, gains or losses on sales of investments are recorded as the difference between proceeds and cost, cost is determined on a specific identification basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

FASB guidance defines fair value as the price that would be received by the Plan for an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. FASB guidance establishes a fair value hierarchy which requires the Plan to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy places the highest priority on unadjusted quoted market prices in active markets for identical assets or liabilities (level 1 measurements) and gives the lowest priority to unobservable inputs (level 3 measurements). The three levels of inputs within the fair value hierarchy are defined as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Plan has the ability to access as of the measurement date.

Simplex Time Recorder Pension Plan
Notes to Financial Statements
December 31, 2009

Investment Valuation and Income Recognition (Continued)

Level 2: Significant other observable inputs other than level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect the Plan's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

In some cases, a valuation technique used to measure fair value may include inputs from multiple levels of the fair value hierarchy. The lowest level of significant input determines the placement of the entire fair value measurement in the hierarchy.

The fair values of the underlying investments of the Master Trust are determined as follows:

Interest bearing cash is primarily invested in a money market mutual fund. The fair value is determined by obtaining quoted prices on nationally recognized securities exchange.

103-12 investment entities: The underlying assets in this pooled investment are valued individually by the custodian except that income and expenses are valued on the accrual basis. The value of the underlying assets are net of any expenses, charges, or other liabilities incurred or accrued by the pooled fund in accordance with procedures consistently followed and uniformly applied. The net value of the pooled fund assets are divided by the total number of units of the pooled fund in existence as of the relevant valuation date. The values are supported by actual redemption prices.

Common stocks: Prices obtained from readily available sources. Most securities trade on active markets and the last trade or official close is used for valuation. Securities that trade thinly are valued either nominally, using the bid or ask, or the mean of bid or ask.

Common collective trusts are valued based on their net asset values, as reported by custodians of the common collective trusts and as supported by actual redemption prices.

Corporate bonds: The majority of this balance represents more than 200 corporate high yield and investment grade credit bonds ("Corporate credits"), as well as Asset Backed Securities ("ABS"). The Corporate credits are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. ABS, are generally valued using matrix pricing through recognized financial models utilized by the investment manager and the custodian that incorporate other observable inputs such as cash flow, security structure, or market information, when there is no broker/dealer quote available.

Partnership/joint venture interests are valued by the custodian based on the underlying assets which includes publicly traded common stock, commercial paper, futures, foreign exchange forwards and money market funds. Redemption value is based on current ownership percentage at the end of the calendar month. Redemption frequency is on a monthly basis, upon 15 days notice of sale.

U.S. government securities: These are direct obligations of the U.S. government or its agencies. These securities are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. This category also includes mortgage backed securities ("MBS") issued by U.S. government agencies that may utilize models, such as a single cash flow model, that incorporate data on interest rate movements, pass-thru securities markets, bid evaluations, and other pertinent data.

Simplex Time Recorder Pension Plan
Notes to Financial Statements
December 31, 2009

Investment Valuation and Income Recognition (Continued)

Registered investment companies are valued by obtaining quoted prices on nationally recognized securities exchanges.

Other investments: Includes swap, municipal bond, non-U.S. government bonds, and sundry assets which are valued by third party pricing sources obtained by the custodian which may utilize models that incorporate pertinent data to determine pricing and non-U.S. sovereign debt securities, where the custodian will utilize available broker/dealer quotes.

The methods above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results may differ from those estimates.

Federal Income Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated December 12, 2002, that the Plan and related trust are designed in compliance with applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes is required.

Subsequent Events

The Plan Sponsor has evaluated subsequent events through the time it issued its financial statements on October 11, 2010.

5. INVESTMENT IN THE MASTER TRUST

As of December 31, 2009 and 2008 the Plan's sole investment is in the Master Trust, which was established for the investment of assets of the Plan and several other TIMCO LLC and affiliated companies' sponsored retirement plans. The assets of the Master Trust are held by its trustee, The Northern Trust Company, for the years ended December 31, 2009 and 2008. Each participating retirement plan has an undivided interest in the assets of the Master Trust except for any other securities, which, if applicable, are identifiable with individual plans. The Plan's interest in the net assets of the Master Trust is approximately 39% and 38% at December 31, 2009 and 2008, respectively.

The Master Trust engaged in security lending. The Master Trust discontinued its security lending during 2009. The collateral pledged and securities on loan were \$29,612,669 and \$29,126,823 at December 31, 2008.

6. NET ASSET VALUE (NAV) PER SHARE

The Plan expanded its disclosures to include the category, fair value, redemption frequency, and redemption notice period for those assets whose fair value is estimated using the net assets value per share as of December 31, 2009.

The following table for December 31, 2009, sets forth a summary of the Master Trust's investments with a reported NAV.

(1) This fund has an investment objective of exceeding the return of the broad non-U.S. equity market as defined by the MSCI All Country World Index excluding the U.S. equity market.

(2) This is a fund whose objective is to exceed the return of the U.S. corporate bonds and mortgage backed securities sectors in the Barclays Aggregate Bond index.

(3) These are two passive index funds whose objectives are to track the returns of the Russell 1000 and Russell 1000 Value U.S. equity indices, respectively.

7. RISKS & UNCERTAINTIES

The Master Trust invests in a highly diversified portfolio of investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the use of estimates and the assumption setting process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Schedule SB, Line 21b – Explanation of Discount Rate Applicable Month Discrepancy

The full yield curve with an applicable look-back month of November 2008 was used to value funding liabilities as of January 1, 2009.

The applicable month has not been entered here due to restrictions within the EFAST2 system which did not allow for an entry in line 21b if the "N/A, full yield curve used" option was selected in line 21a. Since the applicable month was the second month preceding the month including the valuation date (November 2008), "2" would have been entered in line 21b had the system allowed an entry.

Line 21b was completed on the pdf attachment of the Schedule SB.

Schedule SB, Part V – Statement of actuarial assumptions/methods *(continued)*

Actuarial methods

Asset methods – effective January 1, 2009

We used financial data submitted by the trustee as of the valuation date without further audit. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

The asset valuation method is an annual average of the adjusted market value over the last 25 months preceding and including the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate based on IRS guidance. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430. A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant methods – effective January 1, 2008

We used the participant data supplied by the plan sponsor. We have reviewed the data and have no reason to doubt its substantial accuracy. Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants.

Benefits included or excluded

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Late retirement increases:** Participants over normal retirement age are valued including the late retirement actuarial increase
- **Shutdown benefits:** We are not aware of any corporate actions that would create shutdown benefits; therefore, they are excluded.

Schedule SB, Part V – Statement of actuarial assumptions/methods *(continued)*

- **IRC Section 415(b):** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **Benefit restrictions:** Benefit restrictions (if applicable) are ignored in this valuation.

Plan sponsor elections – effective January 1, 2009

Funding interest rate:

- Full yield curve with 2 months look-back (November curve)

Mortality assumption for funding target:

- Static annuitant and non-annuitant tables

Valuation of lump sums based on IRC Section 417(e) assumptions

- N/A

Asset valuation method:

- Average value with 25 months in average period and annual frequency of valuation

Minimum funding method

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **accrued liability** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the accrued liability and the normal cost for an individual are the sum of the component accrued liabilities and normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual normal costs, and the plan's **funding target** is the sum of the accrued liabilities for all participants under the plan.

Maximum deductible contribution method

The cushion amount is based on the funding target for minimum funding calculations.

Schedule SB, Part V – Summary of plan provisions

We have used and relied upon the plan documents, including amendments, supplied by the plan sponsor. The plan sponsor is solely responsible for the validity and completeness of this information.

Following is a summary of the major plan provisions used to determine the plan's financial position. It should not be used in determining plan benefits.

(b) Conversion rule

For active participants who were employed on January 1, 1989 and who were age 45 on December 31, 1988, opening balance is greater of the following:

1. Actuarial equivalent of accrued benefit under the plan as of December 31, 1988 ((a plus b) times c) but not less than d.
 - a. (50% (45%, if less than age 45 as of December 31, 1988) times average compensation minus 50% times Social Security benefit times the lesser of [benefit service projected to normal retirement date divided by 30, 1]
 - b. 0.5% times average compensation times maximum [benefit service to normal retirement date minus 30, 0]
 - c. Benefit service at December 31, 1988 divided by benefit service projected to normal retirement date
 - d. \$144 times years of benefit service

OR

2. Same as 1 if new compensation definition and 50% of average compensation were used in determining the accrued benefit.

For all other active participants on January 1, 1989, the greater of the following:

1. Actual December 31, 1988 accrued benefit (#1 above)

OR

2. Actual December 31, 1988 accrued benefit using new definition of compensation.

Average compensation and new compensation as defined in the plan document effective December 31, 1988

Schedule SB, Part V – Summary of plan provisions (continued)*(c) Transition credits*

For active participants who were in employment on January 1, 1989, an additional credit will be provided for each computation year (for a maximum of 10 computation years).

- Frequency: Credit is as of last day of each computation year, except when retirement benefits begin in such computation year. In this case, credit is as of date of termination.
- Credit: % of participant's compensation (as of such computation year) times % factor using the table below

Sum of Age on Birthday in 1988 and Benefit Service as of 12/31/88	% of Compensation
0-39	0.5%
40-49	1.0
50-59	1.5
60-69	2.0
70-79	3.5
80 or more	4.5

Transition credit is only granted in computation years in which an annual cash balance credit is granted. Also, no transition credits will be granted upon reemployment for participants who incur a severance from service date after November 30, 1990.

After December 31, 2001: For active participants who have 10 years of credited service and whose age plus years of credited service equals 60 or more as of December 31, 2001 and who are not receiving LTD payments, the credit equals the participant's compensation (as of such computation year) multiplied by the % factor using the table below

Sum of Age on Birthday in 2001 and Benefit Service as of 12/31/2001	% of Compensation
60-69	1.50%
70-79	2.00
80-89	2.75
90 or more	3.75

No transition credits will be granted after the 2006 computation year.

Changes since prior valuation

The benefit limitation under IRC Section 415(b) increased from \$185,000 in 2008 to \$195,000 in 2009. This change had no effect on the plan's liabilities.

Benefits not included in valuation

To the best of our knowledge, no benefits were excluded from the valuation.

Significant events

To the best of our knowledge, no significant events occurred during the year that would significantly affect valuation results.

Schedule SB, Line 25 – Change in method

In accordance with plan sponsor elections:

- The funding target interest rate was changed from the 24-month average of segment rates with 1 month look-back and no phase-in to the full yield curve with 2 months look-back.
- The asset method was changed from the fair market value to an annual average of the adjusted market value over the last 25 months preceding and including the valuation date.

These changes are granted automatic approval by the IRS

Expected plan related (administrative) expenses are now included in the target normal cost, as required by the Worker, Retiree, and Employer Recovery Act of 2008.

Report of Independent Accountants

To the Participants and Administrator
of the Simplex Time Recorder Pension Plan

We were engaged to audit the financial statements of the Simplex Time Recorder Pension Plan as of December 31, 2009 and 2008, and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2009 and 2008, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

1. DESCRIPTION OF PLAN

The following brief description of the Simplex Time Recorder Pension Plan (the "Plan"), formerly the Simplex Time Recorder Company Employees' Pension Plan, is provided for general information purposes only. Selected Plan provisions are described below. Participants should refer to the Plan document and summary of Plan description for more complete information regarding the terms of the Plan.

General

The Plan is a trustee, noncontributory, defined benefit pension plan which covers virtually all United States employees of Simplex Time Recorder Co. (the "Company") who completed one year of service and attained age 21 prior to December 31, 2001. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") and the Internal Revenue Code of 1986, as amended (the "Code").

Effective December 31, 2001, all future participation under the Plan ceased. Annual cash balance credits on account of compensation or service and continuation of interest credits for cash balance accounts were no longer provided, except for those participants who are eligible for special transition credits as provided for in the restated Plan document effective January 1, 2001.

Effective September 30, 2006, in anticipation of the plan to separate Tyco International Ltd. ("TIL") into three separate, unrelated publicly traded companies consisting of Covidien Ltd ("Covidien"), Tyco Electronics Ltd. ("Tyco Electronics"), and TIL (the "Separation"), the Plan was amended to change the Plan Sponsor from Tyco International (US) Inc. to Citrine Management Corp. ("CMC"). On February 8, 2007, CMC changed its name to Tyco International Management Company ("TIMCO"). On June 29, 2007 TIL was separated into three unrelated publically traded companies. TIMCO converted on August 13, 2010, from a Nevada corporation to a Nevada limited liability company. TIMCO's new legal name is Tyco International Management Company, LLC ("TIMCO LLC" or "Plan Sponsor" or "Tyco") and TIMCO LLC is currently the Plan Sponsor of the Plan.

The Company is part of a controlled group of entities with TIMCO LLC.

Funding Policy

The Company's funding policy is to make all required contributions to the pension plan in accordance with applicable pension laws and regulations. Additional voluntary contributions (in excess of required minimum amounts) are periodically considered based on their individual merits. No Company contributions were necessary during 2009 in order meet the minimum funding requirements under Internal Revenue Service regulations. The Company's contributions for 2008 met the minimum funding requirements under Internal Revenue Service regulations.

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA.

Pension Benefits

Participants are entitled to annual pension benefits beginning at normal retirement age of 65 based on the participant's calculated balance which consists of the following:

- 1) Opening balance credit for benefits earned through December 31, 1988.
- 2) Annual transition credits for active participants on January 1, 1989 credited through 1998; Annual transition credits for active participants on January 1, 2002 credited through 2006. Transition credits are equal to a percentage of compensation based on age and years of benefit service as of December 31, 1988 and December 31, 2001, respectively.
- 3) Annual credits equal to a percentage of compensation based on age and years of benefit service.
- 4) Annual interest credits based on one-year United States Treasury Bill yields (not less than 6% or more than 11%).

The Plan permits early retirement at age 55 and 10 years of vesting service. Retirement benefits are normally paid in equal monthly installments for life to unmarried employees and on a reduced basis 50% for married participants with the reduced benefit paid to the designated beneficiary for life.

Participants may elect the following:

- a) An unreduced benefit payable for his/her lifetime only.
- b) A percentage (100%, 75%, 66-2/3% or 50%) of the reduced benefit continued to a designated beneficiary for life.
- c) A reduced benefit for life with a guarantee that no less than 120 payments will be made.
- d) A temporarily increased benefit, followed by a decrease, which, when added to Social Security payments, provides a reasonably constant total lifetime benefit.

Vesting

Accrued benefits vest at the earlier of: normal retirement age, completion of five years of vesting service; three years after January 1, 2008, or complete or partial plan termination. Effective January 1, 2008, a participant will need to complete three years of service to be 100 % vested.

Disability and Death Benefits

Participants who terminate employment due to total and permanent disability or spouses of vested participants who die may be entitled to receive benefits under this Plan.

Administrative Expenses

Insurance premiums, trustee service charges, audit fees, investment related fees and certain administrative and actuarial fees are paid by the Plan. All other expenses associated with the administration of the Plan are paid by the Company.

Plan Administration

The Plan has an Administrative Committee and an Investment Committee. The Administrative Committee acts in the capacities of Plan administrator and Plan fiduciary. The Investment Committee acts in the capacity of Plan fiduciary. At least three persons of each committee are appointed by the Board of Directors of TIMCO LLC. The Investment Committee appoints the investment managers to manage the assets of the Tyco Master Trust (the "Master Trust").

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable, or would have been payable, during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC"), a U.S. government agency, up to the applicable limitations.
3. All other vested benefits; that is, vested benefits not insured by the PBGC.
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan's sponsor and the level of benefits guaranteed by the PBGC.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Actuarial Valuation Method and Assumptions

Independent actuaries are employed by the Company to determine the Plan's required contributions, present value of accumulated benefits, and prior service costs using the traditional unit credit cost method. The significant actuarial assumptions including mortality, salary increases, and investment returns, used by the independent actuaries are summarized as follows:

Investment Return Rate:	8.04% Effective interest rate based on the IRS November 2008 full yield curve.
Retirement:	Weighted Average Age 64
Mortality:	2009 PPA separate static annuitant and non-annuitant mortality table

Certain actuary assumptions discussed above have changed since the January 1, 2008 valuation. The actuarial assumptions used in the January 1, 2008 valuation were: a) the investment return rate was 5.31% for the first 5 years, 5.90% for the next 15 years, and 6.41% for the years thereafter, b) the mortality table was the 2008 PPA separate static annuitant and non-annuitant mortality tables.

The affects of these changes are included in footnote 3 under the caption Change in actuarial assumptions.

Basis of Accounting

The financial statements of the Plan are presented on the accrual basis of accounting.

Recently Issued Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board ("FASB") issued guidance that emphasizes that even if there has been a significant decrease in the volume and level of activity, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not forced liquidation or distressed sale) between participants at the measurement date under current market conditions. The guidance provides a number of factors to consider when evaluating whether there has been a significant decreases in volume and level of activity for an asset or liability in relation to normal market activity. In addition, when transactions or quoted prices are not considered orderly, adjustments to those prices based on the weight of available information may be needed to determine the appropriate fair value. The guidance also requires increased disclosures. This guidance is effective for annual reporting periods ending after June 15, 2009, and shall be applied prospectively. The impact of adoption of this guidance was not material to the Plan's net assets available for benefits or statement of changes in net assets available for benefits.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The investment in the Master Trust is shown at estimated fair value since no quoted market price for this investment is available. The fair value of the Plan's interest in the Master Trust is based on the beginning of the year value of the Plan's interest in the Master Trust plus actual contributions and allocated net investment income or loss less actual distributions and allocated administrative expenses. Net investment income or loss and certain administrative expenses are allocated to the individual plans based upon the ratio of the plans holdings in the Master Trust of the prior month end.

Other significant accounting policies include: investment transactions are recorded on the trade date, gains or losses on sales of investments are recorded as the difference between proceeds and cost, cost is determined on a specific identification basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

FASB guidance defines fair value as the price that would be received by the Plan for an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. FASB guidance establishes a fair value hierarchy which requires the Plan to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy places the highest priority on unadjusted quoted market prices in active markets for identical assets or liabilities (level 1 measurements) and gives the lowest priority to unobservable inputs (level 3 measurements). The three levels of inputs within the fair value hierarchy are defined as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Plan has the ability to access as of the measurement date.

Simplex Time Recorder Pension Plan
Notes to Financial Statements
December 31, 2009

Investment Valuation and Income Recognition (Continued)

Level 2: Significant other observable inputs other than level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect the Plan's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

In some cases, a valuation technique used to measure fair value may include inputs from multiple levels of the fair value hierarchy. The lowest level of significant input determines the placement of the entire fair value measurement in the hierarchy.

The fair values of the underlying investments of the Master Trust are determined as follows:

Interest bearing cash is primarily invested in a money market mutual fund. The fair value is determined by obtaining quoted prices on nationally recognized securities exchange.

103-12 investment entities: The underlying assets in this pooled investment are valued individually by the custodian except that income and expenses are valued on the accrual basis. The value of the underlying assets are net of any expenses, charges, or other liabilities incurred or accrued by the pooled fund in accordance with procedures consistently followed and uniformly applied. The net value of the pooled fund assets are divided by the total number of units of the pooled fund in existence as of the relevant valuation date. The values are supported by actual redemption prices.

Common stocks: Prices obtained from readily available sources. Most securities trade on active markets and the last trade or official close is used for valuation. Securities that trade thinly are valued either nominally, using the bid or ask, or the mean of bid or ask.

Common collective trusts are valued based on their net asset values, as reported by custodians of the common collective trusts and as supported by actual redemption prices.

Corporate bonds: The majority of this balance represents more than 200 corporate high yield and investment grade credit bonds ("Corporate credits"), as well as Asset Backed Securities ("ABS"). The Corporate credits are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. ABS, are generally valued using matrix pricing through recognized financial models utilized by the investment manager and the custodian that incorporate other observable inputs such as cash flow, security structure, or market information, when there is no broker/dealer quote available.

Partnership/joint venture interests are valued by the custodian based on the underlying assets which includes publicly traded common stock, commercial paper, futures, foreign exchange forwards and money market funds. Redemption value is based on current ownership percentage at the end of the calendar month. Redemption frequency is on a monthly basis, upon 15 days notice of sale.

U.S. government securities: These are direct obligations of the U.S. government or its agencies. These securities are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. This category also includes mortgage backed securities ("MBS") issued by U.S. government agencies that may utilize models, such as a single cash flow model, that incorporate data on interest rate movements, pass-thru securities markets, bid evaluations, and other pertinent data.

Simplex Time Recorder Pension Plan
Notes to Financial Statements
December 31, 2009

Investment Valuation and Income Recognition (Continued)

Registered investment companies are valued by obtaining quoted prices on nationally recognized securities exchanges.

Other investments: Includes swap, municipal bond, non-U.S. government bonds, and sundry assets which are valued by third party pricing sources obtained by the custodian which may utilize models that incorporate pertinent data to determine pricing and non-U.S. sovereign debt securities, where the custodian will utilize available broker/dealer quotes.

The methods above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results may differ from those estimates.

Federal Income Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated December 12, 2002, that the Plan and related trust are designed in compliance with applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes is required.

Subsequent Events

The Plan Sponsor has evaluated subsequent events through the time it issued its financial statements on October 11, 2010.

5. INVESTMENT IN THE MASTER TRUST

As of December 31, 2009 and 2008 the Plan's sole investment is in the Master Trust, which was established for the investment of assets of the Plan and several other TIMCO LLC and affiliated companies' sponsored retirement plans. The assets of the Master Trust are held by its trustee, The Northern Trust Company, for the years ended December 31, 2009 and 2008. Each participating retirement plan has an undivided interest in the assets of the Master Trust except for any other securities, which, if applicable, are identifiable with individual plans. The Plan's interest in the net assets of the Master Trust is approximately 39% and 38% at December 31, 2009 and 2008, respectively.

The Master Trust engaged in security lending. The Master Trust discontinued its security lending during 2009. The collateral pledged and securities on loan were \$29,612,669 and \$29,126,823 at December 31, 2008.

(1) This fund has an investment objective of exceeding the return of the broad non-U.S. equity market as defined by the MSCI All Country World Index excluding the U.S. equity market.

(2) This is a fund whose objective is to exceed the return of the U.S. corporate bonds and mortgage backed securities sectors in the Barclays Aggregate Bond index.

(3) These are two passive index funds whose objectives are to track the returns of the Russell 1000 and Russell 1000 Value U.S. equity indices, respectively.

7. RISKS & UNCERTAINTIES

The Master Trust invests in a highly diversified portfolio of investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the use of estimates and the assumption setting process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
