Report of Independent Auditors

To the Participants and Benefits Administrative Committee of the
PDG Chemical Inc. Pension Plan:

We were engaged to audit the financial statements of PDG Chemical Inc. Pension Plan (the "Plan") at December 31, 2009 and December 31, 2008 and for the years then ended, as listed in the accompanying index. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Notes 7 and 8, which was certified by Bank of New York Mellon, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2009 and December 31, 2008 and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

PDG CHEMICAL INC. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

1. Description of Plan

General – The PDG Chemical Inc. Pension Plan (“Plan”) is a noncontributory defined benefit pension plan for eligible represented employees of Equistar Chemicals, LP (“Equistar” or “Plan Sponsor”) at Equistar’s Beaumont facility. The Plan is subject to the provisions of ERISA. Equistar is a wholly owned subsidiary of Lyondell Chemical Company (“Lyondell” or “Company”). Participants should refer to the Plan document for a complete description of the Plan.

On January 6, 2009, Equistar was included among the debtors who filed voluntary petitions for relief under Chapter 11 of the U.S. Bankruptcy Code (“Chapter 11”) in the U.S. Bankruptcy Court. The bankruptcy cases were jointly administered in the U.S. Bankruptcy Court under the caption “In re Lyondell Chemical Company, et al.” The Plan of Reorganization provided that Equistar would continue to maintain the Plan. On April 30, 2010, Lyondell emerged from Chapter 11 bankruptcy protection.

Pension benefits – Participants who meet the years of service requirement are entitled to annual pension benefits upon attaining the normal retirement age of 65, as defined in the Plan documents. The Plan permits early retirement at a reduced benefit level for participants who are (i) at least age 55 where the combined years of age and years of continuous service total 85 or more or (ii) age 60 with at least ten years of continuous service. Participants receive their accumulated plan benefits as a monthly benefit payable upon retirement.

Death and Disability Benefits – If an active employee dies, death benefits, as described in the Plan documents, are paid to the employee’s beneficiary. Active employees who become totally disabled receive annuity disability benefits as defined in the plan documents.

The Plan is administered by the Benefits Administrative Committee (“BAC”). Mercer is the Plan’s recordkeeper and actuary. Plan assets are maintained in the Lyondell Chemical Company Retirement Master Trust (“Master Trust”) under the custody of The Bank of New York Mellon (“Trustee”). Management of portfolio assets is directed by external investment managers hired and monitored by the Benefits Finance Committee (“BFC”). Both the BAC and BFC consist of individuals appointed by the Lyondell Board of Directors.

On August 17, 2006, the Pension Protection Act of 2006 (“PPA”), a comprehensive pension reform legislation which revised many rules surrounding defined benefit plans was signed into law. The Plan was timely amended in 2009 as required under the PPA.

2. Summary of Significant Accounting Policies

Basis of Accounting – The financial statements of the Plan are prepared in accordance with accounting principles generally accepted in the United States of America using the accrual method of accounting.

Reclassifications – Certain reclassifications have been made to the fair value note to conform to current year presentation.

Accounting and Reporting Changes – On July 1, 2009, the Financial Accounting Standards Board (the “FASB”) released the authoritative version of its new Accounting Standards Codification (“ASC”) as the single source for Generally Accepted Accounting Principles (“GAAP”), which replaces all previous GAAP accounting standards. While not intended to change GAAP, the ASC significantly changes the way in which the accounting literature is organized. The Plan adopted the ASC to reference GAAP accounting standards in its December 31, 2009 financial statements. The adoption of ASC does not impact the Plan’s financial statements except for references made to authoritative accounting literature in footnotes.

PDG CHEMICAL INC. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS—(Continued)

In September 2006, the FASB issued ASC 820, *Fair Value Measurements and Disclosures*. ASC 820 provides a common definition of fair value and a framework for measuring assets and liabilities at fair values when a particular standard prescribes and expands disclosures about fair value measurements. The Company adopted the new accounting standard for plan years beginning January 1, 2008. The adoption did not have a material impact on the Plan's financial statements.

On October 10, 2008, the FASB issued ASC 820-10-65-2, *Determining the Fair Value of a Financial Asset When the Market for that Asset is Not Active*, which clarifies the application of ASC 820 in a market that is not active. The update provides additional guidance regarding how the reporting entity's own assumptions should be considered when relevant observable inputs do not exist, how available observable inputs in a market that is not active should be considered when measuring fair value, and how the use of market quotes should be considered when assessing the relevance of inputs available to measure fair value. The guidance became effective immediately upon issuance. The additional guidance with respect to the valuation of its financial assets and liabilities and their corresponding designation within the fair value hierarchy was considered. The Company adopted this guidance on December 31, 2008. The adoption did not have a material impact on the Plan's financial statements.

On May 28, 2009, the FASB issued ASC 855, *Subsequent Events*, which establishes general standards of accounting for, and disclosure of, events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Although there is new terminology, the standard is based on the same principles as those that currently exist in the auditing standards. The Company adopted the standard, which includes a new required disclosure of the date through which an entity has evaluated subsequent events, on December 31, 2009. The adoption did not have a material impact on the Plan's financial statements.

In January 2010, the FASB issued additional guidance on improving disclosures regarding fair value measurements. The Accounting Standards Update 2010-06 amends ASC 820-10 *Fair Value Measurements and Disclosures*. This update requires entities to disclose the amounts of significant transfers between Level 1 and Level 2 of the fair value hierarchy and the reasons for these transfers, as well as the reasons for any transfer in or out of Level 3. The update further clarified the existing disclosure requirements in ASC 820-10 regarding: i) the level of disaggregation of fair value measurements; and ii) the disclosures regarding inputs and valuation techniques. This update will be effective January 1, 2010, except for the gross presentation of the Level 3 transfers in and transfers out information, which is effective for the current fiscal year. The Company is currently evaluating both the timing and the impact of the adoption of this amendment.

Use of Estimates – The preparation of the Plan's financial statements requires management to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits and accumulated plan benefits at the date of the financial statements and the changes in net assets available for benefits and changes in accumulated plan benefits during the reporting period and, when applicable, disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition – A separate account for the Plan is maintained by the Master Trust reflecting the Plan's share of the Master Trust. Investments of the Master Trust traded on national or foreign securities exchanges are valued based upon quoted market price on the last business day of the period presented. Short-term and certain other investments are valued at cost, which approximates market value. Interest in the Master Trust is determined on a monthly basis and is based upon the beginning of the month value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income, less actual distribution and an allocation of administrative expenses.

From time to time the Master Trust's investment managers may use derivative financial instruments including forward exchange contracts and future contracts. Derivative instruments are used primarily to mitigate exposure to foreign exchange rate and interest rate fluctuations as well as manage the investment mix in the portfolio. The

PDG CHEMICAL INC. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS—(Continued)

Master Trust's interest in funds which utilize such financial instruments is not considered significant to the Plan's financial statements.

Purchases and sales of securities by the Master Trust are accounted for on a trade date basis (the date the order to buy or sell is originated). Gains or losses on the sale or distribution of securities are computed on a first-in, first-out basis. Dividend income is recorded on the ex-dividend date. Income from other investments is recorded as earned. The net appreciation or depreciation in the fair value of investments, which consist of the realized gains or losses and the unrealized appreciation or depreciation on those investments, is included in "Investment income (loss)" in the Statement of Changes in Net Assets Available for Benefits.

Interest and dividends earned, net appreciation or depreciation in the fair value of investments, and expenses incurred under the collective investment accounts of the Master Trust are allocated to the Plan based upon each plan's average monthly investment balance in the Master Trust. See Note 9 for discussion of fair value measurements.

Risks and Uncertainties – The Master Trust invests in a combination of common stocks, mutual funds, corporate bonds, commingled funds, open ended real estate funds and short term investments. Investment securities are exposed to various risks, such as market and credit risks. Changes in the values of investment securities will continue to occur in the near term and such change could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Payment of Benefits – Benefit payments to participants are recorded upon distribution and are paid by the Master Trust.

Administrative Expenses – Certain administrative expenses are paid by the Plan and Plan sponsor.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions, which are attributable under the Plan's provisions to the service that employees have rendered as of the beginning of the plan year. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries; (b) beneficiaries of employees who have died; and (c) present employees or their beneficiaries. Benefits under the Plan earned that were accrued are based upon the employee's continuous years of service multiplied by a monthly benefit rate as specified in the Plan document. Benefits payable under all circumstances, including retirement, death, and termination of employment, are included to the extent that the circumstances are deemed attributable to employee services rendered up to the valuation date.

The 2008 actuarial present value of accumulated plan benefits were determined by the Plan's actuary, Mercer. The actuarial method used to determine the present value of accumulated plan benefits is the unit credit actuarial cost method. The more significant assumptions underlying the actuarial valuation are as follows:

	<u>December 31, 2008</u>
Investment return	8.0% per year
Mortality table	RP-2000 combined annuitant and nonannuitant healthy mortality table (sex distinct) projected 6 years with no collar adjustment
Assumed average retirement age	59 years of age

PDG CHEMICAL INC. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS—(Continued)

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based upon certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

The foregoing actuarial assumptions are based upon the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Funding Policy

The contributions by Equistar are designed to fund an amount as required under applicable regulations as determined under the standard unit credit method, as adopted January 1, 2008, under the PPA. Fluctuations in the return (interest, dividends, and net appreciation or depreciation in fair value) on investments of the Plan from the assumed rate serve to reduce or increase future contributions required to provide for the benefits defined under the Plan.

Under the provisions of ERISA, the Plan's actuaries determined that no contributions were required for the years ended December 31, 2009 or 2008.

5. Plan Termination

Although it has not expressed any intention to do so, Equistar has the right, under the terms of the Plan document, to discontinue its contributions at any time and to terminate the Plan, subject to provisions set forth under ERISA.

Participants' retirement allowances under the Plan are insured to the extent required by law through the Pension Benefit Guaranty Corporation ("PBGC"). If the Plan were to be terminated, priorities of payment of benefits would be made in accordance with the requirements under ERISA.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

6. Tax Status

The Internal Revenue Service ("IRS") issued a determination letter dated July 1, 2008, stating that the Plan and related Master Trust are designed in accordance with applicable sections of the Internal Revenue Code ("Code"). The BAC believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Code. Accordingly, no provision is made for federal income taxes.

7. Information Certified by the Plan's Master Trustee

The plan administrator has elected the method of compliance permitted by Section 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustee has certified that the following data included in the accompanying financial statements are complete and accurate:

- Plan interest in the Master Trust, at fair value
- Investment income (loss) from the Master Trust
- Investment information as shown in Note 8 and Note 9

8. Lyondell Chemical Company Retirement Master Trust

The Master Trust is a pooled investment Master Trust composed of the beneficial interests of certain participating defined benefit plans ("Master Trust Plans") of Lyondell and certain of its subsidiaries and affiliates. The Master Trust consists of a portfolio of investments in a combination of common stocks, mutual funds, corporate bonds, commingled funds, open ended real estate funds and short term investments, all of which are held by the Master Trust.

On April 1, 2009, the Basell Retirement Income Plan, Basell Pension Plan, and Basell Pension Plan for Hourly Employees at Edison, NJ merged into the Master Trust. The net assets of these plans, totaling \$139,514,011, were transferred into the Master Trust.

Master Trust Plans do not own specific securities or other assets in the Master Trust but have an undivided interest in the Master Trust. At December 31, 2009 and 2008, the Plan's undivided interest in the investment holdings of the Master Trust, consisting of total investments, receivables from sales of securities, accrued interest and dividends, payables from purchases of securities, and other payables and receivables, was approximately 1% for both years. Investment income (loss) related to the Master Trust is allocated to the Master Trust Plans based upon each plan's average monthly investment balance in the Master Trust.

9. Fair Value Measurements

As discussed in Note 2, the Plan adopted ASC 820, *Fair Value Measurements and Disclosures*, as of January 1, 2008. ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. ASC 820 also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally-developed market assumptions. In accordance with ASC 820, fair value measurements are classified under the following hierarchy:

Level 1 – Quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.

Level 3 – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, quoted market prices are used to determine fair value and such measurements are classified within Level 1. In some cases where market prices are not available, observable market based inputs are used to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are

PDG CHEMICAL INC. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS—(Continued)

not available, fair value is based upon internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

Fair value measurements are classified according to the lowest level input or value-driver that is significant to the valuation. A measurement may therefore be classified within Level 3 even though there may be significant inputs that are readily observable.

Valuation methodologies used for major investment types measured at fair value include:

Common stocks and fixed income securities – Valued at the closing price reported on the active market on which the individual securities are traded.

Comingled funds – Valued based upon the unit values of such collective trust funds held by the Master Trust at year end. Unit values are based on the fair value of the underlying assets of the fund derived from inputs principally from, or corroborated by, observable market data by correlation or other means.

Short term investments – Valued at the quoted prices for similar assets or liabilities in active markets.

Real estate – Valued on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant view as rental property.

Convertible securities – Valued at the quoted prices for similar assets or liabilities in active markets.

The following table sets forth by level, within the fair value hierarchy, the Master Trust assets at fair value as of December 31, 2009:

	Balance at December 31, 2009	Basis of Fair Value Measurement		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

The following table sets forth a summary of changes in the fair value of the Master Trust level 3 assets for the year ended December 31, 2009:

	Real estate
Balance, beginning of year	\$ 54,473,905
Realized gains	2,082,388
Unrealized losses relating to instruments still held at the reporting date	(26,489,004)
Purchases, sales, issuances, and settlements, net	6,305,057
Balance, end of year	<u>\$ 36,372,346</u>

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

10. Subsequent Events

On April 30, 2010, Lyondell emerged from Chapter 11 bankruptcy protection.

Lyondell has evaluated subsequent events through October 14, 2010, the date the financial statements were issued.

Schedule SB, Part V – Statement of actuarial assumptions/methods

Asset methods – effective January 1, 2009

We used financial data submitted by the trustee as of January 1, 2009 without further audit. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

The market value is the amount reported in the year end audited asset statement.

The asset valuation method is an annual average of the adjusted market value over the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset valuation method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than market.

Participant methods – effective January 1, 2008

We used the participant data supplied by the plan sponsor. We have reviewed the data and have no reason to doubt its substantial accuracy. Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Disabled participants:** The liabilities for participants on long-term disability have been included with the liabilities for active participants. Participants who become disabled continue to accrue service during their disability. We have valued these participants as if they were active participants.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for active participants.

Schedule SB, Part V – Statement of actuarial assumptions/methods (continued)

Benefits included or excluded – effective January 1, 2008

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement. The Plan distributes benefits to active participants who work beyond age 70 1/2.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are not valued including the late retirement actuarial increases. The Plan distributes benefits to all deferred vested participants upon attaining age 65.
- **Shutdown benefits:** We are not aware of any corporate actions that would create shutdown benefits; therefore, they are excluded.
- **IRC Sections 401(a)(17) and 415(b):** The limitations of Internal Revenue Code Sections 401(a)(17) and 415(b) have been incorporated into our calculations, as applicable.
- **Benefit restrictions:** Benefit restrictions (if applicable) are ignored in this valuation.

Minimum funding method

Target liability for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **accrued liability** is the present value of benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **normal cost** is the present value of the benefit deemed to accrue in the plan year. If multiple decrements are used, the accrued liability and the normal cost for an individual are the sum of the component accrued liabilities and normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual normal costs, and the plan's **funding target** is the sum of the accrued liabilities for all participants under the plan.

Maximum deductible contribution method

Calculations of maximum deductible contributions include the excess of the accrued liability computed using the projected unit credit method over the minimum funding target. The objective of the projected unit credit method is to fund each participant's benefits under the plan as they accrue, taking into consideration future compensation increases. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- An individual's **projected accrued liability** is the present value of benefits based on credited service as of the beginning of the plan year and projected compensation that would be used in the calculation of the benefit on each expected separation date. If multiple decrements are used, the accrued liability for an individual is the sum of the component accrued liabilities associated with the various anticipated separation dates.
- The plan's **projected accrued liability** is the sum of the projected accrued liabilities for all participants under the plan. The excess of the plan's projected accrued liability over the plan's funding target is included in the "cushion amount."

Schedule SB, Part V – Summary of plan provisions

Schedule SB, Part V – Summary of plan provisions (continued)

Normal retirement	
Eligibility	Attainment of normal retirement age.
Benefit	The accrued benefit determined at retirement.
Late retirement	
Eligibility	Retirement after attainment of normal retirement age.
Benefit	The accrued benefit determined at retirement based on member's age and service at retirement.
Early retirement	
Eligibility	Attainment of early retirement age.
Benefit	The accrued benefit determined at early retirement age reduced by 3/10 of 1% for each complete calendar month preceding age 62. In addition, an annual supplement of \$2,400 is payable until age 62 if the participant retires with 85 or more age/service points.
Deferred vested	
Eligibility	Five years of continuous service.
Benefit	The accrued benefit determined as of the date of termination payable at 65 or at early retirement age with a reduction. If commencement age precedes age 65 the benefit is reduced 6-2/3% per year.
Preretirement survivor benefit	
Eligibility	Five years of continuous service.
Benefit	Life annuity payable to the spouse only. Payment commences on the later of date of death or the date the participant would have reached early retirement age. Benefit is calculated as if the participant had terminated on the date of death, survived to earliest commencement date and commenced receiving a 55% joint and survivor benefit.
Disability	
Eligibility	Participant on long-term disability.
Benefit	The accrued benefit determined as of the earlier of a participant's recovery from disability if not re-employed or normal retirement age.

Schedule SB, Part V – Summary of plan provisions (continued)

Other provisions															
Normal form of benefit	Survivor benefits are payable only as described above. Monthly benefits are paid in the form of a single life annuity if the member has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid as a 55% joint and survivor annuity.														
Optional forms of payment	Single life annuity. Joint and survivor annuity (100%, 75% and 50%).														
Actuarial equivalence	See table of sample factors for a 55% joint & survivor annuity based on the assumption male spouses are 3 years older than female spouses: <table><tr><td><u>Age</u></td><td><u>Male</u></td><td><u>Female</u></td></tr><tr><td>55</td><td>0.897</td><td>0.918</td></tr><tr><td>60</td><td>0.885</td><td>0.915</td></tr><tr><td>65</td><td>0.885</td><td>0.915</td></tr></table> For actual factors used see plan provisions.			<u>Age</u>	<u>Male</u>	<u>Female</u>	55	0.897	0.918	60	0.885	0.915	65	0.885	0.915

55	0.897	0.918													
60	0.885	0.915													
65	0.885	0.915													
Changes in plan provisions since prior year	The annuity benefit cap was increased from \$185,000 to \$195,000 to reflect changes in the 415(b) limits. Increase in the monthly benefit rate to \$42 effective July 1, 2007.														

Benefits included or excluded – effective January 1, 2008

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement. The Plan distributes benefits to active participants who work beyond age 70 1/2.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are not valued including the late retirement actuarial increases. The Plan distributes benefits to all deferred vested participants upon attaining age 65.
- **Shutdown benefits:** We are not aware of any corporate actions that would create shutdown benefits; therefore, they are excluded.
- **IRC Sections 401(a)(17) and 415(b):** The limitations of Internal Revenue Code Sections 401(a)(17) and 415(b) have been incorporated into our calculations, as applicable.
- **Benefit restrictions:** Benefit restrictions (if applicable) are ignored in this valuation.

Schedule SB, Line 25 – Change in method

- Beginning with the 2009 valuation, expected expenses are added to the normal cost.
- The asset method was changed from the fair market value to the average adjusted market value.
- The funding interest rate was changed from the segmented yield curve with no phase-in and 4 month lookback to the full yield curve with 2 month lookback.
