Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Methods

Actuarial cost method

For minimum required and maximum contribution purposes:

The Funding Target is the present value of accrued benefits (frozen as of December 31, 2006) and based on service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year. The Target Normal Cost is equal to \$0 since the plan was frozen as of December 31, 2007.

Asset valuation method

For minimum required and maximum contribution purposes: Smoothed Asset Value over 2 year period.

The Valuation Assets are determined using a method that spreads asset gains/(losses) over 2 years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. Accrued contributions, if any, are included in the Valuation Assets.
