Independent Auditor's Report

To the Plan Administrator
ThyssenKrupp Materials NA, Inc.
Pension Plan

We were engaged to audit the financial statements - modified cash basis of ThyssenKrupp Materials NA, Inc. Pension Plan (the "Plan") as of December 31, 2009 and 2008 and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified by The Bank of New York Mellon/BNY Mellon, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the Trustee as of December 31, 2009 and 2008 and for the years then ended that the information provided to the plan administrator by the Trustee is complete and accurate.

As described in Note 2, these financial statements were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age and gender are shown below.

Attained Age	Male and Female	Rates
50-54		3.5%
55-61		3.5%
62		35.0%
63-64		10.0%
65		100.0%

Rates between 50 and 54 apply only to Steel employees with at least 80 points (age plus service). The weighted average retirement age is 63.

Disability rates (per 100 employees)

None.

Compensation increases

Age-graded salary scale as follows:

Age	Salary Increases
<35	4.2%
35-39	3.8%
40-44	3.4%
45-49	3.0%
50-54	2.6%
55-59	2.2%
≥60	1.8%

The weighted average salary increase is 3.0%.

Future increases in Social Security

For purposes of determining target normal cost and the additional funding target for maximum deductible contribution purposes, the National Average Wage Index is assumed to increase by 3.250% per annum.

Future increases in Maximum Benefits and Plan Compensation Limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Representative termination rates (per 100 employees) not due to disability, retirement or mortality

Attained Age	Males	Females
20	0.149	0.250
25	0.099	0.149
30	0.069	0.099

40	0.028	0.049
45	0.017	0.028
50	0.004	0.017

Form of payment

100% of participants are assumed to elect a lump sum.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 80% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

It was assumed that there will be no new or rehired employees.

Asset method

Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 6.40%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.25%, and the applicable limitation for the plan year, equal to 6.40%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 6.09%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 8.25%, and the applicable limitation for the plan year, equal to 6.09%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.4. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

Data was supplied electronically by the employer.

Benefits not included in valuation

We believe that we have reflected all significant Plan provisions in this valuation.

PBGC Premium Funding Target

The Alternative Premium Funding Target was determined using the assumptions described above.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Social Security Covered Compensation

The average of the Social Security Taxable Wage Base for the 35 year period ending with the last day of the calendar year the employee attains Social Security Retirement Age, based on the Social Security law in effect on the earliest of:

1. The Participant's severance from service date or
2. The Participant's Normal Retirement Date or

The date as of which the calculation of an Accrued Benefit is being made.

Plan Compensation**Steel & Auto**

Pensionable pay defined as Total Compensation, excluding imputed taxable income and perquisites; "Highest Average Compensation" defined as average Compensation over the five consecutive calendar years during which participant was compensated on a salaried basis, which produces the highest average. Compensation for this purpose is W-2 pay, including elective contributions and excluding in-kind payments, perquisites and company contributions to other benefit plans. For accruals between January 1, 1989 and December 31, 1993, compensation limited to \$235,840. For accruals between January 1, 1994 and December 31, 2001, compensation limited to \$150,000 per year, subject to cost-of-living adjustments. For accruals after January 1, 2002, compensation limited to \$200,000 per year, subject to cost-of-living adjustments

Copper & Brass Salaried

Pensionable pay is base pay, which excludes overtime, bonuses, imputed taxable income and prerequisites ("Base Salary"). Compensation for accruals between January 1, 1994 and December 31, 2001 is limited to \$150,000 per year, subject to cost-of-living adjustments. Compensation for accruals after January 1, 2002 is limited to \$200,000, subject to cost of living adjustments.

For Participants classified as "Outside Sales Personnel" compensation shall mean the Participant's Total Recognized Compensation ("TRC"). The Participant's TRC is the Participant's "Base Salary" plus the Participant's commissions up to his Maximum Recognized Commissions ("MRC"). The MRC is that portion of the commissions that does not cause the sum of his commissions plus his Base Salary for the current year to exceed his TRC for the previous year. Beginning October 1, 2005, the Participant's MRC shall be increased each year by two percent (2%) of the Participant's TRC for the previous year.

Accrued Benefit**Steel & Auto****For Service on or after January 1, 1994:**

1.2% of Highest Average Compensation (HAC) up to Covered Compensation (at later of termination or calculation) plus 1.45% of such average in excess thereof, all multiplied by up to 35 years of service (reduced by length of service credited before 1994). HAC is the highest 5 consecutive year average with annual compensation limited to \$150,000 (indexed) after 1993 and before 2002; limited to \$200,000 (indexed) after 2001.

For Service between January 1, 1989 and December 31, 1993:

1.2% of HAC up to Covered Compensation (for 1993) plus 1.45% of such average in excess thereof, all multiplied by up to 35 years of service (reduced by length of service credited before 1989). Compensation for all Pre-1994 years for this benefit accrual period is limited to \$235,840.

Note: For purposes of this section, HAC is the highest 5 consecutive year average as of December 31, 1993, with annual compensation limited to \$235,840, multiplied by the ratio (not less than 1) of the highest annual compensation earned after 1993 (limited as in the post 1993 benefit formula) to the 1993 compensation (annualized if partial year of pay) limited to \$235,840.

For Service prior to 1989:

26% of Highest Average Compensation up to Social Security Covered Compensation plus 50% of such average in excess of Social Security Covered Compensation (for 1988), reduced proportionately for less than 25 years projected service at age 65. Such benefit is then prorated based on the ratio of credited service at 12/31/1988 to projected credited service at age 65. (The 25 year amount is only 15 years for participants as of 7/01/1976.)

Note: For purposes of this section, HAC is the highest 5 consecutive year average as of December 31, 1988, multiplied by the ratio (not less than 1) of the highest annual compensation earned in the period from 1989 through 1993, limited to \$235,840, to the 1988 unlimited compensation (annualized if partial year of pay); and then multiplied by the ratio (not less than 1) of the highest annual compensation earned after 1993 (limited as in the post-1993 benefit formula) to the 1993 compensation (annualized if partial year of pay) limited to \$235,840.

Copper & Brass Salaried – Pre-January 1, 2004 Terminations

Accrued normal retirement benefit determined as in Accrued Normal Retirement Benefit and reduced by 5/9% for each month that commencement precedes age 62 down to age 55. Actuarially equivalent reduction (based on the normal form of payment) is applied for commencement prior to age 55.

Vested Deferred Benefit

Eligibility: 5 years of Vesting Service.

Benefit: Accrued benefit payable at age 65, or reduced for early commencement at any age. For Steel Group employees, reduction is actuarially equivalent, based on the normal form of payment. For Copper Group employees, the reduction is the same as for Early Retirement.

Disability Retirement Benefit

Eligibility: At any age or service upon total and permanent disability that has continued for at least 6 months.

Benefit: Accrued Normal Retirement Benefit, with continuing benefit accruals during the period of disability leave assuming that Compensation remains at the level in effect in the calendar year prior to disability.

Pre-Retirement Death Benefit

Eligibility: After completion of five years of Vesting Service, and married at time of death.

Benefit: 50% of the pension he would have been eligible to receive had the participant retired on the first day of the month in which he died. There is no charge for coverage.

Optional Forms

As elected by Participant, actuarially equivalent to normal form including:

- Joint & 50%, 66-2/3%, 75% or 100% Survivor
- Ten- Year Certain & Life
- Lump Sum

Actuarial equivalence for annuity options is based on a 7.5% interest rate and the 1983 GAM (unisex) table. Lump sum distributions are based on the GATT rate for the December preceding payment, rounded down to the next lowest 0.5%, using the 1983 GAM (unisex) mortality table for lump sums prior to 2003, and the RR2001-62 mortality table beginning in 2003. The lump sum will reflect the normal form of payment. Lump sums for participants eligible for early retirement are based on the accrued benefit reduced for immediate payment, otherwise based on the accrued benefit deferred to age 65.

ThyssenKrupp Materials NA, Inc. Pension Plan

Notes to Financial Statements December 31, 2009 and 2008

Note 1 - Plan Description

The following brief description of ThyssenKrupp Materials NA, Inc. Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan, as amended and restated through January 1, 2006, is a noncontributory defined pension plan sponsored by ThyssenKrupp Materials NA, Inc. (the "Company").

All employees of the Company hired prior to January 1, 1997 who are not covered by a collective bargaining agreement are eligible to participate in the Plan. Due to a plan merger in prior years, the Plan also includes separate prior benefit structures for the former salaried and nonunion hourly employees of Copper and Brass Sales. All former salaried and nonunion hourly employees of Copper and Brass Sales employed during 1997 who remained in service as of January 1, 1998 became participants in the Plan as of that date. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Eligibility and Vesting - The Plan is frozen to new participants. Employees became fully vested upon completion of five years of service.

Pension Benefits - Normal retirement is permitted at age 65 with five years of continuous service. The Plan permits early retirement based on certain age and credited service requirements. Monthly benefits are based on an annualized average of the participants' compensation and years of credited service, as described in the plan document. The Plan also contains provisions for disability, deferred vesting, and surviving spouse benefits.

Death Benefits - In certain circumstances, if an active or terminated employee who has a vested interest in the Plan dies prior to his or her normal retirement age, the surviving spouse or designated beneficiary shall receive a survivor benefit, as defined in the Plan.

Funding Policy - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. The Company will also make additional contributions, from time to time, with the total not to exceed the maximum contribution deductible under the Internal Revenue Code (IRC). Annual contributions meet the minimum funding requirements of ERISA.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation - The accompanying financial statements have been prepared on the modified cash basis of accounting. Under the modified cash basis of accounting, contributions and investment income are recorded when received, benefit payments and expenses are recorded when paid, and investments are recorded at fair market value.

Investment Valuation - The Plan's investments are stated at fair value. The fair value of the Plan's interest in the ThyssenKrupp USA Master Trust (the "Master Trust") is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. Common stock, preferred stock, and mutual funds are valued at quoted prices. Money market funds and interest-bearing cash are valued at their outstanding balances, which approximates fair value. The government securities and corporate obligations are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve, as well as other relevant economic measures. Investments in common collective trust funds are valued at fair value, based on the fair value of the underlying assets. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Certain administrative expenses associated with the Plan are paid by the Company.

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Notes to Financial Statements December 31, 2009 and 2008

Note 2 - Summary of Significant Accounting Policies (Continued)

Use of Estimates - The preparation of financial statements in conformity with the modified cash basis of accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Subsequent Events - Subsequent events have been evaluated through September 2, 2010, which is the date the financial statements were available to be issued.

Reclassification - Certain prior year amounts have been reclassified to conform to the current year presentation.

Note 3 - Unaudited Investment Information

The trustee of the Plan, The Bank of New York Mellon/BNY Mellon, N.A. (the "Trustee"), holds the Master Trust's investments and executes all related investment transactions. The investment balances and related investment results included in the accompanying financial statements, including information summarized in Note 5, are based solely on information provided by the Trustee.

Certain assets of the Master Trust are in investment funds managed by The Bank of New York Mellon/BNY Mellon, N.A. or its affiliates. Since The Bank of New York Mellon/BNY Mellon, N.A. is the trustee of the Plan, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines. The market value of these investments was approximately \$97,000,000 and \$39,000,000 at December 31, 2009 and 2008, respectively.

Note 4 - Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered to the valuation date. These include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

The normal individual retirement benefit is calculated based on the participant's years of credited service and an annualized average of the participant's compensation as defined in the plan document.

ThyssenKrupp Materials NA, Inc. Pension Plan

Notes to Financial Statements December 31, 2009 and 2008

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial present value of accumulated plan benefits is determined by the independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts and interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, and retirement) between the valuation date and the expected date of payment. The determination was made as of January 1, 2009 and 2008.

The more significant actuarial assumptions underlying the actuarial computations at January 1, 2009 and 2008 are as follows:

Actuarial cost method	Unit credit method
Interest rate	8.25 percent
Mortality rates	The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants
Retirement	Based upon a defined table of ages and percentages
Salary projection	Weighted average salary increase of 3.0 percent and 3.6 percent used in 2009 and 2008 valuations, respectively

The foregoing actuarial assumptions are based on the presumption that the Plan will continue indefinitely. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial present value of accumulated plan benefits as of January 1, 2009 and 2008 was as follows:

	2009	2008
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 11,017,537	\$ 11,496,010
Other vested participants	33,618,122	30,989,359
Total vested benefits	44,635,659	42,485,369
Nonvested benefits	1,776,980	1,755,389
Total actuarial present value of accumulated plan benefits	<u>\$ 46,412,639</u>	<u>\$ 44,240,758</u>

The following schedule summarizes the components of net increase in actuarial present value of accumulated plan benefits for the years ended January 1, 2009 and 2008:

	2009	2008
Actuarial present value of accumulated plan benefits -		
Beginning of year	\$ 44,240,758	\$ 43,421,951
Increase (decrease) during the year attributable to:		
Benefits accumulated including actuarial gains and losses	3,494,339	2,698,497
Interest due to the decrease in the discount period	3,615,124	3,513,628
Benefits paid	(4,937,582)	(5,691,499)
Change of assumptions	-	298,181
Net increase	<u>2,171,881</u>	<u>818,807</u>
Actuarial present value of accumulated plan benefits -		
End of year	<u>\$ 46,412,639</u>	<u>\$ 44,240,758</u>

The increase in actuarial present value of accumulated plan benefits related to change of assumptions for the year ended January 1, 2008 is primarily due to a change in the mortality basis.

Note 5 - Interest in Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and several other pension plans sponsored by affiliated participating employers of ThyssenKrupp USA, Inc. Each participating retirement plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Trustee. At December 31, 2009 and 2008, the Plan's interest in the net assets of the Master Trust was approximately 2.35 percent and 3.99 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon their pro rata share in the net assets of the Master Trust.

The following table is a summary, at fair value, of the net assets of the Master Trust at December 31, 2009 and 2008:

Note 5 - Interest in Master Trust (Continued)

The investment income for the Master Trust for the years ended December 31, 2009 and 2008 is as follows:

	2009	2008
Net appreciation (depreciation) in fair value of investments:		
Mutual funds	\$ 9,001,885	\$ (7,153,237)
Common collective trust funds	576,884	(36,978,420)
U.S. government securities	(13,639,785)	31,761,637
Corporate obligations	36,672,043	(32,533,458)
Common and preferred stocks	103,981,497	(246,930,338)
Net appreciation (depreciation) in fair value of investments	136,592,524	(291,833,816)
Interest and dividends	27,586,560	29,826,786
(Loss) gain on foreign currency exchange	(354,907)	636,410
Securities lending income	506,248	1,554,046
Net investment income (loss)	<u>\$ 164,330,425</u>	<u>\$ (259,816,574)</u>

Securities Lending - The Master Trust participates in a securities lending program with the Trustee for its U.S. and non-U.S. securities held in custody with the Trustee. The program allows up to 100 percent of the qualified assets to be on loan at any given time. These securities are lent to certain unrelated third-party brokers in exchange for cash and noncash collaterals. U.S. assets and non-U.S. assets on loan are collateralized at 102 percent and 105 percent, respectively, of the assets' market value.

The net assets of the Master Trust reflects, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. The collateral received from borrowers totaled \$96,784,750 and \$39,199,601 as of December 31, 2009 and 2008, respectively. This consisted of cash collateral received of \$96,784,750 and \$39,199,601, which was invested in the ASL short-term fund, a money market fund, at December 31, 2009 and 2008, respectively. In the event that a loaned security is called, the Master Trust will receive the market value of the asset in cash. The market value of loaned securities amounted to \$94,346,870 and \$37,995,025 at December 31, 2009 and 2008, respectively.

ThyssenKrupp Materials NA, Inc. Pension Plan

Notes to Financial Statements December 31, 2009 and 2008

Note 5 - Interest in Master Trust (Continued)

Derivative Instruments - The Master Trust is party to certain agreements, which are designed to manage exposures to foreign exchange risk. The foreign currency instruments are used for the purpose of hedging changes in the fair value of assets that result from currency fluctuations. The notional amount represents the contract amount, not the amount at risk. The notional amount of foreign currency instruments was approximately \$3,100,000 and \$9,100,000 at December 31, 2009 and 2008, respectively. The estimated fair value of derivative instruments at December 31, 2009 and 2008 is insignificant.

The investment managers, on behalf of the Master Trust, manage its foreign currency risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of a foreign currency, the Master Trust's risk is limited to the fair value of the instrument.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2009 and 2008, and the valuation techniques used by the Plan to determine those fair values.

Level 1 - In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

(1) This class represents investments in actively managed common collective trust funds that invest primarily in equity securities which may include common stocks, options, and futures. Investments are valued at the fair value per share multiplied by the number of shares held as of the measurement date.

(2) This class invests primarily in fixed-income securities, including, but not limited to, bonds, notes, or other investments such as government securities, commercial paper, certificates of deposits, master notes, or variable amount notes, with the objective of providing high-current income consistent with the preservation of capital and the maintenance of liquidity. Short-term investments are valued at \$1.00/unit, which approximates fair value.

(3) Short-term investments are valued at \$1.00/unit, which approximates fair value. Amounts are generally invested in actively managed interest-bearing accounts.

Note 7 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated October 29, 2002 indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Note 8 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Schedule SB, Part V – Line 25**Changes in assumptions and methods since last actuarial valuation**

Other than the prescribed changes in the discount rate and mortality, the following changes in assumptions and methods were made as part of this valuation:

- The discount rate was changed from the October 3-segment rates to the full yield curve as of the October before the valuation date. This change is being made as elected by the plan sponsor and is deemed to be automatically approved by the IRS pursuant to guidance in IRS March 31, 2009 Newsletter.
- The asset valuation method was updated pursuant to changes in the permitted asset valuation method made by the Worker, Retiree, and Employer Recovery Act of 2008 (WRERA). As described in IRS Notice 2009-22, expected earnings are taken into account when averaging. In addition, the averaging period has been changed from three-month to two-year. Changes in the asset method for plan years beginning in 2009 to any permissible asset method are deemed to be automatically approved by the IRS. Also, the prior year calculated the valuation assets based on two monthly computation periods. This year's valuation assets are based on two annual computation periods.
- The amount included this year for plan-related expenses is \$546,696. WRERA includes a technical corrections provision requiring target normal cost to include the amount of plan related expenses expected to be paid from plan assets during the year.
- The salary scale was decreased by 0.6% at each age as described above.
- The National Average Wage Index was decreased from 3.75% to 3.25%.
