Blue Circle Aggregates Union Hourly Pension Plan

PN 002
Attachment to 2009 Schedule SB Part V – Statement of Actuarial Assumptions/Methods

Methods

Contributions:

— Valuation date	First day of plan year
— Funding target	Present value of accrued benefit
— Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year
— Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of fair value, including contributions receivable. The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Valued

All benefits described in the Plan Provisions of this report were valued except plant shutdown and other "unpredictable contingent event benefits" which are not valued until and unless the triggering event occurs. Towers Watson is not aware of any significant benefits required to be valued that were not.

EIN 58-1841729
PN 002
Attachment to 2009 Schedule SB Part V – Statement of Actuarial Assumptions/Methods

Change in Assumptions & Methods

The funding interest rate changed from IRS prescribed segment rates without 3-year transition based on bond yields through the December preceding the valuation date to the IRS prescribed one-month average yield-curve based on bond yields during the October preceding the valuation date.

The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.

An assumption for administrative expenses was included as part of the target normal cost, as required by The Worker, Retiree and Employer Recovery Act of 2008.

There was a change in the method for calculating the actuarial value of assets. The prior valuation used the market value of assets (including contributions receivable).

Data Sources

Towers Watson used asset data and retiree data supplied by the trustees. Lafarge North America Inc. furnished other participant data and the dates and amounts of the contributions that were paid in 2009. Data were reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Watson actuaries when data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Aspect of the Valuation	Old	New
Administrative Expenses	Not included in Normal Cost	Included in Normal Cost
Actuarial Value of Assets	Market Value	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
