Report of Independent Auditors

To the Participants and Administrator of
Retirement Plan for Certain Hourly
Employees of Anheuser-Busch, Inc.

In our opinion, the accompanying statement of net assets available for benefits and the related statement of changes in net assets available for benefits present fairly, in all material respects, the net assets available for benefits of Retirement Plan for Certain Hourly Employees of Anheuser-Busch, Inc. (the "Plan") at December 31, 2009, and the changes in net assets available for benefits for the year ended December 31, 2009, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 ("ERISA"), the Plan administration instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4 which was certified by State Street, the trustee of the Plan, except for comparing such information with the related information included in the December 31, 2008 financial statements. Our report, dated October 14, 2009 indicated that (a) because of the significance of the information that we did not audit, we were unable to, and did not, express an opinion on the financial statements taken as a whole and (b) the form and content of the information included in the financial statements other than that derived from the information certified by the Trustee, were presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

1. Description of the Plan

The following brief description of the Retirement Plan for Certain Hourly Employees of Anheuser-Busch, Inc. (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

Purpose of the Plan

The Plan is a defined benefit plan that provides normal retirement, early retirement, disability and death benefits to eligible hourly-paid employees at covered operations of the participating employers who have completed one year of service and who are not covered by a collective bargaining agreement under which the participating employers are required to make contributions to another retirement plan. Participating and former employers include Anheuser-Busch, Inc. (the Company), Golden Eagle Distributing Company, August A. Busch & Co. of Massachusetts, and Eagle Snacks, Inc. The Plan was established on January 1, 1989. Employees do not contribute to the Plan.

The Plan is subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Plan Administration

The Plan Administrator is the Company. State Street Bank and Trust Company (Trustee) as sole trustee of the Plan, holds all Plan assets and is responsible for benefit payments from the trust fund according to information submitted by the Plan Administrator.

Plan Benefits

Under the Plan's provisions, each participant who retires at age 65 (normal retirement) is entitled to a Unit of Monthly Pension multiplied by the participant's period of credited service, in years and completed fractions thereof, up to a maximum of 35 years (30 years for participants at the New Orleans Wholesale Operation of Anheuser-Busch, Inc.; no maximum for Operating Engineers of the Columbus, Ohio Brewery). Credited service is equal to the period of each participant's continuous, uninterrupted employment as an eligible hourly employee at a covered operation of a participating employer, as specified by the Plan. Covered employees are eligible to participate on the first day of the month coincident with or following the completion of one year of service.

Vesting service is used in determining eligibility for early retirement and disability benefits. A year of vesting service is earned for each calendar year during which an individual completes at least one thousand hours of service. Participants become fully vested after five years of vesting service.

Effective January 1, 2009, the Plan adopted interest rate and mortality assumptions as required by the Pension Protection Act of 2006.

Benefits for eligible individuals at covered operations are determined in accordance with the provisions of the Plan document.

Expenses of the Plan

Under the Anheuser-Busch Companies Master Trust (Master Trust) agreement with the Trustee, the Company may pay all expenses incurred in the administration of the Plan, including trustee fees, but is not obligated to do so. Trustee expenses not paid by the Company are paid by the Master Trust and proportionately allocated to participating plans. All other expenses are paid by the Plan.

Plan Termination
The Company anticipates the Plan will continue without interruption but reserves the right to discontinue its participation in the Plan. In the event that such discontinuance results in termination of the Plan, the Plan provides that the net assets will be allocated among the participants and beneficiaries of the Plan in the order of preference and in the manner outlined in the Plan Document. To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (PBGC) to participants, up to specified limitations. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

2. Summary of Significant Accounting Policies

Basis of Accounting
The Plan's financial statements are prepared on the accrual basis of accounting with the exception of benefit payments, which are recorded when paid.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation and Income Recognition
The assets of the Plan are invested in the Master Trust along with the assets of certain other retirement plans sponsored by the Company. The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for a discussion of fair value measurements.

Investments in collective investment funds are valued at net asset value. Short-term investments are valued at cost, which approximates fair value.

Income from investments is recorded as earned. Purchases and sales of investments, and related realized gains and losses, are accounted for on the trade date.

In accordance with the policy of stating investments at fair value, the Plan presents, in the Statement of Changes in Net Assets Available for Benefits, the Plan interest in Master Trust investment income/loss, which consists of earned income (net of asset management fees), realized gains or losses and the unrealized appreciation or depreciation on the underlying investments in the Master Trust.

Risks and Uncertainties
Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the Statement of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Allocation of Assets

The Plan participates in the Master Trust. The method of allocation utilized by the Plan is Equitable Share Accounting (ESA). ESA values each plan's participation in the Master Trust based on a percentage of the fair value of total Master Trust assets. ESA determines this applicable percentage using a weighted average based on cash flows of each individual plan. Earned income and realized and unrealized gains or losses are retained in the Master Trust and are allocated to participating plans by the Trustee, based on ESA.

3. Funding Policy

Pension contributions are funded by the Company. Annually, an independent actuary performs a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value of assets. The Plan has met the minimum funding requirements of ERISA, as determined by the independent actuary for the Plan years ended December 31, 2009 and 2008.

4. Summary of Financial Information and Data Certified by Trustee

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan administrator has accepted the certification by the Trustee as to the accuracy and completeness of the investment information and has instructed the Plan's independent auditors not to perform audit procedures with respect to the given information for the year ended December 31, 2008.

The following is a summary of Plan financial information and data certified by the Trustee as of December 31, 2008 and for the year then ended:

- The fair value of the Master Trust investments as of December 31, 2008 is included in Note 6 and the Plan's interest in the Master Trust as of December 31, 2008 is included in the Statement of Net Assets Available for Benefits.

- Investment income (loss) for the Master Trust for the year ended December 31, 2008 included in Note 6 and the Plan's interest in Master Trust investment income (loss) for the year ended December 31, 2008 is included in the Statement of Changes in Net Assets Available for Benefits.

The financial information related to the assets and earnings of the Master Trust and the Plan's interest in the Master Trust has been audited by the Plan's independent auditors as of and for the year ended December 31, 2009.

5. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on an employee's credited service. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

The accumulated plan benefit obligation is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. Significant actuarial assumptions used in the valuation as of January 1, 2009 are as follows:

- Mortality - According to the RP-2000 Mortality Tables for males and females, with blue collar adjustment, projected to 2005 using Scale AA.
- Assumed rate of return (discount rate) - 7.5% per annum as of December 31, 2009 and 2008.
- Retirement - According to a graded retirement schedule based on years of service and age.
- Actuarial Cost Method - Traditional unit credit

The foregoing actuarial assumptions were based on the assumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Set forth below is the actuarial present value of accumulated plan benefits as of January 1, 2009, and the changes in accumulated plan benefits for the year then ended:

Accumulated Plan Benefits

Actuarial present value of accumulated plan benefits	
Vested benefits	
Retired participants and beneficiaries currently receiving payments	$ 7,311,712
Other participants	5,796,567
Total vested benefits	13,108,279
Nonvested benefits	530,270
Total actuarial present value of accumulated plan benefits	$13,638,549

Changes in Accumulated Plan Benefits

Actuarial present value of accumulated plan benefits at January 1, 2008	$12,528,378
Increase (decrease) during the year attributable to	
Benefits accumulated	317,761
Actuarial losses	893,741
Decrease in the discount period	930,424
Benefits paid	(880,967)
Plan amendments (see Note 1)	308,716
Change in actuarial assumptions	(459,504)
Actuarial present value of accumulated plan benefits at January 1, 2009	$13,638,549

The decrease in the Plan's deficiency of net assets compared to benefit obligations during the year ended December 31, 2009 relates to the favorable investment performance of Plan assets. The Plan has been and will continue to be funded in compliance with ERISA requirements and income tax regulations.

6. Interest in Anheuser-Busch Companies Master Trust

At December 31, 2009 and 2008, the Plan's interest in the investments of the Master Trust was approximately 1.2% and 1.1%, respectively.

The following table presents the fair values of investments in the Master Trust at December 31, 2009 and 2008:

	2009	2008
Investments, at fair value		
Common/collective trusts	$ 914,661,642	$ 814,342,070
Short-term investments	13,933,468	163,114,102
	928,595,110	977,456,172
Interest receivable	-	21,436
	$ 928,595,110	$ 977,477,608

Investment income (loss) of the Master Trust is as follows for the years ended December 31, 2009 and 2008:

	2009	2008
Net appreciation (depreciation)		
Common/collective trusts	$ 161,795,723	$ (509,287,255)
Corporate debt	-	(378,162)
U.S. Government securities	-	(24,568)
Real estate	(810,205)	(423,582)
Interest-bearing cash	-	300
Foreign currency exchange contracts and other investments	-	95,197
	160,985,518	(510,018,070)
Interest and dividends	288,063	1,180,940
Net investment income (loss)	$ 161,273,581	$ (508,837,130)

The Master Trust follows accounting rules that provide a framework for measuring fair value for all assets and liabilities that are measured and reported at fair value. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk or the risks inherent in the inputs to the valuation, were used in the valuation process. Inputs to valuation can be readily observable, market corroborated, or unobservable. Valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs were used. That framework also establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. All financial assets and liabilities carried at fair value were classified in one of the following three hierarchy levels:

Level 1 Inputs based on quoted prices in active markets for identical assets or liabilities that the Master Trust has the ability to access at the reporting date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability; and
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs to the valuation methodology that is unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Common/Collective Trusts
Common collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror indices such as Standard & Poor's 500 Index, Russell Small & Large Cup Indices, MSCI EAFE Index, and MSCI Emerging Markets Index.

The fair values of participation units held in the common/collective trusts are based on the net asset value (NAV) after adjustments to reflect all fund investments at fair value. The common/collective trust funds generally permit redemptions daily. Certain common/collective trusts held by the Plan only allow redemptions on a weekly or bi-weekly basis. The fair values of the Plan's interest in the common/collective trusts are based on quoted market prices in active markets and securities and contracts are valued using observable inputs. The Master Trust is permitted to redeem investment units at NAV on the measurement date, and as a result, the investment is classified as a Level 2 asset in the fair value hierarchy.

Short-Term Investments
Short-term investments are considered to be cash equivalents due to their shortmaturities, and are valued at cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth, by level within the fair value hierarchy, assets measured at fair value on a recurring basis as of December 31, 2009 and 2008:

	December 31, 2009

The SSGA Provisional ACWI ex US Fund had a market value of $147,993,659 and $133,623,883 at December 31, 2009 and 2008, respectively. In 2009, the Master Trust purchased a total of $239,528,120 and sold $268,131,062 of the fund. During 2008, the Master Trust purchased a total of $547,987,582 and sold $409,584,587 of the fund.

8. Income Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated November 21, 2003, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code. Therefore, the underlying trust of such a Plan is exempt from federal income taxes under Section 501 of the Internal Revenue Code. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

9. Subsequent Events

Management has evaluated subsequent events through October 13, 2010, the date which the financial statements were available to be issued.

Effective April 1, 2010, the Plan is subject to certain restrictions relating to the payment of accelerated benefit payments. These restrictions resulted from the Plan falling below certain funding levels as required by the Pension Protection Act of 2006.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 22
Description of Weighted Average Retirement Age
as of January 1, 2009

See Schedule SB Attachments – Part V – Statement of Actuarial Assumptions and Methods for retirement rates. The average retirement age for Line 22 was calculated by determining the average age at retirement for those current active participants expected to reach retirement, based on all current decrements assumed.

Supplemental Portability Benefit Assumption

- No decrements other than mortality and retirement
- Retirement at the average retirement age of the participant's original defined benefit plan
- Growth of the Defined Contribution account balances at 7.50%
- Defined Contribution account balances converted to annuities using whichever following set of assumptions that produces the higher annuity factor:
    - the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
    - the funding valuation interest rate assumption and PPA unisex combined mortality for 2009

Form of payment

Participants are assumed to elect the normal form.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

It was assumed that there will be no new or rehired employees.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS
SCHEDULE SB, LINE 24 – CHANGE IN ACTUARIAL ASSUMPTIONS
SCHEDULE SB, LINE 25 – CHANGE IN METHOD

Asset method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.38%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.09%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Participant data

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by State Street.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2009 is used to determine the maximum deductible contribution for the tax year ending December 31, 2009.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants. Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under this plan. Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event over the lifetime would be 5%, the number who would receive the offer would be 10-15 employees, and the resulting liability impact would be deminimis.

PBGC Premium Funding Target

The Alternative Premium Funding Target was determined using the assumptions described above.

At-Risk Calculations

Calculations of at-risk liability and normal cost reflect the statutory required assumptions regarding retirement or termination of employment. In addition, for at-risk calculations, the normal form of payment was assumed to be the most valuable option under the plan. For certain eligible portability participants, the lump sum form of payment was assumed to be the most valuable option. All of assumptions for at-risk calculations reflect the regular valuation assumptions.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are rounded to the nearest .01% to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS
SCHEDULE SB, LINE 24 – CHANGE IN ACTUARIAL ASSUMPTIONS
SCHEDULE SB, LINE 25 – CHANGE IN METHOD

Changes in assumptions and methods since last actuarial valuation

Other than the prescribed changes in mortality and plan-related expenses, the following assumptions and methods have changed since last year:

1. The discount rate assumption was changed from the 3-segment rates (applicable month of September, no transition) to the October 2008 full yield curve. Approval for this change is not required by the IRS.

2. The asset method was changed from market value of assets to the asset method described above. Approval for this change is not required by the IRS.

3. The assumption used to convert defined contribution account balances to annuities for the Supplemental Portability benefit has changed from the RR2001-62 Mortality table and 5.00% interest to using whichever following set of assumptions that produces the higher annuity factor:
    - the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
    - the funding valuation interest rate assumption and PPA unisex combined mortality for 2009

    Approval for this change is not required by the IRS.

4. The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

Asset method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.38%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.09%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by State Street.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2009 is used to determine the maximum deductible contribution for the tax year ending December 31, 2009.

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants. Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under this plan. Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event over the lifetime would be 5%, the number who would receive the offer would be 10-15 employees, and the resulting liability impact would be deminimis.

PBGC Premium Funding Target

The Alternative Premium Funding Target was determined using the assumptions described above.

At-Risk Calculations

Calculations of at-risk liability and normal cost reflect the statutory required assumptions regarding retirement or termination of employment. In addition, for at-risk calculations, the normal form of payment was assumed to be the most valuable option under the plan. For certain eligible portability participants, the lump sum form of payment was assumed to be the most valuable option. All of assumptions for at-risk calculations reflect the regular valuation assumptions.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. Changes in assumptions and methods since last actuarial valuation

Other than the prescribed changes in mortality and plan-related expenses, the following assumptions and methods have changed since last year:

1. The discount rate assumption was changed from the 3-segment rates (applicable month of September, no transition) to the October 2008 full yield curve. Approval for this change is not required by the IRS.

2. The asset method was changed from market value of assets to the asset method described above. Approval for this change is not required by the IRS.

3. The assumption used to convert defined contribution account balances to annuities for the Supplemental Portability benefit has changed from the RR2001-62 Mortality table and 5.00% interest to using whichever following set of assumptions that produces the higher annuity factor:
    - the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
    - the funding valuation interest rate assumption and PPA unisex combined mortality for 2009

    Approval for this change is not required by the IRS.

4. The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

Plan Name	Retirement Plan for Certain Hourly Employees of Anheuser-Busch, Inc.
Valuation Date	January 1, 2009
Enrolled Actuary	James J. Holloman
Enrollment Number	08-06456

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Inclusion date

The valuation date coincident with or next following the date on which the employee becomes a participant.

Plan-related expenses

The average of actual expenses paid over the last three years (net of PBGC variable rate premiums) plus the expected 2009 PBGC variable rate premium. The amount included this year for plan-related expenses is $108,473.

Mortality

For non-disabled participants, the prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants.

Disabled Mortality

For disabled participants: mortality in accordance with Revenue Ruling 96-7.

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire are shown below.

Supplemental Portability Benefit Assumption

- No decrements other than mortality and retirement
- Retirement at the average retirement age of the participant's original defined benefit plan
- Growth of the Defined Contribution account balances at 7.50%
- Defined Contribution account balances converted to annuities using whichever following set of assumptions that produces the higher annuity factor:
    - the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
    - the funding valuation interest rate assumption and PPA unisex combined mortality for 2009

Form of payment

Participants are assumed to elect the normal form.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

It was assumed that there will be no new or rehired employees.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS
SCHEDULE SB, LINE 24 – CHANGE IN ACTUARIAL ASSUMPTIONS
SCHEDULE SB, LINE 25 – CHANGE IN METHOD

Asset method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.38%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.38%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 7.50%, and the applicable limitation for the plan year, equal to 6.09%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Participant data

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by State Street.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2009 is used to determine the maximum deductible contribution for the tax year ending December 31, 2009.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants. Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under this plan. Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event over the lifetime would be 5%, the number who would receive the offer would be 10-15 employees, and the resulting liability impact would be deminimis.

PBGC Premium Funding Target

The Alternative Premium Funding Target was determined using the assumptions described above.

At-Risk Calculations

Calculations of at-risk liability and normal cost reflect the statutory required assumptions regarding retirement or termination of employment. In addition, for at-risk calculations, the normal form of payment was assumed to be the most valuable option under the plan. For certain eligible portability participants, the lump sum form of payment was assumed to be the most valuable option. All of assumptions for at-risk calculations reflect the regular valuation assumptions.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are rounded to the nearest .01% to be consistent with the rounding specified for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS
SCHEDULE SB, LINE 24 – CHANGE IN ACTUARIAL ASSUMPTIONS
SCHEDULE SB, LINE 25 – CHANGE IN METHOD

Changes in assumptions and methods since last actuarial valuation

Other than the prescribed changes in mortality and plan-related expenses, the following assumptions and methods have changed since last year:

1. The discount rate assumption was changed from the 3-segment rates (applicable month of September, no transition) to the October 2008 full yield curve. Approval for this change is not required by the IRS.

2. The asset method was changed from market value of assets to the asset method described above. Approval for this change is not required by the IRS.

3. The assumption used to convert defined contribution account balances to annuities for the Supplemental Portability benefit has changed from the RR2001-62 Mortality table and 5.00% interest to using whichever following set of assumptions that produces the higher annuity factor:
   - the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
   - the funding valuation interest rate assumption and PPA unisex combined mortality for 2009

   Approval for this change is not required by the IRS.

4. The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

Normal Form of Benefit: Life Only.

Optional Forms of Benefit: 10 years certain, 50% joint and survivor, and 75% joint and survivor. In addition, certain portability participants can receive a one sum or a 10 years certain form of payment.

Late Retirement

If retirement occurs after the normal retirement date, the late retirement income will be equal to the normal retirement benefit calculated using credited service as of the late retirement date, offset by the actuarial equivalent value of any retirement payments received.

Early Retirement Benefit

Eligibility:	Columbus and Merrimack: Age 55 and 10 years of vesting service. Louisville: Age 55 and 10 years of vesting service, or at any age with 30 years of vesting service. All Other Locations: Age 55 and 5 years of vesting service.
Monthly Benefit:	Columbus: If at least age 62 with at least 10 years of vesting service, or age 60 with at least 20 years of vesting service, the accrued benefit as of the early retirement date is unreduced. If at least age 55 with at least 10 years of vesting service, the accrued benefit as of early retirement date is reduced by 1/2 of 1% for each month that early retirement precedes the normal retirement date. Louisville: Accrued benefit as of early retirement date reduced by 1/2 of 1% for each month that early retirement precedes the Normal Retirement Date. Effective May 4, 2004 employees who retire with 30 or more years of vesting service receive their accrued benefit without reduction. All Other Locations: Accrued benefit as of early retirement date reduced by 1/2 of 1% for each month that early retirement precedes the Normal Retirement Date.

Disability Benefit

Eligibility:	Total and permanent disability of participant prior to normal retirement date, 10 years of vesting service (5 years for Columbus), and eligible to receive social security disability benefits.
Monthly Benefit:	The accrued benefit without reduction for early commencement.

SCHEDULE SB ATTACHMENTS – PART V – SUMMARY OF PRINCIPAL PLAN PROVISIONS

Vested Benefits Upon Termination of Service

A participant is 100% vested upon completion of 5 years of vesting service or upon reaching his Normal Retirement Date.

Death Benefits for Participants in Active Service

Eligibility:	Must be a vested participant
Monthly Benefit:	The participant's spouse of at least one year will receive a monthly retirement income payable for life in an amount equal to 50% of the amount the participant would have received if he had terminated on his date of death (or actual termination date if earlier), survived to his earliest retirement date, elected to commence receiving benefits under the qualified joint-and-50% survivor option, and then immediately died.

Supplemental Portability Benefit

Eligibility:	The participant must be within a collective bargaining unit covered by an Anheuser-Busch –Teamsters National Brewery Conference Master Agreement, or a similar agreement, which includes special job security provisions. The participant must have transferred from a location covered by a defined benefit plan, pursuant to a transfer opportunity described in the agreement, to a new location that does not participate in such plan, and the combined retirement benefit from both the original plan and the new plan is less than the benefit the participant would have received from the original plan had he not transferred. The participant must have 5 years of vesting service and can commence benefits after attaining age 55.
Monthly Benefit:	The participant will receive a monthly benefit equal to the actuarial equivalent value of the benefit that would have been payable from the original defined benefit plan had the participant not transferred, less the actuarial equivalent values of the benefits actually payable to the participant from the original plan and new plan. The provisions for early retirement benefits under the original plan are used when determining the benefit that would have been payable had the participant not transferred.

Plan Participants' Contributions

None.
