Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report of Independent Auditors

The Goodrich Corporation
Benefit Design and Administration Committee
Goodrich Corporation Wage Employees' Pension Plan

We were engaged to audit the accompanying statements of net assets available for benefits of the Goodrich Corporation Wage Employees' Pension Plan as of December 31, 2009 and 2008, and the related statement of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 5, which was certified by the Bank of New York Mellon, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2009 and 2008, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements

December 31, 2009

1. Significant Accounting Policies

Basis of Accounting

The financial statements of the Goodrich Corporation Wage Employees' Pension Plan (Plan) are prepared on the accrual basis.

New Accounting Guidance Adopted in 2009

The Accounting Standards Codification (ASC) has become the source of authoritative United States generally accepted accounting principles (U.S. GAAP). ASC changed the referencing of financial accounting standards and did not change or alter existing U.S. GAAP.

The Plan adopted a new accounting standard included in ASC 855, *Subsequent Events*, which requires the Plan to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the statement of net assets available for benefits. Plan management has evaluated subsequent events through October 12, 2010, the date these financial statements were issued.

The Plan adopted a new accounting standard included in ASC 815, *Derivatives and Hedging*, which requires enhanced disclosures about its derivatives and hedging activities in order to improve the transparency of financial reporting. See the *Derivatives* section under "Valuation of Investments."

The Plan adopted a new accounting standard included in ASC 860, *Transfers and Servicing*, which requires enhanced disclosures about its continuing involvement with transferred financial assets. See Note 9, Securities Lending.

The Plan adopted a new accounting standard included in ASC 820, *Fair Value Measurements and Disclosures*, which allows entities to use net asset value (NAV) per share (or its equivalent), as a practical expedient, to measure fair value when the investment does not have a readily determinable fair value and the NAV is calculated in a manner consistent with investment company accounting. The Plan utilized this practical expedient to measure the fair value of commingled funds, real estate and the securities lending collateral fund and provided additional disclosures regarding the nature and risks of investments within the scope of this guidance. See the "Valuation of Investments" section of this Note and Note 9, Securities Lending, for these disclosures. This standard did not have a material effect on the Plan's net assets available for benefits or its changes in net assets available for benefits.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

1. Significant Accounting Policies (continued)

The Plan adopted a new accounting standard included in ASC 820 which provides additional guidance on estimating fair value when the volume and level of activity for an asset or liability have significantly decreased in relation to its normal market activity. This standard also provided guidance on defining major categories of debt and equity securities to comply with the disclosure requirements of ASC 820. Adoption did not have a material effect on the Plan's net assets available for benefits or its changes in net assets available for benefits.

New Accounting Guidance Not Yet Adopted

In January 2010, new accounting guidance was issued to amend ASC 820, *Fair Value Measurements and Disclosure*. This guidance requires certain new disclosure requirements and amends certain existing disclosure requirements. It is effective for the first reporting period beginning after December 15, 2009. Upon adoption, Plan management will include the additional disclosures to comply with this standard.

Valuation of Investments

The Plan's investments are held by The Goodrich Corporation Master Trust for Qualified Employee Benefit Plans (Master Trust), a master investment trust administered by The Bank of New York Mellon (Trustee). Participation units of the Master Trust are stated at the underlying fair value of the trust investments.

The assets of the Plan are measured at fair value. The Company defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The following three levels of inputs are used to measure fair value:

Level 1 – quoted prices in active markets for identical assets and liabilities.

Level 2 – observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 – unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

1. Significant Accounting Policies (continued)

The Plan's assets as of December 31, 2009 have been classified as Level 1, Level 2, or Level 3 within the fair value hierarchy. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Fair values are principally determined using a market approach based on quoted prices or other relevant information from observable market transactions involving identical or comparable assets. When market prices are not available, fair values are estimated using an income approach to discount future cash flows combined with observable market inputs for similar assets with comparable terms and credit quality. Following is a description of the various classes of Plan assets categorized by the methods and inputs used for valuing them.

Common Stock and Real Estate Investment Trusts (REITs) – Level 1

These are individual equities traded on an open market where quoted prices are determinable and available. The investments are valued using a market approach primarily based on prices obtained from the primary or secondary exchanges on which they are traded.

United States Treasuries – Level 1

U.S. Treasury bonds, bills and STRIPS are valued using a market approach primarily based on prices obtained from the primary or secondary exchanges on which they are traded.

Derivatives – Level 2

Derivatives are related to futures and forward contracts used to manage a portion of the interest rate and currency exposure. Futures contracts are held within the fixed income portfolios to manage the interest rate exposure in the Master Trust and are designed to offset 30% to 60% of the effects of interest rate changes on the Plan's funded status. Forward contracts are held within the international and Global Tactical Asset Allocation (GTAA) portfolios to manage the currency exposure in the Master Trust and to add value to total return related to investments in international securities denominated in currencies other than the U.S. dollar. No individual currency exposure can be targeted at a net short position. The maximum net exposure to any one of the major currencies is not permitted to exceed the percentage weight of that currency in the benchmark plus 25% and any non-major currency is not permitted to exceed the percentage weight of that currency in the benchmark plus 15%.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

1. Significant Accounting Policies (continued)

The derivative financial instruments are valued using a market approach based on prices obtained from primary or secondary exchanges for exchange-traded derivatives or using proprietary pricing models which incorporate observable inputs including volatility, index levels, interest rates, yield curves, prepayment speeds, default rates and other market-corroborated inputs.

Commingled Funds (Applicable to Money Market, Equity and Fixed Income Investments) – Level 2

The commingled funds are institutional investment instruments valued at the fair value of the ownership interests in the funds. The NAV per unit (provided by the fund administrator) is the primary input into the valuation of the ownership interest. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities, divided by the number of shares outstanding. Commingled investment funds generally are leveled based upon the observability of the prices or inputs used to value the underlying portfolio instruments, which are money market, U.S. and international equity, and fixed income securities. These instruments are valued using a market approach with either unadjusted quotes in active markets (Level 1) or quoted prices for similar assets or other observable inputs (Level 2). The Company is required to classify these assets according to the lowest level used in their valuation, which accordingly classifies them within Level 2. In addition to the NAV, consideration is given to any specific rights or obligations that pertain to investments in the commingled investment fund, which if deemed significant, may adjust the fair value of the ownership interest and result in a lower, less observable fair value hierarchy level. There are no significant specific rights or obligations pertaining to these commingled funds that require an adjustment to the fair value.

A portion of the assets are invested in a global tactical asset allocation (GTAA) fund. The GTAA is a specialized commingled fund which utilizes a variety of daily valued funds to tactically gain exposure to certain U.S. and international equity and fixed income markets. For reporting classes, the component investments of the GTAA are separated into the equity or fixed income commingled fund classifications, as applicable.

Withdrawals from the commingled funds can be made daily with a two-day advance written request. Certain of the Plan's commingled investments, which represented approximately 4.3% of the Master Trust assets at December 31, 2009, were in a fund that had imposed a 4% per month withdrawal limitation in March 2009 due to liquidity and valuation issues around

1. Significant Accounting Policies (continued)

investors' interests in the securities lending cash collateral pool held by the fund. This limitation did not impact the Plans' ability to generate sufficient liquidity to service ongoing needs from other Plan investments. The Company systematically moved assets out of the restricted fund to a non-securities lending fund with no withdrawal limitations and completed the transition in August 2010.

Government, Corporate and Asset-Backed Obligations – Level 2

Individual fixed income securities, primarily government, corporate and asset and mortgage backed obligations, are valued either (1) based on market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, including consideration of yield or price of securities of comparable quality, coupon, maturity and type or (2) based on quotes from bankers, brokers, dealers or other qualified appraisers. Fair value is within a "bid-ask spread" and is considered to be the price at which the security would be exited. These investments are valued principally using a market approach, which may include matrix pricing to value securities on quoted prices combined with their relationships to other benchmark quoted securities and indices. Certain securities may be valued using an income approach based on cash flows and observable inputs such as discount rates, industry research reports, the value of underlying assets or guarantees and issue structure.

Securities Lending Collateral Fund – Level 2

The Company participates in a securities lending program which uses a money market commingled fund as the collateral fund which is invested in liquid assets of investment grade companies. The entire collateral fund is valued using a NAV derived from the fair value of the underlying securities. Please see above discussion in Commingled Funds.

Real Estate – Level 3

The assets are two institutional real estate commingled funds valued using the NAV. The underlying assets are valued using unobservable inputs from the fund manager principally annual third party appraisals based on market, income or cost valuation techniques. Unobservable inputs would include prices of sales of similar properties, estimates of operating income, discount rates and estimates of reproduction or replacements costs.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

1. Significant Accounting Policies (continued)

Withdrawals from the two real estate funds can be made once per quarter, subject to available cash, upon a 45-day advance written request. To the extent that redemption requests exceed available cash, distributions are pro rated based on the fair market value of participants' relative interests in the total net asset value of the funds as of the valuation date prior to that quarter's redemptions. During 2009, the Plan was subject to a redemption queue; however, this did not impact its ability to generate sufficient liquidity to service ongoing needs from other Plan investments. As of September 25, 2010, there was no remaining redemption queue.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 4) are those estimated future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to services rendered by covered employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on the employees' cumulative benefit service. The accumulated plan benefits for active employees are based on their accumulated service and average compensation, where applicable, preceding the valuation date. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

2. Description of the Plan

The Plan is a defined benefit plan that covers most of the unionized employees of the Goodrich Corporation (Company or Plan Sponsor) and certain of its subsidiaries and provides for retirement and death benefits. The Plan also covers the non-union hourly employees at two of the Company's locations. The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan participants.

The Company has the right under the Plan to discontinue such contributions at any time and terminate the Plan. In the event of a termination of the Plan, the net assets of the Plan will be distributed to the participants based on priorities established by the Employee Retirement Income Security Act of 1974 (ERISA), as amended. Generally, the net assets would be set aside first for the payment of vested benefits and then for the payment of accrued but nonvested benefits.

To the extent that assets were not available to pay these benefits, distributions would be made on a pro-rata basis; however, the Pension Benefit Guaranty Corporation (PBGC) guarantees the payment of all nonforfeitable basic benefits, subject to certain limitations prescribed by ERISA. Any amount of Plan assets remaining after the payment of all vested and nonvested benefits would be returned to the Company.

Additional information about the Plan, the vesting and benefit provisions provided by the Plan, and the PBGC's benefit guarantee is contained in the Summary Plan Description and Plan documents. Copies of these documents are available from the Company's human resource department.

3. Funding Policy

The Company's funding policy is to contribute amounts at least sufficient to satisfy regulatory funding standards but which do not exceed the maximum tax deductible contribution limit. Effective January 1, 2008, the Pension Protection Act of 2006 (PPA) amended ERISA and significantly changed the rules used to determine minimum funding requirements for qualified defined benefit pension plans in the United States. The funding targets contained in the law are generally consistent with the Company's internal targets. The Plan's funding objectives include avoidance of benefit restrictions under the PPA and at-risk status designation of the Plan.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

3. Funding Policy (continued)

Under the PPA, minimum funding requirements require an employer contribution to the Plan sufficient to fund the Plan's target normal cost and a seven year amortization of the funding shortfall. As of January 1, 2009, the Company's independent actuaries have certified the Plan's Adjusted Funding Target Attainment Percent (AFTAP) which was above the 94% threshold established by the PPA for 2009 to be exempt from the funding shortfall amortization component of the minimum funding requirement. The Plan has met minimum funding requirements prescribed by ERISA, as amended.

Effective with the January 1, 2008 valuation, the actuarial cost method used to calculate the funding target and target normal cost is the present value of accrued benefits, as required by the PPA. As required by the PPA effective with the January 1, 2009 valuation, expenses of \$1.3 million were included in target normal cost.

4. Accumulated Plan Benefits

The Company's independent actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The actuarial calculations were made using the accrued benefit cost method.

The accumulated plan benefit information for the Plan as of December 31, 2008, is as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefits	\$ 295,372,798
---	----------------

Other participants	<u>188,131,029</u>
--------------------	--------------------

Total vested benefits	483,503,827
-----------------------	-------------

Nonvested benefits	<u>1,817,304</u>
--------------------	------------------

Total accumulated plan benefits	<u><u>\$ 485,321,131</u></u>
---------------------------------	------------------------------

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

4. Accumulated Plan Benefits (continued)

The change in the actuarial present value of accumulated plan benefits during 2008 is accounted for as follows:

Actuarial present value, December 31, 2007	\$ 463,564,265
Increase due to:	
Benefits Accumulated	5,337,636
Decrease in discount period	39,963,400
Assumptions changes	12,178,772
Plan amendments	11,429,822
Decrease due to:	
Experience gains	(7,240,017)
Benefits paid	(39,912,747)
Actuarial present value, December 31, 2008	<u>\$ 485,321,131</u>

Significant assumptions underlying the actuarial computations were as follows:

Interest rate	8.75% net of expense
Mortality basis:	
Healthy	RP 2000 Healthy Combined Mortality with projections using Scale AA phased out by 2015
Disabled	1944 RRB Male Ultimate Disabled Mortality Table
Retirement	Rates varying by age

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The increase in accumulated plan benefits from assumption changes was due primarily to (1) the change in interest rate from 9.00% to 8.75% to reflect long-term return expectations and (2) the benefit commencement date for 40% of the deferred vested participants entitled to unreduced benefits at age 62 has been accelerated from age 65. All others remain assumed to commence at age 65 to reflect experience. The change in the accumulated plan benefits from Plan amendments was due primarily to updated negotiated benefit levels for wage employees.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

5. Investments

The Plan's investments are held by the Master Trust in a bank-administered trust fund which was established for the investment of assets of the Plan and other retirement plans sponsored by the Company. The Plan's investments are presented at fair value. Please see Note 1 "Valuation of Investments" for discussion of the methodologies and assumptions used to determine the fair value of the Plan's investments. All investment information disclosed in the accompanying financial statements and notes including investments held at December 31, 2009 and 2008, and net appreciation/depreciation in fair value of investments, interest and dividends for the years ended December 31, 2009 and 2008, was obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by the Trustee.

As of December 31, 2009 and 2008, the investment in the Master Trust represents the Plan's proportionate interest in the assets of the Master Trust. The Plan's investment in the Master Trust represented 24.8% and 24.6% of the total net assets of the Master Trust at December 31, 2009 and 2008, respectively. The interest and dividend income from investments and the net realized and unrealized appreciation or depreciation in fair value of investments in the Master Trust were allocated to the participating plans based upon their percentage interests in the Master Trust.

6. Income Tax Status

The Plan has received a determination letter from the IRS dated July 17, 2002, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related Master Trust (see Note 5) is exempt from taxation. Subsequent to this determination by the Internal Revenue Service, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Benefit Design and Administration Committee and the Benefit Plan Asset Committee of the Plan Sponsor believe the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believe that the Plan, as amended, is qualified and the related Master Trust is tax-exempt.

7. Transactions with Parties-in-Interest

Certain legal and administrative expenses are paid by the Company. Administrative fees relating to accounting, actuarial, benefits administration and investment advisory services are paid by the Plan. In addition, the Plan pays certain legal fees related to the Plan design and administration. Other than as described above or pursuant to a certain trust agreement (see Notes 1 and 5), the Plan does not have agreements or transactions with parties-in-interest.

8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

9. Securities Lending

In April 2006, the Master Trust entered into a securities lending agreement which authorizes the Trustee to engage in the lending of certain Master Trust assets. Securities lending is an investment management strategy that utilizes the existing securities (government bonds, corporate bonds or equities) of the Master Trust to earn additional income by loaning securities to a select group of approved broker-dealers. In return for the loaned securities, the Trustee simultaneously receives collateral in the form of cash or United States Treasury bills as a safeguard against possible default of any borrower on the return of the loan. Each security lending transaction is collateralized by a margin requirement, as specified in the terms of the securities borrowing agreements, from a minimum of 102% to a maximum of 105% of the fair value of the securities loaned plus accrued interest. The collateral is marked-to-market on a daily basis to maintain the margin requirement.

Goodrich Corporation Wage Employees' Pension Plan

Notes to Financial Statements (continued)

9. Securities Lending (continued)

During 2008, certain investments in the collateral fund of the Master Trust became impaired due to the bankruptcy of the issuer of the investments. The value of these securities will not be known until the bankruptcy proceedings are concluded. However, the Trustee entered into support agreements with the investors, including the Master Trust that segregated these assets from the rest of the collateral fund and created floor values for the valuation of these impaired investments. The impaired assets are valued using the greater of the average of the street broker quotes or the support agreement of 80%. The unrealized loss in the collateral fund related to these companies at December 31, 2009 and 2008, is \$672,636.

At December 31, 2009 and 2008, the Master Trust had securities on loan of \$28,878,152 and \$57,067,073, respectively, and debtors provided the Trustee with cash collateral totaling \$29,757,156 and \$59,165,967, respectively. Cash received by the Trustee is invested in money market securities by the Master Trust and accordingly, recorded at fair value in the financial statements with a corresponding obligation to repay the collateral in accordance with the securities borrowing agreements. There was no noncash collateral provided to the Master Trust at December 31, 2009 or 2008. The income earned by the Master Trust under the securities lending program with the Trustee in 2009 and 2008 was \$110,743 and \$1,225,814, respectively.

Certain of the Plan's commingled investments also participate in securities lending activities on terms similar to those of the Master Trust securities lending agreement. One of those investments imposed withdrawal limitations during 2009 due to liquidity and valuation issues around investors' interests in the securities lending cash collateral pool held by the fund (see Note 1, Commingled Funds (Applicable to Money Market, Equity and Fixed Income Investments) – Level 2).

Percentage married 60%

Spouse Age Wives three years younger than husbands.

Actuarial Methods

Contributions:

- ▶ Valuation date First day of plan year
- ▶ Funding target Present value of accrued benefit.
- ▶ Target normal cost Present value of plan benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets.
- ▶ Actuarial value of assets Average of fair market value of assets on valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings. The average asset value must be within 10% of fair value, including contributions receivable.

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension protection Act of 2006 (PPA). These rules produce smoothed value that reflect the underlying market value of plan assets but fluctuate less than market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Valued

All benefits were valued except for benefits payable in the event of future reduction in force or plan shutdowns, the potential refund of employee contributions with interest upon death before retirement. For benefit provision with staggered effective dates, benefit level in effect at December 31, 2009 is recognized for funding.

Change in Assumptions and Methods Since Prior Valuation

Contributions

The funding interest rate was changed from the full corporate bond yield curve based on average rates during the month prior to the valuation date (December), to the full corporate bond yield curve based on average rates for the third month prior to the valuation date (October), as provided under the Pension Protection Act of 2006 (PPA).

The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements to comply with PPA requirements.

The actuarial value of assets method was changed from fair market value to “smoothing” average of market value of assets as of January 1, 2009 and the prior two valuation dates.

Assumed administrative expenses of \$1.3 million were added to the target normal cost

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

Data Sources

Towers Perrin used asset data supplied by the trustee. Goodrich Corporation, through its third party administrator, furnished participant data as of the valuation date. Data was reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Perrin actuaries, with Goodrich approval, when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

vested benefit	of termination payable at age 65. However, the employee may elect to commence benefits after reaching age 60 and before age 65, in which event his monthly benefit would be reduced as for early retirement.
Death with pre-retirement spouse benefits	If an employee dies after attaining age 60 with ten years of benefit service, his spouse receives the spouse benefit assuming the employee had retired early and elected the 50% joint and survivor option the day before his death. If an employee dies before age 60, the benefit is calculated as if the employee terminated his employment on his date of death, survived to his earliest retirement date and elected the 50% joint and survivor option. Benefit is not paid before employee would have been age 60.
Normal form of payment	Life annuity if the participant has no spouse as of the date payments begin. If married, benefits are paid in the form of a 50% joint and survivor annuity.
Optional form of payment	Life annuity or 50% joint and survivor annuity. Actuarial equivalence for optional forms uses 1994 GAM (75% male/25% female) for participant mortality and 25% male/75% female for joint annuitant mortality, and an interest rate of 6%.
Maximum on benefits	All benefits for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code.

Schedule SB, line 25 - Change in Method

- The funding interest rate was changed from the full corporate bond yield curve based on average rates during the month prior to the valuation date (December), to the full corporate bond yield curve based on average rates for the third month prior to the valuation date (October), as provided under the Pension Protection Act of 2006 (PPA).
- The actuarial value of assets method was changed from fair market value to "smoothing" average of market value of assets as of January 1, 2009 and the prior two valuation dates.
- Assumed administrative expenses of \$1.3 million were added to the target normal cost
- The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
