1. DESCRIPTION OF PLAN:

The following description of The Ohio Heart and Vascular Center, Inc. Profit Sharing Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Ohio Heart and Vascular Center, Inc. Profit Sharing Plan was established January 1, 1996, for the purpose of providing retirement benefits to employees of the Company who have attained the age of 21 years and completed one full year of service. The Plan is a defined contribution plan and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Termination of the Plan

By action of its Board of Directors, on December 18, 2008 Ohio Heart and Vascular Center, Inc. terminated the Plan effective December 31, 2008. As of December 1, 2008, all affected participants became 100% vested in their account balances. As of December 31, 2009, all balances had been distributed.

Contributions

Prior to termination, each year, participants could contribute a percentage of pretax annual compensation, subject to certain limitations and as defined by the Plan. Participants who had attained age 50 before the end of the plan year were eligible to make catch-up contributions. Participants could also contribute amounts representing distributions from other qualified defined benefit or contribution plans. There were no contributions in 2009.

Prior to termination, the Company could contribute a qualified matching amount in its sole judgment. There were no contributions in 2009.

Participant accounts

Each participant's account was credited with the participant's contribution and allocations of (a) the Company's contributions and (b) Plan earnings. Each account was charged with an allocation of administrative expenses. Allocations were based on participant earnings or account balances, as defined. The benefit to which a participant was entitled was the benefit that could be provided from the participant's vested account.

Vesting

Effective December 1, 2008, with the termination of the Plan, all affected participants are 100% vested. Prior to December 1, 2008, participants were immediately vested in their voluntary contributions plus actual earnings thereon. Vesting in the Company's matching and discretionary contributions plus actual earnings thereon was based on years of continuous service, in which a participant became 100 percent vested after six years of credited service. The Plan defined 'one year of service' as a 12 month period in which the employee works 1,000 hours of service. Forfeitures arising under the Plan were either reallocated to eligible participants or were used to reduce employer contributions for such plan year.

Payment of benefits

On termination of service due to death, disability or retirement, a participant could elect to receive either a lump sum payment, periodic payments, single life annuity or a qualified joint and fifty percent survivor

annuity. For termination of service due to other reasons, a participant could receive the value of the vested interest in his or her account as a lump sum distribution. Benefits are recorded when paid.

Forfeited accounts
At December 31, 2009 and 2008, forfeited nonvested employer contributions totaled $0 and $54,305, respectively. Approximately $97,000 of additional forfeitures occurred in 2009. These amounts were reallocated equally among participants in 2009.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of accounting
The financial statements of the Plan are prepared under the liquidation basis of accounting.

Investment valuation and income recognition
Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

The change in the unrealized difference between cost and fair value of investments held was reflected in the statement of changes in net assets available for benefits as net appreciation in fair value of investments. Gains and losses on dispositions of investments are recognized at the time of disposition with the amount of gain or loss determined on a specific identification basis.

Purchases and sales of securities were recorded on a trade date basis. Dividends were recorded on the ex-dividend date.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invested in investment contracts through a collective trust. Contract value for this collective trust was based on the net asset value of the fund as reported by the investment advisor. As required by the professional standards, the statement of net assets available for benefits at December 31, 2008 presented the fair value of the investment in the collective trust as well as the adjustment of the respective fully benefit-responsive investments from fair value to contract value.

Administrative expenses
A portion of the administrative expenses of the Plan were absorbed by the Company.

3. INVESTMENTS:

The Plan provides for participant directed investment programs for individual participants. Investments of employee contributions and related Company contributions can be made into various funds in accordance with each participant's election. Fund balances that represent 5 percent or more of the Plan's net assets at December 31, 2009 and 2008 are as follows:

	$ 3,403,470

4. FAIR VALUE MEASUREMENTS:

Generally accepted accounting principles establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below.

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 — Inputs to the valuation methodology include: 1. Quoted prices for similar assets or liabilities in active markets; 2. Quoted prices for identical or similar assets or liabilities in inactive markets; 3. Inputs other that quoted prices that are observable for the asset or liability; 4. Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Money Market/Cash: The carrying value approximates fair value.

Mutual Funds: Valued at the net asset value ("NAV") of shares held by the plan at year end.

Common/Collective Trust: The fair value of the investments in common/collective trusts are determined by the fund trustee based on the fair value of the underlying securities within the fund, which represent the net asset value of the shares held by the Plan at year-end.

Self Directed Brokerage: Valued on the underling net asset value of investments held by the plan at year end. Underling net assets include cash, mutual funds, common stocks, corporate bonds and government obligations. Common stocks, corporate bonds and U.S government securities are valued at the closing price reported on the active market on which the individual securities are traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2009.
