Independent Auditors' Report

To the Plan Administrator of Lau (Dayton) Hourly Employees' Pension Plan:

We were engaged to audit the accompanying statements of net assets available for benefits of the Lau (Dayton) Hourly Employees' Pension Plan (the "Plan") as of December 31, 2009 and 2008, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 5, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of December 31, 2009 and 2008, and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information in the Plan's financial statements that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Lau (Dayton) Hourly Employees' Pension Plan

Notes to Financial Statements

1. DESCRIPTION OF THE PLAN

The following description of the Lau (Dayton) Hourly Employees' Pension Plan (the "Plan") is provided for general information purposes only. Participants and all others should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan covering substantially all hourly employees who are members of the collective bargaining unit at the Dayton, Ohio, plant of Lau Industries, a wholly owned subsidiary of Tomkins Industries, Inc. (the "Company"). The plant employing all members of the Plan was closed November 30, 2005. There will be no new entrants into the Plan and no additional service or vesting will be earned by participants. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The Tomkins North American Retirement Board (the "Plan Administrator") administers the Plan. The Plan Administrator has full power, authority, and responsibility to control and manage the operation and administration of the Plan. The Northern Trust Company ("Northern Trust" or "Trustee") was appointed by the Plan Administrator as trustee for certain qualified defined benefit pension plans for the Company and Tomkins Industries, Inc. ("Tomkins"). A single trust agreement, The Tomkins US Master Trust ("Master Trust") Agreement, governs the assets of the plans from Tomkins, the Company and their affiliates, (collectively, the "Participating Plans").

Eligibility

Each employee as described above was eligible to enter the Plan upon meeting the eligibility requirements of one full year of service and at least 12 months had passed since their first hour of service.

Vesting

Full vesting occurs when a participant has five years of credited service, attains age 65, retires as a result of disability or dies.

Forfeitures

Non-vested amounts attributable to terminated participants are forfeited and shall be used to reduce the contributions from the Company.

1. DESCRIPTION OF THE PLAN (CONTINUED)

Pension Benefits

After five years of continuous service, participants are entitled to monthly payments for life beginning at the normal retirement age of 65. Participants may elect to receive their benefit in the form of a life annuity or one of three joint-and-survivor annuity options. After attaining age 60 and 15 years of service, participants may also elect early retirement with reduced benefits.

Monthly life annuity benefits under the Plan are based on an employee's years of credited service (maximum of 40 years) multiplied by an amount stipulated in the collective bargaining agreement as follows:

Date of Retirement or Termination	Benefit Rate	
	Hired Prior to July 1, 1986	Hired on or After July 1, 1986
Certain other rates applied prior to July 1, 1999		
July 1, 1999 – June 30, 2000	\$ 13.50	\$ 8.00
July 1, 2000 – June 30, 2001	14.25	8.75
July 1, 2001 – June 30, 2002	15.00	9.50
July 1, 2002 – June 30, 2003	15.50	10.00
July 1, 2003 – June 30, 2006	16.00	10.50
July 1, 2006 – June 30, 2007	16.00	11.50
July 1, 2007 – Forward	16.00	12.50

Internal Revenue Service ("IRS") regulations allow qualified plans to distribute to previously terminated participants, without their consent, the present value of any accrued benefit up to \$1,000. With a participant's consent, the present value of any accrued benefit of up to \$5,000 can be distributed.

Death and Disability Benefits

In the event of a participant's death after five years of continuous service, the beneficiary of the participant will receive the survivor portion of the joint-and-survivor benefit. This would provide the beneficiary with a percentage of the participant's earned monthly benefit depending on the option selected.

Participants who have attained 15 or more years of service are eligible for retirement benefits if they become permanently disabled while they are employed.

1. DESCRIPTION OF THE PLAN (CONTINUED)

Tax Status

The IRS has determined and informed the Company by a letter dated April 21, 2004, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since the receipt of this letter; however, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, they believe that the Plan is qualified and the related trust is tax exempt; thus, no provision for income taxes is included in the accompanying financial statements. The Company filed a Determination Letter Application with the IRS on January 31, 2008 for the Plan. This request for determination is still pending with the IRS.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared using the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires plan management to make estimates and assumptions that affect the accompanying financial statements and accompanying notes. The most significant of these estimates relates to the determination of the accumulated plan benefits and the funded status of the Plan. Actual results could differ from those estimates.

The Master Trust includes certain investments whose fair values have been estimated by the Trustee in absence of readily determinable values. The information used to value these assets was the most current at the time of the valuation, and differences from the estimated value will be reported in future periods. See Note 6, *Interest in Tomkins US Master Trust* and Note 7, *Fair Value Measurements*, for further disclosure regarding investment valuation and fair value measurements.

New Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board ("FASB") issued guidance under ASC 105, *Generally Accepted Accounting Principles*. This guidance establishes the FASB Accounting Standards Codification ("ASC" or the "Codification") as the single source of authoritative GAAP for nongovernmental entities, superseding various existing authoritative accounting pronouncements.

Lau (Dayton) Hourly Employees' Pension Plan

Notes to Financial Statements

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

New Accounting Pronouncements (Continued)

The Codification establishes one level of authoritative GAAP. All other literature is considered non-authoritative. There were no changes to the Plan's financial statements due to the implementation of the Codification other than changes in reference to various authoritative accounting pronouncements in the financial statements.

In March 2008, the FASB amended disclosure requirements for derivative instruments and hedging activities. This guidance was later codified in ASC 815-10-50. The new guidance requires enhanced disclosures about an entity's derivative and hedging activities to improve the transparency of financial reporting. The Plan adopted the new guidance as of January 1, 2009, which increased the Plan's disclosures but did not have a material impact on the Plan's financial statements.

In April 2009, the FASB issued guidance under ASC 820, *Fair Value Measurement and Disclosures*. This guidance emphasizes that the objective of a fair value measurement does not change even when market activity for the asset or liability has decreased significantly. Fair value is the price that would be received for an asset sold or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. When observable transactions or quoted prices are not considered orderly, then little, if any, weight should be assigned to the indication of the asset or liability's fair value. Adjustments to those transactions or prices should be applied to determine the appropriate fair value. The standard also requires increased disclosures. The impact of adoption of this standard was not material to the Plan's financial statements and was adopted prospectively.

In September 2009, the FASB issued ASC Update 2009-12, *Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. This guidance provides a practical expedient for measuring the fair values of Plan investments in a limited number of entities that calculate a net asset value per share (such as hedge funds, private equity funds, funds of funds, and certain collective trusts, and pooled separate accounts). This guidance also provides enhanced disclosure requirements and it became effective for Plan reporting periods ending after December 15, 2009. The adoption did not have a material impact on the Plan's financial statements.

Lau (Dayton) Hourly Employees' Pension Plan

Notes to Financial Statements

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

New Accounting Pronouncements (Continued)

In January 2010, the FASB issued ASC Update 2010-06, *Fair Value Measurements and Disclosures* (Topic 820): *Improving Disclosures about Fair Value Measurements*. This guidance requires the reporting entity to disclose additional information on transfers in and out of fair value levels, measurement disclosures by classes of assets and descriptions of valuation techniques and inputs used to measure fair value (both recurring and nonrecurring fair value) in addition to other disclosures. This guidance is effective for reporting periods beginning after December 15, 2009, except for certain disclosures which will be effective for fiscal years beginning after December 15, 2010. Management does not expect that the adoption will have a material impact on the Plan's financial statements.

In May 2009, the FASB issued ASC 855, *Subsequent Events*, which was updated in February 2010 by ASC Update 2010-09: *Amendments to Certain Recognition and Disclosure Requirements*. This guidance establishes general standards of accounting and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. In particular, the guidance sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. The adoption of the guidance is effective immediately and is reflected in Note 10, *Subsequent Events*, to the financial statements.

Investment Valuation

The investment in the Master Trust in the accompanying financial statements represents the Plan's share of the Master Trust's net assets, which are valued at fair value. The Plan's share of the income (loss), net appreciation (depreciation) in fair value of investments and expenses of the Master Trust represents the Plan's allocation of these items from the Master Trust. See Note 6, *Interest in Tomkins US Master Trust* and Note 7, *Fair Value Measurements* for the investment valuation policies of the Master Trust.

Lau (Dayton) Hourly Employees' Pension Plan

Notes to Financial Statements

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Concentration of Investments and Risks and Uncertainties

The Plan provides for various investments through the Master Trust. Investment securities, in general, are subject to various risks, such as interest rate, credit and overall market volatility risk. Additionally, the value, liquidity and related income of the investment securities are sensitive to changes in the economic conditions, including changes in real estate values, delinquencies or defaults, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Certain investments (such as insurance company pooled separate accounts and some common collective trusts) may be less liquid and include restrictions on their sale. Forced liquidation, although not expected at this time, may affect the estimated value of such investments. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of such investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits and the funded status of the Plan.

As of December 31, 2009, approximately 68% of the Master Trust net assets were invested in the NTGI Russell 3000 Fund – Non-Lending (“Russell 3000”). A significant decline in the market value of the Russell 3000 would significantly affect the Master Trust net assets. See Note 7, *Fair Value Measurements*, for a description of the underlying assets of the Russell 3000. The Master Trust is also a significant investor in the Russell 3000.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the amounts reported in the financial statements and accompanying notes.

The Pension Protection Act of 2006, as amended by the Worker, Retiree and Employer Recovery Act of 2008, imposes certain benefit restrictions for qualified defined benefit plans that do not meet certain funding thresholds. Collectively bargained plans have a delayed effective date for application of the benefit restriction rules which is generally the earlier of (i) the end of an agreement ratified before January 1, 2008 and (ii) January 1, 2010. A plan's funded percentage is referred to as the Adjusted Funding Target Attainment Percentage (AFTAP). The 2009 AFTAP for the Plan is 116.92%. Because the Plan's AFTAP equals or exceeds 80%, the Plan is not subject to any benefit restrictions.

Lau (Dayton) Hourly Employees' Pension Plan

Notes to Financial Statements

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Administrative Expenses and Investment Management Fees

The Plan's operating, investment and administrative expenses are generally paid as provided for in the Plan document. Expenses for trustee fees and investment management fees are generally allocated; however, other fees such as actuarial, auditing and legal fees are specifically identified and charged to the Participating Plans. Other administrative functions are performed by employees of the Company or its subsidiaries at no cost to the Plan. All other costs not paid by the Plan are paid by the Company.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

3. FUNDING POLICY

The Company's policy is to make contributions to meet the minimum funding requirements under IRC 412. The contributions for 2009 and 2008, as detailed in the actuary's valuation reports, met the minimum funding requirements of ERISA and the IRC.

4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to employees or their beneficiaries upon retirement, death, disability, or termination. Benefits payable under all circumstances noted above are included in the computation of the actuarial present value of accumulated plan benefits to the extent they are deemed attributable to employee service rendered to the freeze date (if applicable) or valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of benefit payments (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The effect of any Plan amendments on accumulated Plan benefits is recognized during the year in which such amendments become effective.

Lau (Dayton) Hourly Employees' Pension Plan

Notes to Financial Statements

4. ACCUMULATED PLAN BENEFITS (CONTINUED)

The significant actuarial assumptions used in the January 1, 2009 actuarial valuation are as follows:

Mortality	UP94 Mortality Table for males and females projected eight years
Discount rate	8.00% per annum, compounded annually
Form of payment	Straight-life annuity
Retirement age	Various probabilities from age 55 to 65 Age 65 with 5 years of service, or attained age if later, or Age 60 with 30 years of service, or attained age, if later, or Age 60 and completion of at least 15 years of continuous service

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as determined by the actuary as of December 31, 2008 is as follows:

Vested benefits:	
Participants currently receiving benefits	\$ 1,487,929
Other participants	538,972
Actuarial present value of accumulated plan benefits	\$ 2,026,901

The changes in the actuarial present value of the Plan's accumulated plan benefits for the year ended December 31, 2008, are as follows:

Actuarial present value of accumulated plan benefits – January 1, 2008	\$ 2,080,728
Increase (decrease) during the year attributed to:	
Actual benefits paid	(195,801)
Decrease in the discount period	158,626
Actuarial gain	(16,652)
Net decrease	(53,827)
Actuarial present value of accumulated plan benefits – December 31, 2008	\$ 2,026,901

5. INFORMATION CERTIFIED BY THE TRUSTEE

The Plan Administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. The following is a summary of the unaudited information regarding the Plan as of December 31, 2009 and 2008, and for the years then ended. This information was included in the Plan's financial statements that was prepared by or derived from information prepared by Northern Trust and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the Trustee that such information is complete and accurate.

	2009	2008
Statements of Net Assets Available for Benefits:		
Investment in the Tomkins US Master Trust	\$ 2,175,676	\$ 2,201,233
Statements of Changes in Net Assets Available for Benefits:		
Plan's interest in net investment income (loss) of the Tomkins US Master Trust	\$ 98,315	\$ (101,859)
All investment balances and investment information included in Notes 6 and 7.		

The Plan's independent auditors did not perform any auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements.

6. INTEREST IN TOMKINS US MASTER TRUST (UNAUDITED)

The Plan Administrator implemented the Tomkins Master Trust Statement of Investment Policy, (the "Investment Policy"), a single investment policy that applies to all Participating Plans. Investments are managed under agreements by which the investment managers have been given the authority to make individual investment decisions within the guidelines stated in the Investment Policy. Therefore, the Plan's portion of the net income (loss), net appreciation (depreciation) in fair value of investments and expenses of the Master Trust are determined on a pro-rata basis and measured monthly.

The Plan had interests of approximately 0.48% and 0.47% in the Master Trust's net assets as of December 31, 2009 and 2008, respectively. Such interests are included in the accompanying Statements of Net Assets Available for Benefits. In compliance with the Department of Labor's reporting requirements, the net change in value from participation in the Master Trust is reported as a single line item in the accompanying Statements of Changes in Net Assets Available for Benefits.

Master Trust Valuation of Investments and Income Recognition

All Master Trust investments are recorded at fair value as further described in Note 7, *Fair Value Measurements*, and include U.S. Government securities, insurance company pooled separate accounts, a limited partnership, common/collective trusts, insurance company general accounts and interest rate swap contracts.

The change in net appreciation (depreciation) consists of both realized and unrealized gains and losses. Interest rate swaps are marked to market daily based on quotations from market makers, and the change, if any, is recorded as an unrealized gain or loss in the changes in the Master Trust net assets.

6. INTEREST IN TOMKINS US MASTER TRUST (UNAUDITED) (CONTINUED)

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date.

Derivative Financial Instruments, Interest Rate Swaps and Other

The Master Trust may enter into fixed income interest rate swaps. Swap agreements involve the exchange by the Master Trust with a counter-party of their respective commitments to pay or receive interest (e.g., an exchange of fixed rate payments for floating rate payments) with respect to a notional amount of principal. The Master Trust carries the fair value of the swap as an asset or liability in the Master Trust's net assets. Market risk of loss is limited to the changes in fair value from December 31 of each year presented, through the applicable expiration date. Swap agreements involve elements of credit market risk or risk if the counter-party is unable to meet the terms of the contracts. Due to the nature of the Master Trust's investments, the Company does not believe credit risk is significant.

The following table provides a quantitative summary of derivative activity as of and for the years ended December 31, 2009 and 2008:

<i>Derivative Instruments</i>	Plan Year	Notional/ Contractual Amount ^(b)	Assets ^(a)	Liabilities ^(a)
Interest rate swaps	2009	\$ 315,400,000	\$ 796,934	\$ (31,743,114)
Interest rate swaps	2008	\$ 335,100,000	\$ 11,004,280	\$ (12,748,400)

(a) Reported in investments at fair value held in the Master Trust as included in the investment in the Tomkins US Master Trust on the Statements of Net Assets Available for Benefits.

(b) Notional amounts do not quantify risk or represent assets or liabilities of the Master Trust or Plan, but are used in the calculation of cash settlements under the contract.

6. INTEREST IN TOMKINS US MASTER TRUST (UNAUDITED) (CONTINUED)

In addition, as a result of the Master Trust's participation in certain common/collective trusts and insurance company pooled separate accounts, those trusts may be invested from time to time in derivative financial instruments as defined and allowed by the bylaws of each of the respective funds. Financial exposure to the Master Trust is limited to its proportional interest in these funds.

The Master Trust has investments in insurance company pooled separate accounts and insurance company general accounts pursuant to certain guaranteed annuity contracts with various insurance companies. These contracts contain certain minimum balance requirements and certain restrictions on termination of the contracts. The minimum balance requirements were met as of December 31, 2009 and 2008. The Company does not intend to terminate these contracts at this time.

7. FAIR VALUE MEASUREMENTS

ASC 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described as follows:

- **Level 1:** Quoted prices in active markets for identical assets or liabilities. The assets of the Master Trust that fall within Level 1 are U.S. Government securities which consist mainly of U.S. Treasury bonds.
- **Level 2:** Observable inputs other than Level 1 prices such as quoted prices for similar assets; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets. The assets of the Master Trust that fall within Level 2 include common/collective trusts, a limited partnership, and interest rate swap contracts.
- **Level 3:** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets. Level 3 assets include items where the determination of fair value requires significant management judgment or estimation. The assets of the Master Trust that fall within Level 3 include insurance company general accounts and pooled separate accounts.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

7. FAIR VALUE MEASUREMENTS (CONTINUED)

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

U.S. Government Securities: U.S. government securities are stated at fair value based on multiple pricing services, based on a bid evaluation process using observable, market-based inputs effective the last day of the plan year or last reported sale or bid date if no sale took place on the last business day of the year.

Insurance Company Pooled Separate Accounts (PSAs): PSAs are valued at the net asset value as determined by the PSA's designated accountants. Net asset value is calculated based on the fair value of the underlying investments, which are generally traded in an active market.

Common/Collective Trusts (CCTs): The investments include an equity index fund and a short-term investment fund. The equity index funds' primary objective is to approximate the risk and return characterized by the Russell 3000 Index. This index is commonly used to represent the broad U.S. equity market. The fund provides for daily redemptions at the reported unit value with one day advance notice requirement. CCTs are valued daily based on the fair values of the underlying investments in the CCT, which are generally traded in an active market and which represent the net asset value of the units held by the Plan at year end. The Master Trust was permitted to redeem investment units at net asset value as of the measurement date.

The units of the short-term investment fund are valued at the total value of the underlying investments less any liabilities divided by the outstanding units. The investment strategy is to maintain a \$1 unit value. The fund transacted at the \$1 unit value as of the measurement date.

Insurance Company General Accounts: These investments are valued at fair value based on the contractual agreement between the Plan and the insurance company and typically include consideration of contractual interest rates, current interest rates and duration of the contract. There can be restrictions on the sale of such investments based on the terms of the contract.

Interest Rate Swap Contracts: The interest rate swap contracts are valued at fair value as determined by Northern Trust based on various comparative pricing services and the fair value represents the amount the Master Trust would receive or pay to terminate the agreement as of the measurement date.

Limited Partnership: The investment in the limited partnership is valued at estimated fair value at the measurement date of the plan year as determined by the general partner or fund administrator. This investment was liquidated in 2009.

7. FAIR VALUE MEASUREMENTS (CONTINUED)

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Master Trust's investments measured on a recurring basis as of December 31, 2009:

	Level 1	Level 2	Level 3	Total
U.S. Government securities ⁽¹⁾	\$ 152,363,272	\$ -	\$ -	\$ 152,363,272

The breakdown of investments included in the fixed income portfolio is as follows: 93% of the portfolio was invested in U.S. Treasury Bonds, 6% of the portfolio was invested in debt of U.S. Agencies, and 1% of the portfolio was in cash or other assets.

(2) The following represents investments in the Northern Trust Global Investments Russell 3000 Non-Lending Fund. The breakdown of investments included in the fund is as follows: 65% of the fund is invested in U.S. large cap companies, 25% of the fund is invested in U.S. mid-cap companies, and 10% of the fund is invested in U.S. small cap companies.

The following table sets forth by level, within the fair value hierarchy, the Master Trust's investments measured on a recurring basis as of December 31, 2008:

8. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right, under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, the assets of the Plan will be allocated to Plan participants and beneficiaries in accordance with applicable provisions of ERISA and the Plan document. Should unfunded vested benefits exist, such benefits will be provided up to specified limitations as described in ERISA and by the Pension Benefit Guaranty Corporation (the "PBGC").

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Additional information regarding the priority of participants' claims to the assets of the Plan upon termination and benefits guaranteed by the PBGC is available from the Plan Administrator.

9. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

The Short Term Cash Account and the Northern Trust Global Investments Collective Daily Russell 3000 Fund, which are included in the investments within the Master Trust, are managed by Northern Trust, the trustee. Certain expenses related to audit, custody, asset management and actuarial services are paid from Plan assets. These transactions qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules.

10. SUBSEQUENT EVENTS

On July 27, 2010, the Board of Pinafore Acquisitions Limited ("Pinafore"), a consortium of Onex Corporation and the Canadian Pension Plan Investment Board, and the Independent Directors of Tomkins plc announced they had reached an agreement on the terms of a recommended cash acquisition of the entire issued and to be issued share capital of Tomkins plc by Pinafore (the "Acquisition"). Tomkins plc shareholders voted in favor of the Acquisition on August 31, 2010. The Acquisition was completed on September 30, 2010. No changes have been made to the Plan as a result of the Acquisition.

The Plan Administrator has evaluated subsequent events through October 8, 2010, which is the date the financial statements were available to be issued.

Schedule SB, Line 25 Change in Method as of January 1, 2009

The three-segment yield curve with a 24-month average as of the September prior to the valuation year has been changed to the full yield curve as of the October prior to the valuation year. The actuarial value of assets method has been changed from the fair market value of assets to the average market value of assets as established by the Worker, Retiree, and Employer Recovery Act (WRERA) of 2008. Plan expenses are included in the target normal cost. Previously, plan expenses were excluded. A change in funding method under § 430 resulted from a change in valuation software. This change is automatically approved per Announcement 2010-3 as the conditions outlined in said announcement are satisfied.

Schedule SB, Part V - Statement of Actuarial Assumptions and Methods

Asset Method

Under this method, the actuarial value of assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.38%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.09%.

Participant Data

Participant data were supplied by the client as of the valuation date.

Tax Policy

The actuarial valuation performed for the plan year ending December 31, 2009 is used to determine the maximum deductible contribution for the tax year ending January 2, 2010.

Schedule SB, Part V - Statement of Actuarial Assumptions and Methods

Nature of Actuarial Calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are rounded to the nearest .01% (e.g., 81.58%) to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Changes in Assumptions and Methods Since Last Actuarial Valuation

The three-segment yield curve with a 24-month average as of the September prior to the valuation year has been changed to the full yield curve as of the October prior to the valuation year. The actuarial value of assets method has been changed from the fair market value of assets to the average market value of assets as established by the Worker, Retiree, and Employer Recovery Act (WRERA) of 2008. Plan expenses are included in the target normal cost. Previously, plan expenses were excluded. A change in funding method under § 430 resulted from a change in valuation software. This change is automatically approved per Announcement 2010-3 as the conditions outlined in said announcement are satisfied.

Vesting

Eligibility: A participant is 100% vested when he has completed at least 5 years of Continuous Service or attainment of his Normal Retirement Date while employed. All active participants were considered fully vested at the time of the plant closure in September 2005.

Benefit: A monthly retirement income commencing at his Normal Retirement Date equal to his accrued retirement income. For participants with at least 15 years of Continuous Service, the benefit may begin as early as age 60 reduced same as for Early Retirement described above.

Disability

Eligibility: Total and permanent disability as determined by the Committee after the completion of 15 years of Continuous Service.

Benefit: The accrued normal retirement benefit based on Credited Service as of date of disability, payable during continuance of disability until Normal Retirement Date.

Normal Form of Payment

A monthly pension payable for life with all payments ceasing on the participant's death.

Pre-Retirement Spouse's Benefit

Eligibility: Death after 5 years of Continuous Service, provided the employee has been married to his current spouse for at least one year.

Benefit: The surviving spouse will receive the benefit she would have received if the participant had retired on the day before his death or, if later, at the earliest possible retirement age based on his years of Continuous Service at death, and had elected a 50% Joint and Survivor option.

Form of Payment

An employee may elect to receive his benefit on a straight-life basis, an actuarially equivalent 50% Joint and Survivor basis or any other available payment form. Unless otherwise elected, any benefit payable under the plan shall be paid:

- a. on a 50% Joint and Survivor basis, if the employee has been married to his current spouse for at least one year; or
- b. on a straight-life basis otherwise.

Asset Method

Under this method, the actuarial value of assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.38%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.00%, and the applicable limitation for the plan year, equal to 6.09%.

Participant Data

Participant data were supplied by the client as of the valuation date.

Tax Policy

The actuarial valuation performed for the plan year ending December 31, 2009 is used to determine the maximum deductible contribution for the tax year ending January 2, 2010.
