The Employee Benefits Committee
Idearc Pension Plan for Collectively Bargained Employees

We were engaged to audit the accompanying statement of net assets available for benefits of Idearc Pension Plan for Collectively Bargained Employees as of December 31, 2009, and the related statement of changes in net assets available for benefits for the year ended December 31, 2009. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 6 as of and for the year ended December 31, 2009, which was certified by State Street Bank and Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee, as of and for the year ended December 31, 2009, that the information provided to the plan administrator by the trustee is complete and accurate.

We have audited the statement of net assets available for benefits as of December 31, 2008, and the related statement of changes in net assets available for benefits for the year then ended, and in our report dated October 14, 2009, we expressed an opinion that this financial statement presents fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2008 and the related statement of changes in net assets available for benefits for the year then ended, in conformity with accounting principles generally accepted in the United States.

Idearc Pension Plan for Collectively Bargained Employees

Notes to Financial Statements

December 31, 2009

1. Description of Plan

The following is a brief description of the Idearc Pension Plan for Collectively Bargained Employees (“the Plan”). Participants should refer to the Plan document for more complete information.

General

The Plan is a cash balance defined benefit plan established for the purpose of providing retirement benefits for eligible employees and former employees of Idearc Inc. and its Affiliates formerly doing business as “Verizon Information Services” (“Verizon”) and their predecessors, for whom pension assets and liabilities were transferred to the Plan. The Company was formed from the spin-off of Verizon to the shareholders of Verizon Communications Inc. on November 17, 2006. As a result of this spin off, the Company established the Plan to mirror the plan provided by Verizon Communications Inc. On or about the spin date, Verizon Communications Inc. transferred assets equal to approximately 90% of the estimated pension liability to the Idearc Inc. Master Trust (the “Master Trust”). The remaining 10% was transferred to the Company during 2009, and is shown as a transfer in from Verizon Communications Inc. on the accompanying statement of changes in net assets available for benefits. The related income or loss on the assets for the period held by Verizon is shown as other income (loss) on the statements of net assets available for benefits.

In March of 2009, Idearc Inc. (the “Company”) filed for protection under the United States Bankruptcy Code (the “Bankruptcy Code”). On May 15, 2009, the Company submitted a joint plan of reorganization and disclosure statement for consideration by the Bankruptcy Court and affected creditors. On September 8, 2009, the Company filed its First Amended Joint Plan of Reorganization (the “Reorganization Plan”) with the Bankruptcy Court, which was later modified on November 19, 2009 and approved by the Bankruptcy Court on December 22, 2009. The Company emerged from bankruptcy on December 31, 2009 and changed its name to SuperMedia Inc. (“SuperMedia”), on January 4, 2010. As a result of the Company’s emergence from Chapter 11 of the Bankruptcy Code, SuperMedia Inc. is the successor registrant to Idearc Inc. pursuant to Rule 12-g3 under the Securities Exchange Act of 1934. No provisions of the Plan were changed in the Reorganization Plan.

Notes to Financial Statements (continued)

1. Description of Plan (continued)

As of December 31, 2007, part three of the Plan was amended. Under the amendment, any employee whose terms and conditions of employment are determined by the collective bargaining applicable to Communications Workers of America, AFL-CIO (“CWA”) Local Nos. 1301 or 1302 (or International Brotherhood of Electrical Workers (IBEW) Local 2213) and who is not a participant of the plan on December 31, 2007 (the “Freeze Date”), shall not become a member after the Freeze Date.

The Plan was further amended that any employee whose term and condition of employment are determined by the collective bargaining applicable to CWA Locals 1301 or 1302 or IBEW Local 2213 who is a member at the Freeze Date shall cease accruing benefits under the Plan as of the Freeze Date.

The Plan was further amended that any employee whose term and condition of employment are determined by the collective bargaining applicable to CWA Locals 1301 or 1302 or IBEW Local 2213 who is a member at the Freeze Date shall continue to accumulate Net Credited Service and ERISA Service for purposes of qualifying for an early retirement subsidy and for purposes of vesting, respectively, in accordance with the Plan.

Effective December 8, 2008, the benefit formula for members of CWA Local 1301 who had greater than five years of pension accrual service as of January 1, 2009 was changed to equal 1.3% of Average Compensation times Credited Service, but not less than the benefit earned as of December 31, 2007 with the prior formula. This change resulted in an increase in the actuarial present value of accumulated plan benefits of approximately \$2,046,000. (See Note 5).

Effective June 30, 2009, participants in Pennsylvania and New York with less than five years of service on the effective date are frozen in the Plan but shall continue to solely accrue interest credits thereafter.

On October 4, 2009, the CWA agreed that, effective January 31, 2010 (the “effective date”), Participants in Virginia, Maryland, and New Jersey with less than five years of service on the effective date will be frozen in the Plan and will receive benefits in the SuperMedia Savings Plan. The effect of this amendment is not included in the accumulated plan benefit obligation at December 31, 2008.

This plan was closed to all new hires at December 31, 2009.

Notes to Financial Statements (continued)

1. Description of Plan (continued)

The Plan is subject to the provisions of the Employee Retirement Income Security Act, as amended (“ERISA”). The Employee Benefits Committee (the “Committee”) is responsible for the general administration of the Plan.

Pension Benefits

Benefits are credited to the benefit of the participant under one or more benefit formulas set forth in the Plan. Benefits available depend on the service and the legacy employer of the participant. Generally, there is a (a) cash balance formula, (b) highest average pay formula, (c) grandfathered GTE benefit formula, and (d) grandfathered Bell Atlantic formula.

Death and Disability Benefits

Death benefits are based on the greater of the combined value of the participant’s cash balance account and any unconverted annuity benefit; or if the participant was a former GTE employee with Change in Control (CIC) protection, the value of the 50% survivor benefit.

If an employee becomes disabled, they may continue to earn benefits under the Plan or receive an unreduced pension.

Vesting

A participant is fully vested upon completion of five years of vesting service or if employed at normal retirement age. Effective January 1, 2008, certain participants as defined by the Plan document are vested in their cash balance account after three years of service.

2. Summary of Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States (“GAAP”).

Subsequent Events

The Company has evaluated subsequent events through October 12, 2010, which is the date through which these financial statements were available for issuance.

2. Summary of Accounting Policies (continued)

Use of Estimates

The accompanying financial statements have been prepared in conformity with GAAP, which requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Payments of Benefits

Benefits paid directly to participants are recorded upon distribution.

In connection with the preparation of the 2009 financial statements, the Company noted benefit payments were incorrectly coded between the Union Plan and Management Plan resulting in an understatement of benefit payments in the Union Plan and a corresponding overstatement of benefits payments in the Management Plan of approximately \$2.7 million for the year ended December 31, 2008. The coding was corrected for the year ended December 31, 2009. No individual participant benefits payment calculations were impacted by this coding error.

Investment Valuation and Income Recognition

The Plan participates in the Master Trust along with the Idearc Pension Plan for Management Employees. Each participating plan has an undivided interest in the Master Trust. The assets of the Master Trust are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). See Note 6 for further discussion and disclosures related to fair value measurements. Prior to June 2008, the Master Trust invested in common collective trusts, that were measured at fair value as determined by the issuer based on the fair values of the underlying investments of such trusts. Effective June 1, 2008, the Company changed its investment policy. The Plan began investing the assets of the Master Trust in a diversified portfolio of investments which provide exposure to global asset classes including private equity, hedge funds, fund of funds, equities, commodities, fixed income, cash and foreign exchange. The fair value of the Plan's interest in the Master Trust is based on the beginning of period value of the Plan's interest in the trust plus actual contributions and allocated investment income or loss less actual distributions and allocated administrative expenses. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. See Note 6 for additional information.

2. Summary of Accounting Policies (continued)

Reclassification

Certain detailed information regarding the Plan's interest in the net gain/loss in the Master Trust as of December 31, 2008, has been reclassified to be reported as a line item to conform to the 2009 presentation. Certain 2008 amounts in the fair value hierarchy table in the footnotes have been reclassified to conform to the 2009 presentation.

New Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board ("FASB") issued FASB Accounting Standards Codification ("ASC") 105-10, *The Financial Accounting Standards Board Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles* (formerly Statement of Financial Accounting Standards (SFAS) 168). ASC 105-10 replaces SFAS 162, *The Hierarchy of Generally Accepted Accounting Principles*, and establishes the FASB Accounting Standards Codification (the "Codification") as the source of authoritative accounting principles recognized by the FASB to be applied by non-governmental entities in the preparation of financial statements in conformity with GAAP. The Codification became the exclusive authoritative reference at September 30, 2009. Updates to the Codification Standards are issued as Accounting Standard Updates ("ASU"s) by the FASB. The adoption of the Codification does not impact the Plan's financial statements except for references made to authoritative accounting literature in the footnotes.

The Plan adopted the provisions of ASC 815-10-50, *Disclosures about Derivative Instruments and Hedging Activities*, on January 1, 2009. The new requirement amends and expands the disclosure requirement related to derivative instruments to provide users of financial statements with an enhanced understanding of the use of derivative instruments by the Plan and how these derivatives affect the financial position and financial performance of the Plan. This standard requires qualitative disclosures about the objectives and strategies for using derivative instruments, quantitative disclosures about the fair value of, and gains and losses on, derivative instruments, as well as disclosures about credit risk-related contingent features in derivative agreements. The standard enhances the disclosure requirements for derivative instruments and related hedging activities and thus, the adoption of the standard had no impact on the statements of net assets available for benefits and statement of changes in net assets available for benefits. See Note 6 for additional information.

Idearc Pension Plan for Collectively Bargained Employees

Notes to Financial Statements (continued)

2. Summary of Accounting Policies (continued)

Effective January 1, 2009, the Plan adopted the authoritative guidance under GAAP on determining fair value when the volume and level of activity for the asset or liability have significantly decreased and identifying transactions that are not orderly. Accordingly, if the Plan determines that either the volume and/or level of activity for an asset or liability has significantly decreased (from normal conditions for that asset or liability) or price quotations or observable inputs are not associated with orderly transactions, increased analysis and management judgment will be required to estimate fair value. Valuation techniques such as an income approach might be appropriate to supplement or replace a market approach in those circumstances. The guidance also provides a list of factors to determine whether there has been a significant decrease in relation to normal market activity. Regardless, however, of the valuation technique and inputs used, the objective for the fair value measurement in those circumstances is unchanged from what it would be if markets were operating at normal activity levels and/or transactions were orderly, that is, to determine the current exit price. The adoption of this guidance did not have a material effect on the Plan's financial statements.

The Plan has adopted the authoritative guidance under GAAP for estimating the fair value of investments in investment companies that have calculated net asset value per share in accordance with the specialized accounting guidance for investment companies. Accordingly, in circumstances in which net asset value per share of an investment is not determinative of fair value, the Plan estimates the fair value of an investment in an investment company using the net asset value per share of the investment (or its equivalent) without further adjustment, if the net asset value per share of the investment is determined in accordance with the specialized accounting guidance for investment companies as of the reporting entity's measurement date. The adoption of this guidance did not have a material effect on the financial statements. See Note 6 for additional information regarding investments valued using net asset value.

In 2009, the Plan adopted the FASB amendments to general standards on accounting for and disclosures of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. The adoption of this guidance did not materially affect the Plan's financial statements.

In January 2010, the FASB issued ASU 2010-06, *Improving Disclosures about Fair Value Measurements*. ASU 2010-06 amended ASC 820, *Fair Value Measurements and Disclosures*, to clarify certain existing disclosures and to require a number of additional disclosures. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provided guidance on how to

Idearc Pension Plan for Collectively Bargained Employees

Notes to Financial Statements (continued)

2. Summary of Accounting Policies (continued)

determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirements for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2, and 3 of the fair value hierarchy and to present information regarding the purchases, sales, issuances, and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirements to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 becomes effective for reporting periods beginning after December 15, 2009. Plan management is currently evaluating the effect that the provisions of ASU 2010-06 will have on the Plan's financial statements.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits represent the actuarial present value of estimated future periodic payments, including lump sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, and (b) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent third-party actuary. This value is computed by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2008, were (a) life expectancy of participants (RP-2000 Combined Healthy Mortality Table was used), (b) retirement age assumptions (the assumed average retirement age was 65), and (c) an assumed average rate of return of 7.0%, which decreased from 8.0% in the December 31, 2007 valuation. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. See Note 5 for additional information related to the actuarial present value of accumulated plan benefits.

Notes to Financial Statements (continued)

3. Funding Policy

It is the Company's policy to make contributions to the Plan sufficient to comply with the minimum funding standards imposed by the Internal Revenue Code ("IRC"). The Company's contributions shall be determined annually, or more frequently, by the Board of Directors of the Company. Each contribution made to the Plan shall be made on the condition that it is currently deductible under section 404 of the IRC for the taxable year with respect to which the contribution is made. For the Plan periods ended December 31, 2009 and 2008, there is no funding required under the ERISA minimum funding requirements, and the Company elected not to make any contributions to the Plan.

4. Plan Termination

Although it has not expressed an intention to do so, the Company reserves the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Upon termination, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations and the plan document, generally to provide the following benefits in the order indicated:

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).
- c. All other vested benefits (vested benefits not insured by the PBGC).
- d. All nonvested benefits.

Whether all participants receive their benefits should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Fair Value Measurements

In accordance with the authoritative guidance on fair value measurements and disclosures, the Master Trust discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (Level 3 measurements). The guidance establishes three levels of the fair value hierarchy as follows:

Level 1 – Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2 – Level 2 inputs utilize inputs other than quoted prices included in Level 1 that are observable for an asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, and inputs other than quoted prices that are observable for an asset or liability.

Level 3 – Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability.

6. Interest in Idearc Inc. Master Trust (continued)

A financial instrument's level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Committee. The Committee considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Following is a description of the valuation methodologies used for the Master Trust financial assets measured at fair value. There have been no changes in the methodologies used at December 31, 2009 and 2008.

State Street Bank and Trust Company Government Short Term Investment Fund (the STIF): Valued at net asset value based on the fair value of the underlying investments of the trust as determined by the sponsor of such trust.

Long-Term Bonds: The fair value of long-term bonds is based on current quoted market prices for exchange-traded bonds.

Hedge Funds: Hedge fund investments are valued at each fund's reported net asset value.

Interest Rate Swaps: Unrealized gain or loss on swap contracts are calculated by taking the difference between the present value of the estimated future cash flows to be received and paid pursuant to the terms of the swap contracts as of the valuation date. Interest rate swaps are valued by using external pricing sources using quoted inputs on the valuation date, such as specific yield curves and volatility quotes. The Master Trust's investment manager has a counterparty approval process that ensures that all counterparties meet minimum credit ratings. The interest rate swaps are traded under the terms of an International Swaps and Derivatives Association ("ISDA") agreement and accompanying Credit Support Annex, which further provides assurance that the counterparties meet the required credit quality. The Plan's investment manager seeks to minimize any counterparty credit exposure by actively collateralizing the interest rate swap exposure.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. Furthermore, while the Committee believes the Master Trust's valuation methods are appropriate and consistent with those of other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth, by level, the Master Trust assets as of December 31, 2009:

Derivatives

The Master Trust invests in interest rate swaps which are considered derivative instruments. Interest rate swaps held by the Master Trust are utilized as hedges to manage market volatility risk and are intended to minimize fluctuations in the Plan's funding requirements by establishing a fixed income position more efficiently than purchasing or selling a physical security.

6. Interest in Idearc Inc. Master Trust (continued)

At December 31, 2009 and 2008, the Master Trust held 18 and 14 interest rate swap agreements, respectively, with Goldman Sachs International (the counterparty) with a total notional amount of approximately \$281,700,000 and \$260,000,000, respectively. According to the terms of the interest rate swap agreements, cash is exchanged based on the difference between a fixed interest rate and a series of variable interest rates over an agreed period of time. The fixed interest rate is established at the beginning of the transaction, while the variable rates used are based primarily on the London Interbank Offered Rate.

The interest rate swaps in an asset position were \$270,758,729 and \$155,775,353 at December 31, 2009 and 2008, respectively, and interest rate swaps in a liability position were \$281,661,743 and \$70,722,872 at December 31, 2009 and 2008, respectively, resulting in a net liability position of \$10,903,014 at December 31, 2009 and a net asset position of \$85,052,481 at December 31, 2008. The net position is recorded at fair value on the Statements of Net Assets Available for Benefits in Plan interest in Idearc, Inc. Master Trust; with changes in fair values reported in the Statements of Changes in Net Assets Available for Benefits in Net investment gain (loss) from Plan interest in Idearc, Inc. Master Trust. Also see the fair value hierarchy table above as well as the Net Investment Income (Loss) from Master Trust table above.

Futures Contracts

As of December 31, 2009, the Master Trust utilized fixed income exchange traded futures contracts to hedge the Plans' fixed income assets from adverse movements of interest rates, and to augment returns by allowing the stressing of certain areas of maturity when those areas are identified as being unusually high yield or low yield. On behalf of the Master Trust, investment managers enter into various futures contracts to economically hedge investments in domestic securities. These contracts, which are considered derivatives under ASC 815, *Derivatives and Hedging*, are agreements between two parties to buy or sell a security or financial interest at a set price on a future date and are standardized and exchange-traded. Upon entering into such a contract on behalf of the Master Trust the investment manager is required to pledge to the broker an amount of cash or securities equal to the minimum "initial margin" requirements of the exchange on which the contract is traded. Pursuant to the contract, the investment manager agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded on a daily basis by the trustee as a realized gain or loss equal to the difference in the value of the contract between daily closing prices.

Investments Valued Using Net Asset Value

The Plan uses the Net Asset Value (the "NAV") to determine the fair value of all the underlying investments which (a) do not have a readily determinable fair value, and (b) either have the attributes of an investment company or prepare their financial statements consistent with the measurement principles of an investment company.

As of December 31, 2009, the Plan used NAV to value the Master Trust investments in common/collective trusts and hedge funds. The value of these investments at December 31, 2009, was \$60,774,786 and \$280,073,113, respectively. The Master Trust has no unfunded commitments to these investments. Additional information about these investments follows.

STIF: This is an open-ended investment in a fund that invests in a diversified portfolio of U.S. government securities. The investment strategy is to provide safety of principal, daily liquidity, and a competitive yield by industry. There are no redemption restrictions on this investment.

Hedge Funds: These are open-ended investments in various hedge funds with a wide range of investment strategies as described below. Redemption terms range as follows: 1) monthly with 30-120 day notice; 2) quarterly with 30-90 day notice; 3) semi-annually with 60 day notice; 4) annually with 65-180 day notice; and, 5) every three years with 120 day notice. Redemption restrictions range from none up to a three-year lock-in period.

The various hedge fund investing styles that the Plan utilizes are as follows:

Macro: The fund attempts to create a diversified portfolio of option-like asymmetrical risk/reward expressions of their views. The fund will seek to generate returns from broad market moves. The portfolio managers seek to understand the business cycle, policies and investor response, and structural inefficiencies in the financial markets. Some of the macro funds invest in strategies expected to generate relatively high levels of volatility and assume substantial risk, while some of the macro funds emphasize emerging markets, and a minor portion of the portfolio is invested in distressed/event-driven situations.

Equity Long/Short Opportunities: These funds invest in long and short positions in global and domestic markets. Investments may be across multiple industries including: real estate, leisure, chemicals, retail, restaurants, healthcare, autos, utilities, consumer services, and technology/media/telecommunications. Additional investments include banks, commercial services, financial services, home builders, insurance, investment companies, shipping, oil services and energy. The portfolios generally have a mix of low-risk and high-risk positions. The portfolios experience low turnover, and the average hold is generally two to three years. The objective is to achieve capital appreciation while limiting risk.

Multi Strategy: These funds invest in multiple strategies. Their strategies include global credit, global equities, global rates and securitized products, principal strategies, global markets and quantitative strategies, global energy, and reinsurance. Additional strategies include long/short equities, high volatility, corporate bond, merger, closed-end and statistical arbitrage, distressed credit, and direct capital activities. The funds focus on investing in a wide variety of securities, instruments, and other investment opportunities and engaging in a broad array of trading and investment strategies.

Restructuring/Event Driven: These funds invest in distressed and high yield debt and equities. An example is purchasing senior bank debt in the secondary market to provide acquisition financing in middle market leveraged buy-out deals and co-investing in the equity alongside the financial sponsor. The investments may include many industries and across all parts of a company's capital structure. Investments are made in situations from which some investors shy away because of uncertainty or recent negative events, such as companies facing secular change, regulatory uncertainty, litigation, refinancing risk, fraud, and other issues causing negative investor sentiment. Other situations may include financial stress, bankruptcy, restricting, liquidation, and spin off, in both public and private companies.

Notes to Financial Statements (continued)

6. Interest in Idearc Inc. Master Trust (continued)

Other Directional: These funds invest exclusively in debt obligations (primarily secondary debt), which will be held for a relatively long period of time – generally from one to six years. As a result, these holdings are relatively illiquid. Although the majority of the investments are in U.S. debt instruments, there may also be investments elsewhere, in particular in Europe and Asia.

Distressed: The fund's investment strategy focuses on investing in debt and equity of operationally troubled companies and seeks to add value through active operational improvement.

Statistical Arbitrage: These funds trade global equities on a high frequency basis through the use of electronic interfaces with banks. These funds typically have short holding periods ranging from a few weeks to three months. These funds apply mathematical models implemented as automated computer algorithms on a systematic basis, using quantitative analyses to make trading decisions.

7. Tax Status

The Plan has not yet applied for a determination letter from the Internal Revenue Service stating that the Plan is qualified under Section 401(a) of the Code. However, the Plan administrator believes that the Plan has been designed to comply with the requirement of the Code and has indicated that it will take the necessary steps, if any, to bring the Plan's operations into compliance with the Code.

8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statements of net assets available for benefits.

The actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Notes to Financial Statements (continued)

9. Related Party Transactions

Certain of the Plan's assets in the Master Trust are invested in funds managed by the trustee of the Plan. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

10. Reconciliation of Financial Statements to the Form 5500

The following is a reconciliation of net assets available for benefits per the financial statements to the Form 5500:

11. Commitments and Contingencies

On November 25, 2009, three former Bell retirees brought a class action in the U.S. District Court for the Northern District of Texas, Dallas Division, against both the Verizon benefits committee and the Plan's benefits committee. All three named plaintiffs are receiving the single life monthly annuity pension benefits. All complain that Verizon transferred them against their will from the Verizon pension plans to the Company pension plans at or near the spin-off. The complaint alleges that both the Verizon and Company defendants failed to provide requested plan documents, which would entitle the plaintiffs to statutory penalties under ERISA that both the Verizon and the Company defendants breached their fiduciary duty for refusal to disclose pension plan information; and other class action counts aimed directly at the Verizon defendants. The plaintiffs seek class action status, statutory penalties, damages and a reversal of the employee transfers. The Company has waived issuance of citation and filed its motion to dismiss the entire complaint on March 10, 2010. The briefing on the motion is complete and the Company awaits the order of the Court. The Company plans to honor its indemnification obligations and vigorously defend the lawsuit on the defendants' behalf.

12. Subsequent Events

Effective January 1, 2010, the Plan was renamed the SuperMedia Pension Plan for Collectively Bargained Employees and the Master Trust was renamed the SuperMedia Inc. Master Trust.

Description of Weighted Average Retirement Age Calculation

The rates of retirement at each age depend on the following factors:

- age
- gender
- service

The detailed description of the exact rates that apply at each age for each of the various categories is contained in the attachment to Part V.

In calculating the weighted average retirement age, the weight applied to each age is (a)/(b), where (a) and (b) are defined as follows:

(a) the number of participants expected to retire at the retirement age to which the weight is being applied. The number of participants expected to retire is estimated by applying the assumed retirement decrement rates to the current active population at that age.

(b) the total number of participants expected to retire. The number of participants expected to retire is estimated by applying the assumed retirement decrement rates to the current active population.

Summary of actuarial assumptions

Economic assumptions	2009	2008
Effective interest rate	6.85%	6.31%
Funding target interest rate basis	Exhibit E	Exhibit F
PBGC 1st segment rate (years 0 to 4)	6.72%	4.93%
PBGC 2nd segment rate (years 5 to 19)	7.12%	6.13%
PBGC 3rd segment rate (years 20 and after)	6.36%	6.69%
FAS 87 discount rate as of beginning of year	6.75%	6.25%
FAS 87 expected long-term rate of return on assets	7.50%	8.00%
Consumer price index	3.00%	3.00%

All of the interest rates above are compounded annually.

Salary scale

North and South Associates	4.00%	4.00%
Enterprise		
Ages less than 40	7.00%	7.00%
Ages 40-49	5.00%	5.00%
Ages 50 and over	4.00%	4.00%

Lump sum interest rates (Funding calculations)

The interest rate to convert annuities into lump sums:

GATT interest rate	4.75%	4.75%
PBGC interest rate	3.25%	3.25%

The interest rate to convert cash balances into annuities

Cash balance interest credit rate	4.75%	4.75%
	3.75%	3.75%

Lump sum interest rates (FAS 87 Expense calculations)

The interest rate to convert annuities into lump sums:

GATT interest rate	5.50%	5.00%
PBGC interest rate	4.00%	3.50%

The interest rate to convert cash balances into annuities

Cash balance interest credit rate	5.50%	5.00%
	4.50%	4.00%

Future pension band increases (FAS 87 expense calculations)

We assume a 1.5% annual increase for the North and South Associates after the expiration of the current contract.

Summary of actuarial assumptions

Demographic assumptions

Retirement

The retirement decrement assumptions for active participants are summarized in Exhibit A1 for Enterprise, Exhibit A2 for North Associates and Exhibit A3 for South Associates. The weighted average retirement age is 62, using the methodology described in Exhibit G. All deferred vested participants are assumed to retire at age 65.

Withdrawal

The withdrawal decrement assumptions are summarized in Exhibit B1 for Enterprise, Exhibit B2 for North Associates and Exhibit B3 for South Associates.

Disability

The disability decrement assumptions are summarized in Exhibit C1 for Enterprise, Exhibit C2 for North Associates, and Exhibit C3 for South Associates.

Mortality

For FAS 87, for non-disabled participants the mortality table is the RP-2000 Combined Healthy Mortality Table and for disabled participants the mortality table is the RP-2000 Mortality Table for Disabled Lives. For ERISA, the mortality table, in accordance with Treasury regulations 1.430(h)(3), is the prescribed 2009 static mortality table, with separate rates for annuitants and non-annuitants. For Lump Sum conversion, the mortality table used is the table defined in the plan document.

Timing

Decrement assumptions are assumed to apply as of the middle of the year.

Marital status

Husbands are assumed to be 3 years older than wives.

Summary of actuarial assumptions

Other assumptions

Form of payment

For Enterprise participants the form of payment for 70% of future retirees is assumed to be a lump sum, while the remaining 30% are assumed to take an annuity.

For North Associate and South Associates:

Through December 31, 2013, for the North Associates and until the expiration of the South Associates' contract, the form of payment is assumed to be lump sum for 70% of future retirees and annuity for the remaining 30%. Afterwards, 100% of future retirees are assumed to take an annuity.

For male participants, 60% percent of annuities are assumed to be taken as 50% joint and survivor annuities with a pop-up feature, and 40% of annuities are assumed to be taken as single life annuities. For female participants, 10% percent of annuities are assumed to be taken as 50% joint and survivor annuities with a pop-up feature, and 90% of annuities are assumed to be taken as single life annuities.

Administrative expenses

The FAS 87 expected return on assets have been reduced by .25% to reflect administrative expenses paid from the trust.

The Funding Target Normal Cost includes a load for estimated administrative expenses equal to 0.30% of assets as of valuation date.

Sickness Death Benefit

The percentage of active and retired participants who have beneficiaries that qualify for this benefit is summarized in Exhibit D1 for Enterprise, Exhibit D2 for North Associates and Exhibit D3 for South Associates.

Supplemental Earnings

North: assumed to be 4% of base earnings.

South: assumed to be 3% of base earnings.

Valuation earnings

The valuation earnings for Enterprise participants and North Associates use annualized base pay as of valuation date plus prior year actual pay for other components of compensation.

Maximum earnings

The maximum compensation limit under IRC section 401(a)(17) is \$245,000 for 2009. For calculating FAS 87 pension cost, the maximum compensation limit is assumed to increase 3.00% per year, compounded annually.

Maximum benefit

The maximum benefit payable under IRC section 415 at normal retirement age is \$195,000 for 2009. For calculating FAS 87 pension cost, the maximum benefit payable is assumed to increase 3.00% per year, compounded annually.

Social security wage base

The 2009 taxable wage base of \$106,800 is assumed to increase 3.50% per year, compounded annually.

Summary of actuarial assumptions

Changes from prior year

Mortality

The mortality table for ERISA changed from the prescribed 2008 static mortality table, with separate rates for annuitants and non-annuitants for 2008, to the prescribed 2009 static mortality table, with separate rates for annuitants and non-annuitants for 2009.

Administrative Expense

The Funding Target Normal Cost included an administrative expense assumption as required by the Worker, Retiree, and Employer Recovery Act of 2008 (WRERA). No expected expenses were previously included in the Funding Target Normal Cost. Expected administrative expenses for 2009 are assumed to equal 0.30% of assets as of the valuation date.

FAS 87 Discount rate

The discount rate for FAS 87 pension cost valuation changed from 6.25% for 2008 to 6.75% for 2009.

FAS 87 Expected long term rate of return on assets

The expected long term rate of return on assets for FAS 87 changed from 8.00% for 2008 to 7.50% for 2009.

Lump sum interest rate and cash balance interest credit rate

The lump sum interest rate and cash balance interest credit rate increased by 0.50% for the FAS 87 pension cost.

FAS 35 Interest rate

The FAS 35 interest rate changed from 8.00% for 2008 to 7.00% for 2009.

Summary of actuarial assumptions

Actuarial methods

Valuation date

The valuation date is January 1.

Calculation of normal costs and liabilities

The method used to calculate the service cost and projected benefit obligation for determining pension expense is the projected unit credit cost method.

Under this method, benefits are estimated at each decrement age by crediting future accruals based on projected pay. The liability is calculated by prorating the present value of the projected benefit by service at the valuation date over benefit service projected to the date of decrement.

The service cost is the amount of the present value of projected benefits attributable to the valuation year.

The method used to calculate the ERISA target normal cost and funding target, PBGC premium funding target and FAS 35 liabilities is the unit credit cost method.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA or FAS 35 assumptions is the ERISA funding target or FAS 35 actuarial present value of accumulated plan benefits. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, including the PBGC premium funding target, benefits at each decrement age are determined in the same manner, but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, the following ancillary benefits have not been treated as vested: subsidized disability benefits not in payment status and sickness death benefits.

Actuarial value of assets

The actuarial value of assets is used to calculate contribution requirements under ERISA and is equal to the market value of assets.

Changes from prior year

There were no changes in actuarial methods from January 1, 2008, to January 1, 2009.

Expenses

All reasonable expenses of administering the Plan shall be paid out of the assets of the Pension Fund, except to the extent paid by the Company.

Participation

North Associates and South Associates: Any non-salaried employee of a participating company is eligible to become a participant upon the later of:

- (1) Attainment of age 21,
- (2) Completion of 1,000 hours of service during a 12-month period beginning on the employee's date of hire, the anniversary of the employee's date of hire, or the calendar year.

North Associates may not enter the plan after December 31, 2007.

Enterprise: Eligible employees become participants immediately upon hire.

Definitions

Transition Employee (Enterprise)

An employee with 10 or more years of service as of January 1, 2002.

Cash Balance Account (Enterprise)

Equal to the sum of opening account balance, if applicable, plus pay and interest credits.

Pay Credits (Enterprise)

Cash balance accounts are credited monthly by an amount equal to a percentage of monthly compensation based on points (age plus service) at the beginning of each year as follows:

Points	Pay Credit Percentage
Less than 35	4%
35-49	5%
50-64	6%
65 or more	7%

Interest Credits (Enterprise)

Up to the benefit commencement date, interest is credited based on the average annual yield on one-year Treasury bills plus one percentage point with the total limited to the yield on 30-year Treasury bonds.

Pension Benefit Formulas (Enterprise)

Post-2001 Modified Former Plan Formula (MFPF) -- Sum of:

- (a) MFPF accrued benefit as of 12/31/2001 (see Special Benefit Provisions).
- (b) 1.35% of Average Compensation times service from 1/1/2002 to 12/31/2007.
- (c) 1.35% of career average pay for service after 12/31/2007.

Idearc Pension Plan for Collectively-Bargained Employees
EIN / PN: 20-5095175 / 002
Schedule SB, Part V – Summary of Plan Provisions

Transition Employee, 1.35% of Average Compensation (to 12/31/2007) times service to 12/31/2007, plus 1.35% of career average pay for service after 12/31/2007.

Non-Transition Employee: 1.35% of Average Compensation (to 5/31/2004) times service to 5/31/2004.

Integrated Formula –

Transition Employee, sum of:

(a) 1.15% of Average Compensation (to 5/31/2004) up to Social Security Integration Level plus 1.45% of Average Compensation (to 5/31/2004) over the Social Security Integration Level times service to 5/31/2004.

(b) 1.35% of Average Compensation (to 12/31/2007) times service from 6/1/2004 to 12/31/2007.

(c) 1.35% of career average pay for service after 12/31/2007.

Non-Transition Employee:

1.15% of Average Compensation (to 5/31/2004) up to Social Security Integration Level plus

1.45% of Average Compensation (to 5/31/2004) over the Social Security Integration Level times service to 5/31/2004.

Social Security Integration Level (Enterprise)

Average annual wages under the Social Security Act for a worker attaining age 65, computed as though the annual wages were equal to the maximum amount of the taxable wages under the Social Security Act based on the calendar year an employee separates from employment.

Compensation (Enterprise)

Base pay (highest rate for the month), sales bonuses and commissions, short term performance incentives (excluding Senior Managers), lump sum merit payments, foreign service payments, premiums, corporate profit sharing, differentials and back pay awards. Salary reduction amounts under IRC Section 125 or 401(k) are included. Qualified plan compensation is limited to \$245,000 for 2009.

Compensation (North)

Base pay plus earned and unearned commission. Qualified plan compensation is limited to \$245,000 for 2009.

Average Compensation (Enterprise)

The average of Compensation over the sixty (60) consecutive calendar months during which the average is the highest.

Average Compensation (North)

The average of Compensation for the highest 4 out of the last 7 calendar years.

Supplemental Payments (North and South)

Differentials and other special payments. These supplemental payments include special city allowances, in charge allowances, extra payments for temporary assignments or temporary promotions to higher graded or supervisor positions, job differentials, and evening and night differential payments. Supplemental payments also include the 3% of pay lump sum paid in October 2003.

Annual Average Supplemental Payments (North and South)

The average of the sum of all Supplemental Payments received in the three years immediately preceding retirement for all South participants and for North participants with 5 or more years of service as of January 1, 2009. For North participants with less than 5 years of service as of January 1, 2009, the average of all Supplemental Payments received in the three years immediately preceding December 31, 2007.

Credited Service (North and South)

All eligible years and months of employment accrued to the earlier of actual retirement or separation from service. However, credited service for North participants with less than 5 years of service as of January 1, 2009 ceased to accrue as of December 31, 2007.

Preretirement death benefit

Eligible

Death of vested participants who die before payments commence.

Death benefit

North and South participants without Service on and After August 6, 2000

North: Upon the death of a deferred vested participant who did not waive the preretirement survivor's benefit, the participant's spouse will be eligible for a benefit equal to 50% of the participant's accrued benefit deferred to the later of the earliest age when the deferred vested pension would have been payable and the current age. This benefit is reduced for early commencement and the cost of a 50% survivor annuity.

South: Upon the death of an active employee not eligible for immediate retirement and with less than 15 years of service, or a vested former employee who terminated employment after 1975, 44% of the accrued benefit payable at the time the participant would have attained age 65. If earlier commencement is elected, benefit is the amount that would have been payable to the spouse if participant terminated employment, survived to the commencement date, retired with a 50% Joint and Survivor Annuity, and then died.

North and South participants with Service on and After August 6, 2000

North: Active Employees – Upon the death of an active participant, the participant's spouse or named beneficiary will be eligible for a benefit equal to 65% of the participant's accrued benefit payable immediately. This benefit is further reduced for the cost of a 65% survivor annuity. (A 50% survivor annuity is provided for non-spouse beneficiaries more than 25 years younger than the participant.)

North: Deferred Vested Employees – Upon the death of a deferred vested participant who did not waive the preretirement survivor's benefit, the participant's spouse or named beneficiary will be eligible for a benefit equal to 65% of the participant's accrued benefit deferred to the later of the earliest age when the deferred vested pension would have been payable and the current age. This benefit is reduced for early commencement and the cost of a 65% survivor annuity. (As above, a 50% survivor benefit is provided for non-spouse beneficiaries more than 25 years younger than the participant.)

South: Active Employees Eligible for Early or Normal Retirement or with 15 or More Years of Service – the participant's spouse or named beneficiary will be eligible for a benefit equal to 65% of the participant's accrued benefit payable immediately. This benefit is further reduced for the cost of a 65% survivor annuity. (A 50% survivor annuity is provided for non-spouse beneficiaries more than 25 years younger than the participant.)

Active Employees Not Eligible for Early for Normal Retirement or with Fewer than 15 Years of Service – the participant's spouse or named beneficiary will be eligible for a benefit equal to 65% of the participant's accrued benefit deferred to the later of the earliest age when the deferred vested pension would have been payable and the current age. This benefit is reduced for early commencement and the cost of a 65% survivor annuity. (As above, a 50% survivor benefit is provided for non-spouse beneficiaries more than 25 years younger than the participant.)

Enterprise: If the deceased participant was an active employee or a vested former participant who terminated after the plan's effective date, the death benefit is the greater of the full value of the Cash Balance Account or a 50% survivor benefit under alternative formulas.

EIN / PN: 20-5095175 / 002
Schedule SB, Part V – Summary of Plan Provisions

Sickness death benefit

North: Employee's mandatory beneficiary receives a benefit equal to one year's pay based on pay on the earlier of the employee's retirement date and December 31, 1986.

South: One year's pay based on pay on the earlier of the employee's death or retirement, subject to a maximum of \$39,000. Participant must have been eligible as of 8/9/1986.

Enterprise: Mandatory beneficiaries of all active and retired employees hired before April 1, 1991 and retired before January 1, 2002 are eligible if death occurs from an illness or an off-the-job accident. Participants who received a 100% cash-out in 1993, 1994, or 1995 and make an election to receive this benefit from another source are excluded. Benefit equals one year's pay based on pay on the earlier of the employee's retirement date and December 31, 1991.

Forms of payment

Normal form

Single participants: Life Annuity.

Married participants: 50% Joint-and-Survivor Annuity with the spouse as the survivor.

Optional forms

North: 50%, 75%, and 100% joint and survivor annuities, and 5-year and 10-year certain and life annuities. The cost of the survivor annuity depends on the difference between the employee's and beneficiary's ages. The cost of the survivor annuity is restored to the employee's pension if the beneficiary predeceases the employee. Benefit amounts are reduced 2% for the cost of the 5-year certain and life annuity and 6.5% for the 10-year certain and life annuity.

South: 50% joint and survivor annuity, reduced 10% (reduced 12% for vested former participants and 15% for vested former participants terminated prior to December 27, 1992), 60% joint and survivor annuity, reduced 12%, or 70% joint and survivor annuity, reduced 14%. The reduction is restored to the employee's pension if the beneficiary predeceases the employee.

North and South: Vested participants and retirees terminating employment during the period November 1, 2004 through December 31, 2008 can elect to receive 100% of the benefit in the form of a lump sum. During 2008 this form of benefit was extended until 2009 for South Associates and until 2013 for North Associates.

North and South: For any form of payment with a beneficiary, with a spouse's consent, a parent, grandparent, brother, sister, or an unmarried child may be an eligible beneficiary provided they are dependent upon the employee for support.

Enterprise:

Lump-sum cash out.

Combination annuity and lump-sum cash out. Designated amount in 10% increments (up to 50%) paid as a lump-sum cash out and the remaining portion distributed in any of normal or optional payment forms.

33-1/3%, 50%, 66-2/3% or 100% Joint-and-Survivor with designated beneficiary as the survivor.

50%, 75% or 100% Joint-and-Survivor with designated beneficiary as survivor with monthly payments restored to the life annuity level if the beneficiary predeceases the participant (pop-up).

Special benefit provisions

Modified Former Plan Formula (MFPP) Minimum (Enterprise)

Eligibility: fBA Employees with 15 years of service on 9/1/1999.

Modified Former Pension Formula: 1.6% of career average pay (for service prior to 1/1/1991, the average pay from 1/1/1987 to 12/31/1991 times service through 12/31/1991 is used).

Retirement Eligibility: Age 65 with 10 years of service, age 60 with 15 years of service, age 55 with 20 years of service, age 50 with 25 years of service, or at 30 years of service.

Early Retirement Reductions with 30 or More Years of Service: No reductions on benefit earned through 12/31/1995; 3% per year reductions from age 59 (pre-2002) or age 60 (2002 and after) on the benefit earned after 12/31/1995.

Early Retirement Reductions with Less Than 30 Years of Service: 6% per year from age 59 (pre-2002) or from age 60 (2002 and after).

Summary of Plan Changes

Benefit accruals ceased as of December 31, 2007 for North participants with less than 5 years of service as of January 1, 2009. The retirement benefit formula for Commission Paid Employees (CWA 1301) with 5 or more years of service as of January 1, 2009 changed to equal 1.3% of Average Compensation times Credited Service, but not less than the benefit earned as of December 31, 2007 with the prior formula.

The period of time for which the lump sum form of payment is available for North participants has been extended to December 31, 2013 and for South participants has been extended until expiration of contract in 2009.
