Surviving Spouse Benefit	It is assumed that 80% of males and 80% of females have an eligible spouse, and that males are three years older than their spouses.
Benefit Limits	Projected benefits are limited by the current IRC section 415 maximum benefit of $195,000.

Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Trust Expenses Included in Target Normal Cost	$183,288. The expenses included in the target normal cost reflect the prior year's administrative and investment expenses.

Changes in Plan Provisions from Prior Year

The January 1, 2009 funding valuation reflects the following plan change:

- An increase in the annual maximum benefit limit under IRC Section 415 from $185,000 in 2008 to $195,000 in 2009.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

- The target liability was calculated using the full yield curve based on corporate bonds rates for October. As such, "2" was entered on line 21b as the applicable lookback month.

- Line 11a(b) does not match the amount reported on line 38 of the 2008 SB, because the amount reported on line 38 did not reflect the modified determination of excess contributions provided in final regulations 1.430(f)-1(b)(1)(ii)(B).

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following changes:

- The mortality assumption changed from the 2008 Static Mortality Table for Annuitants and Non-Annuitants Per §1.430(h)(3)-1(e) to the 2009 Static Mortality Table for Annuitants and Non-Annuitants Per §1.430(h)(3)-1(e).

- A change in the age at which current and future terminated vested participants are assumed to retire from age 65 to 62.

These changes were made to better reflect the anticipated plan experience. None of these assumption changes reduced the funding shortfall, as such approval of the Commissioner is not required.

Schedule SB, line 25—Change in Funding Method

The funding valuation reflects the following method changes:

- A change in the asset valuation method from an average value method to the two year smoothed value method as of January 1, 2009.
- A change in the interest rate basis from segment rates to the full yield curve with a two month lookback (October 2008 yield curve).
- An addition to the Target Normal Cost of assumed expenses payable from the trust, as required by WRERA.

These changes have automatic approval under final regulations, Notice 2009-22 or other IRS guidance.

NOTE A - DESCRIPTION OF PLAN

The following is a brief description of the Jim Beam Brands Co. Pension Plan for Hourly-Paid Union Employees (the "Plan"). Participants should refer to the Plan document for a more complete description of the Plan's provisions, which is available from the Plan administrator at 510 Lake Cook Road, Deerfield, Illinois, 60015.

General

The Plan is a non-contributory defined benefit plan for the hourly-paid union employees of Jim Beam Brands Co. (the "Company") who are represented for purposes of collective bargaining by United Food and Commercial Workers' International Union, CLC, Local III-D. The Company is a wholly-owned subsidiary of Beam Global Spirits & Wines, Inc., which is a wholly-owned subsidiary of Fortune Brands, Inc. ("Fortune").The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended.

Effective January 1, 2007, the Plan was closed to new entrants with no reduction in benefits.

Pension Benefits

Employees become fully vested after five years of vesting service. Participants are eligible for monthly pension benefit payments beginning at the normal retirement age (the later of age 65 or after five years of vesting service in the Plan if their employment is terminated with all Fortune entities). Benefits are calculated according to an integrated benefit formula based upon total years and months of credited service multiplied by an applicable benefit rate in effect at the time of termination.

The normal form of pension benefit for a participant with no eligible spouse is an annuity payable for the participant's lifetime only. The normal form of pension benefit for a participant with an eligible spouse is an annuity payable at an actuarially reduced amount for the participant's lifetime and, thereafter, at a specific percentage of such amount for the eligible spouse's lifetime.

A participant may elect to modify the normal form of pension benefit by exercising one of several options, including a single-life annuity, various joint and survivor annuities or various period-certain annuity options. Reduced benefits are payable upon early retirement after attaining age 56 with a minimum of ten years of vesting service.

The Plan also provides for disability and deferred pension benefits. A participant is considered disabled as long as he or she meets the definition of totally and permanently disabled in the plan.

NOTE A - DESCRIPTION OF PLAN - Continued

Pension Benefits - Continued

A participant is eligible for a deferred vested pension if his or her employment is terminated with the Company before death or retirement after completing at least five years of vesting service.

Contributions

The Company contributes such amounts as are necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to Plan participants. The minimum funding requirements of ERISA were satisfied in 2009 and 2008.

Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan's provisions to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, participants will become fully vested in their accrued benefits, and the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations. In addition, the Pension Benefit Guaranty Corporation ("PBGC") insures certain benefits for beneficiaries and vested participants under the Plan if the Plan terminates.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency of the Plan's net assets at the termination date to provide these benefits and may also depend on the financial condition of the Plan Sponsor and on the level of benefits guaranteed by the PBGC.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Adoption of New Accounting Standard

Effective January 1, 2008, the Plan adopted accounting guidance issued by the Financial Accounting Standards Board ("FASB") that established a single authoritative definition of fair value, set a framework for measuring fair value, and required additional disclosures about fair value measurements. In accordance with the guidance, the Plan classifies its investments into Level 1, which refers to securities valued using quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The three levels of the fair value hierarchy are as follows:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including:

1. Quoted prices for similar assets or liabilities in active markets.
2. Quoted prices for identical or similar assets or liabilities in inactive markets.
3. Inputs other than quoted prices that are observable for the assets or liabilities (including volatilities).
4. Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 inputs are unobservable for the asset or liability (including the entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability) and significant to the fair value measurement.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Adoption of New Accounting Standard - Continued

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

In 2009, the FASB issued updates to the initial fair value measurements and disclosures guidance that covered determining fair value when the volume and level of activity for the asset or liability have significantly decreased and identifying transactions that are not orderly. Such guidance expanded disclosures and required that major categories for debt and equity securities in the fair value hierarchy table to be determined on the basis of the nature and risks of the investments.

In September 2009, the FASB amended the fair value measurements and disclosures for investments in certain entities that calculate net asset per share (or its equivalent). The amendment is effective for the first reporting period ending after December 15, 2009 and expands the required disclosures for certain investments with a reported net asset value (NAV). The Plan has adopted both changes to the fair value measurements and disclosures guidance on a prospective basis for the year ended December 31, 2009. Adoption did not have a material impact on the fair value determination and disclosure of applicable investments. The effect of the adoption had no impact on the statements of net assets available for benefits and statements of changes in net assets available for benefits.

In January 2010, the FASB amended the fair value measurements and disclosures by adding new disclosure requirements for Levels 1 and 2, separate disclosures of purchases, sales, issuances, and settlements relating to Level 3 measurements and clarification of existing fair value disclosures. This amendment is effective for periods beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010. The Plan is currently evaluating the impact this amendment will have on the financial statements.

In July 2009, the FASB established the FASB Accounting Standards Codification (ASC) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. The ASC supersedes all existing accounting and reporting standards and is not intended to change GAAP. The use of the ASC was effective for financial statements issued for periods ending after September 15, 2009.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated Plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation

The assets of the Plan are included in a pool of investments known as the Fortune Brands Home & Hardware, Inc. Retirement Plans Trust (the "Master Trust") along with ten other pension plans for various employee groups of Fortune and subsidiaries. The Plan's investment in the Master Trust is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust.

Plan management uses the following methods and significant assumptions to estimate fair value of investments in the Master Trust. There have been no changes in the methodologies used at December 31, 2009 and 2008.

The investments held by the Master Trust are valued as follows:

Government obligations, Corporate bonds, and Preferred stocks: Valued at the closing price reported on the private market on which the security is traded.

Common stocks and Other: Valued at the closing price reported on the active market on which the security is traded.

Collective funds: Valued at the net asset value ("NAV") provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The NAV's unit price is quoted on a private market and the underlying assets owned by the fund are generally trading on active markets.

Interest in unitized pooled account – common stock: Valued at the price per unit multiplied by the number of units held by the Plan. The price per unit is determined based on the pooled account's assets at fair value which includes common stocks that are publicly traded on an active market.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Investment Valuation - Continued

Group annuity contract: Valued at contract value, which approximates fair value, representing contributions and investment return as determined in accordance with the contract, less funds used to pay benefits and administrative expenses charged.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in different fair value measurement at the reporting date.

See Note D - Investment in Master Trust for the Master Trust's investments by level within the fair value hierarchy as of December 31, 2009 and 2008.

Purchases and sales of securities by the Master Trust are reflected on a trade-date basis. Gain or loss on sales of securities is based on average cost. Dividend income is recorded on the ex-dividend date. Interest and other income are recorded as earned on an accrual basis.

In accordance with the policy of stating investments at fair value, the Plan's portion of net appreciation/(depreciation) in the fair value of the investments in the Master Trust consists of realized gains and losses and unrealized appreciation/(depreciation) on those investments. The net appreciation/(depreciation) of the Master Trust, along with interest, dividend and other income, net of Master Trust expenses are presented in the accompanying statements of changes in net assets available for benefits as net investment income (loss) from Fortune Brands Home & Hardware, Inc. Retirement Plans Trust.

Payment of Benefits

Benefit payments to participants are recorded when paid.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

Administrative Expenses

The Plan provides for payment of certain administrative expenses from Plan assets. Expenses paid to the Trustee and the investment managers are allocated to the Plan either based on the direction of the Plan administrator or based on the ratio of the Plan's assets to the fair value of all assets held in the Master Trust and are presented in the accompanying statements of changes in net assets available for benefits as net investment income (loss) from Fortune Brands Home & Hardware, Inc. Retirement Plans Trust. Expenses paid to the PBGC, the actuary and other various Plan-related expenses that may be incurred are allocated specifically to each plan and are presented in the accompanying statements of changes in net assets available for benefits as administrative expenses.

NOTE C - TAX STATUS

The Plan obtained its latest determination letter on December 1, 2008, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (the "IRC"). The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is currently designed and being operated in compliance, in all material respects, with the applicable requirements of the IRC.

NOTE D - INVESTMENT IN MASTER TRUST

The Master Trust investments are stated at fair value as reported by The Northern Trust Company (the "Trustee"). The ratio of the Plan's assets to the fair value of all assets held in the Master Trust is used to allocate interest income, dividend income, other income, realized gains (losses) and unrealized appreciation (depreciation) in the market value of investments and certain investment management fees on a monthly basis. Other changes in net assets available for Plan benefits are directly attributable to the Plan and are, therefore, not subject to allocation.

NOTE D - INVESTMENT IN MASTER TRUST - Continued

NOTE D - INVESTMENT IN MASTER TRUST - Continued

The investments of the Master Trust were maintained under a trust agreement with the Trustee during the years ended December 31, 2009 and 2008. The Trustee has supplied and certified as to the completeness and accuracy of the information included in these financial statements with respect to the investments and all amounts relating to investment activity as of and for the years ended December 31, 2009 and 2008, and, accordingly, this information was not subject to audit.

The Master Trust invests in derivative financial instruments, primarily futures contracts, which are used for hedging purposes. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. When the contract is closed, the Plan records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed. Risks arise from the possible inability of counterparties to meet the terms of their contracts. As of December 31, 2009, open treasury futures positions represent less than 1% of total investments and have aggregate notional principal amounts of approximately $30.9 million (122 contracts outstanding). As of December 31, 2008, open treasury futures positions represent less than 1% of total investments and have aggregate notional principal amounts of approximately $7.5 million (54 contracts outstanding). The related realized and unrealized gains and losses on these futures have been recognized in the Master Trust net investment income (loss).

Securities Lending

The Master Trust participates in the Northern Trust Security Lending Program for its U.S. securities held in custody at the Trustee. These securities are lent to certain unrelated third-party brokers in exchange for collateral usually in the form of cash. Collateralization levels are equal to a percentage of the market value of the borrowed securities.

For U.S. securities, initial collateral shall not be less than 102% and, for non-U.S. securities, initial collateral shall not be less than 105%. Cash collateral received is invested in a segregated account managed by the Trustee, which consists of high-quality, short-term fixed income investments.

NOTE D - INVESTMENT IN MASTER TRUST - Continued

Securities Lending - Continued

In accordance with FASB accounting guidance the statement of net assets of the Master Trust reflects, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. Cash collateral held related to loaned securities amounted to $17,682,163 and $10,316,826 at December 31, 2009 and 2008, respectively. The Master Trust held no non-cash collateral (including U.S. Treasury bonds) related to loaned securities at December 31, 2009 and 2008, respectively. Investment income from securities lending was $36,701 and $68,243 in 2009 and 2008, respectively, and is included in interest in the net investment income (loss) of the Master Trust.

NOTE F - ACCUMULATED PLAN BENEFITS

Accumulated Plan benefits are those future periodic payments that are attributable under the Plan's provisions to service employees have rendered. The actuarial present value of accumulated Plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Accumulated Plan benefits as of December 31, 2008, are as follows:

Actuarial present value of accumulated Plan benefits	
Vested benefits	
Participants currently receiving payments	$15,019,182
Other participants	10,413,142
Total vested benefits	25,432,324
Non-vested benefits	556,059
Total actuarial present value of accumulated Plan benefits	$25,988,383

Changes in the present value of accumulated Plan benefits for the year ended December 31, 2008, were as follows:

Present value of accumulated Plan benefits, December 31, 2007	$25,182,447
Increase (decrease) during the year attributable to	
Interest accumulation	2,006,115
Benefits paid	(1,766,806)
Changes in actuarial assumptions	269,729
Other changes	296,898
Present value of accumulated Plan benefits, December 31, 2008	$25,988,383

The mortality assumption for healthy and disabled lives changed from the 2008 Static Mortality Table for Annuitants and Non-Annuitants per §1.430(h)(3)-1(e) to the 2009 Static Mortality Table for Annuitants and Non-Annuitants per §1.430(h)(3)-1(e).

NOTE F - ACCUMULATED PLAN BENEFITS - Continued

The age at which current and future terminated vested participants are assumed to retire changed from age 65 to 62.

The legislated section 401(a)(17) recognizable pay limit increased from $225,000 for 2007 to $230,000 for 2008; and the legislated section 415 dollar limit for defined benefit plans increased from $180,000 for 2007 to $185,000 for 2008.

The significant actuarial assumptions used in the valuations as of December 31, 2008, were as follows:

Life expectancy of the participants	2009 Static Mortality Table for Annuitants and Non-Annuitants per §1.430(h)(3)-1(e) for healthy and disabled lives
Retirement age assumptions	The age at which current active employees are assumed to retire varies between ages 56 and 65. All employees age 65 are assumed to retire.
Discount rate	8.25%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

NOTE G - RISKS AND UNCERTAINTIES

The Plan holds a beneficial interest in the Master Trust. The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

NOTE G - RISKS AND UNCERTAINTIES - Continued

Plan contributions are made and the actuarial present value of accumulated Plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE H - RELATED-PARTY TRANSACTIONS

Certain Plan investments are collective trusts managed by The Northern Trust Company. The Northern Trust Company is the Trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions during the years ended December 31, 2009 and 2008.

Management of the Plan has evaluated subsequent events from December 31, 2009 through October 14, 2010, the date these financial statements were available to be issued. There were no subsequent events that require recognition or additional disclosure in these financial statements.
