Change in Assumptions and Methods Since Prior Valuation

Contributions

The full corporate bond yield curve used to calculate the funding target and target normal cost was updated from January 2008 to January 2009.

The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.

Assumed plan-related expenses of \$20,000 were added to the target normal cost.

The termination and retirement rates were updated to reflect actual experience.

Data Sources

Towers Perrin used asset data supplied by the trustee. Flint Hills Resources furnished participant data as of the valuation date. Flint Hills Resources also provided the dates and amounts of the 2008 contributions that will be paid in 2009, the postretirement benefit asset, postretirement benefit liability and amounts recognized in accumulated other comprehensive income as of December 31, 2008. Data were reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Perrin actuaries when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
